1. The Southern Masmûda of the plain lived to the north of the Great Atlas. The chief tribes were the Dukkala; the Banû Mâgîr (around Safi); the Gümûrâ; the Raqrâga and the Hâha (to the south of the lower course of the Tansift). The chief town in this region was Safi [see asfî], for the town of Amazmûr [q.v.] and the ribût of Tî [q.v.] were in the enclave of Şanâhdja; beside the port of Safi, we must also mention that of Kûz (the Aqoz of the Portuguese) at the mouth of the Tansift, which gave Aghmât access to the sea and had a ribût, and that of Aqamûl (the Mogador of the Portuguese) which served the district of Şus. Besides these three centres, there were, as in Tâmasnà, a large number of fortified little towns (karya) many of which survived down to the 10th/16th century; the Portuguese chroniclers, Leo Africanus and Marmol have preserved for us many names of these places which have now disappeared, their very memory being lost; the local hagiographic collections, and notably the Kibîj al-Targahawûf of al-Taldîlî (7th/13th century), have preserved a good deal of valuable historical and ethnographic data on this subject. At the present day, all the country to the north of this region is arabicised and if the old Berber element has not com-
pletely disappeared, it is at least overwhelmed by Arabs, of whom the majority seem to be of Maqṣūl origin. The Ḥāhā alone, between Mosgador and Agadir, have remained almost intact and have retained the use of the Berber language.

b. The Southern Maṣmūda of the moun-
tains occupied the Great Atlas (Djebel Darara), the massif of Sirwā (anc. Sirwān) and the Anti-Atlas or mountains of the Nagṣa (Berber, Ḥān Gist).

In the Great Atlas, the Maṣmūda extended to the east as far as the upper course of the Tanāṣif (a pass called Tizi-Teblew). From east to west, the following were the chief groups; the Glāwsā; the Ḥaylānsā (or Aylānsā), the Warīka and the Ḥazradjā, near Aghmāt; the Aṣṣāndān, including the Masfīwā, the Māqṣūl and the Durgṣānā of Bar Ḍugṣānī; the Ḥintāntā, including the Ghayyghayā; the people of Tin-Mallāf, on the upper course of the river of Naffis; the Sawdā or Zawdā, in the lower valley of the Assīl al-Māl, the Gaddmīwā and lastly in the west, the Gāfīsī, the chief tribe of which was the Saksāwā or Saksīwā.

The massif of Sirwā and the high valley of the Wādī Sūs were inhabited by the Banū Wāwazqī and the Saktānā. The northeastern part of the Anti-Atlas was occupied by the Ḥarghā.

Further to the south, the Sūs, properly so-called, was inhabited by heterogeneous elements of Maṣmūda origin, Ḥaṣṣāfīn al-Ṭurq bi-n-Nāṣir as Maṣmūdā. Describing the road leading from Tarūndant to Aghmāt, al-Idrīsī mentions between Tarūndant and the land of the Ḥarghā, four tribes the names of which, corrupted by the copyists, are unfortunately hardly identifiable.

Besides these highlanders, who were strictly Maṣmūdā, we must mention the Ḥaskūrā (or Ḥaskūrān) of the Anti-Atlas. These were highlanders of Ṣāḥāḏī origin, brethren of the Lāmāt and Gażūlā, who led a nomadic existence to the south of the Great Atlas and the Anti-Atlas. The Ḥaskūrā were settled in the high valley of Ṭanāṣif and the Wādī al-ʿAbīd, on the two slopes of the mountain range which links the Great Atlas, the home of the Maṣmūda, with the Central Atlas, the home of the Zanāṯā (= Ṣāḥāḏī) of Tādīlā; their main tribes were the Ṣāḥāḏī, the Muḥrūn, the Garnānā, the Ġhūḏḏāmī, the Fatwāqā, the Maṭṭāwā, the Huṭlānā, and the Ḥantīfā, who, according as they lived on one slope or the other, belonged to the Ḥaskūrāt al-Kībīla (H. of the south) or to the Ḥaskūrāt al-Dīlī (H. of the north (< zīlī)). Ibn Khalīlūn, who calls attention to the Ṣāḥāḏīs origin of the Ḥaskūrā, adds, that as a result of their taking up the Almohad cause, it became customary to associate them with the Maṣmūda tribes, but that they never enjoyed the same privileges as these latter.

History. In 62/682, ʿUbkā b. Naⱽāf [q.v.] marched against the Maṣmūda of the Atlas with whom he fought several battles. On one occasion, he was surrounded in the mountains and owed his safety solely to the help given him by a body of Ṣāḥāḏī. In the same year, he attacked and took the town of Naffis which was occupied by ʿRūm and Berbers professing Christianity. Thence he went to Iglī, a town of Sūs which he also took. Legend adds that he even thrust his way to the Atlantic where he rode his horse into the water, calling God to witness that there were no more lands for him to conquer.

This first submission of the Maṣmūda does not however seem to have lasted after the departure of ʿUbkā. In 88/707, Māsā b. Naⱽāshīr had to reconquer Maṣmūda by his person and in the following year, he sent his son to the conquest of Sūs and the land of the Maṣmūda.

In 1147/392 ʿUbayd Allāḥ b. al-Habbāb was appointed governor of the Mağrib; he appointed his son Ismāʿīl as assistant to the governor of Morocco and gave him particular charge of the district of Sūs. In 1173/752, the same ʿUbayd Allāḥ sent Ḥābīl, grandson of ʿUbkā, to make an expedition into Sūs against the Maṣmūda and the Ṣāḥāḏīyya (Massūfā). Later the latter's son ʿAbd al-Rāḥmān al-Fīhīr (d. 127/745) becoming semi-independent governor of the Mağrib occupied Iglī and built a camp there, the remains of which could still be seen in al-Bakrī's time.

It is to the same governor that is attributed the making of the wells which supply the road from Tāmdālt to Awadhīn [q.v.] via Waddān, through the modern Mauritanian.

The land of the Maṣmūda then disappears from history till the 3rd/9th century. The conquests of Idrīs I did not extend in the south beyond Tāmāsānā and Tādīlā. But in 213/828 Idrīs II made an expedition against the town of Naffis; on his death in 213/828, his son ʿAbd (or ʿUbayd) Allāḥ obtained as his share of the kingdom, Aghmāt, Naffis, the lands of the Maṣmūda and of the Lamātā or Sūs. Al-Bakrī records that some of his descendants ruled as lords of Naffis and among the Banū Lamāt, not far from Iglī. Other Idrīsīs, descendants of Yābāb y. Idrīs, were at this time lords of Darā al-ʿAmīr. With the death of ʿAbd (or Idrīs) power in the 4th/10th century, the Maṣmūda again became independent and were ruled by elected chiefs or inghārīn (sing. ānghār [q.v.], Arabic šayyāb [q.v.]); al-Bakrī tells us that those of Aghmāt were appointed by the people for a term of one year. When at the end of the 4th/10th century, Zanātā principalities became established in Morocco (at Fāṣ, Shālīlā and Tādīlā), Maghrāwā established themselves at Aghmāt; but all we know of them is that they were attacked by the Almoravids.

In 449/1057, after receiving the submission of Sūs and of the Maṣmūda (Zawdā, Šaḥṣifwa, Gaddmīwā, Raghāra and Hāhā), the Almoravid chief ʿAbd Allāḥ b. Yā-Sīn took Aghmāt, the last Maghrawa ruler of which, Lagūṭ b. ʿAlī, fled to Tādīlā. His wife, the famous Zaynab, who was one of the Naftāzī, finally became the wife of ʿUbayd b. Tāghīfīn, whom she initiated into the fine art of diplomacy.

From 449/1057, Aghmāt was the capital of the Almoravids till 454/1062, when Yūsfūl b. Tāghīfīn founded Marrākush [q.v.]. In 466/1074 the same ruler, having divided his empire among several governors, gave his son Tamīm the governorship of Marrākush, Aghmāt, of the Maṣmūda and of Sūs, then of Tādīlā and Tāmāsānā. The Maṣmūda seem to have remained subject to the Almoravids till the rebellion in 515/1121 provoked by the meḥdir Ibn Tūmār [q.v.] of the tribe of Ḥarḥa, who, supported by ʿUmār Intī, šayyāk of the Ḥintītā, and by ʿAbd al-Muʿmin [q.v.], brought about the foundation of the Almohad dynasty. The history of the Maṣmūda is henceforth involved with that of the dynasty which they brought to power and which was to last till 1269. The Maṣmūda, together with the Almohad dynasty, thus contributed to the rise of the Ḥafsīsids, who ruled over Ifrīqiya from 625/1228 to 982/1574, through the descendants of Abū Hafs Ṣamīʿ Intī, šayyāk of the Ḥintītā.

During the first half of the 7th/13th century, the power of the Almohads, routed by the Christians of Spain at the battle of Hīnān al-ʿUkbā (Las Navas de Tolosa) in 609/1212 and vigorously attacked in Morocco by several Castilian and Aragonese kings, the Maṣmūda of the Atlas, indifferent to the fate of the dynasty, took advantage of its plight to regain
their independence. It was the tribes of the Hintáta and the Háscura, which in 621/1224 at the proclamation of al-Ádil assumed the leadership in the movement; frequently allied with the Hílái of the Atlas and the Hashánt, we find them fighting in all the civil wars and supporting various pretenders to the throne. When in 667/1269, the Máríns had definitely crushed the Almohads, the Masmúda retained a certain amount of independence and lived more or less in submission to the central power, ruled by chiefs chosen from the great local families: Awlád Yání among the Hintáta; Awlád Sa’d Áláb among the Gadmíwa; among the Saksása, Úmar b. Haddá was an independent chief who went so far as to claim the Berber title agéllad (= king). In Sús, the Banú Yáddar (Idder) founded an independent principality which lasted from 652/1254 till about 740/1340. As to the Háscura, the power among them was exercised by the Banu Khahtáb.

Down to the 9th/15th century, except during the first half of the reign of the Almohad dynasty of which they had been the principal supporters, the Masmúda of the Atlas were hardly ever under the direct rule of the Moroccan government; only the tribes of the plains, Dúkkála and Hásbía, in a position of inferiority as a result of their geographical situation, were able to offer less resistance and had to submit. The latter dynasties, Sa’díd and ʿAlawi, were no better able to subdue the Masmúda of the highlands; but instead of gathering round local chiefs with temporal power, the latter now placed themselves under the leadership of holy men with religious prestige.

In the beginning of the 10th/16th century, the land of the Masmúda was in a state of anarchy. Some agéllád of the tribe of the Hintáta held the lands of Marrakush; the most famous was ʿAbú Shantuf; to the south of Tansift, the 8th/14th century saw the rise of the warlike group of the Ragragá; in the 9th/15th century, the power of the mystic al-Dżazúl (q.v.) spread among the Hásbía. In the adjoining country of Dará, the Sa’díd dynasty was rising, which, after occupying Sús, imposed its domination on the whole of Morocco. But it did not, however, succeed in subjecting completely the highlanders of the Atlas. The powerful ʿAbd al-Mánṣúr himself had to fight against a pretender who had proclaimed himself king of the Saksása. After the death of al-Mánṣúr, the Atlas and Sús were all under the authority of local religious leaders of whom the most important were to be found among the Hásbía and in Tázarwált (family of Ábd al-Músá). It was the ʿAlawíd Sultan Mawláy Rásghíd who restored Sús and the Atlas to the Moroccan empire. The only episode to note is the constitution in Tázarwált, by a marabout Sayyid (Sül) Hishám of a kind of independent kingdom, the capital of which was Tíghám and which lasted from the end of the 18th century till 1886.

Henceforth, the Masmúda disappear from history. The Atlas remained more or less independent, according to the degree of power of the ruling sovereigns, but all the important events in the region took place among the Hásbía or in Sús (q.v.). The French occupation found the old Masmúda grouped, since the death of the ʿAlawíd Sultan Mawláy al-Hasán, into three bodies each under the authority of a local family: the Gláwa in the east, the Guñáfa in the centre, ad the Muğga in the west. The name Masmúda, still preserved in the north of Morocco in the name of a little tribe of al-Kayr al-Kabír, seems to have completely disappeared in the south, where the former Masmúda peoples, continuing to talk Berber, bear the name of Talláh (French Ouled) (q.v.). It may even be asked if the name Masamúda, which is found so often in the Arab historians, the Banu Yáddar and the Háscura, is not also among the peoples to whom they apply it; it is, indeed, suggestive that it is not found in the long lists of ethnics given in the Kitáb al-Ansáb, published in the Documents inédits d'histoire almohade.

Social structure. The Masmúda of the Atlas lead a settled life, living by a little agriculture and breeding a poor type of cattle; they live in villages or hamlets of stone houses with clay roofs. Ibn Khatdún notes the existence among them of numerous little strongholds and fortified villages (mašúk wa-husun), the ancestors of the modern argens and agardís (q.v.). There were none towns among the mountains; Tin Mallal, famous for the mosque where Ibn Túmart was buried, was never a town. Before the Almoravide ruler Yusuf b. Tádhíf founded Marrákúsh in 45/1062, built moreover in the plains out of reach of the highlanders, whom it was to control, the only urban centres in the district were situated at the foot of the Atlas on its lowest slopes. The principal towns were in the north, the double town of Aghámá (q.v.) and that of Naffí in the river of the same name; in the south, in Sús, Iglí and Tarídánt; as places of less importance we may mention in the north, Shíshawá (mod. Shishawa), Alfan and Tamurar; in the east, among the Hásbía, and in the borders of Sús, Tádnáat. The great trade-routes which traversed the region started from Aghámá for the port of Kúz (at the north of the Tansíf), Fás (via Tádlá), Sidjámása (through the land of the Hazradja and the Háscura), and Sús (via Naffí, the land of the Banú Mágús and Iglí; no doubt using the pass now called Tízí n-Test). Al-Bakrí particularly mentions the industry and application and the thirst for gain, characteristic of the Masmúda of the Atlas of Sús. The principal products of the country were fruits (nuts and almonds), honey and oil of argan (q.v.), a tree peculiar to the country, of which there were regular forests among the Hásbía. The Masmúda could cast and work iron and also copper, which they exported in the form of ingots or "loaves" (tanguit); they also worked and chased silver jewellery. In Sús also the cultivation of the sugar-cane enabled sugar to be made.

From the intellectual point of view, the Masmúda seem to occupy a place of first rank among the Berbers. Each of their three principal groups has produced a "reforming prophet", the author of sacred works in the Berber language: Há-Mim of the Cúmára; Sálih b. Taríf of the Beraghwái; Ibn Túmart of the Masmúda of the Atlas. It may also be noted that Sús is one of those few districts in which books were written in Berber down to a quite recent date (cf. H. Basset, Essai sur la littérature des Berbères, 73-81).

Religious life. The Masmúda were converted to Islam in the 1st/7th century by Ukhá b. Naffí, who left his comrade Shíkár among them to teach the new religion. The latter died among them and was buried on the banks of the Tansíf where his tomb is still venerated. The place is now called Ribát Sayyíd Shíkár near the confluence with the river of the Shisháwa. The Mosque of the town of Aghámá of the Haylána was founded at the beginning of the 2nd/8th century in 85/704. Ibn Khatdún describes the Masmúda of the Atlas as being attached to Islam from the first conquest, in which they differed from their brethren of the north, the Baraghwái and the Cúmára, who remained
faithful to their heretical beliefs. At the beginning of the 2nd/8th century, several of them became vassals of the Abbasids, others of the Samanids, and yet others of the Ghurids. The descendants of the saint Sallam Ahmad ibn Musa concentrated in the south of Sus, in Tazarwalt where Tadili's hagiographic collection, entitled Kitab al-

aym b. Mukarrin in the time of the caliph Ray by Nusayri, was addressed "to the masmughan of Dunb awand, Mardin-djah, to the people of Dunb awand, of Khurram of Luriz (Luridj) and of Shririz". This gives us an idea of the extent of the sway of the masmughan. His possessions included the country round Mount Damawand and stretched down the plains as far as the east of Ray. The district of Dunbawand (* Dubawand, [the land occupied by] the * Duban clan?) did not form part of Tabaristan. The Arabs mention it along with Ray (al-Tabari, i, 2653-6; al-Mukaddasi, 209; Ibn al-Fakih, 275-7), but as we have seen, at the time of the conquest, Ray and Dunbawand were under different dynasties. The old capital of Dunbawand may have been at Mandan, where, according to Ibn al-Fakih, Armaicl had built a wonderful house of teak and ebony, which in the reign of Harun al-Rashid was taken to pieces and transported to Baghdad. In the Arab period there were two towns in Dunbawand, sc. Wima and Adhur. The former was the capital of the district but also by the Sanhadja of the adjoining plains south full of wonder-working saints. Later, the tribe of the Ragraga, settled on the lands now occupied by the Shayadima, was the cradle of a movement at once religious and warlike, the details of which are little-known but the memory still alive. In the first half of the 11th/17th century, religious activity seems to be concentrated in the south of Sus, in Tazarwalt where the descendants of the saint Sallam Ahmad ibn Musa carved themselves out an independent marabout principality.

(M. S. COLIN)

MASMUGHAN, ("great one of the Magians") a Zoroastrian dynasty which the Arabs found in the region of Dunbawand (Damawand) as early as the north of Ray.

The origins of the Masmughans. The dynasty seems to have been an old, though not particularly celebrated, one, as is shown by the legends recorded by Ibn al-Fakih, 275-7, and in the Biruni, Asfar, 227. The title of masmughan is said to have been conferred by Faridun upon Armaicl, Bwarsap's former cook (Zohak), who had been able to save half the young men destined to perish as food for the tyrant's serpents. Armaicl (according to Yakut, ii, 606, a Nataacan, a native of the Zab) showed to Faridun in the mountains of Daylam and Shririz, a whole nation of these refugees, which caused Faridun to exclaim "we are the descendants of the house of Khurram the just" (hasti nasr* wa la nisnat*) promising an annual payment of 200,000 dinars. The charter given by Nu'aym was addressed "to the masmughan of Dunbawand, Mardin-djah, to the people of Dunbawand, of Khurram of Luriz (Luridj) and of Shririz". This gives us an idea of the extent of the sway of the masmughan. His possessions included the country round Mount Damawand and stretched down the plains as far as the east of Ray. The district of Dunbawand (* Dubawand, [the land occupied by] the * Duban clan?) did not form part of Tabaristan. The Arabs mention it along with Ray (al-Tabari, i, 2653-6; al-Mukaddasi, 209; Ibn al-Fakih, 275-7), but as we have seen, at the time of the conquest, Ray and Dunbawand were under different dynasties. The old capital of Dunbawand may have been at Mandan, where, according to Ibn al-Fakih, Armaicl had built a wonderful house of teak and ebony, which in the reign of Harun al-Rashid was taken to pieces and transported to Baghdad. In the Arab period there were two towns in Dunbawand, sc. Wima and Adhur. The former was the capital of the district but also by the Sanhadja of the adjoining plains south full of wonder-working saints. Later, the tribe of the Ragraga, settled on the lands now occupied by the Shayadima, was the cradle of a movement at once religious and warlike, the details of which are little-known but the memory still alive. In the first half of the 11th/17th century, religious activity seems to be concentrated in the south of Sus, in Tazarwalt where the descendants of the saint Sallam Ahmad ibn Musa carved themselves out an independent marabout principality.

(M. S. COLIN)
are very contradictory, as is shown by their very detailed analysis in Vasmer, op. cit., in Bibl. After the defeat of the ıspahbads, the Arsabs conquered the masmughan and captured him and his daughters Baktataraya (?2) and Smyr (? or Shākil). Of these princesses, one was the wife of al-Mahdī b. al-Mansūr and the other the umm wa'ad al-Mīl b. Rāyta. According to a story in Ibn al-Fakih, 314, Khālid b. Barmak (Vasmer, op. cit., 100, that he was exiled to Ray, and there from al-Mahdī ordered him to be beheaded.

After the death of the masmughan, the people of these mountain regions lapsed into barbarism (hāzewiyah) and became like wild beasts (al-Tabari, iii, 136). According to Ibn al-Fakih (276), however, the descendants of the masmughan (= Armidil?) were still well-known.

Spiegel’s and Marquart’s hypotheses. Yākūt, i, 244, interprets masmughan as kabir al-madidjus “the great one of the magi” (mas ‘great’, N.W. Ira- nian form). Spiegel thought of connecting this dynasty with the prince-priests of Ray, whose existence is known from a well-known passage in the Avesta (Yazna, i, 18, Darmesteter, i, 170; cf. Jackson, Zoroaster, 202-5). In spite of Marquart’s criticisms, who says it is impossible to quote the authority of Avestan traditions which relate to much earlier state of affairs, Spiegel’s suggestion is still of interest. We have certain to deal with vague memories and not with actual facts. In the time of the Arab conquest, the descendants of Sahrām Cōhūn were ruling in Ray, but the Arabs (al-Tabari, i, 263-6) installed there a certain al-Zaynabī, son of Kūla and father of al-Farrukhān. It remains to be seen if this family of Zaynabī “whom the Arabs call al-Zaynabī” (al-Baladhuri, 317) is connected with Dunbawand. Their stronghold in Ray was called ʿArin (?), which resembles the name of the mountain al-ʿArayn from which the last masmughan came down (cf. the note by de Goeje and de Jong, 228). Masrūh wanted to connect the masmughans of the Bawandid dynasty, the eponymous ancestor of which Baw, a descendant of Kāwūs, brother of Khusrū Ī, is said to have lived in the time of the later Sāsānids [see BAWAND]. This Baw was a man of piety, and after the fall of Yazdārgard III had retired to his father’s fire-temple. Marquart regards him as a ‘magus’ and identifies him with the father of the Christian martyr Anastasius, who bore this name (βαύς) and was a ‘master of Magian lore’. Lastly, he quotes the fact that the Bawandids appeared in 167/783-4 only after the disappearance of the masmughans (after 141), as if to continue their line. Unfortunately, several details of the ingenious argument are not accurate: our sources (Ibn Isfandiyar; Zahir al-Dīn, 204-5) give not the slightest suggestion that Baw belonged to the priestly caste. According to Ibn Isfandiyar (tr. Browne, 98), his grandfather’s temple was at Kūsān, which Rabino, Marzandarān and Astarābād, 160, locates a little distance west of Aṣafrah i.e. quite remote from Dunbawand. The passage in al-Tabari, iii, 1294, which Marquart quotes to prove the occurrence of the name Masmughan among the Bawandids refers to the cousin of Māzyār of the Kārinid dynasty [q.v.], which is quite different from the Bawandids (cf. below). The Kārinid masmughan. It is curious that neither Ibn Isfandiyar nor Zahir al-Dīn speaks of the dynasty of the masmughan of Dunbawand, perhaps because they do not include this region in Tabaristan proper. On the other hand, they mention a masmughan (masmughān, Vognar) Wandād Hurmūz [i.e. of Miyan-du-rūd] (Zahir al-Dīn, 42), says that this canton was near the Šāri between the rivers Kalārūd and Mihrābān and that on the east it adjoined Karatuğan; Miyan-du-rūd is thus quite close to where Rabino puts Kūsān (!). This masmughan Wallāsh (Ibn Isfandiyar, 101; Zahir al-Dīn, 42) lived in the time of Dāmāspīd Farrukhān the Great (709-227) and married to the elder branch of the Kārinids descended from Zāmrī b. Sūkhī. (It is unclear why Justi, Iranische Namenbuch, 430, takes this Wallāsh to be the son of the last masmughan of Dunbawand). The Kārinid Wandād Hurmūz (of the younger line, descended from Kārīn, brother of Zāmrī) in his rising against the caliph (al-Mahdī, 158-69/775-85) had combined with the ıspahbads Šarwīn (772-97) and the masmughan Wallāsh of Miyan-du-rūd. This latter (Ibn Isfandiyar, 126; Zahir al-Dīn, 155) seems to have been one of the successors of the masmughan Wallāsh mentioned above.

Under 224/838 al-Tabari (iii, 1294) mentions a cousin of the Kārinid Māzyār, who was called Shāhrīyār b. al-Masmughān. According to this, al-Masmughān would be identical with Wandād Umūmid, uncle of Māzyār (cf. Justi, 430). On the other hand, under the year 250/864, al-Tabari, iii, 1294, mentions a Masmughān (sic) among the allies of the ʿAlīd Hasan b. Zayd. Ibn Isfandiyar, 165, calls him Masmughān b. Wandād-Umūmid. One must either suppose there is an error in al-Tabari’s genealogy or admit that the title of masmughān was borne both by Wandād-Umūmid and his son, but the form of the designation of the latter; (mas- without the article) would rather show that the title had become a simple proper name (Browne was thus wrong in translating “the masmughān”). To sum up then. Alongside of the masmughāns of Dunbawand, we have the masmughāns of Miyan-du-rūd. These masrūhs, if we may rely on Zahir al-Dīn, belonged to the Zāmrīrid branch of the dynasty of Sūkhūr (Sāsānīd governor of Tabaristan descended from Kārīn, who was called šahīd al-Dīn, 42), of the famous smith Kāwā (see KĀWĀN). Later we find the title (or proper name?) of masmughān recurring in the younger branch of the line of Sūkhūr (the Kārinid branch), which occupied a position in Tabaristan subordinate to the Bawandid ıspahbads (Zahir al-Dīn, 154, 14).

(V. Minorsky)

Masraḥ Defter, the household account book of high-level Ottoman administrators such as viziers or governors, or of palace personnel such as waterbearers. The account book covered, for time periods of a month up to several years, detailed monthly inventories of household economic transactions. These entries are often organised under subject headings such as kitchen, clothing, or food expenses,
purchases of household goods from merchants and artisans, salaries of household members, or gifts given and received during religious holidays. Each entry of the inventory usually contains a description of the transaction, the price, quantity and the names of the people involved in the transaction. No systematic study of these books, hundreds of which are to be found in the Topkapı and Ottoman State archives, has yet been undertaken.

(F. Müge Göçek)

**MAŞRAF DEFTERI — MASRAH**

Primarily an artistic and literary phenomenon of the last two centuries, the Arab theatre has its roots in local performances of passion plays [see TA’ZIYA], marionette and shadow plays [see KARAGOZ], mimicry and other popular farces, and was affected by the then-contemporary (rather than the classical) foreign theatre as well. Although some popular open-air plays in Arabic have occasionally been presented publicly since the 12th/18th century, if not earlier, an Arabic theatre in the modern sense of this term has been in existence only since the mid-19th century. It was in 1847-53 that Mârûn al-Nakkâsh [q.v.], under the impact of the Italian theatre, wrote and produced several plays, chiefly adapted from Molière, before sailing for Italy. His production of the locale, the names of the dramatis personae and certain elements of the plot, in order to increase the appeal; with the same intent, the language combined the literary with the vernacular, and both vocal and instrumental music was added. To moderate possible opposition from religious circles, men and boys acted the female parts (later on, non-Muslim—and afterwards, Muslim—women joined theatre troupes). These features, which remained characteristic for some time, were introduced into Egypt by Syrian-Lebanese immigrant actors, who soon rendered Egyptian (and, most particularly, Cairo) the centre of Arab theatrical activity. Performances continued in Syria as well, and gradually spread to other Arab lands in the Middle East and North Africa. Most troupes were made up of amateurs, e.g. students, or at most, of semi-professionals; gradually, however, the number of the professional actors increased, although they had to await the establishment of semi-independent states, following World War I, in order to benefit from the public funds which were vital for their unhampered activity.

These developments were paralleled by playwriting. At first, most plays were written by people of other professions. Mârûn al-Nakkâsh was a clerk and merchant; his successors were journalists or, even more often, troupe directors, stage managers or actors. Only much later did the writing of plays become a full-time profession. Adaptations, mostly from the French, came first, as al-Nakkâsh’s literary output indicates. An even more prolific writer was Muhammad Uthman Dialâl (1829-98) of Egypt, who adapted into Arabic French tragedies and comedies, introducing appropriate changes, chiefly in the latter; in general, the former were performed in literary Arabic, the latter in the vernacular. Increased education and changes in taste led to more literal translations (although adaptations did not disappear for some time). One typical translator was the Beirut-born Nagib al-Haddad (1867-99), who wrote in Egypt. Although he changed the names of the plays and some of the characters and added music, al-Haddad usually remained faithful to the originals (mostly translated from the French); his works served as a model for the strictly literal translators which soon followed. These generally translated from French or English and represented a lesser extent, from Italian and other languages. There followed an impressive number of original playwrights, whose output continued simultaneously with active translation work (and, initially at least, adaptations). These cover the entire gamut of dramatic writing, contributing to the répertoire of farces, historical plays, melodramas, dramas, tragedies, comedies, political and symbolic plays, as well as works pertaining to the theatre of the absurd. One of the best known of these playwrights, who successfully tried his hand at several of these genres, is Tawfik al-Hakim (born in 1902), one of Egypt’s prominent 20th century men-of-letters.

There was evident interaction between dramatic output and the further development of the troupes. While the musical theatre dominated and attracted crowds, the acting, the stage-directing and theatrical criticism achieved gradual professionalisation: the number of theatre halls increased, and troupes performed an increasing variety of plays to a steadily growing public of diverse interests and tastes. Of all the troupe directors and actors in Egypt after World War I, perhaps the ones with the most impact were Diûrîj Abyâd [q.v. in Suppl.] who, having studied acting in the Paris Conservatoire, promoted semi-professional theatrical activity. Performances of the national theatre [q.v.], premiered at the National Theatre in Cairo (1899-1901), promoter of the often tear-jerking melodrama with social background; and Nagib al-Rihamî (1891-1949), nicknamed ‘The Oriental Molière’, whose comedies amused the crowds while criticising the social mores of his time. Numerous other troupes have joined these during the Inter-War period and since World War II, particularly in Egypt, Lebanon, Syria and Iraq, less so in Jordan, and hardly at all in the Arab Persian. Most are ephemeral unless supported by public funds, while usually means government allocations. Obviously, schools for the dramatic arts and theatre halls are dependent on such funds. All this has, again, led to a certain politicisation of the Arab theatre, differing from one country to the other. This process has been evident from the early days of the Arab theatre, e.g. in the plays of Ya’qub ‘Abd al-Nâdkâra [q.v.] in the Egypt of the 1870s; since World War II, however, it has acquired an obvious social content, often fully committed and starkly realistic. Theatrical criticism, too, has become increasingly outspoken, with critics generally vying among each other in their caustic remarks on playwriting, acting and stage-directing. They readily find an outlet not only in journals specially devoted to theatrical criticism (see Bibliography, below, for examples), but in many Arabic dailies and periodicals as well. All this is yet another indication of the great interest in the theatre throughout much of the Arab East.

**Bibliography:** Few bibliographies are devoted exclusively to the Arab theatre, e.g. Salâh Djawad al-Tu’ma, Bibliyugrafiyyat al-adab al-‘Arabi al-masrahi al-hadith, 1945-1965, Baghdad 1969; or al-Nâsir al-masrahiyya al-mufradât fi masârî wal-Kâhirâ mundhû nashâîhattdal-dn, in al-Kâtîb al-‘Arabi, xlv (April 1969), 60-83. For a list of plays in Arabic (both original and translated), see Dâr al-Kutub, Kâtîma ‘an al-tamhîliyya wal-‘Arabiyya wa l-mu’arrab, Cairo 1960. Bibliographies concerning the Arab countries or modern Arabic literature are relevant, in part, as are some bibliographies of the theatre, like N.B. East (ed.), *African theatre: a checklist of critical materials*, Nairobi 1970, 15-19 (for Egypt) and the Maghrib. Several of the books
mentioned below also comprise useful bibliographical lists. Source materials, as well as memoirs (but not autobiographies), such as the Shi' a 'alim, Abu Bakr b. Ahmad, in al-
Din'ar (Beirut), vii (1875), 521; al-Tamthil al-'Arabi, in al-

2. In North Africa

Tunisia. — The first attempt at introducing theatre into Tunisia dates back to the early years of the 20th century. It owed much to the initiative of a fine actor known as the master, continued in his footsteps. In 1909, he formed his own troupe, with which that of ‘All al-Khazin was soon to be a serious competitor.

In the period following the First World War, groups of amateur performers proliferated in all the major towns. They toured the country, playing Egyptian tragedies and dramas in literary Arabic, as well as comedy and farce in colloquial language. But it was the popular entertainment which appealed most to the public. Nevertheless, the Egyptian influence remained apparent, especially in the more serious genre as a result of the tours which the major troupes of Cairo made periodically in the Maghrib, visiting Tunis in particular: Dāwūd Abyad in 1921, Yusūf Wāhbi in 1927, Fātimah Rūg启迪 in 1932 and ‘Abd al-Riḥānī in 1937.

In a theatre quite openly dependent on foreign material, a play such as al-Sudd ("The Dam") by Mahmūd al-Mas‘ādī takes on the nature of an original experiment. This transparently symbolic drama evokes the failure of a person engaged in an enterprise which is beyond him and which ultimately testifies in favour of the man and of his destiny. The action is stark, the scene set at the foot of a mountain. Two persons arrive, Ghayān and Maymūnā, leading a heavily-laden mule. The man decides to construct a dam, but he encounters enormous difficulties. Barely begun, the work is stopped, the scaffolding soon abandoned. To add to his misfortune, the man is swept away by a storm with his work unfinished, while his consort rushes headlong towards the plain exclaiming: "The Land, it is the Land that I discover!" Written ca. 1940 in a very pure prose style, intended to be read rather than performed, al-Sudd, on its publication in 1955, came to be regarded as a kind of masterpiece by Tunisian and Egyptian scholars and French Arabists.

However, dramatic production after 1940 seldom strayed from the beaten tracks. Authors were not concerned with presenting scenes that were new, true and pertinent to the human condition. Whether engaged in serious or in comic vein, they made strenuous efforts to achieve pathos or, on the other hand, contented themselves with facile gaiety. Innovations were rare, and performances of mediocre quality. For their part, the majority of actors were young amateurs whose enthusiasm did not compensate for their lack of training. Moreover, the absence of producers and technicians meant poor preparation and clumsy performances. The emergence of the professional troupes, which came about in the 1950s, was due to the achievements of the Tunisian theatre. At this stage, Tunisian theatre seemed doomed to failure. It was certainly in a state of stagnation.

It was not until the years following Independence that significant efforts were made at various levels with a view to reviving the theatre. Writers, mostly of dual Arab and French culture, generally occupying posts in public administration which guaranteed their material security, sought to lay the ground-work for a new dramatic movement. The example set by the foreign plays which were frequently produced in Tunis encouraged them to give freer rein to the imagination. In this process of renovation, producers, hitherto an unknown breed, played a role of the highest importance. The greatest of them was undoubtedly the Egyptian Zaki Tula Mayer, a man of expertise and experience, who for a long time enjoyed a well-deserved reputation in artistic circles of the Near East and the Maghrib.

When he arrived in Tunis in 1956, eight competing
companies of amateur comic actors shared between them the patronage of a sparse and eclectic public. Actors variously performed Egyptian plays in literary Arabic, or texts of European works, comedies and farces in the colloquial style of the locality, normally concluding the show with singing, dance and music. There were among them some talented individuals, whom Tulaymat chose in order to form a company of quality. He strove to make the scenery more authentic, the performance of actors more natural; he required his casts to rehearse thoroughly, to work in a spirit of team collaboration, to present well-constructed, living productions in which the element of convention is mingled with fantasy. The training which he gave bore fruit. In fact, when Zakî Tulaymat left Tunisia in 1961, the theatre experienced a new era of prosperity through the efforts of some of his young successors, including 'Ali Ben 'Ayad.

The latter was then director of the Municipal Theatre of Tunis. Both a man of grand aspiration and a man of the people, he was active in all spheres of artistic pursuit, with imagination and zeal as well as with realism. He adopted a dramatic technique which consisted in transposing the themes of works borrowed from the foreign répertoire to ancient or contemporary Arab-Islamic society, with the appropriate bayt, costumes and decorations. Thus, for example, his Caligula (1961) is set in the Middle Ages, at the court of a Maghribi sultan surrounded by his viziers, amirs and Arab retainers. There is nothing in common with the historical character nor with the protagonist of Camps' play, whom the Tunisian dramatist takes as the symbol of a sovereign ruling in bloody tyranny over his people. Ben 'Ayad applied similar treatment to a series of foreign works which he presented in Tunis and at the international cultural centre of Hammamet before performing them before the heterogeneous audiences of provincial towns and rural villages: Measure for Measure and Othello by Shakespeare, L'Evocateur by Molière, En attendant Godot (1955), La Derniere bande (1965), etc.

For his part, Fattah Wall devoted his life to the theatre and the drama, and was active in all spheres of artistic and literary activity. The net result is that these productions earned him renown both in Tunisia and abroad, especially in Paris, at the Théâtre des Nations.

At the same time, other younger dramatists who favoured strong characters, violent emotions and local colour, attempted to find new sources of inspiration in drawing their themes from Arab-Islamic history. They preferred the ages of glamour, retaining the facts but moulding them according to their imagination, developing the classical ideals of love, faith, honour and valour. The heroes, princes, military chieftains or simple warriors are obliged to risk their lives for the glory of Islam and the love of the homeland. Thus for example, Ahmad Khayr al-Din dramatised the epic of the Berber queen al-Kahina, who, at the end of the 1st/7th century offered fierce resistance to the Arab army of Hasan b. al-Nu'mân before finally collapsing under his onslaught (al-Kâhîna). For his part, Fattâh Wâli devoted his Pearl of Sicily (Ghauhar al-Sikilli) to the exploits of the Muslims who, embarking from Sousse in 210/827 under the command of Asad b. al-Furat, flung themselves into the conquest of Christian Sicily. Nor is romance absent from these pseudo-historical tableaux. 'Abd al-Razzak al-Bahrakha brings alive on stage the famous couple Ibn Zaydûn and Wallâda, with a nostalgic evocation of the Cordova of the 5th/11th century (Wâlâyda wa-Ibn Zaydûn). In this category of plays of heroic or historical pretensions, Murâd III (1966) by Habib Boulares (Bu l-Arîs) is reminiscent of Caligula by 'Ali Ben 'Ayad, but the epic grandeur of the subjects creates an atmosphere of heroic legend capable of capturing the imagination of the spectators. Ultimately, the characters are of quite elementary simplicity, entirely good or totally evil, clad in their symbolic guises.

Alongside this serious theatre, the comic genre has made a worthy contribution. In the relaxed atmosphere of the period 1960-70, numerous humorists provided comedies, farces or simple entertainments of circumstance, introducing hilarious, pathetic or cynical characters. It was during this time that Ahmad Khayr al-Din enjoyed his greatest popular success with the creation of the character of Hâdí Klîfî, distant cousin of the Egyptian Kîch Kîch Bey. All such plays, a little simplistic but well-constructed, have delighted popular audiences. It may be added that the theatre, in the past twenty-five years to interest all classes of society in theatre in its most diverse forms have succeeded well. In the context of decentralisation, provincial drama companies have evolved, so that today every town boasts its own troupe of comic actors, whose active members contribute both to improvement in standards of production and to the opening up of the theatre to new audiences. On the other hand, theatre has made its presence felt in the school, the academy and the university, and every years competitions are organised to reward the best young dramatists. Thus a new spirit is alive in theatrical life. Attendance at dramatic performances, formerly the preserve of a narrow circle of intellectuals, has become within a few years a social event shared by the scholar, the artisan and the peasant. It is beyond doubt this fact which, more than the number and quality of works, best characterises the rebirth of theatre in Tunisia.

Algeria. — It was only in the years following the First World War that Arab theatre appeared for the first time in Algeria. In 1921, the Egyptian troupe led by Djûrûd Abyad, after performing in Tunis, presented in Algiers two historical dramas by Nadjib al-Haddâd written in classical Arabic: Salâd al-Dîn al-Ayyûbî ("Saladin the Ayyûbî") and Thdrât al-Arâb ("Vengeance of the Arabs"). Although encountering only limited success before a public generally ignorant of the literary language, these performances made the Algerian élite aware of the existence of a militant and didactic Arabic theatre. Drawing on this experience a few months later, a handful of young intellectuals, for the most part former madîwan students, formed a cultural association, al-Mu'addiba ("The Educating [Society]") one of whose leaders, Tahir 'Ali Sharîf, organised the performance in the capital of three plays in literary Arabic which had the purpose of awakening the national sentiment of his compatriots and educating them concerning the horrendous consequences of social scourges such as alcoholism: al-Qâfiq bâ'd al-anâ' ("Recovery after the trial", 1921), Khâdîjat al-dhurâ ("Perfidy of Love," 1923) and Pâdî (1924). Another company, that of al-Tamthîl al-Isrâîlî ("The Arab Theatre"), founded in 1921, had as its leading personality a former student of arabic literature.
literature, Muhammad al-Manshali. This company performed in Algiers two plays in literary Arabic borrowed from the Egyptian repertoire: Fi sabih al-waqta (“‘For the homeland’,” 1922) and Fitiha al-Andalus (“The conquest of Andalusia,”” 1923). This attempt at the introduction of dramatic art was hindered by two apparently unsurmountable obstacles: on the one hand, it encountered the incomprehension of a public barely familiar with Arabic literature; on the other hand, it incurred the disapproval of the bourgeois élite, which had little taste for performances whose themes seemed incompatible with the principles of Arab-Islamic ethics.

Taught by this experience, some young enthusiasts performed during the same period plays which would be universally accessible, drawing their themes from contemporary life and from popular traditions. They shared their predecessors’ concern with moral and social, even political issues, and their simplistic philosophy, but they were at pains to express them in the daily patois of their fellow-citizens. During the interwar period, three names are pre-eminent: 4Allalu, Ksentini and Bachtarzi. With quite dissimilar gifts, all three gained reputations in comedy and in song, perpetuating in the theatre the tradition of popular poetry whose rhythms lend themselves particularly to musing on commonplace, profaning degrees, the tastes and the spirit of their time.

In many respects, 4Allalu is a pioneering figure. Born in Algiers in 1902, he first participated as a singer in public concerts whose a musical society, al-Mutrihiyya, organised during the evenings of Ramadan. Later he began performing in local cinemas, at Bab el Oued in particular, short sketches in the style of farces dramatising domestic situations. Enriched by this experience and confident of his methods, he formed in 1925 his own drama company, the Zahia troupe, and composed satirical, romantic comedies and comic ballets, written entirely in dialect, which he presented successfully in Algiers and the surrounding region, between 1926 and 1931: "Djeha" (Djeha, 1926), "The marriage of Bou-Akline" (Abu ‘l-Hasan, 1926), "Abou-Hassan or the sleeper awakened" (Abu ‘l-Hasan, 1927), "The Fisherman and the Genie" (1928), "Antar el-Hachachi" (‘Antar al-Hachayihi, 1930), El-Khaliia oues-Ssayyad (El-Khalifa ou ‘l-sayyad, "The Caliph and the Fisherman," 1931) and Hallaj Guernata (Hallak Qarnatai, "The Barber of Granada," 1931). However, his company, the beneficiary of neither public nor private aid, was not a commercial success and 4Allalu soon found himself beset by serious financial difficulties. As director, he led an exhausting life and consequently his health suffered. Disillusioned, in 1932 he decided to renounce all his theatrical activities.

4Allalu had no pretensions to originality, and little interest in novelty. Three of his productions were adaptations of very well known stories from the Thousand and one nights: Abu-Hassan or the sleeper awakened, The Fisherman and the genie and El-Khaliia oues-Ssayyad. His Djeha does indeed contain numerous humorous episodes traditionally attributed to the popular character of the same name, but the general theme is borrowed, via Le Medicine malgré lui, from a medieval fable, Le vilain mire, which depicts the triumph of a cunning woman. In The Marriage of Bou-Akline there are numerous echoes both of Arab folklore and of the French tradition of farce humour. 4Allalu does not venture to follow Molère in the direction of comedy of character. His figures confine themselves to stereotyped theatrical roles; they never become authentic human beings. Nevertheless, he excels in devising plots and situations which automatically arouse laughter: in Djeha, the hero is soundly beaten by the emir, the sultan before admitting that he is indeed the famous physician capable of curing the son of the sovereign. Similarly, the wife of Bou-Akline, finding the door closed on returning from an assignation with her lover, simulates suicide by throwing a great stone into the garden well; later, when everyone believes her dead, she appears before her husband who, terrified, imagines himself confronted by the ghost of his wife. Thus, the plays of 4Allalu appear to be a compromise between farce and comedy of intrigue. Invariably, the audience is held in suspense by theatrical sensations or amused by the disguises: Abu ‘l-Hasan, a nonentity dressed as a caliph and flaunting the trappings of his temporary authority; Hârin al-Raghîd and his vizier Qa’far disguised as merchants, etc.

Furthermore, 4Allalu is a skillful writer, deploying many witticisms, puns, amusing expressions: he gives to the hero of his first play, Djeha, the name of a popular character in the Arab world and to his wife that of Hila ("Stratagem, trick"); the aged retainer of Bou-Akline, Mekidech (Mheidâgh) is the homonym of another fictitious character whose adventures have amused the long evenings of his audience. The marriage of Bou-Akline"

In addition, he endows them with a popular, vivid, colourful style of language. As well as their demeanour and their gestures, their speeches provoke laughter. Their verbal comedy is constituted partly by aphorisms, maxims and proverb in current Algerian usage, partly by the repetition of exclamations habitually employed by the people to express joy, surprise or sadness (wiil wiil, "Alas for me!"; ya sâ‘di, "Just my luck!"). The borrowings from the spoken language and the verbal novelties are evidently designed to make the audience share the gaiety of the actors. In sum, there is no profundity, but the revelation, through laughter, of a good humour free from vulgarity, a joyous, irrepressible, infectious enthusiasm. This cheerful mood makes everything acceptable: Djeha and his wife Hila are arrant rogues, Bou-Akline is not entirely honest, and no more so is Abu ‘l-Hasan. It would be folly to object and to attach any importance to their actions or their concerns. 4Allalu has succeeded in the gamble of turning quasi-serious issues into the material of farce, without any pretension of displaying to the audience the illusion of reality. His principal achievement has been the definitive establishment in Algeria of a theatre of essentially popular inspiration and expression, adapted to the taste of his contemporaries.

The second actor-writer who has contributed significantly to the growth of the theatre in Algeria during the 1930s is incontestably Rashid Ksentini, whose works are published in the lengthy article devoted to him, s.v. al-Kasanthini.

The third motive force of Algerian theatre between the two World Wars is Bachtarzi (Muhyi ‘l-Dîn Bâsh
Tarzi), who was born and died in Algiers (1896-1985). When he came to prominence in the 1930s, he was already a veteran of the stage where he had acquired a fine reputation as a singer and an actor. Initially, he confined himself to repeating the principal successes of his predecessors in a slightly amended version. His players merged with those of Allalı and Ksentini, and the company thus formed comprised Algerian actors (al-Mansılı, Bash Djarrab, Dahmın and Hamel) and French ones (Louis Chaprot, Georges Baudry and Georges Hertz), who were joined by comic actresses such as Khalilah and Marie Soussan, the last named being Jewish. On the other hand, Bachtarzi created a répertoire: to the comedies, farces and sketches of his predecessors he added his own works, the first composed in collaboration with Ksentini, Chaprot and Hamel, and some seventy plays in all, all written in colloquial speech and several containing scenes where the actors express themselves in French. Among those which delighted the Algerian audience are the following: *Paqo (Fakı, "That's no good!"); El Bouzerii fel Askaria (al-Bərzənī, ", the Mozabite...""); *The Bouzarian at the barricades," 1934); *Alenniş (Allalı "I'm fine", "From self-respect", 1934); *Beni oui-oui (1935); Syndicat des chomeurs (1935); Le Mariage par téléphone (1936); El-Khedbatne (al-Kabdabinn, "The Trasors", 1937); El Keđabëin (al-Kedabbin, "The Lies", 1938); El Mechetna (al-Maşqah, "The Lies", 1940); and Sliman Elouk (Sliman al-lakk, "Sliman wax.") 1942, the two last-named being adaptations of, respectively, L'Aire and Le Malade imaginaire by Molière.

Bachtarzi was indeed a performer, but he was also above all an impresario of performances. He was also a writer conscious of the rôle which the theatre had to play in the evolution of Algerian society. Eager to encourage the broadest public to discover new horizons, he organised tours throughout Algeria and in Morocco, France and Belgium, playing to the significant Algerian communities present in these countries. However, his situation was precarious, as may be judged from the account in his Mémoires: in 1954, his troupe gave 61 performances in 44 localities; the following year it appeared in 55 urban centres; in 1956 and in 1937, the number of towns visited was respectively 59 and 89. Audiences varied between 150 and 2,000 in Algiers, Constantine, Oran and Tlemcen. Successes were inconsistent and receipts poor.

Such signs are a due to understanding the difficulties faced by the new guiding spirit of Algerian theatre encountering a society which remained backward and an administration uneasy about the theatre encountering a society which remained backward and an administration uneasy about the theatre. In this play, and dramatic tirades, he denounces the danger posed to the Algerian community by the relaxation of morals, the adoption of a poorly understood modernism and the revival of social evils: unemployment, alcoholism, prostitution and usury. With the same zeal, he condemns the disunity of his compatriots, the compromises of elected administrators, religiousibusy bodies and hypocrites. In this mood, he readily employs terms of ideological connotation (bakıd, "political rights"); *tit śhār, "union; "titşiftāt, "accord; "tezatun, "homeland; umma, "nation"), henceforward to become part of the normal vocabulary of every Algerian of any degree of education, and evidence of a willingness to take political and cultural initiatives in accordance with the social ferment dominating the country from the year 1930 onward. Inevitably, the irreverent spirit of Bachtarzi aroused serious hostility. His plays were banned or subjected to censorship. His career declined and he was only able to ensure the survival of his company by compromising with the authorities. However, he was appointed during the Second World War to entertain the Muslim soldiers receiving treatment in military hospitals.

The year 1947 marked the revival of Algerian theatre with the formation at the Algiers Opera of an Arab troupe and the appointment of Bachtarzi as its director. This initiative created conditions of a degree of professionalism and of greater stability. In fact, the players henceforward had facilities for rehearsing at leisure before every performance; they were guaranteed at least one performance per week; and finally they received a regular income as a result of a municipal subsidy. This company initially comprised about a score of actors, actresses, singers and musicians, most of them quite young: Mustapha Kateb, Muhammad Towri, Muhammad Hašţāb, Djālal Sāssīnī, Ridā Falākī, "Ayād Roudched, Kālḫum, Dalålī and Laylā Hākim. Most often, they played comedy in the colloquial language, but they also on occasion performed serious plays such as Hannibal, a historical drama by Tawfīk al-Madānī (1952). They remained active until the dissolution of the troupe in 1956.

Meanwhile, numerous troupes of players made their appearance in Algeria. Four of them were based in Algiers: *Les fervents du théâtre arabe algérien*, which was managed by Muhammad Tāhir Pūdālā; *Fikra al-fann al-samlīli* ("The Company of Dramatic Art") whose main guiding spirit was Mustapha Gribī; *Masrah al-gazārī" ("The Algerian Theatre") of Mustapha Kateb and *Masrah al-ghad* ("Theatre of Tomorrow") of Ridā Falākī, the two last-named being former members of Bachtarzi's team. Other dramatic activists made their appearance in the provinces: Ahmad Ridā Hūlī at Constantine, Hasan Derdour at Bone, Mūsā Khaddawi at Bīda, etc. While Falākī specialized in producing children's programmes for Radio Algeria, the others composed comedies, farces, entertainments, romances, plays full of enthusiasm and fantasy, mostly written in dialect, but with a rapidly increasing number in classical Arabic. It seems that the impression made by Egyptian productions performed by the major companies of Cairo in the course of their tours of Algeria encouraged the activists of the Algerian theatre to give more scope to the literary language.

In the same period, companies of actors were formed in the major cities with the encouragement of organizers of the association of reformist *ulama* and of the M.T.L.D. (Mouvement pour le triomphe des libertés démocratiques). The former presented, on the occasion of the celebration of religious feasts or of the annual distribution of prizes in private Arab schools, small dramas of cultural instruction intended to glorify Islam and the Arabic language. The latter were clearly oriented towards political and social action. For example, the play *Ainak and Rouibah*, performed in Algiers in the 1950s, dramatises the career of a young Algerian who "joins the party of the struggle for liberty" and evokes "the most noble cause". Such a committed theatre naturally had recourse to history with the object of exalting national sentiment: Hamīn al-Kāhina, Barbarossa and Šalāb Bey, each of these characters being seen as a champion of
patriotism. On the other hand, in numerous plays a conspiracy is forged against the sovereign to put an end to "the servitude of the people" and to "deliver" them from tyranny. These transparent allusions enable the audience to make straightforward comparisons and offer as a desirable prospect "the punishment of the despot" and "the revenge of the oppressed". The performance normally ends with the singing of patriotic anthems (anašīd wažanjiyya). It need hardly be stressed that all these performances took place in private places, before a limited audience of militants and sympathisers. After the rebellion of 1954, the Arab theatre virtually ceased to exist in Algeria. Some of its guiding spirits, members of the F.L.N., took refuge in Tunisia where they occasionally performed propaganda pieces.

The years following 1962 saw considerable changes taking effect in the theatre. At the Algiers Opera, renamed the Algerian National Theatre, there were efforts, under the guidance of Mustapha Kateb, to renew theatrical presentation and communication with the public by introducing aesthetic and ideological preoccupations. In this spirit numerous national companies were invited to perform, from Black Africa, Eastern Bloc countries, Asia and Central America. The actors performed in their own languages and boasted of the benefits accruing to the people as a result of revolution in their countries. On the other hand, the influence of foreign works such as those of Bertold Brecht and Sean O'Casey, but it must be admitted that neither the satire on rural and clerical society of the latter, nor the parables employed by the former to illustrate his communist principles, genuinely interested the public, which was thoroughly bored by these spec-

Combination of style is the norm: drama, melodrama, comedy in each of its different elements. Plays rarely display a unity of tone. Written in dialectal prose—"the use of literary Arabic is exceptional)—they reflect familiar modes of conversation. This is nevertheless a good style of theatre, and it would be a mistake to attribute to it a literary quality which it does not have and which it does not claim. The con-

After 1965, Algiers no longer held a monopoly over theatrical life. While, in the context of cultural decen-

dralisation, five regional theatres were progressively established in Constantine, Oran, Sid Bel Abbass, ʿAnnaba and Bejaia, groups of amateurs proliferated in the provinces. In 1970, seventy such groups were counted as regularly attending the annual festival of Mostaganem. Their members gave dramatic treat-

ment to topics of contemporary interest: agrarian reform, socialist development of commerce, emigra-

tion, education of the young and the position of women in Algerian society. This last problem formed the subject of lengthy public debates at the conclusion of plays devoted to it whose the troupe Théâtre et culture performed in Algiers in 1970. Similarly, Le groupe théâtral de l'action culturelle des travailleurs scored a major success both in Algeria and among expatriate com-

munities in France with the performance in 1972 and 1973 of a dual Arabic and dialect version of Charles Dru and Jamal el-Khoury (al-

Khôba, "Breath") by Abdelkader ʿAlālū and El Agra (al-

Agra, "The Sterling") by Zahir Bouzrar (1972-4).

The intentions of other authors are not displayed so openly, but they are no less evident. Such for example is the case of Slimān Benaiissa who, in Boualem zid el-
analysis and taking the measure of the human condition.

Morocco.—As in Algeria, it was not until after the First World War that theatre made its appearance in Morocco. In 1923, an Egyptian troupe led by Fez al-Din al-Masri made a tour of the country during which its most notable production was Salâth al-Din al-Ayyûbi, a historical drama in literary Arabic by Nadîb al-Haddâd, which Dürûd Abyâd had performed two years earlier before Muslim audiences in Algiers. This event inspired several young intellectuals of Fez to present similar spectacles to their contemporaries. They formed a company whose principal organisers were Muhammad al-Durrî, Mahdî al-Mnâïî and Ibn Shaykh. The first wrote about a dozen plays on themes dealing with the political and social scene: he denounced the protectorate régime, extolled national sentiment and stressed the poverty and ignorance which were the lot of the popular masses. Soon arrested, he died prematurely. His successors, who shared the same ideas, embraced political theatre with increased vigour. In 1929, there were enough of them to justify the holding at Fez of a contest to find the best dramatic actor. The winner was a student of the university of al-Karawîyîn who celebrated in literary Arabic the virtues of education in the cause of progress and of the struggle for the liberation of the country.

From 1934 onward, the theatre reflected the demands of the Comité d'action marocaine of `Allâd al-Fâsî which, in particular, sought the reform of Arab education, freedom of the press and the repeal of the dahîr of 16 May 1930 codifying traditional Berber law. In the wake of violent public demonstrations at Fez and Meknès in 1934 and 1937, public meetings were forbidden. This measure had a severe impact on the theatre which took refuge in semi-secrecy. Henceforward, groups of players performed only in private sessions on the occasion of family celebrations. Short, humorous and sometimes satirical plays were shown, featuring known characters or current events, and these were much enjoyed by the audience. The state of limbo to which this theatre of controversy was reduced, banned or legalised according to changing circumstances, persisted until Independence.

The years following 1956 were marked by an intense intellectual ferment, to which the theatre contributed a major part. In the chief cities of the country, numerous amateur companies mounted spectacles combining all elements: evocations of the recent past and of ancient history, borrowings from Arab folklore or from foreign literature. To this scintillating period belong several remarkable works, including Les Fourberies de Scapin, adapted from Molière's Les Fourberies de Scapin, which achieved a huge success both in Morocco and in France, where it was awarded a prize at the Paris Festival of the Nations in 1956. The public authorities encouraged initiatives aimed at popularising the theatre and took various measures with the purpose of putting its activities on a sound footing. It was thus that there was established in 1959 a centre for drama studies designed to train actors and theatre technicians. At the same time, a national company was founded, bringing together the best actors of the time: al-Tayyib al-Šiddîkî, Ahmad al-Tayyib al-Šaldh al-Din al-Ayyûbi, Abd al-Šamad Dînîû and Bashîr Skîrîd; finally, financial support was henceforward offered to groups of amateurs who were invited to participate in the annual festival of dramatic art. This official attempt at imposing structure on the theatre was only a partial failure. It encountered difficulties which twenty years later were still not fully surmounted and which had as much to do with the conflicting ambitions of men of the theatre, their personal concepts of dramatic art and the use of the means laid at their disposal, as with the refusal of the public to buy into a process which would integrate them in a bureaucratic system. The combination of these various factors soon put an end to an experiment which had barely begun. In 1962, the centre for drama studies closed its doors. Soon afterwards, the national company broke up and fragmented into several competing groups, while amateur actors were as desirous of support as they had been in the past.

The theatre born immediately after Morocco's accession to independence produced diverse works of very inconsistent quality. The different comic genres continued to enjoy popular approval: sketches, farces, comedies based on mime and gesture, humorous and satirical playlets featuring traditional types such as the naive and miserly Berber, the cunning and selfish Marrakshi, the greedy Jew, etc. On the other hand, adaptations of foreign works abounded: a characteristic example is supplied by The Inquisitive ones by Ahmad al-Tayyib al-Šaldh al-Din al-Ayyûbi, after Molière's Les Femmes savantes. Finally, serious theatre was enriched by historical dramas which, written by young authors, sometimes display the exuberance of youth. In this spirit `Asîz Sâh*rî`îh describes, in The Battle, the heroic attitude of the inhabitants of al-Šajîdî (formerly Mazagan) in their opposition to the occupation of their town by the Portuguese at the beginning of the 16th century. Similarly, `Abd Allâh Šâkrîn devotes numerous plays to the past of his country and develops the theme of resistance to foreign occupation, especially in al-Wâhi`a ("The Battle").

Around the year 1965, changes took place in the world of the theatre. The majority of those who, for ten years, had contributed to the development of dramatic art, abandoned the stage to enter public administration. Among the pioneers, only one remained at the forefront: al-Tayyib al-Šiddîkî.

Born at Mogador in 1958, his father a teacher of Arabic and his mother of rural origin, al-Šiddîkî spent his childhood in his native town. After studying at the High School of Casablanca and a brief period of working in postal administration, he began his stage career at eighteen years old, in an Arabic adaptation of Les Fourberies de Scapin which, as indicated above, enjoyed major success in Morocco and in France. Al-Šiddîkî then spent two years in Paris, where he learned techniques of production from Hubert Ginioux at the Comédie de l'Ouest before acting for a season at the Théâtre National Populaire, under the direction of Jean Vilar. Returning to Morocco in 1958, he devoted himself entirely to the theatre. Under the auspices of the Union marocaine du travail, he established the Théâtre travailliste, setting up his stages on the Casablanca waterfront and mounting productions adapted from plays by Aristophanes and Gogol. This experiment lasted no longer than two years, after which he formed his own company, consisting of a dozen players who followed him to the Municipal Theatre of Casablanca when in 1964, at twenty-six years old, he took over its direction. Simultaneously, actor, producer, director and administrator, al-Šiddîkî exerted himself unstintingly in efforts to draw the masses of his fellow-citizens to the theatre.

In ten years, he wrote, translated, adapted, presented—almost invariably in dialect—about fifty plays with widely varied themes. First, productions, as more generally, large-scale exhibitions dramatising events of the past of the present: Les Femmes savantes, Zaouia d'Oued Meghezem, Marrakech 1973, etc., huge pseudo-
historical tableaux performed in the open air on the occasion of the annual festival of the tolba. Next came pieces inspired either by classical Arabic literature, such as the makāmāt of al-Hamadhānī, or by the oral tradition as expressed, for example, in the rhymes of al-Madhūb [q.v.] which are still today recited on many occasions in the Maghrib. Finally, al-Siddīkī adapted some forty foreign plays, from Jeu de l’amour et du hasard by Marivaux to Amédée by Eugene Ionesco and En attendant Godot by Samuel Beckett. In sum, we have burgeoning répertoire continually enriched.

In fact, al-Siddīkī sought to provide himself with a lasting supply of material by vigorously seizing everything suited to his purposes, as much in the living popular culture as in foreign works. This versatility corresponded, in his personality, to a threefold concern: to try to interest the largest possible public by offering it numerous and varied productions; to make it aware of the problems faced by contemporary man in the political as well as the social and cultural domain; and to engage it in debate by establishing a dialogue between actors and audience. These parties could not communicate except by using the language of daily conversation. Al-Siddīkī knew that he was risking the disapproval of the partisans of literary Arabic, but he believed that this was a price worth paying for the development of the theatre in his country.

The prestige of al-Siddīkī should not obscure the efforts of writers and actors of lesser importance who for the most part have shared his motivations. There are several scores of them contributing to theatrical life in the main cities of the kingdom, Rabat, Fez, and especially Tangiers. Radio and television regularly devote broadcasts to the theatre, both in literary Arabic and in dialect. Studies of the traditional methods of performance (kisāʿ, ḥalqa and ʿurr) are followed at centres of popular arts. As in Algiers and Tunisia, annual competitions are formed to reward the best dramatists. In short, significant efforts are being made in Morocco to promote and to popularise the theatre.

In the three countries of North Africa, there is periodic talk of crisis in the theatre, expressed in various terms of which the most often heard refers to the paucity of writers, poor standards of performance-venues, public apathy, meagre patronage and the excessive cost of seats. In fact, it is perhaps in the very prosperity of the theatre that the true reasons for the crisis should be sought. Dramatic art in the Maghrib is suffering from inflation. There, as elsewhere, many are called and few chosen. The quite considerable number of mediocre works, hastily mounted productions, insufficiently trained actors, the excessive publicity applied to performances or performances of average quality, the constant confusion between original works and those which only pretend to be such, the urge to educate at any price—all these factors are liable to hinder the progress of the theatre without, however, truly threatening its existence. On the contrary, one is constantly surprised by its vitality, the constant innovation on the part of the young people who devote their daily energies to it—writers, producers, designers and actors—even if the coordination necessary between these elements is not always evident and the style of the particular period is not accurately invoked. What is clear, in any case, is that theatrical people are not doomed, as were their predecessors, to work in isolation. The problem of the relationship that they must establish with the public has never been better addressed than ever before. In conclusion, the basis of hope for the future is founded as much on the development of communication between actors and audience as on the success of an art form.

III. Morocco. Hassen El Mniā, Du côté des

3. In Turkey.
The art of theatre in Turkey developed from the same religious, moral and educational urge to imitate human actions that accompanied its growth in ancient Greece. There are four main traditions of theatre in Turkey: folk theatre, popular theatre, court theatre and Western theatre. Improvised theatre developed in two complete different social environments: as part of the popular theatre tradition in big cities, such as Istanbul, and as part of folk-literature. Although the two traditions seem poles apart, they are essentially not so different in spirit as external characteristics might suggest. Both are extempro and non-literary. In both traditions, the action gains naturalism and vividness by spontaneity, and in both the language is simple, direct and strong. Performances were held at ground level in an arena, thereby lending flexibility to the acting and helping to create intimacy with the audience. Although highly different in presentation, techniques and conventions, both theatres have approximately the same genres: puppetry, storytelling (acted out), dramatic dancing and rudimentary play by actors.

Unlike most Asiatic countries, Turkey had no greatly individualised and distinctive court theatre tradition. Until the period of Westernisation, court theatre simply imitated popular theatre. The courts of mediaeval rulers all over Anatolia attracted dancers, actors, storytellers, clowns, puppet masters and conjurers. They performed only for the aristocracy of the periods—that is, the periods of "reorganisa-

tion" and "despotism"; the second major period, from 1908 to 1923, is that of the Revolution of 1908; and the third from 1923 to the present can be called the Republican period.

Four public playhouses were built in the first year of the Tanzimât period: a Western theatre, a playhouse for performances of traditional Turkish theatre, and two large amphitheatres for circus-like spectacles. (Before this date, however, there were probably several temporary theatres. For instance, documents have established that in 1830 a theatre was under construction in Izmir.) This theatre construction was important to the development of Western theatre in Turkey. As the Tanzimât intelligentsia pointed out, what distinguished Turkish traditional theatre from Western theatre was the latter's reliance on playhouses and written texts. With the opening of four theatre buildings in 1839, the first major distinction had been breached. The second, the development of written text, was to follow.

To go ahead in time, 1908 saw the restoration of the constitution of 1876, and what is commonly called the "Declaration of Freedom" (Hürrîyetti tâhâni). The political change brought a reawakening of the nation's creative theatre life, and the years that followed have been identified by drama historians as the theatre of the Constitutional period. To summarise, it may be said to have begun with the declaration of the Republic on 23 October 1923, first of all because the Republican period finally saw the removal of an obstacle which had been blocking the development of Turkish theatre: the ban against the appearance of Turkish Muslim women on the stage. Though some courageous Turkish women had previously attempted to break this ban, and a few musical comedies called The fugitives from the ballroom (Balâ kacaklari), and the picture of the leading actress Sedâ德 Nazîre Khâmîn, was featured on the cover of a women's magazine. The following year two women appeared in a performance of Shakespeare's Othello, Badîiyâ Muwahhid as Desdemona and Nceyire Neyyir as Emilia. With this general view in mind, the development of Western-style theatre in Turkey can be analysed in detail.

In 1839 the Royal Decree of Gülhane inaugurated the Tanzimât period, important as a period when an audience for theatre was created, professional personnel developed and playwrights emerged to write hundreds of plays. Among the factors which helped facilitate the establishment of European theatre in Turkey, the following are important.

The sultan and his environment. Three reformist sultans were especially important to this development: Selim III and Mahmûd II, both prior to 1839, and Abd al-Magjid. In 1836 Mahmoud II's library contained 500 plays, of which 40 were tragedies, 40 were dramas, 30 were comedies, and the rest farces and vaudevilles. The sultans sometimes attended public performance, and were a kind of insurance against opposition from fanatical orthodox quarters. When the latter attacked the notion of theatre, the sultans would use the sultan's support as a defence: "Would you know better than His Maj-

esty, not only our Sovereign but the Caliph of all Muslims, who is building a theatre in his own palace,
and rewarding foreign and native actors? He himself honours performances on many occasions. 4 'Abd al-Aziz was not so keen on the theatre as his predecessors, but it was during his rule that Turkish theatre had its golden age. During the thirty-three year reign of his successor, 'Abd al-Hamid II, despotism and rigid censorship halted positive developments in the theatre, and public theatre almost ceased. Nevertheless, he himself had two theatres built in his palace, where he maintained two permanent, salaried theatrical companies, one foreign and the other native.

Turkish statesmen and ambassadors also contributed to the development of Western-style theatre. Early in 1870, the Grand Vizier 'Ali Pasha unsuccessfully tried to establish a national theatre, but later that year he achieved his objectives by granting Gülü Agop, director of the Ottoman Theatre Company, a ten-year monopoly.

The press was another important factor in promoting Western-style theatre. Newspapers appeared in Turkey at just about the same time as the theatre, and many journalists began to write plays. Naturally, newspaper reports and reviews of theatre activities helped stimulate and guide public opinion. Foreign embassies, especially the French and Italian ones, played an important role, since many of these embassies had their own theatres. Both foreign and Turkish actors were often invited to private performances. The embassies were also instrumental in bringing theatre and opera troupes to Turkey from their own countries. Non-Muslim minorities contributed greatly to the development of Western theatre in Turkey, most importantly, the Armenian community. An important role was also played by the cultural centres of other minorities of residents: the German one with its Teutonia, the French with their Alliance Française and the British and Italians through various theatre organisations.

Western theatre was perhaps most strongly promoted by visiting foreign troops, many of which stayed as long as a whole season and gave regular performances. Some of these companies included the leading musical and artistic talents of their nation. These and Turkish actors often learned their profession by watching these performances. Some seasons were so rich that the several foreign companies gave parallel performances, as for example on 11 September 1896, when there were three different performances of Verdi's Aida in Istanbul. Some of the operas of Verdi, Donizetti and Bellini were performed in Turkey before they were seen in Paris or other European capitals. Because of the influx of foreign companies, many more theatres were built. Often when these companies returned home, some of their members remained in Turkey, and it was from these actors, directors, set designers and conductors that Turkish theatre people learned their skills.

As has been pointed out, for the intelligentsia of the Tanzimat period, the establishment of a Western theatrical tradition in Turkey was dependent on the building of theatres and the availability of written texts. The first modern Turkish play dates from 1859. Called The poet's marriage (Bir şah'în evlenmesi), this satire on prearranged marriages by the poet İbrahim Şinasi had been commissioned for the newly-completed court theatre of the Dolma Bagche Palace. Though it was the first Turkish play written by a Turk in Turkey, it was not the first Turkish play. The first Turkish play, attributed to those of the Azerbaijani playwright Mirza Fethi 4 'Ali Akgündüz (1812-78), who wrote six comedies between the years 1850 and 1855. His popular plays were translated into Russian and later into the various languages of the present-day Soviet Union, as well as into Persian, French, English and German. Though Akgündüz preceded İbrahim Şinasi and enjoyed wide popularity outside his own country, Şinasi's short play demonstrates greater skill.

Mention should also be made of a Turkish manuscript found in Viennese archives by Professor Fahir Iz, The strange and curious tale of Ahmet the Cobbler (Wakdyî-i *-adj_ibe we hawddith-i gharibe-yi kefsher Ahmed). Dated 1809, the manuscript, contains translations of the play in Italian, German and French; the name Iskerleç on it is probably that of the copyist. Two more plays were subsequently found: one, Godefroi de Bouillon, dealing with the First Crusade; the other, in both Turkish and French, was by a foreigner, Thomas Chabert, and its long title can be shortened to Hâdîdî Bekdîsh or the founding of the Janissaries. The source of these texts was the Paris Ecole des Langues Orientales, which trained translators for the European embassies in the Middle East countries. Some of these plays were actually produced in the school. Years later, the catalogue of Turkish and Persian manuscripts in Poznan listed another version of Ahmed the cobbler and another work entitled Nasreddin Hoça's appointment to an official post (Nasreddin Khâgûnî nin mansûbî). The manuscript, translated into German, Italian and French was like the earlier-found version of Ahmed the cobbler dated 1809, but the Poznan copy of Ahmed the cobbler bore the signature Dombay, instead of Iskerleç, and the Nasreddin Khâgû play was signed Johann Lippa. The evidence suggests that in the School of Oriental Languages, Turkish was taught by members of the Turkish embassy staff. Though they doubt wrote these plays, they chose as professional diplomats to remain anonymous. They probably dictated them as exercises to students, who in turn translated them into the three major languages of the Austrian Empire. Written from dictation, the manuscripts contain spelling errors, but since the authors were Turks, there are not many mistakes in syntax.

Other plays in Turkish that pre-date Şinasi's were only translations, some of which were performed but never published. For instance, 'Abd al-Medjid's chamberlain, Safêt Bey, translated Molière's plays for performance by the young Turkish musicians of the imperial band, and in 1845 the sultan invited three of his doctors to be present at the Turkish performance of two of Molière's plays, one of which ridiculed the medical profession.

Many foreign plays were translated into Turkish and performed by the Armenian theatre companies prior to the foundation of the Ottoman Theatre. Some of the plays that pre-date Şinasi's play are in Armenian characters. The earliest, published in 1813, is a translation of Molière's Le médecin malgré lui. Four plays by Metastasio were translated into Turkish and published in Armenian in 1831. Since the source of these latter plays was the Bible, it seems likely that they were used to propagate the Christian faith. Unlike contemporary Turkish texts, they do not contain Persian or Arabic words. Lithographed translated texts of opera libretti for Turkish audiences are very rare, but there are some in the Topkapi Museum and in private collections. An Italian opera on Turkish subject, The siege of Silistra, written in Turkish and performed there, has libretti in both Italian and Turkish.

Some students of Turkish theatre consider the first Turkish play to be Khayr Allâh Efendi's Hikâyeye-i İbrahim Pasa, a 19th century version of a 16th century
story about Ibrâhîm Pasha of Sulaymân the Magnificent's time. The manuscript of this play by the father of the well-known Turkish poet and playwright 'Abd al-Hâjj was discovered by İsmâ'îl Hâmî Danışmend in 1939. Written in 1844, fifteen years before Şinâşî's play, when Khâyûr Allâh was a student in medical school, it is little more than a rough draft by an amateur, probably never meant to be seen by others.

The Armenians and Levantines of Istanbul gave Turkey its first Western theatre in the Turkish language, generally adapted to local theatre tastes and conditions. Before the Armenians became active in the theatre, the private residences of foreign embassy personnel were the only places in which Turks could see Western theatre and opera companies in their own languages. By the third quarter of the 19th century, however, the Istanbul Armenians had established two companies that sought a wider Turkish audience. First, a company called Şâirk ("The Orient") and, later, one called Vaspûrakan, came into existence, both of which translated, adapted, and performed European plays in both Armenian and Turkish.

The most important effort in this Armenian-Turkish development was that of the Ottoman Theatre Company at the Gedîkpaşa Theatre in Istanbul. Headed by an Armenian Agop Vartovian (Gûllû Agop), the company prepared the way for a genuinely national Turkish theatre, training and directing his actors in original Turkish plays. Sometimes given minor roles, the Turkish actors helped correct the pronunciation of Armenian performers, and Turkish writers were employed to make sure that the translations were idiomatically correct. The proceedings inevitably aroused the enthusiasm and support of university students.

But the guiding spirit remained Gûllû Agop, who completed this Armenian-Turkish integration by eventually becoming a Muslim. In 1868 he committed his company to performances of plays in Turkish, and in April of that year he offered Istanbul its Turkish-language modern theatre production, a translation of a French play entitled César Borgia. This production was received somewhat unenthusiastically, and Gûllû Agop immediately followed it with a tragedy based on the Turkish romance Leylâ and Majnûn by Muşafâ Efendi. The following year saw a marked increase in original Turkish plays.

As noted earlier, in 1870 the Grand Vizier 'Ali Pasha granted Gûllû Agop a ten-year monopoly of the production of dramas in the Turkish language. This patent, however, required him to open new theatres in various parts of Istanbul within a given time. Other would-be-producers barred from producing plays in Istanbul by Gûllû Agop's monopoly, were encouraged, occasionally by prominent statesmen, to open theatres in the provinces. One such man, Dîvâ Pasha (1825-80), brought a company from Istanbul, and another theatre was opened in Trabzon by the governor 'Ali Bey, who was a playwright. In Bursa, the governor Ahmed Wefîk Pasha adapted nearly all of Molière's plays into Turkish and personally ran his own theatre, training and directing his actors and inspiring talented Turkish authors to write plays.

In Istanbul, Gûllû Agop's monopoly was soon challenged, first by an open company which claimed that his patent did not apply to musical performances on stage, and then by ototayuna [q. e.] actors, who used every subterfuge to put on plays indoors as well as outdoors. They charged Gûllû Agop with having failed to build the new theatres called for in his patent, and that in any case their performances were improvised, without text or employment of a prompter, and therefore not covered by the monopoly. Thus the seed was sown for a new theatre that could perhaps better nourish itself in the native tradition than the borrowed theatre translated from European literatures or directly imitative of them. With their tâlû'a'at (improvisatory) theatre, which filled the outline of a vague plot with local events, incidents picked up from the newspapers, or from street gossip, the ototayuna players gave their generation a kind of commedia dell'arte which stands midway between the traditional Turkish theatre and the imported Western theatre. However, after the Ottoman Theatre Company, was abruptly abolished by an order of the sultan in 1884, theatre activity in Turkey generally suffered an eclipse.

The second phase of the Western theatre tradition in Turkey is considered to have begun in 1908, the year of the constitutional revolution and to have ended in 1923, the year of the proclamation of the Republic. It was an important transitional period, a time of political turmoil. It also marked the restoration of theatre and some attempts to develop in new directions. The early months of 1908 were full of tension and excitement, as the new regime was being greeted with understandable delight. The theatres shared this enthusiasm, and put on productions suited to special occasions. Many new theatres sprang up under the leadership of such directors as the Armenian Agop, and during the next fifteen years they changed names and administration in rapid succession, some managing to survive only briefly. Too often, dramatic offerings were supplanted by political speeches and demonstrations meant to fire audiences with liberal enthusiasm. Plays previously banned by 'Abd al-Hamîd's censorship were revived to stir up the populace against the former regime. The dominant genre of theatre was the pièce de circonstance. These works were set in contemporary Turkey, and their protagonists were the Young Turks, the leaders of the Union and Progress Party, who were shown as patriots, while the supporters and followers of 'Abd al-Hamîd were portrayed as opportunistic villains. Playwrights of the time saw theatre as a vehicle for the abasement of the former regime on the one hand and for enthusiastic praise of the constitutional reforms on the other. Thus the deluge of bad plays continued.

The theatre was also an ideal instrument for the strengthening of civilian and military morale. Wars followed in dizzy succession during that period, among them the Turco-Italian War of 1911, the Balkan War of 1912, World War I, and finally the 'Turkish War of Independence'. A long series of Turkish plays were loosely constructed from topical scenes derived from some recent war, glorifying the struggle of the Turkish people against their enemies. Other plays dealt with Ottoman history, lauding Turkish heroes of the past. The emphasis was always on solidarity and preparedness for war. Needless to say, most of these plays were extremely ephemeral.

Nevertheless, this period saw a number of significant developments in the theatre. Religious and official attitudes mitigating against the appearance of Turkish Muslim women on stage began to give way in 1919, when for the first time an actress—her name was 'Affî—appeared in a play on the Turkish stage. Though her career was not without difficulties, her example was soon followed by others.

The same period also saw the establishment of a school of drama and music in Istanbul. It was organised in 1914 by André Antoine (1859-1943), founder of Paris's Théâtre Libre, who had come to Turkey at the invitation of the mayor of Istanbul. In
1916, it started giving public performances, gradually becoming more of a theatre than a school and leading to the establishment of the present Istanbul Municipal Theatre. It was also during this period that many native playwrights and theatre men of distinction started their careers. Until the Constitution of 1908 and the dethroning of Abd al-Hamîd, government censorship discouraged the development of playwrights. After the reforms, however, there appeared dramatists who treated a variety of previously forbidden subjects. Several professional, semi-professional, and amateur companies were active in this period. Among these were the Şahîn-ye Hewes (formed by amateurs, among whom there were playwrights), and the short-lived Şanâyi-i Nefse. Amateurs later formed other troupes, such as Mûrebîbi Hüsiyyet, which was housed in the Othmânî Agha Theatre. Burhân al-Dîn Tepsi, a pupil of Silvain, studied drama in Paris and subsequently formed a company which gave regular performances. It was followed by another company called Dâr al-Tamâmî-i Othmânî, formed by the actor Hüseyn Kâmi Bey. Certain playwrights, intellectuals and actors unsuccessfully planned to found a national theatre. Other attempts in this direction were the Othmânî Tiyatrosu Kulûbû (Ottoman Theatre Club), the Istanbul Kumpanya, and the Sultan Selim-i Saadet Tiyatrosu. In the same period, the Perseverance of Warships, the Othmânî Donnanma D journalism was formed. Other important companies included Miñâkinâ's Ottoman Theatre and the Binemedjiyan Company.

The present period of Turkish drama dates from the proclamation of the Republic. This and the reforms of 1925-8 opened a new era and quickly brought about official approbation and government support of culture and drama in Turkey. The Turkish language was revived, and there was increased interest in bringing to audiences works based on national history and folklore. Because the state considered drama to be an essential element in the modernisation of Turkey, it assumed full responsibility for the actor's professional career. The state conservatory established in 1935 in Ankara for training actors, actresses, opera singers and ballet dancers has since then greatly advanced the development of Turkish dramatic arts. When the course at that school has been completed, the student is taken on as a member of the leading State Theatre Company, which is founded by the government and functions under the Ministry of Culture. Additional funds are obtained from the sale of low-priced tickets. Providing security and opportunities for work in the theatrical profession, the State Theatre now operates with ten or more stages. In recent years it has produced excellent productions of foreign playwrights, from Sophocles to Edward Albee, and has introduced new Turkish dramatists. Along with several private theatres, it has been sending companies on one or two-month tours throughout the country. The Halk evleri (People's houses) [see KHAIR EY] were established in 1931 and furthered cultural emancipation through a concerted programme of literary, artistic and mainly drama projects. Despite its success, this movement was disbanded on political grounds. The present trend is toward the establishment of regional theatre companies. Theatre activity in Turkey is still mostly confined to the two largest cities, Ankara and Istanbul. The latter has about 25 private theatres, as well as 5 owned by the municipality. Privately-owned and managed theatres do not receive government subsidies or tax relief. In addition to the 4 theatres of the State Theatre Company, Ankara has several private companies, although the number varies from season to season. Owing to the competition of television, most theatres are almost invariably half-empty; therefore, while there appears to be a highly active theatre life in Turkey, this is now only superficially so.

From the point of view of the development of Turkish drama, the Republican period can be subdivided into two main sub-periods: from 1923 to 1960, and from 1960 to the present day. Though rooted in a relatively short tradition, recent Turkish drama has shown considerable promise. Until 1960, the works seen on the Turkish stage reflected few of the changes which had overtaken the country. Some were poor copies of Western plays, in which an effort was made to assimilate the latter's surface qualities. The pre-1960 dramatists tended toward pseudo-symbolism or psychological realism, in which characters worked out their fate in an almost societyless vacuum. Highly popular were the traditional lightweight comedies that amused the audiences without ruffling their composure: plays focusing on unusual or off-beat characters: plays hammering on the theme that money is the root of all evil: plays on the inevitability of fate: plays involving dreams and psychoanalytic themes: plays on the eternal triangle; plays that made fun of puns and stock characters: plays contrasting big city and provincial life; plays in verse which failed to be poetic; and sentimental plays on themes of love, altruism and self-sacrifice. Dramatists most often provided only a sketchy treatment of these themes.

After the Army junta overthrew the Menderes government in 1960 and promulgated a new constitution in the following year, the theatre turned to a more outspoken treatment of contemporary problems. Though theatre was excluded from preliminary censorship, a long list of moral and political taboos remained in effect. Nevertheless, the new values imposed by the 1961 constitution lie behind every problem play of the period. Turkish dramatists were working toward some moment of release from constrictions, both self- and externally imposed. By 1960 they did not dramatise current affairs, but many playwrights writing before 1960 suddenly seemed to find new energy and new forms of expression. This lasted until the 1970s. During those memorable ten years, Turkish theatre enjoyed a vitality that enabled it to deal with problems of current social and political importance. In 1969 serious social, economic, and political unrest descended upon Turkey. Rural inhabitants were flocking to the big cities in search of work and student violence was erupting in the streets. Severe new codes were enacted which subjected the big cities to martial law. People naturally preferred to spend their evenings at home watching television, then quite a recent innovation in Turkey. Between 1960 and the 1970s, private theatre had mushroomed in Istanbul and Ankara, but many now closed their doors, leaving others that are still struggling to survive. Two theatres deserve special mention: Doostlari Tiyatrosu (Friends' Theatre) in Istanbul, and Ankara Sanati Tiyatrosu (Ankara Arts Theatre). Both are private theatres, and are socially and politically committed to the left. Thanks to their loyal audiences and staffs, they have been able to resist the tide. A new generation of aspiring playwrights began to appear in the 1960s, and a changing society provided them with ever-new material. For convenience, the considerable dramatic output of the Republican period can best be broken down by its main focus and
theme. Contemporary man’s sense of isolation, alienation, and loss of identity are dealt with in various plays. Plays about individuals caught in the cultural conflict between traditional values and modern Westernized ideas and manners are the subject of a number of plays. Peasants flooding into the big cities and being forced to live in slums are another topic. Many plays involve lower-middle class or working-class families in the grip of financial difficulties, and show the family as a microcosm of world problems as they fight against disintegration. Since 1960s there have been plays highlighting and revealing the role, the problems, and the social position of modern Turkish women. Some plays can best be described as village or peasant plays offering authentic pictures of village life in out-of-the way places. They deal with such problems as corrupt landlords and local administrators, marriage customs, jealousy intolerance, superstitions and family feuds. Some playwrights take their inspiration from mythology, old legends, local history and the history of previous civilisations. Plotless plays presenting glimpses of assorted characters and their everyday lives are often introduced by a narrator and depend largely on their atmospheric quality. Often they contrast an “inner” and an “outer” world. Many plays highlight political and social revolutionary ideals, the conflict between capital and labour, business ethics, and the fight against Fascism. Idealistic whose zeal mirrors those from contemporary Turkish reality are dealt with in a number of plays. Of a more general nature are those symbolic dramas concerned with such themes as man’s place in the universe, analyses of social organisation and criticism of contemporary mores. In recent years, Turkish dramatists and theatre groups have been experimenting with new forms and unconventional structures. Western culture is now seen not as an ideal model but as a contrasting tradition. Playwrights have also become aware that “modern” theatrical trends in Europe have their counterparts in Turkish traditional theatre, and this has facilitated their absorption into contemporary Turkish theatre. For example, the tradition of Karagöz [q.v.] or shadow theatre has been supplied with new scripts designed for performance by live actors. The contribution of traditional Turkish theatre far transcends mere borrowing or superficial treatment. It stems from the very essence of traditional theatre: a sense of anti-illusionistic rapport between the actors and the audience, an open or flexible form, the attempt to give the impression of improvisation and total theatre in performance, and the use of music, dance and songs as adjuncts to drama.

The history of the theatrical arts in Iran is obscured by the fact that they have only recently acquired a place among the manifestations of Iranian culture to be considered. Literary drama known from pre-Islamic times onwards, although it did not become numerous enough to allow us to describe their origin and development in detail until the last few centuries. Iran even made a unique contribution to Islamic civilisation by creating a form of religious drama [see TA'ZIYEH]. A common feature of these types of drama is that they are based almost entirely on improvisation so that they only rarely have left traces of their past existence in the form of written plays. They belong essentially to popular culture, even if they were adopted by the courts and by members of the educated class as forms of entertainment.

Religious objections to the impersonation of living beings, and to frivolous entertainment in general, being as they were prevalent during the Islamic period, have undoubtedly been an impediment to the development of serious drama. Already before Islam, however, dramatics did not play a prominent part in Iranian culture, at least not in that section of it about which we possess any knowledge. The Greek theatres which existed in some places after the invasion of Alexander remained a foreign element and soon disappeared without having exerted a noticeable influence.

The Sāsānīd kings amused themselves with the performances of minstrels, singers and musicians, as well as with many other kinds of entertainment. Descriptions of these court traditions can be found in the Pahlawi book Khusraw and his page and in many Islamic sources (cf. M. Boyce, in JIRAS [1957], 10-45). They provided a model for the amusements of polite society in later times. This tradition continued without fundamental changes till it came under the attack of modern types of entertainment. It remained close to the popular tradition of performances, called ma’rīka, a rope-dancer, an acrobat, a magician or a leader of dancing animals. Literary sources seldom pay attention to these types of folk art, but a remarkable exception is the Futuḥawat-nâma-yi sulâhî, by Kâshîf (q.v.; see also Galunov, Iran, iii, 94). The earliest observations of such performances made by European travellers date from the 17th century (cf. e.g. J. B. Tavernier, Les six voyages... en Turquie, en Perse et aux Indes, Amsterdam 1678, i, 442-3 (performances at the masdn of Tabriz); J. Chardin, Voyages en Perse, ed. L. Langlès, Paris 1811, iii, 326 f. (variety at Tabriz), 180 R. (wrestlers, sword fighters and fighting animals at Isfahan), 436-64 (Exercices et jeux des Persans)). At the social occasions held at the courts or in private mansions, singing, playing and dancing were among the principal amusements. Central figures were the minstrel (khosuyār; cf. the description of his craft in ch. 36 of the Kâbâb-nâma by Kay Kâwîs [q.v.], ed. Tehran 1345/1967, 193-7), and the singer-musician (mawrîb), who appears frequently in Persian literary works and also entertains at a local court about the end of the 5th/11th century is presented in a short ma‘nawi poem by Mas‘ūd Sâ‘d-i.
The most important types of puppet-play which until quite recently were current in Iran belong to the kind in which the puppets are shown directly to the public. The shadow-play never gained in Iran the prominence which it had in the folklore of other peoples of the Middle East (see KHYAL AL-ZILL) and disappeared already quite early without leaving many traces. A variety making use of glove puppets was called pahlavan-kalal ("the bald hero") after its leading character who also appears however in other forms of popular theatre. It was sometimes called pand or, because they were required to play the stock parts of the show, much more elaborate was the khayma-shab-bazi, a marionette theatre operating, as the name implies, at night and enacted, at least originally, in a tent. The performers were itinerant artists who were reckoned among the lilit (q.v.) or the gypsies. In the present century, the khayma-shab-bazi was also played at a fixed locality such as the kaft-ye shahidbari at Tehran between 1941 and about 1950 (Baydawi, Namayish, 110 ff.). The puppet-player (ustad) and his assistant (shahid) manipulated the figures from behind a screen and let them speak. They used a small whistle (suktabak) to imitate high-pitched voices. In front of the scene, the leader (murfid) introduced the performance and argued occasionally with the characters of the play. Musical accompaniment was played on various instruments.

The variety shows performed by live actors originated from the acts of individual performers of different types. There is perhaps a historical connection with folk traditions, such as the installation of a mock king at the time of the New Year festival, which was practised in parts of Iran until quite recently (cf. M. Kazwini, Min-i Nawzi, in Yadgar, ii/3, 13-6, who described an instance of the custom witnessed at Budjurd in 1923). Wandering groups of actors used to perform humorous sketches during this holiday. One of the stock figures was known as Haji Piruz, a clown with a blackened face. Jesters, called dalkak (originally talkak) or maskhana, have been common in Iran since ancient times. They were present in the private madfis (q.v.), as well as in the public square. In the middle of the 19th century, the maskhana could be seen at Isfahan in the twenties of this century, was the shahri-firang (a name referring probably to its European origin), a metal case inside which a roll (jamda) could rotate to show pictures one by one through an opening at the front of the case (Narodnyi teatr Irana, 67 ff.).

Puppet-shows were known in Iran already during the Middle Ages, as is witnessed by many references in the works of classical poets to puppets (khyi, la'bat) as well as to certain props of the puppet-player, e.g. the curtain (parda), the cloth (na'it) on which the plays were enacted, and the box (sandak) into which the puppets were put away after the show had ended. Mention is also made sometimes of a magic lantern (faris-i khyi), but it is uncertain whether any of the known references may be interpreted as evidence of the existence of shadow play in mediaeval Iran (see P. N. Boratav, art. KARAGOZ). Whenever mention is made of puppet-shows in these sources, the intention is to use them as symbols pointing to the thought that the existence of this world and its inhabitants is dependent entirely on God's will. In the Uthtar-nama, a mystical mathnawi poem attributed by tradition to Attar (q.v.), a Turkish puppet-player is presented as an emblem of the divine rule over human destiny. The literary role of the puppet-player, according to the description in the Fustawat-nama of Karghi (see Galunov, Iran, ii, 72-4).
example of a farce performed about 1838, A. Chodzko, Théâtre persan, Paris 1878, pp. x-xiv). A special type of popular theatre was known as batsal-baiz because the play's main character was a rich grocer who claimed to be a hadji and was made fun of by his insolent servant. The latter was often represented as a negro, and plays in which he appeared in a major role were also called isjah-baiz. A variety show including various kinds of entertainment is the ba-bausti or tah-i bausti, which derives its name from the stage where it was commonly performed: a platform on a pond in the courtyard of a house. Occasions when the artists could be summoned, such as weddings and circumcisions, were especially important days in the life of a family. Popular theatre also attracted the attention of the court, where performances are on record from the time of the Zand dynasty onwards. Under Naser al-Din Shah, the favourite court-jester Karim Shira'i led a group who performed batsal-baiz. Plays were also enacted in tea-houses and, in the present century, in small theatres, notably at Tehran.

In spite of its great popularity, popular drama was always under attack from the side of the religiously minded. In the thirties of this century, the government, suspicion of the satires of the popular forms of drama,.permitted them only by decree, that the script should be made and submitted to the authorities beforehand. Perhaps its most formidable opponent, however, presented itself in the form of modern entertainment as offered by cinema and television. Yet the oral tradition of drama somehow managed to survive long enough to make its impact on the development of modern drama.

The theatrical arts were an element of such prominence in Western civilisation during the 19th century that they could not fail to impress Iranians who travelled to the West, including Naser al-Din Shah himself. In comparison with other countries in the Middle East, however, the introduction of Western-style drama to Iran proceeded at a very slow pace. The only instance of a theatre fitted up to stage modern plays before the end of the century was an auditorium in the building of the Dar al-Funun at Tehran. It was used merely for private performances attended by the Shah and his retinue, and even these were discontinued after some time. Plays by Moliere were the first to be translated, or rather adapted to a Persian audience: Guzdrish-i mardumguriz (Le Misanthrope) was published at Istanbul 1286/1869-70 (cf. Browne, LHP, iv, 459-62); other early translations were Tabrzi- i idjbdri (Le Medecin malgre lui) and Gogol's Tabrizi- i medecin (Le Medecin malgre lui) and Gogol's Les comedies de Malkum Khan, Paris 1867). They are closet dramas written without much concern for the requirements of theatrical performance.

The beginning of theatrical performances in public cannot be dated earlier than the first decade of this century. Tabriz seems to have preceded other cities. The Russian consul B. Nikitine saw performances at Raht in 1912. They included at least one original Persian play, on the problem of alcoholism. The female parts were played by men (Iran-i man ghahma am, Tehran 1329/1951, 127-8). In the capital, theatrical activities started about the same time. Among the first companies which gave regular performances were Kamyari- i Iran (1915), led by Sayyid ʿAli Nafr, and the drama section of Iran-i gawashin (1921), an organisation of progressive intellectuals. The Kamyari- i mazkal (1919) brought musical shows on the stage which were modelled on shows performed in Caucasian Russia. Non-Muslims were at this stage very prominent in the Iranian theatre. From their midst came especially the female actors, as the religious objections to the appearance of Muslim women on the stage were still very strong.

Although translated plays continued to hold their importance in the repertoire of the Iranian companies, original plays were also produced. The bi-weekly magazine Tfar published already in 1908 dialogues which criticised the theatre. The playwright of the earliest period was Ahmad Mahmudi, also known as Kamal al-Wizara (1875-1930). In his Hddjdji Riydji Khan he presented a Per-
sian Tartuffe, and in Ustdd Nawruz-i pambaduz a type similar to the bakkdl of the popular farce. This successful comedy ridicules the type of the westernizing Iranian (cf. I. Djamshid, Hasun Mukaddam wa Djo"far Khân as Firang amad, Tehran 1357/1978 repr. Oakland, 1984, with a French translation by the author himself). Its first performance at the Grand Hotel, Tehran, on 23 March 1922, was an important event in the history of the modern theatre in Iran. The drama was used as a literary genre by the poet Muhammad Ridâ Mirzâ 1shki (1894-1924) for works like Idrâl, Kafan-i siyâh and the “opera” Rastakdz. Sâdik Hidayat [q.e.] and many others wrote plays on episodes from the History of Iran. Notable as a playwright was also Djabîb Bihruz (1891-1971).

Under the Pahlawi regime, the theatre was subjected to censorship, but it also received for the first time official recognition as an important section of modern Iranian culture. In 1939 a college for the training of actors, the Hunaristdn-i hunarmanddn, was founded. The leading personality of the theatre in Iran during the Ridâ Shâh period was the actor and playwright Sâyid Alî Naşr (d. 1961). A similar rôle was later played by 1Abd al-Husayn Nushm (1905-70) who was active as a director and a translator of foreign drama, and wrote the handbook Hunarzân-i adabi (195)2.

The rise of the cinema and afterwards of television in Iran broadened the scope of the dramatic arts. Together with the theatre, they benefited from the remarkable flourishing of these arts, which took off in the 1960s and continued until the revolutionary turbulence began about a decade later. The promotion of indigenous theatre became a matter of official concern.

5. In Central Asia and Afghanistan. Islamic Central Asia—Western Turkistan including Kazakhstan, Eastern Turkistan (Shinjiang) encompassing the area of the present Uyghur Autonomous Province, Afghanistan and contiguous territory where Islam was or is professed and Central Asian or Turkic languages are spoken—has known three main types of theatre. Oral folk art probably pervaded the region long before the advent of Islam, although documentation is as yet unavailable to prove it. Muslim religious drama, known especially to Shî'is [see TAVV], received performance as late as the end of the 19th century in certain areas. Modern indigenous drama and theatre using written scripts, fixed stages and enclosed auditoria began activity within the region no earlier than the second decade of the 20th century.

Historical precedents for organised, formal theatrical presentations long existed in the region. A great, 35-tier, semi-circular outdoor Greek theatre was built and ruins survive at Ay Kahanum, a fortified capital city located on the left bank of the Oxus River (Amû Daryâ) at the confluence of the Kokâ River under the Greco-Bactrian Kingdom in the 3rd and 2nd centuries B.C. Additional archaeological finds from the vicinity of Termez (Tirmdh) and Bukhârâ—in the form of Hellenic carvings, dishes, frescoes and sculptures dating from the 1st to 8th centuries A.D.—have depicted the head of Dionysus, the youthful god, patron of drama and wine, as well as musicians playing harps, drums and local stringed instruments. A ceramic ossuary dated to the early centuries A.D. (at Xorazm, under the nose of Samarkand, shows the clear depiction of several actors holding tragic masks. A comic figure originated from

(J. T. P. de Baar)
the same sites. More direct evidence for theatrical life in that period is difficult to come upon. No clear evidence has been reported conclusively linking that activity with the development of indigenous Central Asian theatre art in the Islamic epoch, beginning there no earlier than the 1st/7th century in western Central Asia. It has been surmised that the obligatory attributes of recent folk performers from Khwarazm known to follow the oldest traditions of maddah (clown) art in Central Asia—such as the goatskin mask and two-horned, cone-shaped or simply dishevelled cap of goat's wool—refer to the ancient Dionysian cult, and particularly to the 5th-6th centuries A.D. in Khwarazm (L. A. Avdeeva, in Uzbekskii sovetskii teatr, Tashkent, Izdatel'stvo "Nauka" Uzbekskoy SSR, 1966, 22, 18; Annaya F. Korsakova, Uzbekskii opernyi teatr, Tashkent, Gosudarstvennoe, Izdatel'stvo Khudozhestvennoy Literatury, 1961, figure facing p. 24, 33).

**Oral folk art**. Undoubtedly the oldest continuous forms of Central Asia theatre still existing late in the 20th century belonged to the folk tradition. At their most uncomplicated level came performances by bear trainers, jugglers, stilts walkers, wrestlers and acrobats, horsemen, slight-of-hand artists, balancing artists, animal imitators and dancers. The last two categories often differed from the other entertainers by representing imagined actions to an audience rather than merely executing certain practiced skills. From at least the 9th/15th century onwards in Harat and Samarkand, the existence of the maddah [see maddah] is recorded. He was a professional storyteller who, with gesture and facial expression, added action to words with an extensive repertory of saint's lives, legends and tales told in public. Several storytellers continued to render their dramatic oral narratives as late as the reign of the Amir Abd al-Ahad of Bukhara (1883-1910) in towns such as Mazari Sharif, Afghanistan (Muhsin H. Qadiraw, Ozbek khalk tamashati sanoati, Tashkent, "Okituvi", 1981, 8).

Puppeteers went even further in the direction of dramatization. One of the two best-known varieties of puppet theatre in Central Asia is the tedzhikhayal, a marionette show with both full-bodied and koghirvaklar (marionettes) suspended and activated from above on strings. The second sort of puppet, usually a half-torso figure, was manipulated from below by the hand of the koi koghirvakhaz (puppeteer). Both kinds of shows presented in confined space the interactions of lively figures whose sounds or words came from behind the scene, uttered by the puppet master, who sometimes talked through a tube or thin disk in order to alter his voice for different puppets. The puppeteer sometimes introduced himself, explaining his purpose, the background of the show, the shows, as the powerful men observe monkey trainers, various sensuous dancers in costume, and a military parade. At the end, a devil sometimes abruptly informs these high-ranking sinners of their involvement with theatre in Afghanistan, Mimoigraphed Essay, Kabul, 18 Jan. 1975, 4). This emphasis upon movement and brusque gesture to entertain viewers was carried over to a notable degree into skits and farces by human actors in folk theatricals. Among Central Asians a form of tannya ("show") could be seen that edged much closer than other folk art to modern comedy.

Typical was the short play, Ra's ("The Keeper of morals"), in which a governor's beadle, the main figure, enforces the injunctions of religion and keeps order as well as verifying the correctness of weights and measures in the marketplace. The keeper of morals suddenly appears in a bazaar, creating consternation among shopkeepers and tradesmen, who must submit to scales and coffins where inspectors for the bazaar bring their goods for inspection. Violators bribe the officials flagrantly. In both Tajik and Uzbek versions of The keeper of morals, the traits of a semi-amateur folk performance are well exemplified. Flexible, unstable dialogue typifies the improvisation in the absence of any written script. Audience volunteers and other, less-experienced performers are openly coached during a show by the master of the troupe. The comedic vein is almost invariably ribald, and the subject of the skit confined to everyday activity in town or countryside. No specific site or stage was used or needed for the presentation. This brief comedy placed emphasis, like the puppet shows, upon slapstick, pantomime, and stock characters. The skit depended for its effect largely upon minimal, repeated variants of one action. In The Keeper of morals, peddler after peddler encounters the same moramide at the entrance of his shop and is heavily fined by inspectors. The action moves forward through reiteration and rough jokes made at the expense of offenders publicly humiliated and by the surprisingly varied sorts of bribes offered to ward off extortion. The second part of the same farce presents the keeper of morals similarly cross-examining hapless Muslims concerning their religious duties and the obligatory rituals, and meting out harsh discipline for infractions (Nizam Nurdzhanov, Tedzhikskii narodnyi teatr, Moscow: Izdatel'stvo Akademii Nauk SSSR, 1956, 145-50, 309-14; Muhsin Qadiraw, Ozbek khalk ag'aziki dramasi, Tashkent, Uzbekistan SSR Fannlar Akademiyasi, Nashriyati, 1963, 37-63).

The many playlets extant differed greatly in size of cast. The Keeper of morals was used as many as 50 performers, but some required only one or two. Many received command performances at the Central Asian courts, and most diverted townspeople or villagers as late as the early 20th century. A sizeable troupe of kizikis (buffoons) at the Kokan (Khokand) court of 'Umar Khjan (1809-22) was led by a star, Bedaghim. Succeeding generations of buffoons consider him to be their patron and founding father. (Uzbekii sovetskii teatr, i, 1966, 47). Troupes of buffoons were maintained in the Khivan and Bukharian courts, except during the reign of an amir or khan whose pious priestly duties provoked a ban on public theatricals. In Khujgihar,
under Ya'kub Beg (1865-77) [q.v.], the ra^is and his muhtasibs strictly enforced the Shari^at. They actively prevented vices, storytellers and actors from diverting the faithful. Before Ya'kub Beg's day, Chinese administrators had allowed all sorts of amusements there (D. Bougle, Central Asian questions, London 1878, 6). Popular folk plays included Uylanizh ("The wedding"), humorously revealing a bridgeroom's reluctance to start life with an unknown woman, especially when it is discovered at the unveiling that she is not the promised bride. Another favourite skit, Zokatki ("Golden这个词"), portrays forbidden dances and rituals engaged in by a group of men and women. They make their bacchanal so alluring that even the keeper of morals sent to censure them joins in the festivities. In Mudarris ("The seminary teacher"), the vices of a Marghilan schoolman become the subject of the farce. Massar ("The tomb") turns on the interaction between a venal custodian of a sacred shrine and women and men who bring offer-

ings to the saint buried there.

Plays in this genre depended for their appeal not only upon the familiar themes but upon theatrical style and verve of the performers, as well as on special effects utilising such devices as flashes of gunpowder, fire, the antics of animals imitated by human per-

formers, and stylised, rudimentary costuming. Most of these plays will not have required more than 20 minutes to perform unless the characteristic repeti-

tions were greatly multiplied. Their bawdy nature and irreverence offended the strict religious leaders of the capitals and repelled the urban literati with their crudity. Thus although folk theatre prepared the way for new developments in Central Asian stage activity by whetting an appetite among the public for more plays, it also created obstacles and provoked prohibitions which affected what was to follow—especially when it is discovered at the unveiling that she is not the promised bride. Another favourite skit, 3a7i7a in Iran and India, the episodes attracted fascinated attention of all villagers. These perfor-

mances, with lines chanted in Turkmen—one source

translated and augmented an existing core of mainly enslaved Sunn! Muslims, performances consisted mostly of readings, recitations, and ritual feasting, but included extended daily presentations of the mystery plays. Known as gasha ("imitation"), among them, and as ta^ziyu in Iran and India, the episodes attracted fascinated attention of all villagers. These perfor-

mances, with lines chanted in Turkmen—one source

observed the plays between 1878-81 says that they were in 3a7i7a—were offered by professional players who travelled from town to town during al-

The main segments of this cycle portray the suffering of Muslim, especially bridgemothers, and other members of the Muslim Holy Family and their offspring and retinue. The martyr-

dom of Husayn, in particular, the bereavement of their women, and the death of some children in the unequal battle on the field at Karbala4 in 60/680, comprise the central theme of the drama. Besides the sacred religious power of these episodes, tremendous effective theatrical use is made in them of physical suffering, acute thirst and hunger, personal sacrifice and loss, heroism, and inevitable human destruction. European witnesses have declared that these village presentations offered the most realistic acting the outsiders had ever seen (O’Donovan, ii, 42). Nevertheless, the producers and performers firmly rejected the notion that the gasha qualified as drama and theatre at all. If universal participation of those engaged in those repetitious performances deprives these presentations of a separated audience to watch without acting, and if that lack thus removes the requirement obligatory for theatre, the Central Asians may be justified in distinguishing such celebra-

tions from what they otherwise call "theatre". No serious person denies that the Islamic mystery or miracle play, as it is designated in Western literature, exerts dramatic force and theatrical effect upon both Muslim and non-Muslim. Notwithstanding this fact, no vestige of this precedent, except possibly in historical tragedy, seems to have carried over into the new drama and stage that overlapped chronologically with it in Central Asia.

Modern drama and theatre. Nearly all forms of theatre known actively to the region began to coex-

ist in the civilization of Central Asia once the modern genre appeared. That innovation occurred separately in the three main sectors of the region only after the first decade of the 20th century. Two factors delayed adoption of the new theatre by Central Asians long after visiting troupes began touring in Tashkent and other cities of the Tsarist Russian sector. Racy folk skits had given "theatre" in Central Asia a bad name in polite society. In addition, the Armenian or Rus-

sian troupes that acted there under the Russian conquest in 1876 were not followed by Central Asian or Chinese troupes which only after the Russian conquest in 1876 were not followed by Central Asian or Chinese troupes which
Azerbaijani and Tatar troupes brought their all-male, Muslim casts and plays to Western Turkistan's cities were educated Central Asians able to accept European-style drama and theatre as their own institution. Central Asian women initially performed on stage in Tagkent and Samarkand, when several actresses were recruited as trainees for the Model Uzbek Troupe established in December 1920. Women could not act publicly in Kâbul theatres until 1959, much later than they went on stage in Kâshâbah and Urumchi in Eastern Turkistan, where, following Central Asian models, they freely played roles beginning around the mid-1930s.

Modern indigenous drama and theatre of the region drew its initial audience in Samarkand, Russian Turkistan, in January 1914. 

Pâdarâkhs yakhûd okumânan balaning hâlî ("The patricide, or the plight of an uneducated boy"), written by the Samarkand author Mâhmûd Khâdja Behbudû (1874-1919) in 1911, provided the premier performance of a play by a local dramatist. Thereafter, the short tragedy quickly went on tour throughout the Tsarist Russian sector among Uzbek, Tajiks, Uyghurs and others. Behbudû's theme—the crying need for education—became a standard subject for Central Asian playwrights. Like some folk plays, these Dzadiid (Reformist) dramas invariably focused upon some social issue, sometimes even though they could not have acknowledged any link with folk theatre. The patricide influenced the entire theatrical development for years to come by inspiring many young poets to begin writing for the theatre. They as a rule created didactic works meant to edify or reform the public and its behaviour, and usually avoided politics or outright comedy. Kolbay Toghis ulf (b. and d. unknown) wrote the first Kazak-language drama, Nenuwûl kînbandari ("Victims of ignorance"), which was printed at Ufa in 1914 and performed at Orenburg in 1916, both towns being located in the Tatar-Bashkir sphere at or beyond the northern fringe of Kazak territory.

The play explored serious difficulties arising among the nomads from the practice of polygamy, again blaming abuses upon a lack of enlightenment in the society. Another theme, the curse of pederasty, also reflected public concern over the prevalence of that practice in the sexually segregated urban life of Central Asia. Abduurauf Shahidi (Shahshudîn) (b. and d. unknown), a Tatar schoolteacher living in Koqan, wrote the play first published (1912) in the Turki language of southern Central Asia. The plot of Mâhrâmandar ("Forbidden to marry") dramatised the destructive effect upon young Turkistan boys of the organised homosexual circles in which many were kept by older men of means.

An acknowledged follower of what was termed Behbudûy akîmi (the Behbudûy tendency), Abdullah Kadirî (1894-1939), chose the second most common serious plot, after backwardness, for his drama, Bûgdiy kastav ("The unfortunate bridegroom"), published in 1915 and staged the same year. In it, Kadirî explored the practice and often unhappy consequences of arranged or forced marriage in Central Asian life. That theme emerged, as well, in one of the earliest original plays presented in Kâbul, Afghanistan, in the 1920s, in Izzudîyûd iştîhârî ("A girl's forced marriage"). Similar social themes animated the modern Uyghur theatre in Kâshâbah during its first period, starting after 1933. Drug addiction, polygamy, bribery, stupid pretension and forced or arranged marriage led the list of subjects in the Chinese sector of the region. Exposure to modern theatre in capitals of the Near and Middle East strengthened the conviction of reform-minded Central Asians that the theatre offered a compelling medium with which to educate and indoctrinate the woefully illiterate populace (96.8% of the total, on average, in 1920) of Central Asians (E. Allworth, Central Asian publishing and the rise of nationalism, New York 1965, 22). In 1913, for example, the disgruntled, socially alienated Koqan poet, Hâmzâ Hâkimzâda Niyaziy (1889-1929), visited Egypt, Syria, Turkey and Russian Azerbaijan, each of which had enjoyed lively indigenous modern stage activity beginning in the 1850s to the 1870s (Mamâdh Râkmânîvan, Khâmzâ i uzbekîkiti teatr, Tagkent: Gosudarstvennoy Literaturî UzSSR, 1960, 38, 70, 81). He returned to write several plays, similarly focused upon social abuses, during 1915-16. His works, unlike the better-known Dzadiid drama, aimed not so much toward constructive persuasion and change as at exacerbating social tension and increasing civil strife. For this reason, Niyazi remained little staged and outside the mainstream of new Central Asian dramaturgy in the initial period. But the same antagonistic quality was to earn this pro-Russian writer an ideological approval from Communist leaders in the 1920s that persisted long after his death. Niyaziy's first play, the four-act Zahirî hâyer uzbekî ("Revolutionary Uzbak drama"), written in 1915, published by the author in 1916 at Tagkent, dramatises the anguish of forced marriage already portrayed in Central Asian poetry, fiction and drama. His version blames religion for permitting the practice. The playwright staged, directed, publicised and organised a company to act in this tragedy in Koqan's military assembly building at the end of 1915. Religious controversy closed the show and he disbanded his troupe after two performances (Mâmâmân Râkmânîvan, Ozbek teatri târkîhi, Tagkent, Uzbekistan SSR "Fân" Nâşrîyati, 1968, 313-16).

Plays that avoided treating contemporary life, usually historical dramas, in the beginning mainly served patriotic purposes, and often ended tragically. They still, however, reflected the current concerns, also persisted in early Reformist drama and literature, reflecting public concern over the prevalence of that practice in the sexually segregated urban life of Central Asia. Abduurauf Shahidi (Shahshudîn) (b. and d. unknown), a Tatar schoolteacher living in Koqan, wrote the play first published (1912) in the Turki (later, "Uzbek") language of southern Central Asia. The plot of Mâhrâmandar ("Forbidden to marry") dramatised the destructive effect upon young Turkistan boys of the organised homosexual circles in which many were kept by older men of means.

An acknowledged follower of what was termed Behbudûy akîmi (the Behbudûy tendency), Abdullah Kadirî (1894-1939), chose the second most common serious plot, after backwardness, for his drama, Bûgdiy kastav ("The unfortunate bridegroom"), published in 1915 and staged the same year. Similar social themes animated the modern Uyghur theatre in Kâshâbah during its first period, starting after 1933. Drug addiction, polygamy, bribery, stupid pretension and forced or arranged marriage led the list of subjects in the Chinese sector of the region. Exposure to modern
dramas staged, like most Afghan plays, in the Dari language. King Amān Allāh (1919-29) [q.v. in Suppl.]
took the lead towards westernizing Afghan theatre in 1926 when he caused a theatre building to be con-
structed in the Paghman suburb of Kābul (Heusler, loc. cit.). Historical themes likewise attracted Afghan
dramatists in later decades, despite the risk entailed in writing about kings unflatteringly in a monarchy.
Abdur Ghafur Breshna (1907-74) wrote his Haji Mir-
awāt Khān about an 8th-century clan leader and khan
who leads intrigues and battles for possession of the
fortress of Kandahār (Breshna, Haji Mirawat Khan. A
historical play in 3 scenes and 17 acts, in Afghanistan:
Historical and Cultural Quarterly, xiii/2 [Summer 1349/1970], 59-81).

In the Russian sector, the earliest historical plays
served supra-ethnic patriotic, but not nationalist,
purposes. They represented Islam at the height of
expansion against Christianity or made allegories for
the Central Asian situation under foreign rule. After
the coup d'état in November 1917, and the increasing
Russian Communist domination of cultural develop-
ment in the sector, historical drama became explicitly
civil—(i.e. class)—war-minded and anti-nationalist. Such
plays were meant to depict rulers and most other past
leaders as "class enemies", a procedure that persisted
into the 1930s. An Afghan edict of 1923, which
works devoted to a few approved potentates who were
usually also poets or scholars. Thus Uzbek drama fur-
nishes an example; the Timūrids Ulugh-Beg (1394-
1449), Mir ʿAli Shīr Nawātī (1441-1501), and Zahir
al-Dīn Muḥammad Bābūr Pāshā (1494-1530), or
ʿUmar Khān's talented wife Nadīrā Khānim (1792-
1842) has each furnished the subject for at least one
full-length stage work in Uzbekistan alone. Selected
historical figures served similar ends elsewhere in
Central Asia.

Most active among the first prominent local
Uyghur playwrights of Eastern Turkistan became the poet Abūdūrāhīm Tilāğh Otkūr (1922-), from Komul
district. He wrote his initial play, “A million flowers
from one drop of blood” (Tarnā kaändi milīyon irtēkalār
(1945) in a patriotic vein. With the poet Lutfrego
(Salumtoy, 1942-45) as an editor of several other
ideological plays—Otkūr wrote “The Steadfast
peony” (Čing modängul), (1943), soon staged in
Urumūći. And, when Otkūr served as Editor-in-Chief
of Shīnjìng gazet, the principal East Turkistan
newspaper, he published his drama, Niyazīkiz (1948).
(Yusup Koḥayef, Çekmaq kəbi hayat, in Biziring wa’dan,
no. 2 [Jan. 1983], 3; personal interview, İstanbul
1956, with Mr Polat Kadr, former Managing Editor,
Shīnjìng gazet).

At Urumūći and Turpan in Chinese Turkistan in
1982, Uyghur troupes staged a new historical drama,
Kantlik yillar (“Bloody years”) that had been published
in the revived, modified Arabic script in 1981. The
Uyghur author Tursun Yunus (b. and d. unknown),
issued it in the unusual Uyghur language journal,
Shinjiang sanqi ("Art of Shinjiang") from Urumūći.
Sidik Zalli, an 18th-century Uyghur poet and hero of
this six-act play, affirms the identity of his country
within the world of Islam when he prays for an end to
religious conflict, rhetorically asking in his final
speech: “When will the sectarian slaughter of the
world of Islam (Islamiat danyari) come to an end?”
Commenting to Chinese critics upon his reason for
creating this long historical drama, Yunus once re-
marked that he wanted it to oppose the old Muslim
sect of ʿIḥānās which had “raised its head again in
recent years in some parts of southern Shinjiang”.
(Tursun Yunus, Kantlik yillar, in Shinjiang, sanqi, no. 1 [July 1981], 24-93; Zhorhilmizning mukhbir,
Tarḥāy dramā “kantlik yillar” sohbat yiyg’inniñ ḥalatist, in Shinjiang tarikh, no. 1 [July 1981], 7-13).

Alongside historical plays there came staged ver-
sions of legendary tales, heroic epics and popular
romances. Mukhtar Auez ufl (1897-1961) not only
gave Kazak audiences such a rendition of legendary
romances and made them increasingly
and death of young Djora and his beloved Nargul
from one drop of blood” (Tamça kandin miliyon ciceklar].
Uyghur author Tursun Yunus (b. and d. unknown), later
used a traditional eastern Romeo and Juliet theme to
the accompaniment of indigenous music. Accord-
ing to an eye-witness, audiences jammed the theatre’s
performances and sang along with the music. Indig-
enous plays were musical comedy and a form of serious
theatre termed "musical drama" which combines
spoken and sung parts for the stage characters. This
type of theatre became institutionalised first in the
Russian Soviet sector, then appeared in Afghanistan
as well as Shinjiang. Gulum C̱afar (1889-1944) wrote one
of the earliest regional musical dramas, the four-act
Hālima, 1918-19. A Taγhket cast with a woman in
the lead role staged it in 1919-20. Oyghur theatre in
Kazakhstan saw its first formal Uyghur musical drama,
Anderkhan, by Dī, Asim and A. Sadır, and based again
upon popular folk songs, staged in 1934 at Dīarkent,
now Fat’ıf, located just eleven miles from the
Shinjiang frontier near Kuldja [q.v.]. Like the refor-
mist plays of two decades earlier in Samarkand
and Kokan, Anderkhan elaborates the unhappy conse-
quences of a forced marriage between a young bride
and an unloved older and wealthy man. In
Kazakhstan, among the small Uyghur population of
109,000 recorded for the USSR in 1926, a succession
of Uzbek theatrical directors, producers and actors
from Uzbekistan helped with the first staging of Ander-
khan. Māmmān Uyghur (1897-1955) and ʿĀli Ardubāsh
Ibrahim (1900-59) infused those initial Soviet Uyghur
endeavours with the brief Uzbek experience in drama.
Ibrahim had also worked earlier in Stalinalad
organised troupes, amateur or professional, coalesced wherever traditional or modern theatre was performed. The Kokan Khanate's next-to-the-last indigenous ruler, Khudayar Khan (1854-8, 1862-3, 1866-75) [see Gilkamb], maintained a well-known folk troupe at court. Itinerant troupes of performers often presented Muslim religious drama in the villages. Neither folk nor religious drama troupes could effectively adapt themselves to the modern stage when it appeared. The first Reformist dramas necessitated creation of entirely new theatre groups to perform them. At Samarkand in 1913, Behbudiy acknowledged his difficulty in forming the initial indigenous troupe of amateurs because of lack of interest and experience. His group soon turned semi-professional through rehearsals and exposure during active road tours outside Samarkand, playing also in Bukhara, Kokan, Andijan and other towns until it disbanded in 1916 (Mamajan Ramanov, 281-2).

The future playwright, Abdullah Awlaniy (1878-1934) established one of the earliest of these troupes, the semi-professional "Turkistan" group, basing itself on Tashkent, in 1914. Like the first Samarkand group, "Turkistan" began assembleing a répertoire around Behbudiy's The patricide, presenting various additional Central Asian plays and some translations from Turkish, Azerbaycan, and the like. Numbers of other private theatre groups came into being, mirroring the custom in folk theatricals. Traditionally, ensembles of clowns, buffoons, puppeteers, conjurors, stilt walkers, equilibrists, horn players, bellringers and related performers had been combined in one kisâsha-ya szandad or mihirâk (guild of musicians) rather than separated into guilds for each special art. As late as the early 20th century, this guild still possessed its own tısâla (statute or treatise), giving a legendary history of the art's origins, naming saintly protectors, and setting forth religious duties and prayers linked to each phase of the vocational activity. In 1926, political authorities in the Soviet sector incorporated these folk performers into a "Union of Art Workers" and continued their performances under government auspices (A. Samoilovč, Turkistanšiki ustav-nusulâ yteqle artístico, in Măteriáli po etnografii, Leningrad: Izdâni, Gosudârstvennogo Russkogo Muzeya 1927, 54-6). Thus sponsorship by provincial governors, added to some patronage of the khâns and âmirns, along with guild structure and tradition, gave performers in folk theatre systematic recognition and status comparable to the position enjoyed by many artisans of the region in different vocations.

In the initial modern period, amateur troupes attempting new productions regularly drew to them in various centres as actors persons who were already accomplished teachers, poets or playwrights. A Tatar author, Abdullah Badiri (b. d. unknown), later a playwright, originally acted to acclaim the women's roles offered by Behbudiy's Samarkand troupe. As "Bay", Abdullah Awlaniy had the lead in the Tashkent presentation of The patricide on 27 February 1914. Hâmzâ Hâkim Zâdä Niyaziy acted in his drama A poisoned life in Kokan on 22 October 1915. Mâmmân Uyghur and Awlaniy performed in the "Turkistan" troupe when it put on Abdullah Kadirüî's The unfortunate bridgenoom in Tashkent, November 1915. Ubaydullah Khødâji's troupe toured all over the Târâghânâ valley. The success of the March and November 1917 changes in Russian governments, some private theatricals had continued in Central Asia. Except for folk art shows, most of their activity was soon curtailed by political authorities. All theatre houses and properties became government-owned after 2 October 1918. By 1922, in the Russian sector among the Central Asians, only state theatre groups received approval or support, and political censorship was again firmly established. Uzbekistan's comprehensive law code in this field became a model for all Soviet Central Asia. It controlled répertoires as well as productions. The decree, enacted by the Turkistan Autonomous SSR on 16 April 1923 and codified by the successor Uzbekistan SSR on 8 February 1927, provided for Union republic censors in publishing houses and press and at all levels of local political hierarchy down to the county (okrug) (Uzbekistan Idgiýa's Shorulâ Dijorak Dijorjorikti Islâyi wa Dîhkan Hokomâtning Kanon va Boyqoqaringlik Yig'indisi, no. 9 [7nci Mart 1927niči yil], 199-202).

Nevertheless, the legacy of theatres, troupes and faithful audiences had already created the environment needed for enlarging modern drama performances on a regular basis. A network of new theatres and troupes quickly grew up in the Russian sector, though there were setbacks. The "Karl Marx Drama Troupe" organised there in October 1918 was led in 1921 to Bukhârâ, which was at the time still semi-independent from Soviet Russia, by Mâmmân Uyghur, to propagate for the new régime's ideology. During a performance of Fitra't Alâ Muslim in 1922 components burned down the theatre and dispersed the troupe, leaving Bukhârâ again without a professional theatre group for years. At Alma Ata in Kazakhstan, in order to lay a stable foundation for guided theatrical growth in its area, the Kazakhstan Autonomous S.S.R. Ministry of Education ordered the establishment of a Kazak Theatre Studio to accommodate 40 students from January 1933 onwards. This followed by almost a decade the founding of a studio for Uzbek theatre troupes in Moscow. The 24 young people sent to Moscow from Uzbekistan had included several who contributed greatly, as authors, directors, actors or translators, to the development of Central Asian theatre. They included the mature Abdullahâmad Sulâyman Çöllân (1896-1938), a promising 14-year old actress Sarâ Â Şâhânturarâyevâ (1911-), Mâmmân Uyghur, and Abâr Hidayâyâv (1900-57). The latter subsequently achieved fame in the role of Hamlet during 21 consecutive Uzbek performances after the premiere in 1935. Cultural leaders dispatched another group of 17 from Uzbekistan to Baku in Azerbaijan for a theatrical apprenticeship (Kazak teatrining tarihî, Alma Ata: Kazak SSSR'ning "Chîlim Başpasâ", 1975, 201-2; Uzbekski zvotestnî teatr, 1, Tashkent: Izdatel'stvo "Nauka", Uzbekskoy SSR, 1966, 246-8). In 1937, there were 124 centres, including both Russian and Uyghur ones, functioning in Kazakhstan.
By 1934, the quantity of regularly performing local-language theatres in all Uzbekistan had reached its peak of 32, after which the numbers gradually subsided to a fairly constant 22 to 28. This did not include provincial, Uzbek houses operated in the Kirgiz SSR at Osh and Tajik SSR at Now (Nau). The quantity of Tadjikistan's theatres working in various languages rose from four in 1934 to 24 by 1941. (Mamajmän Rämänaw, 413-5; N. L’vov, Kirgizskii teatr. Oček istorii, Moscow: Gosudarstvennoe Izdatel’stvo ‘Iskusstvo’, 1953, 127; Yakov Moscheev, My recollections of Now Raion: the status of a peripheral theater in Soviet Tajikistan, in Central Asian Survey, nos. 2-3 [1982-83], 108-22; Nizam Xabiibullovic Xurjджанным, Istorija tadzhikskogo sovetskogo teatra (1917-1941 gg.), Dushanbe: Izdatel’stvo ‘Donish’, 1967, 401). Thus the quantity of theatres in all Central Asia multiplied strikingly from 1913 onwards, reaching an estimated 150 official houses, government sponsored and supported, in the three sectors, during the 1950s and thereafter. The capital cities saw a division of labour among serious drama theatres, musical drama houses, opera, and comedy or children’s playhouses, as well as between the major languages and traditions. In 1983, Tashkent possessed nine of Uzbekistan’s 28 active theatres. Leading administrators in the three principal theatrical organisations of Uzbekistan in 1983 were the drama critics and historians, Professor Fudziyamu (1885-1937) and Saken Sadvakas Seyfullah-uli (1894-1975), the principal Uzbek journal publishing drama, and Director of the Hämza Institute for the Arts of the Ministry of Culture, Uzbekistan SSR; Professor Mämdädjan R. Rämänaw (1914-), Rector of the Ostrovsky Tashkent Theatre Arts Institute, the main training centre for theatre arts; Sara Iğhanturayeva, Bähriddin Nasreddinaw and other officers of the sole membership organisation for stage in the Uzbekistan Theatre Society (Qamismoi). The vigour of the theatrical institution implied a constant need for an attractive repertory, and, especially, for many original indigenous plays. The numbers of original Central Asian stage works written had risen from about 20 altogether by the end of 1916 to many hundreds by the 1980s. New Uzbek scripts of varying quality were written and produced at the rate of some 20 annually in the early 1980s. Yet critics and historians spoke soberly at the same time about a decline in drama, attributed generally to the emergence of radio, television and new popular music. Most keenly missed were good serious plays about contemporary subjects. Even before the strong growth of mass media in broadcasting, Central Asian theatre had endured slumps in attendance to a marked degree. Many auditoria remained nearly empty night after night in the 1920s and 1930s owing to public indifference to the offerings being brought to the stage, especially to those heavily ideological in content.

From the beginning, modern Central Asian drama bore three distinct traits: it was socially or politically didactic; purely entertaining and comic; or the plays were historical and patriotic, sometimes legendary. Newer drama combined some of these characteristics, remaining resolutely instructive in the Russian and Chinese sectors, but more balanced in spirit and aims in Afghanistan until the late 1970s. The theatre of all three sectors began to explore contemporary life seriously, in particular, after an opening period that was notably tendentious. Since the coming of Communist régimes to the three sectors, the nature of drama has shifted remarkably in the direction of propagandising political-social directives from the central authorities. In each case, the acknowledged ideological base is a kind of official Marxism. As a result, plays written and staged in the period following that political change in each sector have become at first outspokenly rhetorical and sloganeering. Themes announced by political authorities for each period can be found reflected in the dramaturgy and repertories. In addition, plays have persistently enunciated such principles as atheism, espoused by Communist régimes. Many Central Asian stage works originating in the Russian sector, far more than in the others, have openly and specifically opposed the religion of Islam. This paralleled the intensification of political and social tensions in the USSR in the 1930s, when Central Asian plays, too, mirrored the times. Zinnat Fathullin (1903-) wrote a drama typical of the period in 1932 entitled Nikah yirtildi (‘The mask torn away’), one which is engrossed with a search for ‘enemies’ ostensibly hidden inside Central Asian society. A related obsession with ‘external enemies’ and ‘traitors’ coloured political plays such as Kandi sarak (‘Bloody morgue’) (1961-4) in two acts and ten scenes, by Sarwar Aziyaw (1923-), a political activist and diplomat.

In the 1960s, dramas with a more human content began to appear increasingly. It was indicative of this evolution that Bähräm Rämänaw (1915-61) turned to themes such as Tursak sirldri (‘Secrets of the heart’) (1953), a play that ignored political topics and simply concentrated upon the private lives of its people. Rämänaw, a Communist Party member, headed the Administration for Art Affairs in Uzbekistan from 1953-5; thereafter, he became Director of the Scientific Research Institute for Studies of the Arts, and finally, in 1958, took the post of First Secretary of the powerful government-controlled Union of Writers of Uzbekistan. Another influential intellectual, Izzat Sultan (1910-), his play İmon addressed the ethical dilemma put before a family that finds a dishonest scholar in its midst. The senior Uzbek poet and playwright, Rämätullä Atäkiziyew Uyyyun (1905-), soon made audiences face the crucial test of social and political ethics in Soviet Central Asia. He looked, in his play Dostilär (‘Friends’) (1961), at the havoc raised among farmers by the Stalinist terror and false confessions that had resulted in unlawful treatment to the extremes of execution and exile. For Central Asian theatre this was a pointed theme, for many of the important earlier playwrights and other theatre people, including the Kazaks Mir Djakib Duwlat-uli (1885-1937) and Säken Sadvakas Seyfullah-ul (1894-1937) and the Uzbek Çolpan, Fitrpat, Kadiriya, Ziya Said (1901-30) and Zafar, had lost their lives in the political repression.

The Kirgiz dramatist and novelist, Čingiz Aytmawat (1928-) and the Kazak author, Kaltay Muhammadjanaw (1928-), joined in examining that very controversial ethical subject. They translated their Kazak language drama, Kölkijedegi kezdesu (“Mountain top encounter”) (1972) based upon a story by Aytmawat, into Russian as Vesokozhdendenie na Pudzysnam (‘The ascent of Mount Fuji’) and gave it its premiere in Moscow in 1973. They recreated the tension in society over collective indifference and guilt toward innocent victims of political repression and social discrimination. But the writers in the end concern themselves more forcefully with basic problems of individual honesty and responsibility for personal actions and outlook.

After those ethical dramas during the 1970s-1980s in the Soviet sector, historical tragedy and domestic comedy seemed to predominate, leaving assertively political and ideological plays less in the forefront that
they had been previously. Yashin returned to the story of climactic events in early 20th-century Central Asian history with a three-act musical drama he called Islam dengi musikal' ("Dawn of the evolution: Bukhara"), published in 1973. Its dramaturge personalities included the Bolshevik dictator Vladimir I. Lenin, the Young Bukharian politician Fazil Khodjaysay, the last Amir of Bukhara Sa'id 'Alimkhân and other historical figures, portrayed on stage with a cinematic flashback technique. Yashin represents the prominent old-time and doctrinaire Central Asian dramatists educated almost entirely in the Soviet period. Like Râhmanov, he held key positions in the administration of the theatrical arts and served as Secretary of the Government's Union of Writers in Uzbekistan. The contribution of these playwrights hardly lay in the comic genre. 

Comedy originally defined Central Asian theatre, for it was the essence of folk skits and acts long before and well after religious or modern drama appeared on the scene. In the early decades of the 20th century, both the Djadids and the very first Communist Soviet playwrights, as well as Afghan writers, initially for the most part rejected light comedy. They believed their message to be paramount and serious. In the first decade, the official bulletin, Ishtirakiyun, published by the Central Committee of the Turkistan Autonomous Soviet Socialist Republic, considered that comedy be "a place of amusement and love intriguers", and it specifically criticised attempts to present "diverting comedy" (Ishtirakiyun, 11 December 1919, 12 October 1920). Consequently, from the 1920s to the 1950s in Soviet Central Asian theatre, most stage comedy spoke with a heavy satirical voice. Hâmid Qulam (1919-) wrote Taghabûn tashîk ("Taibalî in love") (1962), a musical sharply attacking religion and the practice of Islam in Central Asia. Folk humour incorporated in modern plays from the 1920s onward repeatedly conformed to the vision of comedy preferred by cultural managers. The Uyghur dramatist Yusufbek Muhlisi (1920-), who emigrated from the Chinese sector to Soviet Central Asia at about the same time as other writers, sc. around 1964, provided Uyghur performers in Kazakstan and Uzbekistan with a later specimen of this genre. Muhlisi's Nâsrîdîn Apanâmî (1966), a musical staged in 167 at Alma Ata, adapted several anecdotes from the widely popular Nasreddin tradition to fashion, in the Uyghur idiom, what critics called an anti-Islamic satirical comedy. (Akhmedjan Kadyrov, Godi stanovlenija (Iz istorii ugyrskogo teatra muzikal'nyj komedii) Alma Ata: Izdatel'stvo "Zhahlym", 1978, 62-3).

Subler, often lighter, humour characterised more of the works written later in the 1960s by younger dramatists. The new generation of playwrights interests itself directly in personal feelings, contemporary values and ways of life. Most notable in Uzbekistan in the 1970s-80s came Omâs Umârbekeep (1934-) and Adubkaihâr Ibrâhimaw (1939-), both natives of Tagkent. Ibrâhimaw's initial play, Birinci basta ("First kiss") (1969), which the author calls "a lyric drama", ran for 500 performances between 1971-5 on the "Young Guard Theatre" stage in Tagkent. The comedy focuses exclusively upon the personal motives, lives and loves of several teenagers, shown as growing into young adulthood by the end of the second and final act. Ibrâhimaw's unioleological but bitter comedy, the two-act Atrî ("The saw"), 1970, staged in the Farg'ana Oblast's Theatre, is about a lower-class family. It dramatises the character and ideals of Murad, the head of the family. He is an influential medical administrator and professor who is the cutting "saw" of the play Mânsuraw is convinced that everyone acts only out of selfishness or, out of what is closely related, a sense of obligation rooted in the principle of quid pro quo. He disallows the elements of affection, generosity, spontaneity and similar affirmative forces in human relationships. Ibrâhimaw's two-act play Meni ayidi demâng ("Not a word about me") satirises a hearty but impervious country town borough politician and educator, Hâshim-âkâ. His callousness, like that of Professor Mânsuraw in Atrî, permits any positive human urge to wither and die. This is symbolised in Not a word... by the corruption and demoralisation of the borough's best, most generous part-time gardener, a roofer, Ali, whose small courtyard plot has decorated, pleased and fed the whole neighbourhood well up until he acquires false values from a chain of irresponsible bureaucrats, including Hâshim-âkâ, and makes the lush garden to dry up. Ibrâhimaw's later play, Tumaal ("Supposition"), ran at the Samarkand Alimdjan Uzbek Drama Theatre in 1983, and another one, Çakana sâuda ("Retail trade"), was published in 1984. Six of Ibrâhimaw's plays, including Firtâkiss, The saw and Not a word about me, came out in Russian translation in 1982. (Abdukaihâr Ibrâhimaw, Birinci basta. Arrâ. P'tsâlar, Tagkent: Ghâför Qulam namidâgi Quraish adabiyatî tashkent sanoz, 1981; Abdukaihâr Ibrâhimaw, Obo mne ni slova. P'esy, translated from the Uzbek, Moscow: Sovetskii Pisatel', 1982; Çakana sâuda, in Şâhr yulduzi, no. 8 [Aug. 1984], 73-99; Abdukaihâr Ibrâhimaw, Tumaal. P'tsâlar, Tagkent: Ghâför Qulam namidâgi Abâdâbiyatî wâ San'at Nashriyati, 1985). Crimean Tatars, Tajiks and Turkmen also contributed new plays. After the earliest days of modern Central Asian theatre, translations and borrowings from plays written outside the region were frequently published in Central Asian languages and included in the repertoire. Although Tsarist Central Asians originated their own earliest dramas, the relatively few local productions soon required supplementing by adaptations from playwrights of Azerbaijan, Tatarstan and Turkey in order to make an adequate repertoire available. Into Afghanistan, modern stage plays first came from the Arabic, English or Turkish. To Shinjiang in the 1930s, the active theatre of Soviet Central Asia supplied numbers of its plays, easily adapted to the linguistic needs of Uyghur and Kazak actors and audiences. Throughout the region, the range of dramaturgy widened further with renditions of European and Russian dramas. Molère's comedies, especially L'Asare, Le Médecin malgré lui, Georges Dandin and Les fourberies de Scapin became perhaps the most popular in Soviet Central Asia and Afghanistan, as they had been in Egypt and Turkey. Shakespeare, most often represented by Hamlet, The merchant of Venice and Othello, appeared nearly everywhere. Colpan made the first published Uzbek translation of Hamlet in 1934. It was staged, along with Othello, in Tagkent in the mid-30s. By the 1960s and 1970s, Afghanistan's city theatres were staging recent American plays by Eugene O'Neill (Desire under the elms), Tennessee Williams (The glass menagerie), Edward Albee (The zoo story) and others. Translations of standard Russian plays seen in Soviet Central Asia included Gogol's comedy, The Inspector-General, Ostrovsky's melodrama, Thunderstorm, Gorky's ideological Veyor Bul vito and others, and many dozens of works from the linguistic needs of Uyghur and Kazak actors and audiences. Throughout the region, the range of dramaturgy widened further with renditions of European and Russian dramas. tory is emphasised in the fact that translations supplied around one-half of the 130 to 140 plays staged each year in Uzbekistan as late as the early 1980s (Uzbekistan âdâbîyatı va sânhâlî, no. 8 [19 February 1982] 4, 7).

6. In Muslim India and Pakistan.

The classical Sanskrit drama in India had reached its apogee two centuries before the first Muslim penetration. Its gradual decline—often blamed partly on the religious objections of the new Muslim rulers—was probably due as much to linguistic developments, through the mediaeval local Prakrits to the modern regional languages. But whilst Sanskrit drama, which was essentially court theatre, died out, popular vernacular drama prospered. Strolling players went from village to village performing various types of plays, pageants, monologues or other entertainment (Haywood, 294-6), often on familiar Hindu themes such as Krishna and Râdhâ, with singing, dancing and, at times, coarse humour. Among the actors were Muslims: female parts were performed by men or boys.

Some efforts were made in the 17th and 18th centuries to write plays in various languages such as Hindi, Bengali, Assamese and Gujarati of literary, and not merely of entertainment value. But there is no doubt that it was the influence of European—especially British—drama which provided the main impetus for the growth of a new interest in the theatre, though the heritage, both classical and popular, played part. Towards the end of the 19th century, English plays were performed in Calcutta, and two were performed in Bengali translation (Guha Thakurta, 40 ff.). Lord Macaulay’s Minute of 1833 led to the spread of English higher education in India. This in turn led to the study, then the translation or adaptation of English plays, and especially of Shakespeare. R. K. Yajnik, 270-8, lists 200 versions of 29 Shakespeare plays in nine languages between 1864 and 1919. These languages are Urdu-Hindustani, Hindi, Panjabi, Gujarati, Marathi, Bengali and Tamil. English plays were performed in several parts of the region, but mainly in the Calcutta area. The Indian government regarded Hindustani as a lingua franca and official language which could be written in either Persian or Devanagari script, depending largely on whether one was a Muslim or Hindu. People spoke of High Urdu and High Hindi, but the distinction was one of vocabulary, style and script rather than grammar. The entry of Muslims into the region are in print: "Askiya", ein wenig bekanntes Genre des usbekischen Volksgedichts, in Ural-Altaiische Jahrbücher, xii/2 (1964), 676-78; idem, Drama and the theater, in Uzbek Literary Politics, 1964, 215-35; idem, Reform and revolution in early Uzbek drama, in Central Asian Review, xiii/2 (1964), 86-96; idem, A document about the cultural life of Soviet Uzbek outside their SSR, in Central Asian Survey, iv/2-3 (1982-3), 103-25; idem, Mahmud Khodja Behbudiy, in Encyl. of World Literature in the Twentieth Century, i, 1981, 219; idem, Abdurahim Firit, in ibd., ii, 1982, 143-4; idem, Murder as metaphor in the first Central Asian drama, in UTB, Ivii (1986), 65-97; Inim Akhmidli et al., Melâjot tagh boranili, Urümî 1965; Sayyidin Azizin, Amannisakhun (Tarkhiy drammal), Beijing 1983; Akhmatjan Kadirov (compiler), P'isrâl (Uyghur dramaturgi p'tesirîning toqlim), Alma Ata 1978. (E. Allworth)

6. In Muslim India and Pakistan.

The classical Sanskrit drama in India had reached its apogee two centuries before the first Muslim penetration. Its gradual decline—often blamed partly on the religious objections of the new Muslim rulers—was probably due as much to linguistic developments, through the mediaeval local Prakrits to the modern regional languages. But whilst Sanskrit drama, which was essentially court theatre, died out, popular vernacular drama prospered. (E. Allworth)
Elizabethan England. Each company had a resident playwright, most of them Muslims. Plots were often taken from Islamic Persian or Indian folk-lore or history, but contemporary social themes gradually emerged. The leading dramatist was Āghā Ḥašār Kāšmīrī ([q.v. in Suppl.]). Plays were largely in verse, but rhymed prose, and increasingly prose, were also used. Plays by Shakespeare were adapted. There were sub-plots and many short scenes, and the general tone tended to be melodramatic.

This Urdu drama was certainly lively, but it was derived by purists on both moral and literary grounds. Its influence on drama in other languages, such as Hindi and Gujarati, has often been deplored (Tindal, 180-1, and Munshi, 304-5).

The theatre declined after the First World War, due to the emergence of the cinema, and especially of the talkies. Āghā Ḥašār became a film-star in Calcutta, and then founded his own film company in Lahore. On the other hand, radio, and even more, television, have given a new impetus to drama. Thus in Urdu, Miřāz Ādīb (b. 1914), who has specialised in one-act plays on social themes, has worked for Radio Pakistan. Imtiyāz ʿAlī Tāḏ̣i, (1900-70), who wrote for radio and films, excelled in comedy. His chef d’oeuvre is Anārkhālī. On the other hand, ʾIṯrār Ṭahmānī, who is best-known as a critic and editor of dramas, has contributed to the translation of Western plays, with Ḥansī Ḥansī mēn (Brandon Thomas’s farce, Charlie’s Aunt) and Ek Ḥamsālmēn (Booth Tarkington’s Clarence).

The limited scope of this article precludes reference to some leading dramatists with no Islamic connections, particularly in Bengali, Marathi and Hindi. Information on them will be found in the works listed in the Bibliography. The name Massā is associated with the first Arab conquest of Morocco: according to legend, it was on the shore of Massā that Jonah was cast up by the whale. In any case, Massā appears in the list of places the name of the place where it is settled, some 30 miles south of Agadir at the mouth of the Wādī Massā. The latter is probably the flumen Masatat mentioned by Pliny the Elder (v. 9) to the north of the flumen Darat, the modern Wādī Darā, and the Masata of the geographer who would correspond to the modern al-Massā.

The name Massā is associated with the first Arab conquest of Morocco: according to legend, it was on the shore there that, after conquering the Sūs, ʿUkba bin Nāfiʿ embarked on the conquest of the land of the Sus, calling God to witness that there were no more lands to conquer on the west. In any case, Massā appears very early as an important religious and commercial centre. Al-Yāʾkūbī (Buldān, 360, tr. Wiet, 226) notes that the harbour was a busy one, where ships built at al- Ḥumrān and also sent many adventurers there to raise rebellions.

Towards the middle of the 15th century A.D., the Portuguese began to become interested in Massā, where they very soon acquired a privileged position (see R. Ricard, Études sur l’histoire des Portugal au Maroc, Coimbra 1953, 133, 136) and, at the opening of the 16th century, the Genoese came there to purchase gold, wax and goat and cow hides, lac and indigo.

Towards the end of the 15th century, the religious movement begun by al-Dżazūlī ([q.v.] made Massā one of the great zūcāyāt of Sūs, a remarkable centre for culture and piety (see M. Hajji, L’activité intellectuelle au Maroc à l’époque Sa’dide, Rabat 1976-7, ii, 626-8 and index). In the middle of the 9th/16th century, Leo Africanus (tr. Épaulet, 87-9) describes Massā as a group of three little towns surrounded by a drystone wall in the middle of a forest of palm-trees; the inhabitants were agriculturists and turned the rising of the waters of the Wādī to their advantage. Outside the town on the seashore was a highly venerated “temple”, from which the Mahdis was to come; a peculiar feature of it was that the little bays in it were formed of ribs of whalebone. The sea actually throws up many cetaceans on this coast and ambergris was collected here; local legend moreover says that it was on the shore of Massā that Jonah was cast up by the whale.

After the fall of the Sa’dids, the development of the
Marabout principality of Tazerwalt again made Masa a commercial centre. The port was frequented by Europeans, but it was soon supplanted by that of Agadir. The rapid decline of the Principality of Tazerwalt and the steadily increasing influence of the central Moroccan power finally destroyed almost completely any religious and economic importance of Masa.

(G. S. COLIN*)

**MASSALAJEM, the name given to two Islamic settlements in North-West Madagascar:** Old Massalajem, otherwise Langani, is also known as Nœst Manja, and the daughter settlement of New Massalajem, also known as Bœny (Swa. correctly Bwini). The original town is reputed to have been founded from Kilwa [*q. v.*], and to have had regular trade relations with it and with Malindi and Pate, until its destruction by the Sakalava at the end of the 18th century. Sherds found there do not antedate the 14th century. New Massalajem served the Sakalava first as their northern capital, until they moved to Majunga, also a town of Islamic origin.

(G. S. P. FREEMAN-GRENVILLE)

**AL-MAŠṢĪŠA, the Arabic form of the classicalrop Mopsuestis, Byzantine Greek form Μαυσσις, Syriac Maṣṣīštā, Armenian Mez, Ottoman Türk. Meşis, or Massis, modern Tkish. Missis, a town of Cilicia on the western or right bank of the Djîşr al-Walid [i.e., 18 miles/27 km. to the east of Adana [*q. v.*]] and now in the modern vilayet of Adana.

In antiquity it was called Mêdōu ēstūa, a name, which (like that of Mêdōu ʾṣṭīra in the Cilician passes) is derived from the cult of the legendary seer Mopsos (cf. Meyer, *Gesch. d. Alten*, iv, 22, § 483). In ancient times, the town was chiefly famous for its bishop Theodoros (d. 428), the teacher of Nestorius and friend of the suffragan bishop and inventor of the Armenian alphabet, Maghṭūc[^1].

The emperor Heraclius is said to have removed the inhabitants and laid waste the district between Antioch and Mopsuestia on the advance of the Arabs, in order to create a desert zone between them (al-Ṭabarî, i, 2596; al-Baladhûrî, *Fatîh* 163; between al-Iṣkandarûn and Tarsûs), and under the Umayyads all the towns taken by the Arabs from al-Maṣṣîṣa to the fourth Armenia (Malatya) are said to have been left unfortified and uninhabited as a result of the inroads of the Mardizi (Theophanus, ed. de Boor, i, 363, 17). According to Abu ʾl-Khaṭṭāb al-Azdi (in al-Baladhûrî, 164), the Arabs conquered al-Maṣṣîṣa and Tarsûs under Abû ʾUbayda, according to others under Maysara b. Masrûq, who was sent by him and who thereafter acted as governor of Cilicia (al-Bidâya, 16/6307; Caetani, *Annales dell’Litâm*, iii, 805, § 311). Muʿawiyah, on his campaign against ʿAmrūriyya in 25/645-6, found all the fortresses abandoned between Anṭakiya and Ẓarsîs (see above). According to the *Maghazi Maṭʿawî*, he himself destroyed all the Byzantine fortresses up to Anṭakiya in 31/651-2 on his return from Darawliyya (Δάραλλιον in Phrygia) (al-Baladhûrî, 164-5). After the Syrian rebellion against ʿAbd al-Malik, the emperor Constantine IV Pogonatos in 65/684-5 advanced against the town and regained it (al-Yaʾqûbî, ii, 321). Yahyâ b. al-Hakam in 77/696 marched against Marjd al-Šâhm between Malatya and Masaït (al-Yaʾqûbî, ii, 397). It was only in 84/703 that ʿAbd al-Malik’s son ʿAbd Allâh retook the town and had the citadel rebuilt on its old foundations (al-Baladhûrî, 165; al-Yaʾqûbî, ii, 466; al-Wâkidî, in al-Ṭabarî, ii, 127; Ibn al-ʾĀthîr, iv, 398; Theophanus, *Chron.*, ed. de Boor, 372, 4; Michael Syrus, tr. Chabot, ii, 477; Elias Nisiben, *Opus chronolog.*, eds. Brooks, 156, tr. 75; *Script. Syri, chronica minora*, ed. Guidi, 232, tr., 176, under 1015 Sel. year; Weil, *Gesch. d. Chalifen*, i, 472). In the following year, he installed a garrison in the fortress, including 300 specially picked soldiers, and built a mosque on the citadel hill (Tall al-Ḥiṣn); a Christian church was turned into a granary (ḥaryun, ḥuryd = horreum, horrea; al-Baladhûrî, 165; Ibn al-Šîbîna, ed. Beirut, 179).

To the same event no doubt refers the wrongly-dated reference in the *Chronicle* of the Armenian Samuel of Ani of 58/742 A.D. to the fortification with strong walls of the town of "Mamestia, i.e. Miṣîs" by the Muslims under ʿAbd al-Malik (Ratio templorum usque et suam aetatem presbyteri Samuelis Aniensis, in Euseb. Pamphil., *Chron.*, ed. A. Mai and I. Zohrab, Mediolani 1818, App. 57; Alîshan, *Sissouan*, 286). Every year, from 1,500 to 2,000 men of the advance troops (sasîsît) of Antàkiya used to winter in the town. According to Michael Syrus (tr. Chabot, iii, 478), ʿAbd al-Malik died in 1017 Sel. (705 A.D.) in al-Maṣṣîṣa.

ʿUmar II is said to have intended to destroy the town and all the fortifications between it and Antioch and to have been either prevented by his own death (al-Baladhûrî, 167) or dissuaded by his advisers; according to this version, he then had a large mosque built in 155/770 (tr. Brooks, 156, tr. 75; al-Baladhûrî, 165; but Kafarbayya was probably not really built till the time of al-Maṭʿāsîm (al-Baladhûrî, 165); and Kafarbayya was cistern with his inscription. It was called the "Citadel Mosque" and kept up till the time of al-Muṭṭasîm (al-Baladhûrî, 165); but Kafarbayya was probably not really built till the time of al-Maṭṭāsîm (al-Baladhûrî, 165; but Kafarbayya was not built by Heraclius, the emperor’s brother (Theophanus, ed. de Boor, 372, 23; A. M. 6196; according to al-Ṭabarî, ii, 1185, and Ibn al-ʾĀthîr, iv, 419, wrongly not till 87 A.H.).

Higham built the suburb (al-rabad), Marwân II the quarter of al-Khaṭṣūs east of the Djîshān, which he surrounded with a wall with a wooden door and a ditch. The bridge of ḏîṣr al-Walîd between al-Maṣṣîṣa and ḏîṣr al-Maṭ ṭāsîm, 9 mîls from the former, was built in 125/742-3 and restored in 225/840 by al-Muṭṭasîm (al-Baladhûrî, 168; yakūṭ, Muṭṭâm, ii, 82; Safl al-Dîn, *Marâsid*, ed. Juynboll, i, 255). In the first half of the 2nd/8th century the caliph al-Walîd and ʿUzîd III brought the gipsy tribe of the Zutt [*q. v.*], who had been deported to ʿAṣyr by Muʿawiyah in 50/670, and settled them with great herds of buffalos in the region of al-Maṣṣîṣa in order to fight the plague of lions in the district of the ḏîṣr al-Lûkâm (al-Baladhûrî, 168; De Goeje, *Bijdrage tot de Geschiedenis der Zeynabiers*, Leiden 1873, 17-22).
The first 'Abbasid, Abu 'l-cAbbas al-Saffah, on his accession strengthened the garrison by 400 men, to whom he gave lands; the same estates were later allotted to them by al-Manṣūr. The latter in 139/756-7 required the walk was said to have been damaged by an earthquake in the preceding year, and increased with 8,000 settlers the much diminished population of the heathen temple, he built a large mosque which far surpassed the mosque of 'Umar in size. When 'Abd Allah b. Tāhir was governor of the West (i.e. in 211/826), it was enlarged by al-Ma'mūn. Al-Manṣūr increased the garrison to 1,000 men and settled in the town the inhabitants of al-Khūṣūs, Persians, Slavs and Christian Arabs (Nabataeans), whom Marwān had transplanted thither (see above), and gave them allotments of land. It is probably to the same event that the story refers that Ṣāliḥ b. 'Ali, when in the 'Abbāsīd period the inhabitants of al-Māṣīṣa, harassed by the Byzantines, resolved to migrate, sent Djibilt b. Yahyā al-Badjaḫīl al-Khūrsānī in 140/757-8 to rebuild the town and settle it with Muslim inhabitants (al-Baladhūrī, 166; according to al-Ṭabarī, ii, 135 in the year 141). Under al-Mahdī, the garrison was increased to 2,000; in addition, there was the Ṣanṭīqiyā corps of almost the same size which was recruited for the front line until the caliph of Cordoue became their wāli and increased the garrison by 500 men instead. There is a brief reference in the Syriac inscription of ʿEnēsh to a raid by al-Mahdī to the Djiyban (Syr. Gihon) in 780 A.D. (1091 Sel; Chabot, in Ḫattuša, iv, 2000, 88-9, n. 4), al-Muṣānḏ [1900], 88-9, n. 4), al-Muṣānḏ (Freytag, ZDMG, xi; Elias Nisibēn., op. cit.). The gates of Tarsus and of al-Māṣīṣa were

In 352/963, the emperor Nicephorus took Adana, the inhabitants of which fled to al-Māṣīṣa, and sent the Domesticus John Timissēs (Yānīs b. al-Shimīḏīk al-Dumīṣīk) against this town. The latter had besieged it for several days but had to withdraw as his supplies were running short, and after laying waste the country round burned the adjoining al-Mallūn (Mallūq) at the mouth of the Djiyban (Yahyā b. Saʿīd, 793-4). The emperor himself came again in Dhu ʿl-Kaʿda 353/Nov. 964 to the marches (al-Baghdār) and besieged al-Māṣīṣa for over 50 days, but had again to abandon the siege owing to shortage of supplies and retired to winter in Kaysariyya. Finally, the town was stormed by John Timissēs (Arm. Kūṯīr Žan) on Thursday 11 Raḏjab 354/13 July 965. The inhabitants set it on fire and fled to Kafarbayra. After a desperate struggle on the bridge between the two towns, the Greeks took this suburb also and carried off all the inhabitants into captivity (Yahyā b. Saʿīd, 795; Ibn al-ʿAṯīr, viii, 408-11; Abu ʿl-Fida, Ann. Mosl., ed. Reiske, ii, 482-3; Michael Syrus, iii, 128; Elias Nisibēn., ed. Brooks, 218, tr. 106; Georg. Gedemen., ed. Bonn, ii, 362; Leon Diakon., ed. Bonn, 52-3; Matteo Erhayevacī, ed. Dulaurier in Rec. hist. crois., Doc. arm., i, 5; Step’an Asoh̀k of Taron, Armen. Gesch., tr. H. Gelzer and A. Burckhardt, Leipzig 1907, 134, 24). They were, to the number of 200,000, it is said, led past the gates of Tarsūs, which at that time was being besieged by the emperor's brother Leo, to terrify the people of the town (Ibn ʿIrabī, Rawdat al-maṣārid, in Freytag, ZDMG, xi; Elias Nisibēn., op. cit.). The gates of Tarsūs and of al-Māṣīṣa were
gilded and taken as trophies to Constantinople, where one set was put in the citadel and the others on the wall of the Golden Gate (Georg. Cedren., ii, 363). In 1097 the Byzantine Emperor sent two ships with the hands of the Byzantines; the Emperor Basil II Bolgarconuts stayed for six months in the region of al-Maṣṣīṣa and Tarsūs before going to Armenia, after the death (31 March 1000 A.D.) of the Kurupolates David6 of Tayk, to take possession of his lands by inheritance (Yahyā b. Saʿīd, Taʾrīkh, ed. Rosen, 39, in Zap. Imp. Akad. Nauk, xiv, St. Petersburg 1883). In 1042 the Armenian prince Apšapir, son of Hassan and grandson of Khaṭṭāk of the house of the Arturians, was sent by the emperor Constantin Monomachos as governor to Cilicia (St. Martin, Mém. sur l'Arm., i, 199). In 1085 Philaretos Brachmonios, who was appointed in Cilintopole perhaps as Sebastos (Michael Syrus, ii, 173) or at least Kurupolates (Mich. Attal., Bonn ed., 301) and whose episcopal kingdom comprised the land from Tarsūs to Malayta, Urfa and Anṭākiyya, held al-Maṣṣīṣa (Michael Syrus, loc. cit.; Laurent, Byzance et Antioche sous le kurupolate Philarite, in Rev. des Et. Arm., ix [1929], 61-72).

Shortly before the arrival of the Crusaders, the Saljuk Turks took Tarsūs, al-Maṣṣīṣa, ʿAyn Zara and the other towns of Cilicia (Michael Syrus, iii, 179). About the end of September 1097, the Franks under Tancred, who had been invited thither by Lambert of Outremer, took the town, which was stormed after a day's siege: the inhabitants were slain and rich booty fell into the hands of the victor (Albert, Aquens., iii, 15-16, in Migne, Patro. Lat., clxvi, col. 446-7; Radulf. Cadom., Gesta Tancredii, ch. 39-49). William of Tyre describes al-Maṣṣīṣa on this occasion (iii, 21, in Migne, Patro. Lat., cci, col. 295): Erat autem Mamistra una de nobilioribus eiusdem provinciae civitatibus, muro et multorum incolatu insignis, sedet Optimo agro et gleba saeculari et urbani, ubere et amoenitate praecipua commendabilis. Count Baldwin, who had quarrelled with Tancred, followed him along with the admiral Winimer of Boulogne and encamped in a meadow near the Djayhān bridge; Winimer left him there and went with his fleet to al-Lāḏḏiḥiyya, while the two rivals had a desperate fight, after which Baldwin withdrew to the east (Albert, Aquens., iii, 161, 146, 5). Bohemund only took possession of the towns of Tarsūs, ʿAyn Zara and al-Maṣṣīṣa in August (William of Tyre, vii, 2). After the town had again fallen to the Greeks for a period, Tancred again took it in 1101 (Rad. Cad., ch. 143), but had to hand it over with Tarsūs, Adana and ʿAyn Zara to Bohemund on his return from captivity in 1103 (William of Tyre, vii, 2, in Migne, op. cit., col. 379). In the following year, however, Longjinas, Tarsūs, Adana and Māḏṣūr were regained for Byzantium by the campaign of the general Monastras (Anna Commena, Alexiad, ed. Reifferscheid, ii, 140, 5, who apparently did not recognise the identity of Māḏṣūr with Mofou ἔρημος, which she mentions several times). In the treaty between Bohemund and the emperor Alexius of September 1108, the town was promised to the former (Anna Commena, loc. cit., op. cit., 218), but Tancred had taken it in the preceding year with 10,000 men from the Byzantine general, the Armenian Aspietes (ibid., ii, 147). At this time, of the quarters of the town the one (probably Kalafbarbaya) was in ruins (ibid.). Baldwin of Burg and John of Courtenay, who allied themselves against Tancred with Kogh Vasil of Kaysum, were supported by the latter with a detachment of 800 men and a body of Pećenegs, who were stationed in al-Maṣṣīṣa as Greek mercenaries (Mattēos Urhayecē, tr. Daulurier, 266-7 = RHC, Doc. arm., i, 86). The great earthquake of 1114 destroyed the town, like many others in Cilicia and Syria (Gesta Tancredii, Soc. doc. arm., i, 614).

Under the Frankish patriarchate of Antioch, Mopsuestia-Mamistra was separated from the ecclesiastical province of Anazarbus and made an autocephalous metropolis (Michael Syrus, iii, 191; recensions of the Notitia Antiochena of the Crusading period). The ένωρα Μοσπουστέας stretched (according to Notitia Antiochena on the boundaries of the Antiocheia dioceses, ed. Papadopoulos-Kerameus, 67) from Seleucia in Syria and Adana ἀπὸ τοῦ μεγάλου Ἑξηρωτομοῦ (now Ozerci or Rabatç), τῶν τοῦ μεγάλου πολιοτόμου φιδίου. The latter is undoubtedly identical with αὐτὸς ὁ μέγας πολιοτόμος Ἀντανακλής, the Sayhān.

In 1132-13 the Rupēnids Levon I (Αὐτοκέφαλος), son of Constantin, took the town (Arm. Masis, Mises, Mmeceia et Mamistia, ad ann. i, 615). The brother of the emperor John II Comnenus went to him, and Levon gave his sons his daughters as wives with the towns of al-Maṣṣīṣa and Adana as dowries. But when they quarrelled he took back from the Greeks all that he had given them, and Isaac had to flee with his sons to sultan Masʿūd (Michael Syrus), ii, 230). Levon, falling through anarchy into the hands of Raymond of Poitiers, had to cede (1136-7) al-Maṣṣīṣa, Adana and Sarvantsikar (now Sawaran Kaf'eh?), but regained his liberty in a couple of months; he very soon retook these towns (Doc. arm., i, 152-3 = Chron. de Matthieu d’Edesse, tr. Daulurier, 457; Smbat, op. cit., 616). The emperor John in 1137 (1448 Sel.) had his revenge on Levon. He invaded Cilicia, took Tarsūs, Adana and al-Maṣṣīṣa, and Levon fled with his wife and children and took them to Constantinople, where Levon subsequently died (Ibn al-Athir, xi, 35; Michael Syrus, ii, 245; Gregory presbyt., Forts. d. Chronik des Matthäos, tr. Daulurier, 323; cf. Docum. arm., i, p. xxxii, 1 and 153, 4; William of Tyre, xiv, 24, 46; Röhrich, Gesch. d. Krgr. Jerusalem, 211). John installed Coloman (Calamanus), son of Boris and grandson of Cilicia (William of Tyre, xiv, 24, xiv, 9, in Migne, Patr. Lat., cci, cols. 603, 756; a Dux Ciliciæ mentioned in Regum et principum epistolae, no. 24, in Borgas, Gesta Dei per Franc., 1182, i, 46 and passim). When the emperor John died at Marād ila-Bīdāji on 8 April 1143 (William of Tyre, xv, 22; Röhrich, Gesch. d. Krgr. Jerusalem, 228, 4), his successor Manuel I Comnenus had his body brought by boat from Mopsuestia down the Pyramos to the sea and taken by sea to the capital (Niketas Choniatis, Mon. Komn., i, Bonn ed., 67).

Thoros II, the son of Levon, who had escaped home from his confinement in Constantinople, was again able to cast off the Byzantine yoke. When in 1151 he took Masis and Tīl (Tall Hamdun) from the Byzantines (Smbat, in Doc. arm., i, 619) and made their general Thomas prisoner, the emperor Manuel in the following year sent against him with 12,000 cavalry and Andronicus Comnenus, whom he had appointed governor of Tarsūs and al-Maṣṣīṣa (Gregor. presbyt.,
portion of his army thereupon went to Antioch via Tarsus, Mamistra and Thigo (Hish al-Mutlaqash; not Portella, the Syrian passes, with which Rohricht, Gesch d.Kgr. Jerus., 531, identifies). Buller, who visited the East in the train of Duke Leopold VII of Austria and Styria and the Teutonic Grand Master Hermann von Salza, came in the beginning of 1212 to Mamistere which he describes as follows: (Wilbr., ch. 18, ed. Laurent, Pergermanatores, Leipzig 1864, 175): Hic est civitas bona, super flumen sita, sita amowna, murum habens circa se turritum, sed antiquitatem corrompsit paucis in quodam regno habens inhabitatores, quisque omnibus rex illius terrae imperat et dominatur. In the vicinity lay quoddam castrum quod erat de patrimonio beati Pauli sed nunc temporis possidetur a Graecis. In hac civitate [Mamistere] habebatur sepulchrum beati Pantaleonis. Ipsa vero sita erat a Camanella (cf. Tomaschek, SB At. Wiem [1891], app. viii, p. 71) magnam dixtam. Levon II granted the republics of Genoa and Venice the privilege of having their own trading centres in al-Maṣṣīṣa, which could be reached by ship from the sea before the mouth of the Ḏiyāḥān became silted up (Altanhang, Sissouan ou l’Armeno-Cilicie, 287). The attempt of Raymond Rupēn of Antioch to seize the throne of Armenia after Levon’s death in 1219 failed; he was, it is true, able to take Tarsūs and attack al-Maṣṣīṣa but he was taken prisoner by Conor (Conagan) of Antioch and thereby compelled to take the oath of allegiance to the emperor (Dulaurier, 338 = Doc. arm., i, 171). For a century the Rupēnids ruled almost undisturbed in the town. Their glory reached its height under the splendid-loving Het’ūm I (1219-70). These were held the annual festivals of the Church at which numerous princes and nobles used to gather down to the last and difficult years of the king. Here was held the brilliant ceremony at which his 20-year-old son Levon was dubbed knight. Hither the king brought the seat of government after the destruction of Sis (Altanhang, Sissouan, 287-8).

Baybars sent a punitive expedition against Het’ūm in 646/1246 under al-Malik al-Mansūr of Hamā, who advanced as far as Kafat al-ʿAmidīyān and into the district of Sis, where Saltīf Safīd al-Dīn al-Maṣṣīṣa, Adana and Tall Hamdūn (Tlln Hamtunoy) in 1156, but Shaddad, in Rec. Hist. Orient. des Crois., i, 392), advancing al-Maṣṣīṣa, Adana and Tall Hamdūn (Tlln, he took from the Greeks Adana, al-Maṣṣīṣa and Ayn Zarba and to attack Thoros. The sultan, who on the first occasion (548/1153) was content with the defeat of the Armenians and the return of the lands taken from the Greeks, again attacked al-Maṣṣīṣa. On the 11th of February, 664/1266 under al-Malik al-Mansūr of Hama, who brought the seat of government after the destruction of Sis (Altanhang, Sissouan, 287-8).

Baybars sent a punitive expedition against Het’ūm in 646/1246 under al-Malik al-Mansūr of Hamā, who advanced as far as Kafat al-ʿAmidīyān and into the district of Sis, where Saltīf Safīd al-Dīn al-Maṣṣīṣa, Adana and Tall Hamdūn (Tlln, he took from the Greeks Adana, al-Maṣṣīṣa and Ayn Zarba and to attack Thoros. On the 11th of February, 664/1266 under al-Malik al-Mansūr of Hama, who brought the seat of government after the destruction of Sis (Altanhang, Sissouan, 287-8).

Het’ūm, the nephew of the Catholicoē Grigor IV and son of ʿOvrtvavel Tārnōn, who came to Cilicia in 1189 with his brother Shahingah, received from Levon II (1185-1219) his niece Alice, daughter of Rupēn III, in marriage and the town of Mēris, but died in the same year (Sucat, in Doc. arm., i, 629; Marquart, Südarmenien und die Tigrissellen, Vienna 1930, 481-2). The Emperor Frederick Barbarossa in 586/1190 was unable to go to Syria via Tarsus and al-Maṣṣīṣa when he met his tragic end in the Kalkajdos (alleged?) letter of the Armenian Catholicos in Ibn Shaddād, in Rec. Hist. Orient. des Crois., i, 162). A letter of the Armenian Catholicos in Ibn Shaddād in November, but he did no harm to the town and the surrounding district. The emperor, himself too weak to advance the insult, twice induced by gifts the sultan consented with the defeat of the Greeks, again attacked al-Maṣṣīṣa. On the 11th of February, 664/1266 under al-Malik al-Mansūr of Hama, who brought the seat of government after the destruction of Sis (Altanhang, Sissouan, 287-8).

the Egyptians crossed the Djayhán by a bridge of boats, got behind the Armenians who had retired to Misis and inflicted a severe defeat upon them; among the towns taken by Shahsuwar in 871/1467 of the towns destroyed were Sis, Adana, al-Maṣṣisa and ʿAyūn Zarba, and Levon IV Cilician force against al-Maṣṣisa (Mamuestia), Adana, al-ʿAyni, Doc. arm., Orientis Christianas, Tyre, xiv, 10; Le Quien, in Erdkunde, xix, 66-8. To the east of their land (Taeschner, Gesch. d. Kgr. Jerusal., 1198-1200; Körnich, Gesch. d. Kgr. Jerusal., 42, 202). On account of the many Egyptian invasions, the Latin archbishopric was removed to Ayās by Pope John XXII in 1320 (Allahān, Siswan, 290).

After the fall of the kingdom of Little Armenia, the town of the city of Ptolemais, now called Alexandria, has been Turkish-controlled since 1177-1370 (1175-1206, David, 1215 Johannes, 1266 Sion, 1306 Constantine, 1316 John, 1323 Stephen, 1342 Basil, 1362-1370 unnamed; cf. Allāhān, op. cit., p. 290). Michael Syrus knows only al-Maṣṣīsa, but Merkez Kal īesi on the Bab Maṣṣīsa has been Turkish-controlled since 1320 (Alishan, Siswan, 290). According to Yakūt, the town originally had a wall with 5 gates, and Kafarbayra, one with 4 gates. A specialty of the town was the valuable fur-cla...
Marasid, ii, 167; Byzantine M. kástroν Συμμάχους, al-Safsaf on the present Suqatul-Din (ZDMG, xi, 180; Reiske on Abu l-Fida', Annal., ii, 649, n. 76, according to H. R. Macadam and E. F. J. Thomas, this is a corruption of Yekakt (ii, 401) to the marches of al-Maṣṣāsī. Not far from the town was a Syrian monastery, Gawikāth (mentioned in ca. 1200 A.D.: Barher., Chron. eccles., ed. Abbéos-Lamy, i, 624, in Alīghan, Sissouan, 295; Dījkhoth, probably identical with Jawdeṭel). The neighbouring fortress of Anti-Mandalana (now Tumbu-Kaλ-Safsaf, Combenteur, territoria Meloni, i.e. of Mūn, Ar., al-Mallūn) were, according to Wilbrand of Oldenburg (op. cit.), in ca. 1212 in the possession of the Teutonic Order (Allemanni). The Venetians had a church in al-Maṣṣāsī (Gestes des Chrétiens, in Doc. arm., ii, 831). Armenian authors mention there the churches of St. Sarkis, Thòros and Stephan (Alīghan, 286-9).

The present Misis is a large village or small town whose population was, according to the 1905 census, 1,177. A stone bridge with nine arches (in Baedeker, Konstantinopol und Kleinasiern, 1914, 303, wrongly: “five-arched”), the foundations of which are in part ancient (picture in Alīghan, Sissouan, 289; Lohmann, Im Kloster zu Sis, 15), leads to the left bank of the Djayhan where pieces of walls and inscriptions still mark the site of the ancient Mopsuestia. Here lie the modern villages of Kafarbina: while this term is the one in general use in Arabic texts and in modern authors, Hādīddjī Khālīfa (Dīhān-nūmā, Constantinople 1145/1732, 602) has Kafarbīnā (Taeschner, in ZDMG, xi, 180; Annal. orient., ii, 173; iii, 237, no. 121; Istakhri, 63; Ibn Hawkal, 257, iv, 72, 83, 134, tr. in Gaudefroy-Demombynes, La Sirte à l’époque des Mamelous, Paris 1923, p. cvi, 9, 100; Ibn al-Shināh, al-Durr al-muntakhab fi taḥrīr al-Ḥalab, ed. Sarkis, Beirut 1909, 178-81, cf. index, 292; The Loire, Palestine under the Moslems, 26-7, 37-8, 62-3, 78, 82, 505; index, Lands, 128, 130-2, 141; RHC, Doc. arm., i, index, 824; K. Ritter, Erdkunde, xix, Berlin 1899, 195-115 (the older traveller's name) has also Kafarbīnā, “kafar” (McC. ‘Alī, 1885) ist gêr und girop auf dem Arìmûn. i. Paris 1819, 198 (according to P. Câm’ârîan, Armen. Gesch., ii, 995, 50, 157, 335); W. M. Leake, Journal of a tour in Asia Minor, London 1824, 217; W. B. MÂSÜTĐ, village, fort, and district in the upper Yârkûn valley formerly included in the Dir, Swat and ČÎRÎT Political Agency of the North-West Frontier Province of British India and now in Pakistan. It apparently formed part of the ancient territory of Syamaka (Sylvain Lévi, in JA, ser. 11, vol. v, 76; and H. Lâders, Weitere Beiträge zur Geschichte und Geographie von Ostenurkestan, 1930, 29 ff.). Stein identifies Mâṣûtî with the territory of Čî-wei of the Chao-T’ang, who were situated on the Chen, a tributary of the Wuk’ûng in the 8th century A.D. (Ancient Khotan, Oxford 1907, i, 15-16, Strinnia, i, 18). An inscription discovered at Barenis points to the fact that Mâṣûtî...
was included in the dominions of the Hindushahiyya dynasty of Wayhind [see Hindu-ghānihs]. The village of Mastūdūj lies at an altitude of 7,800 feet, and is 71 miles north-east of Čīrāl town and to the west of Qūz, in the Coal. The history of Mastūdūj is closely connected with that of Čīrāl [q.v.]. British relations with these two states arose as a result of their relations with Kāshmīr, which state recognised British suzerainty in the year 1846. During the viceroyalty of Lord Lytton, it was deemed expedient, in view of Russian military activities in Central Asia, to obtain a more effective control over the passes of the Hindu Kūsh. With this objects in view, the Māhārājā of Kāshmīr was encouraged to extend his authority by means of peaceful penetration over Čīrāl, Mastūdūj and Yāsīn. (The fullest account of early British relations with these states is to be found in Foreign Office mss. no. 65, 1062.) After the introduction of Lord Curzon’s tribal militia scheme, Mastūdūj became the headquarters of the Čīrāl irregulars.

**MASŪD b. MAH MŪD, Abu Ṣa’Ibād, SHIHĀB AL-DAWLA, QAMĀL AL-MILLA, etc., sultan of the Ghaznavid dynasty, reigned 421-32/1030-40.**

The eldest son of the great Mahmūd b. Sebūtīgīn [q.v.], he was born in 388/998. In 406/1015-16, as nāfī ‘udd and heir apparent, he was made governor of Hārāt and in 411/1020 led an expedition into the still-pagan Makrān and in 426/1035 asserted his authority in Gurgān and Tabaristān, where the local ruler Abu Kālidjar was two years in arrears with tribute. In India, raids were made into Kāshmīr (424/1032-3), but policy regarding India in the middle years of his reign was taken up with lengthy operations against the rebellious commander of the army of India at Lahore, the Turkish officer Abu bāqar al-Mawsīl, against whom Masʿūd appointed as his commander the Hindū Tilāk (424/1032-3). When order was restored in the Pan- dūja, the sultan in 427/1036 led a successful expedi-

tion against Hānṣī, leaving his son Mawdūd as governor in the Pandūja.

This concentration on India meant that Masʿūd could not give adequate attention to the western parts of the empire, where the situation grew increasingly menacing. On the death in 423/1032 of the Ghaznavid governor in Khvārazm, the Khvārazm-Shāh Aftāntūs [q.v.], that distant province, which had been annexed by Mawdūd less than twenty years before, fell away from Ghaznavid control under less amenable governors there. The loss of this outpost, guarding approaches from the steppes to northeastern Persia, led to Masʿūd in dealing with the incursions of the Turkmens led by the Sāldjūk family, who had been repulsed from Hārāt and Farāwā early in the reign but who were by 425/1033-4 making systematic raids into Khvārazm. Although the Ghazna-

**MASʿūD b. MAW DūD b. ZAN GĪ, ʿĪzz al-Dīn, fifth Zangī Atābāk of al-Mawsīl (Mosul) (576-89/1180-93).**

Masʿūd’s prestige and military reputation were now shattered. Fearing that even eastern Afghanistan and Kāshmīr might fall to the Sāldjūks, he resolved to leave for India, but after crossing the Indus his army rebelled at the ribāt of Mārkīlā, deposed him and soon afterwards killed him, having set up his brother Muhammad again for a brief second reign (Rābī’ II 432/December 1040), before Masʿūd’s son Mawdūd [q.v.] was able to avenge his father.

The verdict of contemporaries such as the official Abu ʿl-Fadl Baybākī [q.v.] was that Masʿūd was inferior in capability and determination to his father; his advisers complimented of this capriciousness and lack of sound judgement. But in retrospection, one may well conclude that the Ghaznavid empire had reached a high point by the end of Mahmūd’s reign which no successor of his, however competent, could have sustained such an emprise.

North Syria and the Djazira. Though he had neither the material resources nor the political imagination to block Salah al-Din's ambitions altogether, he nevertheless proved a tenacious opponent, and in the end was able to retain in the confederation his family al-Mawsil and the core of that of Diyar Rabi'a. We should also note that he seems to have enjoyed the active support of his subjects, whose energy and stubbornness were decisive factors in the defence of al-Mawsil in 581/1185.

Like every other Syro-Djaziran prince of the 6th/12th century, Mas'ud operated within the framework of a family confederation. Once he came to the throne of al-Mawsil, he was the senior member of a group of Zangid princes, but he had little capacity to intervene in the affairs of their appanages or to compel them to accept his leadership. At the time of his accession in 576/1180, Halab (Aleppo) was held by his cousin al-Salih Isma'il b. Nūr al-Dīn Mahmūd; Djazirat Ibn Umar by his nephew Mu'izz al-Dīn Sandjar Shāh; Sayf al-Dīn Ghāzī II, and Sandjar by his younger brother Ihlāq al-Dīn Zangī II. But with Salāh al-Dīn's occupation of Aleppo (Ṣafar 579/1183), Zangīrid rule was restricted to the principalities of al-Mawsil (always the principal one), Sandjar and Djazirat Ibn Umar. These three towns retained in fact the main elements of the Zangī confederation down to its end in the early 7th/13th century. As always in such political arrangements, the princes were seldom united among themselves, and Salāh al-Dīn played with great skill on the petty ambitions of Sandjar Shāh and Ihlāq al-Dīn Zangī II. On the other side, Mas'ud hoped to establish a close supervision over his relatives, but Salāh al-Dīn's presence prevented that.

Mas'ud began his career in the service of his older brother, Sayf al-Dīn Ghāzī II (565/1170-80). He was commander of al-Mawsil's contingent at the disastrous battle of Kurun Hamat (Ramadan 570/April 1175), which marked Salāh al-Dīn's first great military triumph in Syria, and was likewise present at the equally unfortunate Tall al-Sulṭān the following year, though on this occasion his brother Ghāzī was in command.

After this we hear nothing of Mas'ud until the death of Ghāzī (Ṣafar 576/June 1180). Ghāzī had intended to name his twelve-year-old son Sandjar Shāh to succeed him, but was persuaded by the amīr Mudājdīd al-Dīn Kāymāz—the éminence grise of Zangid politics throughout this period—to assign al-Mawsil to his brother Mas'ud and to compensate Sandjar Shāh with Djazirat Ibn Umar. In spite of these, Mas'ud's succession went without incident and was never seriously challenged throughout his reign.

Mas'ud now had the primary responsibility for checking Salāh al-Dīn's evident ambitions, and the first six years of his reign were almost entirely taken up with this problem. The first crisis came with the death of al-Salīh Ismā'il of Aleppo (Rajab 577/December 1181). Ismā'il bequeathed Aleppo to his cousin Mas'ud as the only Zangī prince with sufficient resources to hold the city. Mas'ud in fact did occupy Aleppo during the winter of 577/1182. But he soon negotiated an exchange of Aleppo for Sandjar with his younger brother Ihlāq al-Dīn Zangī II. Ibn al-Athīr states that the reason was Zangī's threat to turn Sandjar over to Salāh al-Dīn; equally a factor, no doubt, was Mas'ud's desire to consolidate his territorial gain of al-Mawsil. The exchange was consummated in Muḥarram 578/May 1182, and at once provoked Salāh al-Dīn's great Syro-Djazīrī cam-
paign of the same year. Al-Mawsil was subjected to a short siege in the autumn of 578/1182, but far more important was Salāh al-Dīn's capture of a string of major Djazīrūn towns, including Sindjar itself. Mas'ud's desire to consolidate his defensive alliance (including Kūfā al-Dīn Il-Ghāzī of Mārīdīn and the Shāhī Arman of Khāṭī) failed, and in the spring of 579/1183 Salāh al-Dīn captured Amid and Aleppo. The latter city was taken through negotiations with Zangī, and this prince was compensated with the restoration of his old seat of Sindjar together with several other towns. Mas'ud's strategy had thus utterly failed; he was now isolated, while Salāh al-Dīn had gained a powerful new client in 'Īmād al-Dīn Zangī II. Worse, a moment of turbulence in the palace politics of al-Mawsil caused Mas'ud to lose control of a traditional client-state in Irbil, whose ruler also went over to Salāh al-Dīn.

At this juncture, Mas'ud sought the support of the powerful Atābāq of al-Dībāl and Atābāqba'yajān, Pahlawān Muhammad b. Eldiğiz [see Eldiğiz], but it did not happen. The garrison and townpeople of al-Mawsil put up a spirited defence, and the caliph's envoys made it quite clear that Salāh al-Dīn's venture did not enjoy the support of the population. Finally, a grave illness forced Salāh al-Dīn to withdraw to Harrān in late autumn, and negotiations throughout the winter at length led to a treaty in Dhu 'l-Hijja 581/March 1186. Mas'ud would retain al-Mawsil and would have full autonomy in internal affairs, but he would recognise Salāh al-Dīn's supremacy in the khutba and sikka and would supply him with military aid as demanded. These terms did in fact govern relations between the two princes for the rest of their lives. Mas'ud's support to Salāh al-Dīn during the reconquest and the Third Crusade even earned for him permission to attack his troublesome nephew Sandjar Shāh in Djazirat Ibn Umar in 587/1191. He did not succeed in taking the city, but did compel Sandjar Shāh to concede him half his lands.

With Salāh al-Dīn's death (Ṣafar 589/March 1193), Mas'ud hoped to recoup the fortunes of his house. Joining forces with Zangī of Sindjar, he moved to occupy as much of the Djazīrī as possible. But before any major results could be achieved, Mas'ud fell ill and returned to al-Mawsil. Meantime, Ayyūbīd forces under al-Ādīl were able to compel the helpless Zangīds to make a quick peace before they suffered irreparable territorial losses. After an illness of some two months, Mas'ud died on 29 Shaban 589/30 August 1193. He left al-Mawsil to his son Nūr al-Dīn Arslān Shāh (d. 607/1211), who would be the last effective ruler among the Zangī-Atābāk of al-Mawsil.

Bibliography: The Arabic sources for ʿIzz al-Dīn Mas'ud are essentially those for Salāh al-Dīn. Of particular importance are Ibn al-Athīr, Atābāq, ed. Tulaymāt, Cairo 1963, and with a French translation by Barbiere de Meynard in RHC, historiens orientaux, ii, 1876; idem, al-Kāmil, xi-xii, passim; Ibn Khallikān, Wayfayt al-ṣūrān, ed. I. ʿĀhūba, Beirut 1972, nos. 236, 521, 721 (Ibn Khallikān follows Ibn al-Athīr closely but adds
some fresh details). Modern works: the Zangid
background is given in N. Elisseeff, Nür al-din, 3 vols., Damascus 1967; of the many works on Salah
al-Din, the most useful at the moment are those of E. H. Lucas, From Saladin to the
Mongols, London 1977, passim. There are no
specialised monographs or articles on Mas'ud.

(R. STEPHEN HUMPHREYS)

MAS'UD B. MUHAMMAD b. MALIK-SHAH
Abu 'l-Fath Ghuyyeb at-Tawr was 'l-Din, Saldjik sultan in 'Irak and western Persia
529-47/1134-52.

Like the other sons of Muhammad b. Malik-Shah [q. v.], Mas'ud was entrusted as a child to the tutelage of
Turkish Atabegs [see ATABAK], latterly with Ay-Aba
Djuwayni Beg acting thus, and given the appanage of
Adharbaydjan and al-Djazira; at Djuwayni Beg's
defeated a coalition of discontented amirs in 542/1147
and killed a major thorn in his flesh, Boz-aba; but
jealousy of the sultan's favourite, the amir Khâbîs Beg
Arslan, provoked further warfare in the next year,
with the rebel group endeavouring, unsuccessfully, to
place Malik-Shah b. Mahmud on the throne in
Baghdad. Mas'ud later gave him one of his daughters
in marriage and made it his goal when Mas'ud died at Hamadân in 547/1152 September
1152, Malik-Shah succeeded briefly to power as the
protégé of Khâbîs Beg. Ibn al-'Azhîr regards the for-
tunes of the Saljuq dynasty as going into steep
depression on Mas'ud's death.

Mas'ud Beg, minister in Central Asia of the
Mongol Khaân in the 13th century A.D.

Soon after 1238, in the reign of the Great
Khân Ogodey (1227-41), parts of Transoxania
and Moghîlîstan [q. v.] (the region of the steppes to
the north of Transoxania) were ceded to Çağhatay as an
investment on a sub-vassal [see ÇAGHÂTAY KHAN
AL-NAHR. 2. History]. Mas'ud Beg's father Mahmud
Yalawâ (q. v.) was transferred from his government of
the sedentary population of Transoxania and
Moghîlîstan to China, and the son then appointed
to succeed him there. Indeed, according to Râqîd al-
Dîn, tr. J. A. Boyle, The successors of Genghis Khan,
New York and London 1972, 94, cf. 183, 218,
Mas'ud Beg administered the affairs of the entire
sedentary population, sc. all but the nomadic Turks
and Mongols, throughout Inner Asia from
Khâzâr-azam to Kâshgharia and Uyghûrîa, Muslims
and non-Muslims alike. Djuwayni praises him for his
just rule over the Muslims of Transoxania. His
benefactions included such buildings as the Kâhînîyya
madrasa (built by him with money given by the Christi-
An Queen Sorkotani, widow of Toluy and mother of
Mongke Khân and Hulegu) and the Mas'ûdiyya
madrasa, both situated near the Rûghstân of Bûkhrâ,
and also, it seems, the Mas'ûdiyya madrasa in
Kâshghar (Djuwayni-Boyle, i, 108).

Mas'ud Beg remained governor of Inner Asia
under Mongke and Batu, during the civil strife of
Alguh and Berke and after the victory of Kaydu over
his rivals in 1269, showing remarkable powers of sur-

third in Kashghar under Kaydu’s son and successor Capar.

(C. E. Bosworth)

MAS’UD-I SA’D-I SALMAN, eminent Persian poet of the 5th/11th century (ca. 440/1046 to ca. 515/1121-2) who early and late in his life enjoyed position and fame at the Ghaznavid court, but spent some eighteen years of his maturity in onerous imprisonment. As a poet, he is most famous for the powerful and eloquent laments he wrote from his various places of incarceration [see HABSYYA in Suppl.]. Mas’ud-i Sa’id was born in Lahore to a family of means and education. The family’s original home was Hamadân, but had been settled in the region long enough for his father to have become a responsible official at court. About Mas’ud-i Sa’id’s early life no reliable information survives. He makes his first dateable appearance in 460/1076-7 as a panegyrist in the retinue of prince Sayf al-Dawla Mahmûd, son of the ruling sultan (Zahir al-Dawla Ibrâhîm [see ghaznawids]), who was appointed governor-general of India in that year. The kaftâr-yi mdâbhâ which Mas’ud-i Sa’id composed on that occasion is the work of a mature and accomplished poet. By his own assertion in other poems from about this period, he was also a brave warrior, and a responsible and highly-regarded member of the prince’s court. In about his fortieth year, Mas’ud-i Sa’id went to Ghazna to reclaim land that had been seized from him by persons unspecified in the sources. While there, he fell under suspicion, and possibly more because of the suspected disloyalty of his patron than of his own, he was imprisoned. This period of imprisonment, which he spent in the fortresses of Sâ’i, Dakhâk and Nây, lasted some ten years despite the repeated entreaties of a number of officials friendly to the poet, and the supplications of Mas’ud-i Sa’id himself.

He was released early in his reign by sultan Ibrâhîm’s successor, ‘Alâ’ al-Dawla Mas’ud (III) who also made the poet curator of the royal library. Mas’ud-Sa’di also enjoyed the patronage of Abû Naṣr-i Fârsî, deputy to the current governor of India, ‘Aṣğr al-Dawla Shîrzâd, and was appointed by him to the governorship of Džâlandhâr/Gâlandhâr, a dependency of Lahore. When shortly thereafter Abû Naṣr-i Fârsî was disgraced and fell from favour, his protégé suffered a like fate and was again imprisoned, this time in the Indian fortress of Marandj; and for a period of eight or more years.

Mas’ud-i Sa’id was released from his second and final period of incarceration in ca. 500/1106-7, shortly after the opening of the reign of Sultan Mas’udd’s successor, Kamâl al-Dawla Shîrzâd, but he remained in obscurity throughout both his reign and that of his successor, Sulhân al-Dawla Arslân Shâh. Only toward the close of his life, with the beginning of the reign of Yamîn al-Dawla Bahrân Shâh, a notable patron of literature, did the now aged poet once again enjoy the recognition that his poetic talents merited.

Mas’ud-i Sa’id was a skilful court panegyrist who continued the style of his eminent predecessors, ‘Unsûrî, Farrûkhî and Manûşîrî [q.v.]. His work does not reflect either the shift toward mystical subjects nor the more complex metaphorical structure that can be seen in the poetry of his contemporaries Sanâtî and Azrâkî. His panegyrics have a special interest for the historian because they contain a measure of historical data about a period for which other sources are rare. However, his most enduring contribution as a poet has been his prison poems (hab-şyâyâ), in which, through the skilful deployment of conventional language, he conveys the despair and power the wretchedness of his days. One hears in these poems that intensely personal voice whose lack is so frequently decried in studies of Persian poetry.

Bibliography: The notices of Mas’ud-i Sa’id salman in mediaeval Tâdâkir are not to be trusted, and the only reliable source for his biography is his Dîwân, which has been capably edited by Râghib Yâsîn. Tehran 1338/1939, and frequently reprinted. Although he boasted of his knowledge of Arabic, no Arabic poetry by him has survived. The best study of his life and work remains that of Mirzâ Muhammad b. ‘Abd al-Wahhâb Kazwînî, Mas’ud-i Sa’id-i Salamân. Translated by E. G. Browne, in JRAI (1905), 693-740, and (1906), 11-15. C. E. Bosworth makes a number of comments on the life of Mas’ud-i Sa’id and the general literary situation at the Ghaznavid court in his The Later Ghaznavids, splendour and decay: the dynasty in Afghanistan and northern India 1040-1186, Edinburgh 1977. There is a lengthy chapter on his imagery in M. Shaffî- Kâddâni, Suwar-i shâhî d dar shîr-i Fârsî, Tehran 1350/1971. (J. W. Clinton)

MAS’UD, SAVÎD SALAR, called Ghasî Mîyân, a legendary hero and martyr of the original Muslim expansion into the Gangetic plain of India. He is alleged to have been the son of a sister of Sultan Mâhmûd of Ghazna [q.v.], to have been born at Admîr [q.v.] in 405/1014, and to have been killed in battle against Hindu idolaters, aged 19, in 424/1033. His tomb is on a pre-Muslim sacred site in Bahrâstî, in the sub-Himalayan plain of northern Uttar Pradesh, and is the centre of a widespread cult. The hero-cult was well-established by the beginning of the 11th/17th century, and is succinctly described by Ibn Bâttûta. The Sultans Mâhmûd b. Tughlakh and Firuz Shâh Tughlakh visited the tomb. The procession of the hero’s nêzâ (“lance”), a tall tufted pole, was prohibited by Sultan Sikandar Lodî (d. 923/1517) but remains a highlight of the annual festival (cf. similar poles of Lîl Beg of the Cuhfas, and of Shâhbaz Kalandar at Sehwan). The myth of Salar Mas’ud was elaborated in Persian in the early 11th/17th century in the Mirzâ-i Mas’udî, a heroic romance which owes something to the Dîstân-i Amîr Hamza though it strives for a greater air of historical authenticity. Ghasî Mîyân’s cult extends to Bengal and the Pandjab, probably sometimes conflated with the cult of other local Muslim shâhîds. The main ‘urs or death anniversary is celebrated on the first Sunday of the solar month of Diwyetha/Dijêt h, between 14 and 21 May, but an ‘urs is also mentioned on the significant date of 11 Muharram. The martyr-cult is combined with a fertility-cult (cf. the secondary sexual symbolism of the pole, and the “mystic-marriage” implication of ‘urs). Legends and songs of the marriage of Ghasî Mîyân before his last battle are widely distributed and were sung at Muslim weddings. At an extreme popular level a conflation may occur (e.g. in the east Nepal), with the celebration of the martyrdom of Hushayn at Karbalâ, with the bridegroom figure of Kâsim b. Hasan, lamented in Iranian märtyrs. The ‘urs of Ghasî Mîyân is celebrated by lower-class Hindus as well as Muslims. Mendicant followers of Ghasî Mîyân carry a daff (tambourine) and are known as daffî fârsîs.

Bibliography: Amir Khusrav Dihlavi, l’îjâzî-i Khusravi, Lucknow 1872, i, 155; Ibn Bâttûta,
Al-Mas'ūdī, Abu 'l-Hasan 'Ali b. al-Husayn, Arab writer whose activity, in the words of Brockelmann (in *EP*, s.v.) “has been undertaken outside the well-trodden paths of professional scholarship”, with the result that he has been rather neglected by biographers and copyists and that a normally well-informed writer like Ibn al-Nadim, who has obviously not read his works, takes him (Fihrist, 154) for a Maghribī and devotes to him only a short, moreover probably truncated, article. In fact, the only reliable account which is available concerning the biography of this eminent individual must be drawn from his two surviving works, the *Murūj al-dhahab* (abbreviated here as *M*, referring to Pellat’s edition—*M*, *passim*) and the *Tanbih* (*T*, ed. Cairo 1962, *Tanbih*, *AL-I*) which he may also have written.

Al-Mas'ūdī was born in Baghdād (M, 987; T, 19, 42) into a Kūfīan family which traced back its genealogy and connected its *nisba* to the Companion Ibn Mas'ūd [q.v.]. He himself does not record his ancestry in entirety, but it could well be as follows (see Ibn Ḥazm, *Djamharat ansdab al-ʿArab*, ed. Cairo 1962, 197; Ibn Khaldūn, *Ibar, ii, 319*): 1. Ali b. al-Husayn b. 'Ali b. Abū 'l-ʿĀl (M, § 522) b. Zayd b. 'Utbā b. 'Abd al-Rahmān b. 'Abd Allah b. Mas'ūd (for the rest of the genealogy, see Ibn al-Kalbī-Caskel, *Djamharat*, Tab. 58: Ḥudhayl, who does not however allot to 'Abd al-Rahmān a son named 'Utbā). The date of his birth is unknown; however, if we are to take literally the expression *haddaṭah-nā* preceding the reference (T, 254) to Ibrāhīm b. 'Abd Allāh al-Kaḥbštī (d. 292/904) or that (*ghābdān*) which is used (T, 254), the *nisba* of both, which includes al-Nādhī (d. 293/906 [q.v.]), must have been born later than some years before 280/893, and not ca. 283/896, as is suggested by A. Shboul (*Al-Mas'ūdī and his world*, London 1979, p. xv).

His youth was spent in Baghdād, but he gives no information regarding the development of his studies. From a reading of the *M*. and *T.*, it may however be deduced that he had the opportunity, during the period of his religious, judicial and literary education, to attend classes given by a number of eminent teachers who died in the early years of the 4th century, notably (T, 296) Wākidī (d. 306/918 [q.v.], M, § 2242) al-Faḍlī b. al-Hubāb (d. 305/917 [q.v. in Suppl.]), (M, §§ 139, 2282) al-Nawbakhtī (d. at the beginning of the 4th century [q.v.]), (T, 396) Abī Ḥaṣīna b. ʿAbd Allāh al-Dhūbaḍī (d. 303/915, see al-Ṭabarī, 396) al-Ash'ārī (d. 324/935 [q.v.]), (M, *passim*) al-Sulī (d. 324/935 [q.v.]), (T, 396) Abu 'l-Kāsim al-Balākhi (d. 319/931, see al-Balākhi, M, § 764) Ibn Duraḍ (d. 321/934 [q.v.]), (M, *passim*) al-Asḥārī (d. 324/935 [q.v.]), (M, *passim*) Nīlāwyā (d. 323/934 [q.v.], and others besides; it is also known that in 306/918 (al-Subkī, *Tabakāt al-Shīʿīyya*, ii, 307) he was present at the death bed of Ibn Suraydī [q.v.]. It would be tedious to list the personalities with whom he associated in the course of his career, but a further exception is to be made in the case of (M, § 3382) Djabīr b. Muhammad b. Hamdān al-Nawrussī (d. 323/944; see Sezgin, *GAS*, ii, § 225) and of (M, *passim*) Abī Bakr al-Sulī (d. 336/946, see al-Sulī), who seem to have played a particularly important role in his life. The scholars and men of letters cited above represent, at this highest level, the principal disciplines cultivated in this period (see, in this context, A. Shboul, *op. laud.*, 29-44; T. Khalidi, *Islamic historiography*, Albany 1973, 148-50; in the encyclopaedic index which follows the new edition of the *Murūj*, brief biographies of the contemporaneous personalities mentioned in this work are to be found).

Whatever may have been the interest and the value of the knowledge thus acquired through direct transmission, an echo of which is also to be found in his work, al-Mas'ūdī would never have attained his eminence had he not been endowed with an extraordinary intellectual curiosity which impelled him, on the one hand, to educate himself with books, and, on the other, to enrich his human experience by undertaking long journeys both within and outside the Muslim world. For the composition of his principal surviving work, the *Murūj*, he had recourse to no fewer than one hundred and sixty-five written sources, including, in addition to Arabic texts, translations of Plato, Aristotle and Ptolemy, as well as Arabic versions of monuments of Paliavi literature. In one paragraph of the *Tanbih* (154), he mentions Christian authors with whom he was in the majority of cases personally acquainted, and passes judgment on their works; he seems to have had them make translations of or to explain passages which provided documentation for chapters of his own works (e.g. M, §§ 523 ff.), and the transcription into Greek characters of the name Helen (M, § 735) is proof of his breath of interest and his curiosity.

The latter are also exhibited in the accounts, unfortunately dispersed, of his travels, a topic which raises the question of his profession, which he does not reveal, and thereby of the resources which enabled him not only to live but furthermore to undertake expensive foreign expeditions. By all appearances, he had no connection with regular commerce and he was neither an official representative nor a religious authority who could depend on hospitality from Muslim communities visited. The hypothesis of A. Miquel (*Geographie humaine*, i, 205-6) according to which he could have been an emissary of the Ismāʿīlīs seems hard to sustain, and ultimately it has to be assumed that this traveller possessed a personal fortune out of which he met the costs of his travels and that he perhaps drew some profits from the occasional commercial venture.

In 300/912, al-Mas'ūdī was still in Baghdād (M, § 2161); three years later (303/915), he is found visiting Persia (T, 106, 224), then India (M, §§ 269, 417-8; T, 224); it is hardly probable that he travelled as far as Ceylon and China (M, §§ 175, 342) since, when he speaks of these lands, he copies from Abū Zayd or the Abīdūr al-ṣīn wa l-ḥind (q.v. in Suppl.) (in 304/916, he returns to a previous source by a visit to the island of Kanbalū (M, § 246). From 306 to 316/918-26 he was travelling around Irāk and Syria (M, § 3326) and it was perhaps during this time that he made his way to Arabia (cf. Shboul, *op. laud.*, 12-13). In 320/932 or a little later he visited the provinces of the Caspian and Armenia (M, § 494), then, from 330/941 or 331 onward, he resided in Egypt, where, in 332/943, he composed the *Murūj* (M, § 874).
and passim), also returning to Syria in the same year (M, § 220) and visiting Damascus (T, 194) and Antioch (M, §§ 704-5) in 334/946. Naturally he visited Alexandria (M, §§ 679, 941) and Upper Egypt (Akhbdr al-zamdn, vi, 110-12), and it seems that he has spent his last years, reviewing his works and writing some new ones, in particular the Tanbih, completed in 345/956 (T, 401), shortly before his death, which came about in Djamrd II 345/September 956. On his travels, see especially Maqbul Ahmad, Travels of...al-Mas'udi, in IC, xxviii (1954), 509-21; A. Shboul, op. laud., 1-28. It is not known exactly at what period al-Mas'udi began the composition of his work and committed himself fully to his vocation as a writer, but the titles that he quotes in the Murudi suggest that he began with relatively short treatises before embarking on his major works and before turning to account the notes which he must have accumulated in the course of his travels. The first point that commands attention is the case which he devoted to the correction and enrichment of the original versions of his writings, in particular the Murudi, of which the first “edition” dates from 332/943 and the last, from 345/956 (T, 154). The second point is the fact that this abundant and diverse corpus of work has, in total, been curiously neglected by posterity, with the exceptions, specifically, of the Murudi, the success of which has never ceased but of which only the “edition” of 332, revised in 336, has been preserved, and of the Tanbih, which, owing to its conciseness, responds to the Muslim taste for abstracts; a third text that has been attributed to him, the Ikhb 'al-wasayya, has survived for obvious reasons (see below) but is of doubtful authenticity.

The content of the surviving works, which are presented in a historico-geographical framework, shows that this prolific writer has a close interest in various disciplines which are not to be arbitrarily classified as history or geography; since he displays in addition an active sympathy for the Akl al-Bayt and Twelver Imami Shi'ism, it is, to say the least, surprising that the Imami, who mention al-Mas'udi as one of their partisans, but are principally familiar with the Murudi (and subordinately with the Ikhb 'al-wasayya), have not devoted their efforts to the preservation of his works, beginning with the most “committed”; in fact, even if it can be understood that his major work, the Alhkb 'ar al-zamdn, might not have tempted the copyists on account of its volume, it is hard to see the reason for a general indifference with regard to the majority of his other writings which ought to have been interesting and more easily manageable. While Ibn al-Nadlm and later biographers have conscientiously enumerated the works, now lost, of so many less prestigious writers, not one of them has apparently entertained the idea of going through the Murudi and the Tanbih, in which thirty-four titles are mentioned, enabling us to establish thirty-six as the total number of al-Mas'udi's writings. It must be supposed that the article in the Fihrist has been truncated by a few lines, because it contains only five titles, whereas Yäkûr, who revised it and therefore must have known it well, refers to eleven (Udahb, viii, 90-4) and the same number recurs in the work of al-Kutubi (Fawdat, ii, 94-5); the Shfi' al-Naqjdsh (Rdgdt, 178) increases the number to fourteen, and Haddl Khâlîf (passim) to sixteen. Ibn Hâdjâr al-Askalânî (Lisan al-Mizât, iv, 224-5) confirms the general impression when he asserts that with the exception of the Murudi, copies of the work of al-Mas'udi are rare. In the West, a number of authors have attempted to compile inventories of his work: De Goeje in the Introduction to his edition of the Tanbih (vi-vii), Carra de Vaux in his translation of the latter (569-70), Sar- ton in his Introduction to the history of science (Baltimore 1927, i, 637-9), Brockelmann (I, 150-2, S I, 220-1), Sezgin (GAS, i, 334-4), but more recently, Khâldî (op. laud., 154-64) and Shboul (op. laud., 55-77) have made strenuous efforts, working on the basis of the titles mentioned in M and T and especially of such references to their content as are available, to identify the subjects of the lost works. When the researcher is confronted with such a discursive writer as al-Mas'udi, this method is often dangerous, but there is no reason why it should not be used in order to gain an impression of at least some of the questions examined and to establish an approximative classification.

I. A first category comprises works of general culture set in a framework of geography and history or of the latter alone:

1.—K. Alhkb 'ar al-zamdn wa-man ashbahu 'l-hdollmin min al-imam al-mazid wa-l-mudid, i (between 332/943 and the last, from 345/956 § 819). The K. Alhkb 'ar al-zamdn published in Cairo, in 1938, by Sâwi, has nothing in common with that of al-Mas'udi; it has been translated as early as 1896, under the title Abrégé des mœurs, by Carra de Vaux, who considered it a popular work (JA, 9th series, vii [1896], 133-44; cf. D. M. Dunlop, Arab civilization to AD 1500, London-Beirut 1971, 110 ff.).

2.—K. Alhkb 'ar al-arwaâb (before 332/943); despite the title, it is a supplement to the above-mentioned work and it concerns expeditions and wars (especially those of the mythical kings of Egypt) which did not figure in the preceding (M, § 819).

3.—Al-Kuldt al-arwaâb (before 332/943); this “Middle book” must have followed the same format as the Alhkb 'ar al-zamdn, since it was both an abridgement and a supplement on points of detail. The Oxford and Istanbul ms. mentioned by Brockelmann (in EP, s.v. al-Mas'udi) and Sezgin (GAS, i, 334) do not corre- spond to the ms. of the above-mentioned Shboul, op. laud., 89, n. 127, who has examined them.

4.—K. Murudi al-jahab wa-uczàid w-al-jawwar (fi tabb al-aghrâf min al-muluk wa-uh al-drâjd, T, 1): it is to this work, written in 332/943, revised in 336/947, again in 345/956 (T, 97, 110-1, 155-6, 175-6) that al-Mas'udi owes his reputation. The text of 332-6, the only version that has survived, was published at Bulât in 1283 and in Cairo in 1313, in the margins of the Naft al-tib of al-Makkarî in Cairo in 1302 and of the Kamîl of Ibn al-Aghîr at Bulât in 1303; Muhyî 'l-Dîn 'Abd al-Hamdî has made from it an annotated edition which has enjoyed a degree of success (2nd ed. Cairo 1368/1948, 3rd ed. 1377/1958, further ed. by Yuusuf Daghîr, Beirut 1973). As early as 1841, the first volume of an English translation, the work of A. Sprenger, appeared in London, and later Barbier de Meynard and Pavet de Courteille edited and translated the entire text into French (Paris 1861-77, 2nd ed. 1913-30); this work has been extensively exploited by orientalists, notably by Marquart (Streif- züge, Leipzig 1903) and A. Seippel (Rerum norman- nicarum fontes arabici, Osdo 1896-1928), who amended it on points of detail; finally, Ch. Pellat has revised the edition-translation by Barbier de Meynard and Pavet de Courteille (5 vols. of text, Beirut 1966-74 and 2 vols. of index in Arabic, Beirut 1979; 3 vols. of
translation, Paris 1962-71, have so far appeared, but the last two and the French index have been complete for some years; this revision has been based on secondary sources rather than on new ms. (which are listed in Brockelmann, v, 31, 220 and Zeising, i, 338).

Brockelmann (in Ep., s.v.) and other authors have accepted without reservation the interpretation by Gildemeister, who (in WZKM, v [1894], 202) asserted that Murūdī al-ḥiṣāb should be rendered as "gold-washings" rather than "meadows" of gold; taking as a basis the fact that the earth "makes gold to grow" (tabdīl al-ḥiṣāb: M, § 796); the author of the present article regards this suggestion as nonsensical, and in this respect is followed by Khalidi (op. luct., 2, n. 2) and Shboul (op. luct., 71).

The Murūdī comprise two essential parts. The first (§§ 34-665) contains "sacred" history up to the time of the Prophet, a survey of India, geographical data concerning seas and rivers, China, the tribes of Turkey, a list of the kings of ancient Mesopotamia, Persia, Greece, Rome, Byzantium, Egypt, and chapters on Negros, Slavs, Gaul and Galicia. Next come the ancient history of Arabia and articles on the beliefs, the various calendars, the religious monuments of India, of Persia, of the Sabaeans, etc., and a summary of universal chronology. In this first part, which takes up roughly two-fifths of the work, al-Mas'ūdī has set down, so as not to have to return to them, generalities regarding the universe and information of a historical nature on non-Muslim peoples (including the pre-Islamic Arabs). In the second part (§§ 664-3661), by contrast, there are only exceptional references to the peoples of countries outside the Islamic world, and it is the history of Islam, from the Prophet up to the caliphate of al-Mu'tāsir, which is recounted; the ḥulafa' rāshidūn, the Umayyads 'kings' (only 'Umar b. 'Abd al-'Azīz has a right to the title of caliph, while al-Hādīṣī enjoys special treatment) and the 'Abbāsid caliphs each form the subject of a chapter in which a brief biographical article is followed by accounts (akhbār), anecdotes and digressions on various subjects. In view of the fact that the author declares (§ 3) that this work contains a summary of studies which had been more fully developed in the Akhbār al-zamān and the Kitāb al-awṣūf, as well as supplementary notices on certain points, the Brockelmann, i, 1, 51, 220 and Sezgin, i, 338).

V.—The part of the book devoted to the history of the Umayyad and 'Abbāsid dynasties, which takes up roughly two-fifths of the work, was probably composed in an earlier period and is formed of the general format of these two works, where the points are perhaps presented with greater rigour.

6.—The K. Waṣl al-magāli al-ṭuṣalī bi-dawā'ī al-akhbār wa-muḥātaṭat al-sulūk al-ṣāliḥ al-āghāl, foreshadowed in M (§§ 3014, 3428, 3608) and mentioned in T (333), was a collection of various traditions, especially concerning the Andalus (the history of which is neglected in the Murūdī); it was probably composed in an unsystematic way and would certainly have appeared in a form closer to adab than to methodical history.

7.—The K. Akhkhār al-mas'ūdīyyat, also composed after M, dealt (T, 259, 333) with the history of pre-Islamic Arabia and of the Al-andalus.

8.—The K. Makālī fursan al-ʿArijan (332/943) was no doubt a collection of traditions concerning Persian heroes, which is of some sort of counterpart of the K. Makālī fursan al-Arab by Abū Ḫubbayda (T, 102).

9.—The K. Funūn al-maṣāfr al-waṣmā jārī fi l-ḥuṭūr al-sulūkī (after 332/943), which is mentioned several times in T (121, 144, 151, 153, 158, 160, 174, 182, 261), seems to have dealt especially with the Greeks, the Byzantines and North Africa and to have filled in the gaps left in preceding works.

10.—The K. Dhikhrīy al-waṣmā ḥāna fi sāliḥ al-duhār (after 332/943) seems to have been more detailed than the Tanbih (T, 97, 175, 400) on certain questions, particularly on the history of Byzantium.

11.—The K. Takhallū al-duwāl wa-taḥjarṣir al-arāḍ wa-l-mīlāl (T, 334) must have been a reflecting upon history with regard to the events which culminated in the seizure of power by the Fātimids in North Africa. This suggestive title makes one regret the loss of a work which Ibn Khalīdūn, who had a high regard for al-Mas'ūdī (see below), probably did not have the leisure to consult.

12.—Finally, the K. al-Tanbih wa-l-īṣārā, composed in 344-5/955-6, is probably the last work of al-Mas'ūdī. It is not exactly an abridgement of the major historico-geographical works which came before it, although it does return to and express, with greater rigour and precision, their essential points of information concerning astronomic and meteorological phenomena, the divisions of the earth, the seas, ancient nations, universal chronology, and then the history of Islam until the caliphate of al-Mu'tāsir. As its title indicates, it is basically a combination of overall review and a setting in temporal perspective. The Tanbih has been edited by De Goeje, in the BGA, viii, 1893-4, and by Sāwi, in Cairo, in 1357/1938; Carra de Vaux has translated it under the title Le Livre de l'aventure et de la révision, Paris 1897.

A second category is also of historical nature, but it is devoted especially to 'Ali b. Abī Ṭālib, the Al-ʿAṣīr and the Twelver Imāms.

13.—The K. al-Zāki (before 332/943) concerned 'Ali and the controversies to which he gave rise (M, § 1463).

14.—The K. Huḍāsik al-ṣāliḥān fī akhkhār Alī Al-ʿĀṣīr al-Nābi wa-taḥjarṣir-khām fī l-buldān (before 332/943) was apparently the history of the twelve Imāms and of the partisans of 'Ali (M, §§ 1013, 1943, 2506, 2704, 3232).

15.—The K. Māzāhir al-akhkhār wa-tbarsī l-ṣāliḥār fī akhkhār Alī Al-ʿĀṣīr-Al-Nābi (al-ṣāliḥār?), also prior to M, must have been a reflecting, like the preceding, a history, or, doubtless, a "sacred history" of 'Ali and of his partisans (M, §§ 1677, 1735, 3032).

16.—The K. Risālah al-BAyān fī ʾaṣma' al-ʾaʾmām al-kittīyya min al-Shīʿa, written before 332/943, contained (M, §§ 2352, 2798; T, 297) detailed biographies of the Twelve Imāms who, unlike the Wāḥiṣīyya, maintained that Mūsā al-Kāẓim [q.v.] was dead and had designated as his successor their eighth Imām, 'Ali al-Riḍā [q.v.].

III. His Imāmī beliefs inspired al-Mas'ūdī to write two works on the question of the Imāmate from the point of view of different sects and schools, as well as on other points of doctrine, such as temporary marriage, the religion of the ancestors of Muhammad, the beliefs of 'Ali before his conversion, etc.:
religions (Sabaism, Mazdaism, Judaism and Christ-
i
indiany). Judging by the number of passages where it is
cited (M, §§ 783, 1138, 1205, 1715, 1945, 1994,
2078, 2225, 2291, 2359, 2420, 2741, 2800, 3156; T,
154, 167-8), this work must have been regarded as
quite important by its author.

20. —The K. al-lhna an usul al-diyina, also prior to
332/943, dealt with the differences between Imamsim and
Mu'tazilism (from which al-Mas'udi admits having
borrowed some doctrines, M, § 2256) and attacked
Mazdaism, Manichaeeism, Dayshism, etc. (M, §§ 212, 2256; T,
§ 354).

21. —The (M, § 1990) was a refutation of
Khairidism (M, § 2190); this must be the text which
Yakut (Udaba, xiii, 94) mentions under the title
Akhbar al-Khawairid.

22. —The K. al-lisriqi' fi 'l-kalami must also have
been a refutation, but of certain beliefs of the
Mazdaeans, the Manichaeeans, the Christians, etc. (M, §
1223).

23. —The K. al-Da'irat al-Dawat al-qarn, men-
tioned only once (M, § 1195, where the translation
needs correction) was directed against "abominable"
beliefs such as the transmigration of souls.

24. —The K. Khaz'at an al-din wa-irr al-shar'in, writ-
ten after 332/943, dealt with the opinion of various sects,
especially the Carmathians, and revealed the
differences between Manichaeeism, Mazdaism and
Mu'tazilism (M, §§ 101, 1613, 385).

25. —The K. al-luqha wa tarr al-madiq, also
dealt with the soul, but a number of other subjects
were also discussed: the qualities of sovereigns, cosmology, diseases, music,
animals, etc. (M, §§ 533, 630, 743, 928, 1325, 1335).

26. —The K. al-Tahawwul fi 'l-madhal wa
'tabii' (cf. above, no. 20), and such an
problem does a difficult to solve. Omissions
example, this
be largely Shafi

AUTHORS.

27. —The K. Tafrik al-ma'qil, was also devoted to the
soul (M, §§ 988, 1247).

29. —The K. al-Ru'is wa sab'iyiya (?) min al-siyasa
al-summ cimuddan ya'ani wa-lamilal-ha al-
tab'iyiya seems to have been a treatise of political
philosophy (M, §§ 928, 1222-3, 1232, 1336), as
written before the preceding is prior to the Murudh.

VI. Two major works of scientific nature may
legitimately be classed separately:

31. —The K. al-Mudabi' wa 'l-tarabh, where there is
a discussion of the influence of the two luminaries
(M § 1325) and

32. —The K. al-Kadriya wa 'l-tdair, in which al-
Mas'udi gives an account of observations made in the
course of his travels of various phenomena, the three
domains of Nature, etc. (M, §§ 369, 705, 815, 817,
846, 1208, 2247).

VII. Although he can hardly be described a priori as a fakih, he did take an interest in the
Shar'i'a and its principles, as is shown by four
treatises:

35. —The K. al-lWaghj fi 'l-fani al-lawaizim, on
points of fikih on which Sunnis and Shi'is were in
disagreement (M, § 1525).

36. —The K. al-Nasr al-adila fi usil al-milla, both of
them prior to 332/943 (M, § 5, 7, 4);
To be sure, the Tanbih is presented in the form of a universal history from Adam to al-Mu'ti', preceded by a survey of general geography; to be sure also, the table of contents of the Muruǧi gives the same impressio

This voluminous work does not contain only history and geography; in addition, it has been observed that at least twenty are generally of a heresiographical, doctrinal, philosophical or legal nature. Even if it is considered that disciplines thus cultivated belong to global history, the qualification of "historian" in the normal sense of the term is only partially appropriate to this polygraph. A. Shboul has not hesitated to describe him, in the subtitle of his treatise, as A Muslim humanist, and A. Miquel (Geographie humaine, i, 202) confers on him the title of "imam of encyclopaedia", thus justifying the quality of adib of the Dāhijīzian type which the author of these present lines has been led to acknowledge in him (in Jnl of the Pakistan Historical Soc., i [1961], 231-4). Eager to acquire all available types of knowledge, of whatever origin, and anxious to present them in a form responding to the exigencies of adab which seeks to instruct without burdening the reader, al-Mas'udi writes for a public which seeks to educate itself, to escape from the narrow confines of traditional instruction and to extend the field of Arab-Islamic culture, while not regarding as negligible everything that happens outside the Muslim world. On the subject of Gaul, B. Lewis recalls (in Mas. Mill. commen. vol. 10) that, from the first millennium of Islam, there have survived only three works dealing with the "history" of Western Europe, and that the oldest of these is by al-Mas'udi, the Muruǧi. This author established no school, and in this there is no cause for surprise, in the sense that the last-named work was in itself adequate to satisfy the curiosity of readers for many years, to say nothing of the encyclopaedists of later times who continued to exploit it without reservation (e.g. al-Kalkashandi cites him forty-two times in the Sultan, the editor of which finds it without reservation (e.g. al-Kalkashandi cites him forty-two times in the Sultan, the editor of which finds it without reservation (e.g. al-Kalkashandi cites him forty-two times in the Sultan, the editor of which finds it without reservation (e.g. al-Kalkashandi cites him forty-two times in the Sultan, the editor of which finds it without reservation (e.g. al-Kalkashandi cites him forty-two times...

Bibliography: The Arabic biographical sources are not particularly detailed: see Ibn al-Nadim, Fihrist, 134 (ed. Cairo, 219-20); Nadim, Rāgīd, Bombay 1317, 178; Yākūt, Udabeh, ii, 90-4; Kutubī, Fawātīr, Cairo 1951, i, 94-5; Subkī, Tabākī al-Shī'īyya, i, 307; Ibn Ḥajar, Liṣān al-Maṣḏūn, iv, 224-5; Ibn Ẓāhirībīrī, Nadīmī, iii, 315-6; Hāḍidī Khālīfī, Kaṣf al-zunūn, index; Ibn al-ʿImām, Shamlabī, ii, 371; Khānsārī, Raḥīdī al-dīnāmī, 579-82; Nūrī, Mustadrak, iii, 310; Ṭālibī, Aʿyan al-Shīrī, xl, 198-213; Ėribī, v, 87; Khābīlā, vi, 80.

Studies: The many orientalists who have exploited the Muruǧi and, to a lesser extent, the Tanbih, have been led to review certain passages and, where appropriate, to amend them; this is especially the case with V. Minorsky, in the commentary on the Hudūd al-šīrīm, London 1937. Different aspects of the work of al-Mas'udi have been the subject of studies and papers, but the most worthy of mention are: the writings of T. Lewicki (in Polish) on the Slavs and other peoples; A. Czajkiewicz, Al-Mas'udi on balneology and balneotherapeutics, in Fīl. Or., iii (1962), 271-5; Ch. Pellat, La Espaňa musulmana en las obras de al-Mas'udi, in Actas del primer congreso de estudios arabes e islámicos, Madrid 1964, 257-64; and especially, S. Maqbul Ahmad and A. Rahman (eds.), Al-Mas'udi Millenary commemoration volume, Aligarh 1960, which contains some twenty contributions on particular subjects. J. de Guignes appears to have been the first to draw attention to the Muruǧi, in Notices et extraits, i, 1787, 27, but the earliest monograph is the work of E. Quatremère, Notice sur la vie et les ouvrages de Masoudi, in JA, 3rd series, vii (1839), 3-31; see also are Wiistenfeld, Geschichtscherher der Araber, no. 119; Marquart, Streifzüge, Leipzig 1903, pp. xxxiv-xxxv; Brockelmann, l, 141-3, S. 220-1, I, 150-2; Sezgin, GAs, i, 332-6; F. Rosenthal, Muslim historiography, index. The works of S. Maqbul Ahmad, Al-Mas'udi's contribution to medieval Arab geography, in Jc, xxvii (1953), 61-77, xxviii (1954), 275-86, and The travels, in ibid., xxvii, 509-25, in fact mark the beginning of a resurgence of interest in the author of the Muruǧi, illustrated by A. Miquel, Le geographie humaine du monde musulman...
MASYAD, a town of central Syria on the eastern side of the Jabal al-Nusayriyya situated at 33 miles/54 km to the east of Bānīyā [q.v.] and 28 miles/45 km to the east of Hamāt [q.v.], in long. 36° 35' E. and lat. 35° N., in the massif of the Jabal Ansariyya at the foot of the eastern slopes of the Jabal Bahārā7, at an altitude of 1,591 ft./485 m. and to the west of the great trench of the fault of the Ghab (q.v.).

The pronunciation and orthography of the name varies between the forms Masyād, Masyāf (in official documents and on the inscriptions mentioned below of the years 646 and 870 A.H.), Masyāt and Masyād (on the interchange of j and q, see O. Rescher, in ZDMG, lvxxiv, 465; Praetorius, in ibid., lvxxv, 292; Dussaud, Topographie historique. de la Syrie, 143, n. 4, 209, 395, n. 3). The variants Masyāt (Yākūt, Muṣīma, ed. Ravaisse, 49), Masyāf (Kahlīl al-Zahīrī, iv, 556), Masyd (ibid., ed. Ravaisse), 49), Masyēt in tr. Venture, 73 and Masyāt (al-Nābulusī, in Vor. Kremer, in SB Ak. Wien, 1850, ii, 331) are no doubt due to mistakes in copying (Van Berchem, in JA, Ser. 9, ix [1897], 457, n. 2). At a later period, the pronunciation Masyāf, Masyād became usual (al-Dimashkī, ed. Mehren, 208; al-Kalkaghāndī, Ṣaḥīh al-ḡāba', ed. ibid., 113; Ibn al-Shihibānī, ed. Beirut, 265; cf. Masyād on von Oppenhein's map in Pieterman Mūsālulān, bīlī [1911], ii, Taf. 11). The name is perhaps a corruption of a Greek Μασεύς (= Μασυάς) or Μασύης, which presumably lay on the Masyās ammī, the boundary river of the Nazerīn (ancestors of the Nusayris) (Pliny, Nat. hist., v. 81) (cf. Pauly-Wissowa-Kroll, Realenzyklopädie, xiv, cols. 1985-6, s.v. Masyās, no. 3).

Masyād was an important settlement which has developed under the protection of a powerful citadel whose traces are visible on a limestone outcrop. The region gets an average of 31.5 inches/800 mm of rain, and the climate is good. Various small watercourses have allowed not only the cultivation in the region of barley and wheat but also the existence of gardens and orchards (baṣātain). In her travel account, Gertrude L. Bell noted the abundance of flowers—anemones, iris, narcissus, and white and red orchids (basātain). In her travel account, Gertrude L. Bell noted the abundance of flowers—anemones, iris, narcissus, and white and red orchids (basātain). In her travel account, Gertrude L. Bell noted the abundance of flowers—anemones, iris, narcissus, and white and red orchids (basātain).
Masyād

557/1162 Rashīd al-Dīn Sinān b. Salmān b. Muḥammad al-Ḵabristānī [q. v. as envoy of the Grand Master of Alāmūt, the head of the Nizārat Ismā‘īlīs, sometimes known as the Assasīs or the Assassins (māzūrīyāt). He soon took over the direction of them in this region, and until his death in 588/1192, showed an extraordinary talent for organisation, making the sect a formidable military force which sowed terror amongst both the Crusaders and the Syrian Muslims. ʿAlā al-Dīn, who wanted to punish them for two attempts on his life, invaded the land of the Ismā‘īlīs in Muhammad ibn ʿAbd Allāh b. ʿAlī ibn al-Ḡazwī during the summer of 580/1184-5 (see NIZARIS, HASHISHIYYA). While Sinān had completely emancipated himself from the suzerainty of the headquarters of the sect in Alāmūt, in 608/1211-12 we find the old conditions completely restored (Abū ʿAlī Shāhīm al-Fakhr al-Rūḍl dātayn, in Van Berchem, op. cit., 1495ff., n. 1).

The fortress of Masyād lies to the northeast of the settlement, at the foot of the Djabal Bahrā. Within the town wall, a few traces of which are still today visible. The fortress is perched on a rocky limestone block and has a situation running from north to south; the eastern edge of this bluff rises vertically for some ten metres and gives the appearance of a cliff. Like Shayzār, Masyād is an Arab citadel antedating the Crusades and having no connection with them; in its dimensions and size, it cannot be compared with such great mediaeval fortresses of Syria as Hisn al-Akrād, Markāb [q. v. or Sahlān], or Sayyūn. For Van Berchem and Fatio (Voyage en Syrie, 115, 172), this fortress resembles in silhouette those of al-Musayliḥa and Shūmayyim. It is one of the best-preserved of the Ismā‘īlīs castles of Syria (Dussaud, Topographie, 138-48). It is made up of a curtain wall of only modest appearance with numerous rectangular salients. A donjon or keep, also rectangular, is built in the centre and dominates the ensemble. According to P. Deschamps (Tripoli, 39), the Ismā‘īlīs are said to have repaired in the 7th/13th century, with good-quality materials, a Byzantine building of minor importance, of which a certain number of columns and capitals embedded in the doorways of the fortress (partially reproduced in Gertrude Bell, op. cit., 217-19) are still visible witnesses. The castle is entered by a grand gateway on the north side reached by several steps; the entrance is vaulted like that of Hisn al-Akrād; and the fitting-out of the interior is the work of the Ismā‘īlīs. The keep is in poor condition, and later accretions over the course of the centuries of stacks and constructions have disfigured this piece of military architecture, which merits study and publication of the results. A certain number of Arabic inscriptions mention the various building works made in the castle. The oldest, dating from the middle of the 6th/12th century, is the signature of a master of works, the māšāq Ḷuṭa (RCEA, viii, 3197); another inscription from 560/1165 bears the signature of a certain Ibn Mubārak (RCEA, ix, 3264). According to two inscriptions on a doorway inside the castle (RCEA, x, 3890-1), the building was put into a state of repair by the Syrian Master Kamāl al-Dīn ʿĀlī al-Dīn al-Ḥasan b. Māṣūd under the suzerainty of the Grand Master of Alāmūt ʿAlī al-Dīn Mūsammār al-Muhammadī (619-53/1221-55). The reference is probably to the Kamālī, who, according to al-Nasawi (Hist. du Sultan Djelal al-Dīn Markokābī, ed. Houdas, 132), was for a period before 624/1227 governor in Syria for the Grand Master of the Ismā‘īlīs. It is uncertain whether the commandant (mutawallī) Mādīj al-Dīn, who received in 624/1227 the ambassadors of Frederick II (al-Ḥamawi, in Amari, Bkd. arabil-ṣurāla, App. ii, 30) was one of the Masters (Van Berchem, in JA [1897], 501, n. 1). About 625-6/1228-9 and still in 651/1253-4, Sirādj al-Dīn Muṣṭafā b. al-Ḥusayn was Syrian Master (al-Nasawi, op. cit., 168; inscription of al-Ḵahīf, in RCEA, x, 4143). In the village, there remain traces of a mediaeval rampart provided with gateways and three inscriptions recording the repairs and works carried out.

A Persian from Alāmūt, Tādī al-Dīn, was in 637/1239-40 mukaddam of the Syrian Ismā‘īlīs (Ibn Wāṣīl, Muṣaffār al-ḵawāṣ, Paris, ms. 1702, fol. 333b, in Van Berchem, 466, n. 2). As Tādī al-Dīn Abu ʿl-Futūḥ he appears in an inscription in Masyād of Dhu ʿl-Kaʿdā 646/February-March 1249, according to which he had built the city wall of Masyād and its south gate. The commander of the fortress under him was ʿAbd Allāh b. Abu ʿl-Fadl b. ʿAbd Allāh (inscriptions A and B in Van Berchem, JA [1897], 456). – Van Berchem-von Oppenheim, Beitr. z. Asyr., vii, no. 19. Probably it was Tādī al-Dīn to whom the Dominican monk Yvo the Breton, a member of an embassy sent by Louis IX to the “Old Man of the Mountains” in May 1250, sent a naive and fruitless appeal for his conversion (Jean de Joinville, Hist. de St. Louis, ed. M. Fatio, 115, 172; Wailly, 246; Van Berchem, in JA [1897], 478-80).

After having got possession of Alāmūt in 654/1256 and having sacked Baghādād two years later, the troops of Hūleqū or Hūlākū [q. v.] invaded northern Syria in 658/1260 and temporarily occupied Masyād. In this year, in the time of the Master Rīdzī al-Dīn Abu ʿl-Maʿālī, the Mongols seized and held the fortress for a time, but after the victory of the Egyptian Sultan ʿUṯūt at ʿAyn Djalūt [q. v.], they abandoned it. About two years later, Baybars began to interfere in the affairs of the Ismā‘īlīs and to demand tribute from them. He very soon deposed the Master Nadjm al-Dīn Ismā‘īlī and appointed his son-in-law Ṣarīm al-Dīn Mubārāk in his place and took Masyād from him. When the latter returned there, Baybars had him seized and brought to Cairo, where he was thrown into prison. Nadjm al-Dīn was again recognised as Master for a brief period and then his son Shams al-Dīn, on payment of an annual tribute before the sultan definitely incorporated Masyād in his kingdom in Radjāb 668/1270 (Abu ʿl-Fidā, in Rec. hist. or. crois., i, 153; Muḥammad b. Abu ʿl-Faḍāl, Gesch. d. Mamlākensulanen, ed. Blochet, in Patrol. Orient., xiv, 445; Van Berchem, in JA [1897], 465, n. 2). Having now become a master of works, Muslim possession, Masyād presumably at first belonged to the “royal province of fortunate conquests” the capital of which was Ḥasan al-
Akrad, then to Tarabulus (after its capture in 688/1289).

Within the scheme of administrative reorganisation within the Mamluk empire, a route was established in the 7th/13th century for the barid [q.v.], a postal service between Hims [q.v.] and Masyad, which was at the time an important strategic point under the authority of a commander responsible directly to the sultan because of the fortress's role in the defence of the dâr al-İslâm [q.v.] just like Ḥisn al-Akrad and Ḥabba [q.v.].

Abu ʿl-Fidāʾ (about 720/1320) describes Masyad as an important town, with beautiful gardens through which streams flowed; it had a strong citadel and lay at the eastern base of the Djabal al-Lukkâm (more accurately Djabal al-Sikín) about a farkh north of Bârîn and a day's journey west of Hamâ (not Ḥims, as Le Strange, Palestine, 507 erroneously says; Abu ʿl-Fidāʾ, Geogr., ed. Reinaud, 229 ff.). As a result of its high situation, it has a more temperate climate than the low ground on the Nahr al-ʿAṣî, the young Usâma in 516/1122-3 brought to Masyad the wife and children of the amir of Shayzayr, his uncle ʿĪzî al-Dîn Abu ʿl-ʿĀṣākir Sulṭān, from the heat of Shayzar which was causing the amir anxiety about their health (Derenbourg, Vie d'Osûmâ, 43).

Ibn Baṭṭûta, who visited Masyad in 736/1335, mentions (Rûda, i, 186-7; tr. Gibb, i, 106) as lying near this stronghold the Ismaʿili fortress of Kadmûs, al-Manayka. Ṣullâya and al-Kahl. These five places, the kiṣâ al-ḍâr wa-ṣâra “fortresses of the [Ismaʿili] mission”, formed, with the castle of al-Ruṣāfa, the nîyâba of Masyad which, in the 8th/14th century, was a dependency of Tarâbulûs. Later, it was separated from this province and attached to the nîyâba of Damascus, to which it still belonged in the time of al-Kakkâshâdî (Ṣâhib, iv, 113, 202, 735). In 614/1122-3 its nîyâba was nominated from Cairo and was at various times an amir of tabâkâhna or an amir of ten, and it had a garrison of Mamlikûs. In 826/1423, under Barsbay [q.v.] there was no longer a barid service, but there was a road which allowed one to travel from Tarâbulûs to Masyad and then to reach, via al-Ruṣāfa and Khawâlî, Kadmûs, where it passed through al-Kahl and then Ullâyka to end up at Balattûn [q.v.]. In the middle of the 9th/15th century, Khâlîl al-Ẓâhirî, in his Zubda (ed. Ravaisse, 49, tr. Ventur, 73), tells us that around 850/1446 “the town of Masyad is still within this province (sc. Hamâwiyya); it is a pleasant town with an extensive surrounding countryside”. An inscription of Masyad of Ramadan 870/April-May 1466 contains a decree about taxes of the Sultan al-Malik al-Zahir Khâkhâzâdî (Van Berchem-Von Oppenheim, Beitr. z. Asyr., vii, 20, no. 23; no. 22 is perhaps of the same al-Malik al-Ẓâhir).

Under Egyptian rule, the position of the lands of the Ismaʿîlîs with Masyad as capital was to some extent exceptional (Gaudefroy-Demobynes, La Syrie à l'époque des Mamelouks, Paris 1923, 182, no. 3).

In the 10th/16th century, after the Ottoman conquest of Syria, Masyad is mentioned in the cadastral survey among the kiṣâ al-ḍâr wa-ṣâra related to the west of Hamât; these villages of the Ismaʿîlîs paid a special tax. Masyad formed part of the lûwâ of Hims; there was situated there a khân [q.v.] on which the Ottomans levied tolls which were abolished in the middle of the 10th/16th century (Mantran and Sauvaget, Reglements fiscaux, 92). In 1105/1693-4 ʿAbd al-ghanî al-Nâbulûsî [q.v.] passed through Masyad and mentions a certain Sulaymân, from the tribe of Tanāšî, as governor of the town at that time. In 1767-8, Masyad was cited in his Bibliothèque orientale as “Massiât”. In the middle of the 12th/18th century, Masyad continued to be the residence of Ismaʿîlî amîrs. On the map drawn up by the Sieur d'Anville in 1750, the place is called “Maisiat”. Of more recent date an earlier cartouche on the map bears the name “Masiat”; it is marked on one from the year 1203/1788-9 relating to the building of a fountain (sabil) (Van Berchem-Von Oppenheim, op. cit., 21, no. 24), and the other to the building of the house of the Ismaʿîlî amîrs (ibid., no. 25).

The Ismaʿîlîs lived constantly in open or secret enmity with the Nuṣayris, although various tribes of the latter had offered their services to the Ismaʿîlî Masters, for example, as early as 724/1324 to Râghîd al-Dîn (S. Guyard, Un grand maître des Assassins au temps de Saladin, in JA [1877], 165; R. Dussaud, Histoire et religion des Nosairîs, 80). A number of Nuṣayris of the tribe of Raslân, whom the amîr of Masyad had allowed to settle in the town under their Shaykh Mâmhûd, in 1806 murdered the amîr, his son and about 300 Ismaʿîlîs, and seized the town. The other inhabitants, who had sought refuge in flight, applied for protection to Yûsûf Pâshâ, the governor of Damascus. He sent a punitive expedition of 4-5,000 men against the Nuṣayris; Masyad had to be surrendered by the Banû Raslân after three month's stubborn resistance, and the fugitive Ismaʿîlîs returned to Masyad in 1810 (Dussaud, op. cit., 32; Burckhardt, Reiset in Syrien, 250). In 1812 Burckhardt estimated the population of Masyad at 250 Ismaʿîlîs and 30 Christian families. The population since then seems to have diminished still further. Burckhardt and Lammens found many houses in the town in ruins and large gardens within its walls. According to Burckhardt, the land east of the town was a desert heath, while in the north at the foot of the hills the citadel stands on a high steep rock; on the west side is a valley, in which the inhabitants grow wheat and oats. The town, which lies on the slope of a hill, is about half an hour’s walk in circumference. Three older gates have been incorporated in the present more modern walls. The mosque is in ruins. The old citadel is for the most part destroyed; only a few buildings have been roughly restored and in parts were still inhabited at the beginning of the 20th century.

From the 19th century onwards, the “Assassins” of Masyad, the generations of whom had lived since the 7th/12th century under the authority of delegates from the Nizâris of Alâmm before becoming subjects of first the Mamlûks and then the Ottomans, were exposed to repeated attacks by the Nuṣayris. In February 1919 the region between Masyad and Tartûs [q.v.] was shaken by the revolt of Shaykh Šâhîr against the French, whose troops were held in check on the road from Shaykh Bâdîr to Masyad. According to Latron, Vie rurale, 208, the Government of Lâdhîkiyya compelled some of the large landowners of Hamât to hand over to it in 1929 their villages in the kada of Masyad: Bayâdîyya, Mîryîmîn, ʿAkârî and Rûsâfâ, whose cultivated lands have been distributed amongst the peasants working them. In this way, the ʿAlawî part of the kada of Masyad, including the fortress of Abû Kubays, was taken away from the sandjak of Hamât for attachment to the new State of the ʿAlawîs.

In the mountain regions to the west of Masyad there exist deposits of iron known since Antiquity and still capable of exploitation. In order to provide a legal framework for disputes over the division of water, a list of the sharers and their entitlements was set down in writing and registered officially (Latron, op. cit., 160).
Until 1938, the mintaka of Masyad was part of the province of Hamat, but in 1939 the kadda of Masyad became part of the province of Hamat. Masyad is about 410 m above sea level, and has, according to the 1970 census, 75,437 inhabitants, 37,922 men and 37,515 women. The cultivators in the region of the Ghab do not benefit directly from the investment in the "Ghab Project". Nevertheless, the plans for this region and the settlement of nomads have favored a perceptible development of the minfak which has, according to the 1970 census, 75,437 inhabitants, 37,922 men and 37,515 women. Since 1965, the Syrian government has set up at Masyad a centre for carpet weaving, with workshops having an essentially female working force. Production amounted to 740 m² of carpets in 1979 but only 410 m² in 1980.

At present, Masyad is linked with the new autoroute which travels along the eastern bank of the Orontes northwards. There is a loop 7 km to the east of Masyad running northwards from the asphalt road having an essentially female working force. Production amounted to 740 m² of carpets in 1979 but only 410 m² in 1980.

astronomical handbooks known as zīdjs [see ZIDJ] for each degree of \( \lambda \) to two or three sexagesimal digits. The underlying formula expressed in modern notation is:

\[
\alpha(\lambda) = \arcsin(\tan \beta \cot e),
\]

where \( \beta \) is the obliquity of the ecliptic and \( e \) is the declination [see MAYL]. The function \( p(\lambda) = \tan \beta (\lambda) \) (multiplied by an appropriate constant related to the bases used for the various trigonometric functions) was also tabulated separately to facilitate computation of \( \alpha(\lambda) \)—it was called al-matāli\(^c\) li-kull al-ard, "ascensions for all the earth". More commonly, however, the quantity \( \alpha' = \alpha + 90° \), called al-matāli\(^c\) min awwal al-qubādy, that is, ascensions measured from the first point of Capricorn, was tabulated. The use of this function, now referred to as "normed ascensions", is explained below.

The ascensions of celestial bodies not on the ecliptic, such as stars, were also called matāli\(^c\). Fig. 2 shows a star with equatorial coordinates \( \alpha \) for ascensions and \( \beta \) for declination. Islamic star tables displayed either ecliptic longitudes and latitudes (\( \lambda \) and \( \beta \)) or equatorial ascensions (regular or normed) and declinations (\( \alpha \) and \( \beta \)) for a specific epoch. Since stellar longitudes increase steadily with time and stellar latitudes are constant, star tables could be modified for a different epoch by simply adding the amount of longitude increase (known as precession). Tables of equatorial coordinates could be prepared either by direct observation or by calculation from tables of ecliptic coordinates; in mediaeval times they could not be prepared from earlier tables of coordinates of the same kind because both stellar right ascension and declination are not linear functions of time. Formulae for the conversion of ecliptic to equatorial coordinates and vice versa, that is \( (\lambda, \beta) \rightarrow (\alpha, \delta) \) were available to Muslim astronomers from Ptolemy's Almagest, and were simplified by them. The universal astrolabe [see SHAHKAZIYYA] was particularly useful for performing transformations of ecliptic and equatorial coordinates.

(2) Oblique ascensions, associated with a specific latitude, were called maṭāli\(^c\) al-balad or al-maṭāli\(^c\) al-baladiyya. In Fig. 3, the arc \( \lambda \) of the ecliptic rises in the same time as arc \( \alpha \) of the equator over the horizon of a locality with latitude \( \phi \). Muslim astronomers tabulated \( \alpha(\lambda) \) for specific latitudes. From ca. 400/1010 onwards, they often tabulated it for each degree of terrestrial latitude, usually for each degree of \( \lambda \). The oblique ascensions, \( \alpha(\lambda) \), are related to the right ascension, \( \alpha(\lambda) \), by the identity:

\[
\alpha(\lambda) = \alpha(\lambda) - d(\phi, \lambda),
\]

where \( d(\phi, \lambda) \) is half the excess of daylight over 180°, called in Arabic the nisf fuṣūl al-nahdr. In Fig. 3, \( YH = \lambda \), \( YE = \alpha \), and \( EG = d \). The formula for \( d(\phi, \lambda) \) used by mediaeval astronomers was equivalent to the modern formula:

\[
\delta(\phi, \lambda) = \arcsin(\tan \beta(\lambda) \tan \phi).
\]

Again, the function \( e(\lambda) = \tan \delta(\lambda) \) was used to generate values of \( d(\phi, \lambda) \) and, hence, tables of \( \alpha(\lambda) \) for different latitudes.

Oblique ascensions are of singular importance in timekeeping and in mathematical astrology. In both disciplines, the point of the ecliptic instantaneously rising over the horizon, which is known as the horoscopus [see TALI\(^c\)], is of interest. In Fig. 4, it is labelled H. Clearly, from the geometry of the sphere, the oblique ascensions of the horoscopus (with ecliptic longitude \( \lambda_H \)) are given by the relation:

\[
\alpha(\lambda_H) = \alpha(\lambda_O) + T,
\]

where \( \lambda_O \) is the longitude of the sun and \( T \) is the time in equatorial degrees since sunrise. In order to measure the time of day, it is thus sufficient to control the oblique ascensions of the horoscopus and the solar longitude. Similar procedures hold for timekeeping by the stars at night. Muslim astronomers, following a tradition started in Ptolemy's Handy tables, generally preferred to use the normed ascensions \( \alpha' = \alpha + 90° \) because of the relation

\[
\alpha(\lambda_H) = \alpha(\lambda_M) + 90° = \alpha'(\lambda_M),
\]

where \( \lambda_M \) is the longitude of upper mid-heaven, the
point of the ecliptic culminating on the meridian. If a star whose ecliptic longitude is known is observed to be culminating, then the longitude of the horoscope can be found immediately from tables of \( \alpha_t \) and \( \alpha(A) \). Once the latter is found, the astrological houses can be determined using tables of ascensions. Ascensions, then, were important in both timekeeping and astrology. In all zīdā and treatises on astronomical timekeeping they figure prominently.

Ascensions were also important in determinations of lunar crescent visibility [see RU `YAT AL-HILĀL]. Since one of the most popular conditions for crescent visibility was that the difference in setting times of the sun and moon be twelve equatorial degrees (= 48 minutes of time), the problem could easily be expressed in terms of ascensions. The situation is shown in Fig. 4. Note that the 'descensions' (maghdrib) of an ecliptic arc \( \alpha \) are \( \alpha_t \) (\( \alpha + 180^\circ \)). Thus if \( \Delta \), and \( \lambda_m = \lambda + \Delta \), represent the longitudes of the sun and moon, the condition may be expressed as:

\[
\alpha_t(180^\circ + \lambda_m) - \alpha_t(180^\circ + \lambda) = 12^\circ
\]

Fig. 4

Using tables of \( \alpha_t(\lambda) \) for a specific latitude, as well as linear interpolation (al-ta'ādīl bayn al-satrayn), it is possible to calculate values of \( \Delta \), satisfying this condition for each range of \( \lambda \). Tables of such values, for each zodiacal sign of solar longitude, were compiled already in the 3rd/9th century for the latitude of Baghdad. Certain later Islamic lunar visibility tables display such information for several latitudes.

On a highly sophisticated method for converting ecliptic and equatorial coordinates, see idem, Al-Khāṭīb’s auxiliary tables for solving problems of spherical astronomy, in *Jnal. for the History of Astronomy*, iv (1973), 99-110, esp. 105-7. On the use of ascensions in astrology, see, for example, Kennedy and H. Krikorian-Preisler, The astrological doctrine of projecting the rays, in *Al-Abhdth*, xxv (1972), 3-15.

AL-MATĀMIR [see MATMURA].

AL-MATAMMA, a town in the Democratic Republic of the Sudan, located in Shandi District, western bank of the Nile, opposite Shandi town [q.v.]. The number of households there in 1973 was 1,108.

Its origins are unknown, but its development was closely connected with caravan traffic that crossed the Nile there, and its status as a sister-town of Shandi is indicated by the fact that it was also known as Shandi al-Qharb. At the end of the 18th century it became involved in the upheavals of the Funj kingdom [q.v.], and around 1801 a rival faction of the Sa’dāb royal family of Shandi settled in al-Matamama, eventually becoming an ally of the Shīkīliyya in their struggle against Funj domination. By the time of the Egyptian invasion (1820-1), the population of al-Matamama numbered about 6,000, being ruled by King Musā’id who was subordinate to his cousin Nimr, king of Shandi. Subjected to foreign rule, the rival kings united in a plot to kill the Egyptian commander Iṣmā’īl Pasha [q.v.] (1822). After the subsequent reprisals in 1823, which hit Shandi more severely than al-Matamama, the latter grew into the most important tribal and commercial centre of the Dājaliyyūn [q.v.], with a large merchant class, and served as a transit point for caravans as in former times. By the middle of the century it was celebrated throughout the Sudan for the manufacture of coarse cotton scarfs. During the Mahdiyya [q.v.], on the eve of the British invasion in 1897, the people of al-Matamama refused to evacuate the town in order to make it a stronghold, and instead established contact with the invaders. A battle ensued in which the Mahdist forces killed most of the rebels (30 Muharram 1315/1 July 1897). During the present century, al-Matamama has gradually recovered but has not regained its commercial role.

MATBAʿA (a.), printing.

1. In the Arab World

The Arabic verb tabaʿa, in the sense of printing a book, is a neologism probably inspired by the Italian or the French. This meaning is already attested in the
Outside Italy, worthy of note is an Arabic grammar half of the 15th century), and lithography (invented by G. A. Senefelder in 1796), which is the subject of which dates back to remote antiquity), printing by xylography or wood-block printing (the discovery of the three technical processes that it comprises, technical: lithography is more versatile than printing, and offers a greater range of possibilities in the production of designs and of maps. The second is artistic: it is an art which lends itself remarkably well to the reproduction of writing. As a corollary, there is the cultural reason: lithography causes no problem to the reader who is accustomed only to the manuscript style adopted for the writing-tablets of the Kur'an school. Finally, there are social and economic reasons. In the East, the profession of copyist was highly developed, giving prestige and prosperity to a large section of the urban working class. According to the Bologna scholar Luigi Ferdinando Marsigli (1658-1730), the number of Turkish copyists in Constantinople, when he visited the city, was as high as 80,000. The creation of printing-presses would therefore have caused devastating unemployment among the educated population. Further reasons are moral, doctrinal and political, and these may easily be imagined. Regarding the relatively late date of the introduction of printing in the Arab countries (except in Lebanon and Syria, the practice did not emerge until the beginning of the 19th century) two other factors, besides those already mentioned, played an important role. In the first place, the majority of the Arab countries had been under the Ottoman dominion since the beginning of the 16th century. Before establishing its own official press in 1726, the Sublime Porte had hitherto forbidden (edicts of Bayezid II in 1485 and of Selim I in 1515) the Muslims to print texts in Arabic characters (although it permitted the Jews to print texts in Hebrew). The second factor is the economic problem which would have faced the innovators. To found presses of even modest size required the investment of substantial capital sums, which the book market, revolutionised by the availability of large-scale mechanical production, remained incapable of repaying properly. It should not be forgotten that the Medici Press in Rome was virtually bankrupt in 1610, because its proprietor-director, Raimondi, lacked the expertise to distribute the books that he printed. And such must have been the fate, undeserved, of many other presses, whose record is confined to the production of a single work! A copyist, on the other hand, worked to a contract, and his only capital outlay was the purchase of paper.

A. Xylography

Xylography, or printing by means of plates or characters engraved on wood, was used by the Arabs, judging by the specimens which have been noted in the collections of manuscripts and papyri possessed by certain libraries in Europe (Vienna, Heidelberg, Berlin and the British Library), America (Museum of the History of Printing), or the Arab countries (National Library of Cairo and the 'Abd al-Wahhāb Collection in Tunis). There is no precise indication of the dates of these specimens, of which the majority are amulets. According to Moritz, six printing-plates in the collection of the ancient Khedival Library of Cairo date from the Fāṭimid period. A study of xylographed Arabic manuscripts would be a worthwhile undertaking, rendering it possible to observe whether the Arabs confined themselves to plates or whether whole books were composed according to this process. See G. Levi Della Vida, An Arabic block print, in The Scientific Monthly, lxxi (December 1944), 473-4; F. Bonoda Bey, Note sur l'origine de l'imprimerie arabe en Europe, in BIE, 5th series, iii (1909), 75; A. Demersseman, L'imprimerie en Orient et au Maghreb, in IBLA, xvii (1954), 21-3; R. W. Bulliet, Medieval Arabic tarsh: a forgotten chapter in the history of printing, in JAOS, cvii (1987), 427-38.

B. Printing and lithography

1. In Europe.

Arabic printing with mobile characters originated and developed, through a curious combination of circumstances which have yet to be fully explained, in Europe in the 16th century. It was in fact with the purpose of publishing Christian religious texts in Eastern languages and in Arabic in particular, that the Cardinal Ferdinando de' Medici, on the advice of Pope Gregory XIII, in 1585 entrusted to the orientalist Giovanni Battista Raimondi the task of establishing and administering the Typographia Medicea in 1585, the book in question being the Kitāb Nahzat al-muhājīt by al-Idrisī [q.v.].

There exist, however, numerous works printed well before the Typographia Medicea began to operate, such that printing in Arabic characters must be deemed to have emerged at the beginning of the 16th century, or even in the final year of the 15th. The first book in Arabic characters seems in fact to have been a Kur'ān printed in Venice by Paganino de' Paganini (the dates given vary between 1499 and 1530); many authors speak of this work but no specimen of it survives, all copies having been destroyed by fire (see Maria Nallino, Una cinquantesima edizione del Corano stampata a Venezia, in Atti dell'Istituto Veneto di Scienze, Lettere ed Arti, cxxiv, Classe di scienze morali, lettere ed arti [Venice 1965], 1-12).

The earliest Arabic text that has reached us is a book of Christian prayers, the Kitāb Salāt al-sawa'i (or Horologium brevium). It was produced at Fano, in the region of the Marches which constituted part of the States of the Church, in 1514, by the master printer Gregorio de' Gregori (or de' Gregorii). Two years later, in Genoa, the typographer Pier Paolo Porro printed the trilingual Psalterium (Greek, Hebrew and Arabic), or else the Book of Psalms (Kitāb al-Mazāmîr) with an Arabic preface. In 1556, in Rome, the Collegium Societatis Jesu produced an anonymous religious treatise in Arabic (probably to be attributed to the Jesuit Gianbattista Eliano or Romano) with the Latin title Fidei orthodoxae brevis et explicata confesio and the Arabic title fī bikhāl al-amānā, which was to be reprinted many times during the same century and in the following century.

The first work of a non-religious nature was printed, again in Rome, by the Venetian master printer Domenico Basa at his Roman printing-press in 1585, the book in question being the Kitāb al-Bustān fī ṣuqūʿ al-ʿarḍ wa l-buldān, a work of descriptive geography by al-Idrisī. Again nothing is known but his name, Salâlah b. Kundudjī al-Salîhī.

Outside Italy, worthy of note is an Arabic grammar
by Guillaume Postel, printed in Paris, probably in 1538, of which the Arabic characters are unfortunately almost illegible. At Neustadt in 1582, with characters engraved on wood, there was published an Alphabetum arabicum by Jacob Christmann, professor of Arabic at Heidelberg. The same characters were used in Heidelberg, the following year, for the printing of a translation by Ruthger Spey of the Epistle to the Galatians of St. Paul.

Again at Rome, in 1627, there began the intensive typographical activity of the press of the Sacra Congregatio de Propaganda Fide, responsible for the printing of two particularly monumental works. The first is the Arabic translation of an abridged version of the Annales ecclesiastici, or history of the Church edited in twelve volumes by Cardinal Cesare Baronio, published between 1653 and 1671, and the second, the Biblia arsica ad usum Ecclesiastum orientalium, in four folio volumes.

At least three other presses, active in the 17th century, are worthy of mention. The first is that of the Collegio Ambrosiano of Milan where, in 1632, there was printed the Latin translation of the well-known Kāmūs of al-Fīruzabādī, made by Antonio Giggei under the title of Thesaurus linguisticarum in four large folio volumes.

The second is that of the Seminary of Padua, in the state of Venice, which ceased to operate in 1698 after printing, in two large volumes, the Arabic text of the Kur’ān, with Latin translation, an introduction and a commentary (drawn from as yet unedited Arabic works) by Ludovico Maracci, confessor to Pope Innocent XI, at the latter’s request.

The third is the Reale Stamperia of Palermo, in Sicily, which published the first collection of accounts relating to the Arab occupation of Sicily intitled Rerum arabiarum, quae ad historiam Siculam spectant, ampla collectio, the Libro del Consiglio d’Egitto, or Klub Dīwān Misr, by the notorious forger, the Abbé Giuseppe Vella, and finally the first Italian edition of the Grammatica arsica of Erpenius.

It is extremely difficult to establish even a rudimentary list of the Arab presses of Europe (nevertheless, see J. Balagué, L’imprimerie arabe en Occident. (XVIIe, XVIIIe et XVIIIe siécles), Paris 1984). Documentation is often fragmentary, sometimes non-existent. Certain presses are known only because they are mentioned in the works that have survived from them and available for study. Four editions of the Kur’ān, published in Europe between the end of the 17th and the first half of the 19th century, indicate the existence of other Arabic presses in Germany and in Russia. The first is that of Hinckelmann, produced in the Free City of Hamburg in 1694. Two Russian editions represent the first two Kur’āns published by Muslims: the first in 1787 in Saint Petersburg, the then capital of the Tsarist Russian Empire; and the second in 1803 in Kazan, in the region of the Volga, today the capital of the Tatar Republic. Finally, in 1834, at Leipzig in Saxony, the centre of the book trade, Gustav Flügel published the first edition of his Kur’ānic text, later to be used by several generations of orientalists.

In Eastern Europe, it should be noted that towards the end of the 17th century, at the request of the Melkite patriarch of Aleppo, Athanasius Dabbās, the Voivode of Wallachia (a tributary of the Ottoman sultanate in the kingdom of Rumania) Constantin Bassaraba Brancovenanul, installed at Sinagovo an Arabic press which edited numerous liturgical books in Arabic. This press seems to have ceased production in 1704, when Athanasius returned to Syria (see below, Syria) and took the initiative of installing a printing-press in the city of Aleppo, his patriarchal seat. See J. Nasrallah, Les imprimeries Melkites jusqu’à la fin du 18e siècle, in al-Maṣarrat, 34th year (1948), 438-40.

2. In the Near East.

a. Lebanon. The Lebanese claim the honour of having printed the first book in an Arab country. The work in question is a Psalter printed in 1610 at the Convent of Saint Antony of Qozhaya (Dayr Mār Anūniyūs or Dayr Qîshayyā). The pages are divided into two columns, that on the right being for the text in Syriac, and that on the left for the Arabic text in kāhirī script [q.v.]. According to a note appended to the work, the printing was done under the supervision of the master (mu’allim) Pasquale Eli, a native of Camerino in central Italy. This edition marked a short-lived enterprise. More than a century was to elapse, and numerous unsuccessful attempts were to be made, before the šamās Abū Allāh Zākhīr, with his second experiment in typography (the first having been in Aleppo) established a press at the Convent of Mār Yūhannā al-Sābhīgh in 1734. Subsequently, other presses were founded, invariably among religious communities.

The American Press and the Imprimerie Catholique deserve special mention, particularly for their editing activities. The Protestant Mission of the American Board of Commissioners for Foreign Missions had installed an Arabic press in Malta, where it functioned from 1822 to 1842. When the Mission transferred its headquarters to Beirut, on 10 July 1823, the decision was taken to move the Arabic press to the Lebanese capital. This was accomplished on 8 May 1834.

The Imprimerie Catholique was founded to some extent with the object of counteracting the activity of Protestant missionaries. Its operations commenced in 1848, but the press soon developed into one of the best-equipped publishing houses of the Near East. See J. Joseph Nasrallah, L’imprimerie au Liban, Beirut 1949, 160.

b. Syria. In Syria, it was the same Melkite Patriarch, Athanasius Dabbās, who, on his return from Europe, undertook to install a press in the city that was his patriarchal seat, Aleppo, and with the aid of the šamās Abū Allāh Zākhīr the press operated from 1706 to 1711. More than a century was to pass before a Sardinian printer, Belfante (?), came, in 1841, to establish a lithographic press at Aleppo. Curiously, the first book printed under his supervision was the Diwān of Ibn al-Fārid. See Kh. Sābat, Taʾwīl al-Tibāʿa, ch. iv, 96-128, and Wahid Gdoura, Le début de l’imprimerie arabe à Istanbul et en Syrie, Tunis 1985.

c. Palestine. Palestine—and Jerusalem in particular—has throughout history been a centre of interest for all the revealed religions. As early as 1830, a Jew, Nessim Bāk (?) had opened a press in Jerusalem for the printing of religious texts in Hebrew. (The Jews were the first Ottoman subjects to use printing for this purpose; in Constantinople their typographical activity dates back to 1490.) In 1840, it was the turn of the Franciscans, encouraged by the
young Emperor of Austria, Franz Josef, through the intermediary of a monk of Austrian origin, Frotchner, to establish the Tipografia dei Padri Francesciani di Gerusalemme. Again in 1846, a printing press was founded, called the London Press, by Protestant missionaries whose aim was the propagation of the Gospel among the Jews. Within a short time, the city of Jerusalem was full of presses producing works in Arabic and other oriental languages including Russian, Armenian, Greek and Turkish, invariably operated by religious organisations or on their behalf.

d. Jordan. Jordan did not become an independent Arab state in the form of an emirate until after the First World War, in 1921 (even though it was subject to British Mandate until 1946). It was in fact in 1922 that a printing-press belonging to the typographer Kâhîl Nakr, who had founded it in Haila in 1909, was transferred to Amman. It was used for printing the journal al-Urdunn. Three years later, the Government Press was established. See Şabat, op. cit., ch. vii, 325-6.

e. 'Irâk. Historians do not agree as to the date at which printing was introduced to 'Irâk. According to Razûk Ilsîa, the first 'Irâkî lithographic works were founded at al-Kâzîmiyya and the first and only work printed was Davâbat al-unzarahî fi ta'rikh wakîdî al-'Irâkî by the Sharîf Râzuk lîrâkî, in 1247/1829, according to others, in 1246/1830. Rûfîl Bîtî (?), states that Dâwâd Pâshâ al-Kurdî, the last independent Mamlûk, published in Baghdâd in 1816, by means of lithography, an official bilingual Turkish-Arabic journal intitled Dîwanî al-'Irâk. Although no copy has survived, Bûtî claims that the existence of the journal was mentioned by foreign travellers who visited 'Irâk in this period.

After the creation of another lithographical press, this time in Karbalâ', the first press using movable characters was established by the Dominican Fathers in Mawṣîl in 1859. One year later, it received sets of Arabic, Syriac and Latin types offered by the Institut des Sciences et des Arts d'Egypte. When the National Press began to function in Egypt in 1798. The Arabic characters used were those of the official Press of the French Republic, in addition to those of the Arabic Press of the Propaganda of Rome. The latter also supplied a number of its staff, to serve as overseers, typographers and printers. The first French and Arabic printed works were produced on board the flagship Orient, the headquarters of Bonaparte and his staff, and bear the mention "printed on board the Orient by the naval military press". After disembarcation at Alexandria, a press was installed there and given the name of the "Imprimerie Orientale et Française". A second press was established in the Demidoff square in Cairo, and this was known as the Imprimerie Nationale. Alongside the latter, there existed for some time a private press belonging to the Kunstmar Emmanuel Auré, a printer and bookseller from Valence (France) and a friend of Bonaparte. His press was entrusted with the printing of the Courrier d'Egypte, a journal of local information, and of the Décade Egyptienne, a literary journal reporting the activities of the Institut des Sciences et des Arts d'Egypte. When the National Press began to operate at full capacity, this put an end to the activity of Marc Auré, who sold his press and returned to France in 1800.

It should be noted that, among the administrative or political texts published, the orientalist Jean Joseph Marcel, who was responsible for the supervision of these presses, published the Arabic text of the Fables of Luskmam, accompanied by a French translation. The activities of the expedition's presses ceased in 1801 with the evacuation of the French troops.

Official typographical activity was revived some twenty years later, on the instructions of Muhammad ʿAlî Pâshâ, with the establishment of a press at Bûlûk. This began to function ca. 1822. The staff consisted partly of Egyptians, including a certain Nicolas Masabki (Masabki) who had been sent for training to Milan, Italy, and partly of Europeans, among them some French typographers who had worked in the presses of the French expedition and remained in the country.
The significance of this event is immense; the inauguration of this "Press of the Pasha" in fact marks the primary introduction of printing into Egypt. It is well known that printing was not established on an official level in this country (1820-85), at a date which is not known in detail, but it is known that it was closed with the establishment of the primacy of Egypt in the great process of evolution which the Nubia was to be.

b. Sudan. It was during the Turkish-Egyptian occupation of this country (1820-85), at a date which cannot be fixed precisely, that a lithographic work was introduced with the object of responding to the needs of the administration. It is known that it was used by Gordon Pasha, when he was appointed Governor of Sudan, to print paper money as a replacement for the metal coinage which gave out during the siege of Khartoum, between the end of 1884 and January 1885. After the capture of the town, the press fell into the hands of the Mahdists [see al-Mahdiyya], who used it to print the *khâbat al-dâ'wa* (messages for religious dissemination) of the Mahdi and other books of a religious nature. See Muhammad Ibrahim Abu Salim, *al-Huraka al-fikriyya fi'l-Mahdiyya*, Khartoum 1970, 58-62; idem, *Tâ'ab al-Khartum*, Khartoum 1971, 212.

5. In the Maghrib.

a. Libya. The first press was the official one introduced by the governor of the wilaya of Tripoli in 1866. Installed in the fortress of the town, it possessed lithographical and typographical facilities. It was here that the first issue of *Tasâbulus Qâzr*, the official Turkish-Arabic journal of the local Ottoman administration, was printed. According to R. L. Playfair, *The bibliography of the Barbary States, Pt. I.*, *Tripoli and the Cyrenaica*, London-Royal Geographic Society Suppl. Papers, ii, 1889, 557-614, in 1827, a journal entitled L' *Investigateur Africain* was published in Tripoli. However, researches, especially by E. Rossi, have shown that the work involved was in fact a manuscript journal, a sort of ante litteram newsletter, composed by the Swedish Consul, Grâber de Hemsâ, with the collaboration of his European colleagues resident in Tripoli. See also M. Scaparo, *La stampe di Tripoli turca* (1866-1911), in *Tripolitania*, iii/3-4 (1933), 10-20; idem, *La stampa di Tripoli* (1866-1933), in *ibid.* iii/7-8, 13-21.

b. Tunisia. Tunisia is one of those instances where printing was not introduced at the official level. Under Ahmad Bey (1837-55), the Abbé François Bourgade, with the aid of a refugee from Leoglobh, Pompeo Sulema, opened in Tunis, in the first months of 1845, the St. Louis College, to which a small lithographical press was attached. It was here that there appeared in 1849, the first Arabic text printed in Tunisia, a translation into Arabic by Sulayman al-Harâ'û, Arab secretary to the French Consulate, of a text by the Abbé Bourgade, of which the French title is *Soirées de Carthage ou dialogue d'un prêtre catholique, un mufti et un cadi*. The subsequent history of this press is not known in detail, but it is known that it was closed by the Ottoman authorities in the wake of a scandal involving forged banknotes.

The official lithographical press was founded in 1857. The first text was, according to Demeerseman, the *4th al-ânâm* (see Dustûr. i. Tunisia) solemnly promulgated at the Palace of the Bardo by Muhammad Bey on 9 September 1857.

On 7 November 1859, a decree of the Bey authorised an English merchant, Richard Holt, to establish a press and to publish a gazette in Arabic and Italian which would provide "commercial news, statistical information and extracts from other publications, with the exception of anything of a political nature". Following difficulties raised especially by foreign representatives, Sadok Bey decided on 18 July 1860 to establish an official press. This was to print al-Râ'id al-tunisi (a title rendered in French by L' *indicateur tunisien*), the first issue appearing in fact on 25 July of the same year. See A. Demeerseman, *Une étape importante de la culture islamique. Une parenté mécénate de l'imprimerie arabe et tunisienne: la lithographie*, in *IBLA*, xvi/68 (1953), 347-89; idem, *Une étape décisive de la culture et de la psychologie sociale islamique. Les données de la controverse autour du problème de l'imprimerie*, in *ibid.*, xvii (1954), 1-48, 113-40.

c. Algeria. The first journal printed in Algeria was the *Estafette d'Alger*, which first appeared at Sidi Ferruch on 14 June 1830, produced by French troops who had landed in this small bay to the west of Algiers and who used a field printing-press. Apparently the same press was used to print the *Moniteur Algérien*, a bilingual French-Arabic journal, two years later. It is interesting to note that the Arabic text was lithographed. Almost a hundred years were to elapse before, in 1925, the founder of the Islamic orthodox reformist movement in Algeria, Ibn Bâdis, was able to establish an Algerian press in Constantine, al-Matba'a al-islamiyya al-djazairiyya, subsequently known as *Matba'a al-Qâzî* after the name of the monthly magazine which it published until 1939. See Christian Souriento-Hoebrechts, *La presse maghrébine*, Paris 1975; Abd al-Malik Muratu, *Ma'âlim al-adab al-'arabi al-hadith fi l-Qâzî*, in *Al-Adab*, xiv/11 (1979), 44-51 (*Inshåd al-matâkhî al-arâbiyya fi l-Qâzî* 45).

d. Morocco. The first press in Morocco was a state foundation, founded on the instructions of the Filâlî Sharîf Muhammad b. 'Abd al-Rahmân (1859-73). This was a lithographical press (matba'a hudâjr) supervised by an Egyptian master printer, Muhammad al-Kabbânî, which operated from January to August 1865 at Meknès, and was subsequently transferred to Fès. The first book printed seems to have been *al-Šârîfî al-Muhammadiyya* (according to Ayache, "The portrait of the Prophet") by the author, compiler of one of the six canonical sunan, died at the end of the 3rd/9th century, Muhammad b. Isâ al-Tirmidî. See G. Ayache, *L'apparition de l'imprimerie au Maroc, in Hespéris-Tamuda*, v (1964), 143-61; M. Ben Cheneb and E. Lévi-Provençal, *Essai de répertoire chronologique des éditions de Fès, Algiers 1922.*

General bibliography: There exists no gener-
al work covering all the Arab countries. The most important works concerning the various regions are mentioned at the end of each section. On printing with movable characters, the most complete survey remains that of Kahlil Sāhām, Tīrūh al-tibīha 5° 17 dahr al-'arabi, Cairo 1966, 378 ff., with an ample bibliography of works in numerous languages; the Maghrib is however completely excluded. Other countries, including Oman, the United Arab Emirates and South Yemen, also pass without mention in this work.

On the question of the slow pace of the diffusion of printing in the Arab countries, see, besides Demeerseman (cited in the bibliography relating to Tunisia), T. F. Carter, Islam as a barrier to printing, ch. xv of The invention of printing in China, in MW, xxiii (1943), 213-16.

Finally, on the Arabic works published in Europe, reference may be made to the bibliographical works of C. F. de Schurrer, Bibliotheca arabica, Halle-a.-S. 1811, covering the period from 1505 to 1810, and V. Chauvin, Bibliographie des ouvrages relatifs aux Arabes publiés dans l'Europe chrétienne de 1810 à 1885, Liège 1892. (G. Oman)

2. In Turkey

Books in Turkish, primarily grammars and dictionaries and phrase-books, were printed in Western European countries within a century or so from the beginning there of printing in Arabic characters by means of movable type, whilst the Christian (Greek Orthodox and Armenian) and Jewish communities of the Ottoman empire also at an early date took the new invention in the production in their own languages and scripts.

The printing of books in Arabic characters from Italian presses (see section 1 above) soon began to acquire an additional motive to that of the interests of Arabic and Italian scholarship in the West, 

...
Oxford, in 1622, started a business in London for printing religious books and with the financial backing of his merchant brother. These books were probably printed under Metaxas’s supervision by William Jourdain or at the Elliot’s Court press, and it may be that the first book published by Metaxas in Istanbul was printed in London at the latter press (Roberts, 19-24; Layton, 155). The Oecumenical Patriarch Cyril Lucaria (1572-1638), who held views similar to those of Calvinism, invited Metaxas to Istanbul in order to use his press against Jesuit Roman Catholic propaganda, to educate the Orthodox and to reform his Church (Roberts, 45). Arriving in 1627 on a Levant Company ship, he brought with him his Greek font, the books he had printed in London and two skilled Dutch printers (Layton, 145). His printing house began in rented premises near to the English and French embassies, and the first book produced there in 1627 was a treatise against the Jews (Legrand, no. 166); but Jesuit intrigue aroused the Janissaries against the innovation of the press, and the latter destroyed it in January 1628 (Hadjiantoniou, 80-3).

The first Turkish text printed in the Greek alphabet (originally written by the Patriarch in Greek and then translated into the Turkish dialect of Karaman, Karamanlılığı), was the profession of faith of the first post-Ottoman conquest Orthodox Patriarch, Gennadios Scolarios, addressed to Sultan Mehemed II Fâthî, the Piskäde-nâme, the Sultan requested that it be translated into Turkish and it was also printed by Martin Crusius in Turco-Graeciae libri octo, Basel 1584, 109-20. Another religious work in Karamanlılığı is the Gülär-i imân-i Meşhû, no press or place of printing is mentioned in it, but it may have been produced at the Armenian press in Istanbul by Panagogiots Kyriakides (Salaville and Daldegio, 3-4).

In all these cases, the presses of these minority faiths had to be imported from outside, and none of them were able to construct them within the Ottoman borders. One inevitably wonders why no Turkish press existed at this time, when printed books imported from Europe were sold in Turkey and when the non-Muslim communities were printing books. A section on printing in Pečewî’s Ta’rîh, Istanbul 1283/1866, 1, 107, argues that the printing press was no longer an alien thing and that Turkish society was slowly accepting it, because of the great speed with which a large number of books can be produced once the tedious work of type-setting has been done; clearly, this historian approved of printing; yet it was to be 78 years after Pečewî’s death before the first Turkish Muslim press was to be established. The reason for the Muslims’ aversion from printing doubtless included motives of religious conservatism but also the vested social and economic interests of the professions of calligraphers (khattât) [see Katta], book illustrators, binders, etc.; and when printing eventually was established in the 18th century, only small numbers of books were produced and demand remained at a low level.

Ibrahim Muteferrika and his press. Some eight years before the establishment of his press in 1144/1730, Ibrahim Muteferrika had 1132/1719-20 printed a map of the Sea of Marmara, probably dedicated to the Vizier Dâmdâb Ibrahim Paša and presented to him, since a note on the map’s bottom right-hand corner reads “If Your Excellency my master so commands, larger ones can be produced. [Dated] year 1132”. It seems therefore that attempts at setting up a printing press dated 1132 by some years (see Kortoğlu, 14-15). A second map, of the Black Sea, followed in 1137/1724-5, and a third one, Mermîdî-i Irân, in 1142/1729-30. A fourth map, Hikhl-i Mişr, was known to have existed (Ersoy, 37), but remained lost until it surfaced recently for sale (see Brit. Museum, Turcica catalogue no. 484, June 1976, 16).

Concerning Ibrahim Muteferrika’s Transylvanian origins, his conversion to Islam, his career in the Ottoman service as a diplomat and as an author, see the article İebraîm Mûteferrika. Here is mentioned too his written proposal, the We’let al-tibâ’â, to the Grand Vizier Dâmdâb Ibrahim Paša of 1139/1726-7 on the benefits of printing: the benefits for the masses needing instruction and for the ruling classes alike, the perpetuation of books by printing when manuscripts could and had been destroyed by war (as in the Christian Reconquista of al-Andalus and in the Mongol invasions) and the general usefulness of the new technique for Islam (this opuscule was printed as the first five pages of the first book which he printed, Wankulî’s Turkish version of al-Djawhartî’s famous dictionary, the tibâ’â). He feared religious opposition, and made a formal approach to the Vizier, requesting a firmân from the Shaykh al-Islâm on the licitness of printing and asked Sultan Ahmed III for a firmân authorizing him to print books, promising that the first work undertaken would be Wankulî’s dictionary, enclosing a few specimen pages of this already printed, explaining the process of proof-reading, setting forth how he had been working towards the project for eight years with the patronage and financial assistance of the high official Sa’îd Efendi and promising that at the end of each book printed the sale price would be given (see the specimens from this application at the end of Gerček, and also Sungû).

With the help of Sa’îd Efendi, the Grand Vizier Dâmdâb Ibrahim Paša and the Shaykh al-Islâm ‘Abd Allâh Efendi’s firmân, Ahmed III was persuaded to issue a firmân to Sa’îd and Ibrahim Muteferrika in Dhu ‘l-Ka’dâ 1139/1727 authorizing the opening of a printing-works and enjoining the printing of books not on such subjects as fikr, hadîth, tefsîr, kalâm, but on practical subjects like medicine, crafts, geographical guides, etc., based on the authority of the fatwa of the former kâdis of Istanbul, Salonica and Qhalata and of the Shaykh al-Islâm (whose names were recorded in the written petition to the sultan); these last are to take charge of the proofreading, for which great care is to be exercised.

With this security behind them, Sa’îd and Ibrahim went ahead with the setting-up of the dâr al-tibâ’â (popularly known as the basma-îhane) in Ibrahim’s own house in the Sultan Selim neighbourhood of the Fatîh quarter. Documents dated 29 Rabî‘ II 1140/14 December 1727 and 2 Dümâda 1140/16 December 1727 show that the press had begun work on Wânkûlî’s dictionary, and this was completed and the book ready by 1 Radjab 1141/31 January 1729. In the 16 years up to Ibrahim’s illness of 1156/1743, only 17 books were produced, explicable partly by his own carefulness but also by an apparent lack of enthusiasm for printed books in Ottoman society. The Patrona Khalil revolt of 1143/1730 which led to the Sultan’s abdication did not affect the progress of Ibrahim’s work, but the idea of printing does not seem to have made a deep impression on society. In this same year, that of the new Sultan Mahmûd I’s [q.v.] accession, a pamphlet on military organisation, Uṣûl al-hikâm fi nizâm al-unâm, was printed, and on 11-20 Sha‘bân 1144/14 February 1732, Mahmûd renewed the firmân originally granted to Sa’îd and Ibrahim by Ahmed III, but this time to Ibrahim only. Ibrahim’s 13th book, the History of Na’mâ
[q.v.], was printed in two volumes in 1147/1734-5. Then followed five years of inactivity, till between 1153/1740-1 and 1156/1743 four more books were produced, bringing the total to 17. In this last year, Ibrahim fell ill and died in 1158/1745. 

The books printed between 1141/1729 and 1156/1743 are as follows:

1. Kitâb-i lughat-i Wânkuli—1 Radjab 1141/31 January 1729
2. Tuhfat al-kâbir fi ašfar al-bihâr—1 Dhû ’l-Ka‘da 1141/29 May 1729
3. Ta’rikh-i sayyâh dar bayân-i suhr-i Aghâvînî wa sahabâ-i tanmâni bi-dinst-i da‘ala-ı Şahâr-i Şanfawaînî—1 Safar 1142/26 August 1729
4. Ta’rikh al-Hind al-Gharbi al-musamûl bi-hadîth-i nâw—middle third of Ramadan 1142/17 June 1730 (illustrated)
5. Usul al-hikâm fi nizâm al-umâm—middle third of Muharrâm 1143/16 August 1730
6. Ta’rikh-i Na’âmî—vol. i, middle third of Muharrâm 1147/middle late June 1734, vol. ii, Şümâdî 1147/middle October 1734
7. Ta’rikh-i Rabî‘î Efendî—1 Dhû ’l-Hijdja 1153/17 February 1741
8. Ta’rikh-i Şehrî Efendî—1 Dhû ’l-Hijdja 1153/17 February 1741
9. Ahvâl-i ghaşarât dar diyar-ı Bosna—1 Muharrâm 1154/19 March 1741
10. Farhang-i Şahrî—1 Şabâ‘i 1155/1 October 1742

With the exception of no. 8, Holdermann’s Grammaire turque, the size of the editions of these books printed at the dâr-i tiyân-i şâmîra is given at the end of the second volume of Na’âmî’s History: 1,000 each for nos. 1 and 2; 1,200 for no. 3; and 500 each for the rest.

After Ibrahim’s death, his former kâbir Ibrahim Efendi (who is thought to have been his son-in-law also) and Kâdî Ahmed Efendi got a firman from Mehmed I, but for unknown reasons were unable to start printing. (Getek, 92). At the beginning of Rabî‘ II 1168/1755 they got a new firman from Əth’iimâni and started printing, their first publication being a second edition of Wânkuli’s dictionary, but soon after this, Kâdî Ibrahim Efendi died and the press was abandoned. Subsequently, two secretaries of the Sublime Porte, the Wâdâ‘-nâzîvî Râşid Mehmed Efendi and the Wâdâ‘-nâzîvî Wâsîl Efendi, bought the press from Ibrahim Müteferrika’s heirs, obtained a firman from Sultan Əbd al-Medjid I and in 1198/1783-4 printed the histories of Şâmi, Şubbi and Şakîr in one volume; in the following year they printed the history of İazzî, a sequel to the preceding three. After the grammatical work Pîrî al-Kâfiyya of the next year, no book was printed, and then between 1207/1792-3 and 1209/1794-5 three books on military topics were produced. Râşid Mehmed Efendi died in 1212/1796-7 and the press was closed down. It had hardly been a shining success in its 64 years of existence; for only 18 of these it had been actually operated, and it had printed just 24 books (including the second edition of Wânkuli).
Turkish, Arabic and Persian, the majority however being in Turkish (Heyworth-Dunne, 334-5). Cayol's lithographic press. Lithographic printing, invented in 1798 by Alois Senefelder of Munich (1771-1834) and further developed after Sencedler in 1818 published his technical manual on the process, was in use in Istanbul not much more than 30 years after its invention. Henri Cayol (1805-65) of Marseille and his cousin Jacques Cayol came to Istanbul and under the patronage of Khüsrew Pasha set up a lithographic press in the grounds of the Ministry of War, at a location whose exact spot cannot be traced today (Geçek, 13), with machinery ordered from Paris. Fifty soldiers were assigned to the Cayols to work with them and learn the trade, and for five years books on military subjects, including drill, were produced, the first book printed by lithography being Mehmed Khüsrew Pasha's Nûhbadât al-tâlim in 1247/1831-2 and with 79 illustrations.

On Khüsrew Pasha's removal from office, the Cayols moved in 1836 to Kulekapı and opened a press there on the basis of a firmâns from Sultan Mahmûd II (Zellich, 47). On 27 Rabî‘ II 1267/1 March 1851 Henri Cayol applied to the Meflîs-ı Wâlâ Presidency and received permission to print books in any language, as well as printing the Armenian monthly journal Panacer ("The Philologist") (Khâyîr al-Dîn Nefîm, 73-4). In January 1852 he printed the only issue of the Journal Asiatique de Constantinople in 1268/1852-3 (Bianchi, 248-9), but in mid-1852 the printing-works were burnt down during type-casting. It re-opened on 1 November 1855 in Beyoğlu at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich. In 1840 the Djerld-khâne press was opened to print in Arabic characters. To a Latin system for the writing of Turkish, Turkish Arabic and Persian, the majority however being in Turkish (Heyworth-Dunne, 334-5).

On Khiisrew Pasha's removal from office, the Cayols moved in 1836 to Kulekapî and opened a press there on the basis of a firmâns from Sultan Mahmûd II (Zellich, 47). On 27 Rabî‘ II 1267/1 March 1851 Henri Cayol applied to the Meflîs-ı Wâlâ Presidency and received permission to print books in any language, as well as printing the Armenian monthly journal Panacer ("The Philologist") (Khâyîr al-Dîn Nefîm, 73-4). In January 1852 he printed the only issue of the Journal Asiatique de Constantinople in 1268/1852-3 (Bianchi, 248-9), but in mid-1852 the printing-works were burnt down during type-casting. It re-opened on 1 November 1855 in Beyoğlu at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich. In January 1852 he printed the only issue of the Journal Asiatique de Constantinople in 1268/1852-3 (Bianchi, 248-9), but in mid-1852 the printing-works were burnt down during type-casting. It re-opened on 1 November 1855 in Beyoğlu at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich. In January 1852 he printed the only issue of the Journal Asiatique de Constantinople in 1268/1852-3 (Bianchi, 248-9), but in mid-1852 the printing-works were burnt down during type-casting. It re-opened on 1 November 1855 in Beyoğlu at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich.

In 1840 the Djerld-khâne press was opened to print the official newspaper Serif-i-Yi Hyâdîlî; and in 1299/1881-2 the Ebu ‘l-Diya (Ebiizziya) press, which was to have a special place in the history of Turkish printing, was opened by Ebu ‘l-Diya Mehmed Tefwîn Bey in Şişli at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich. In January 1852 he printed the only issue of the Journal Asiatique de Constantinople in 1268/1852-3 (Bianchi, 248-9), but in mid-1852 the printing-works were burnt down during type-casting. It re-opened on 1 November 1855 in Beyoğlu at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich. In January 1852 he printed the only issue of the Journal Asiatique de Constantinople in 1268/1852-3 (Bianchi, 248-9), but in mid-1852 the printing-works were burnt down during type-casting. It re-opened on 1 November 1855 in Beyoğlu at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich. In January 1852 he printed the only issue of the Journal Asiatique de Constantinople in 1268/1852-3 (Bianchi, 248-9), but in mid-1852 the printing-works were burnt down during type-casting. It re-opened on 1 November 1855 in Beyoğlu at the corner of the street leading to the French Embassy (Zellich, 52). Henri Cayol died of cholera on 18 August 1856, and after his death, his family worked the press in his name but under the management of Antoine Zellich.

(GÜNAY ALFAY KUT)

3. In Persia

1. Under the Mongols.

Wood-block printing was introduced into Persia in 693/1294. In that year Gayhbatu Khân ordered the printing of paper money (ca'â; Persianised as basma, *bâsma*) in imitation of Chinese practice. The paper money was printed in Tabriz and circulated for the first time on 19 Shawwal 693/12 September 1294. The paper money was probably printed with wooden blocks, which were manufactured by Chinese artisans living in Tabriz. Despite the threat of capital punishment in case of refusal to accept paper money, the population's reaction was one of outright rejection. Gayhbatu Khân was forced to abandon his experiment in Dhu 'l-Hajjâja 693/November 1294, as a result of which the art of printing was momentarily lost to Persia (see Jahn, 125-35).

2. Under the Safawids.

Although the Torah was printed in Persia (with Hebrew characters) in Istanbul in 1594, it was not until 1629 that printing was reintroduced to Persia, this time in the form of typography. For in January 1629, Carmelite friars received a printing press from Rome. It had matrices of 349 Arabic letter types and two instruments to set up type. It is not known whether the press produced any actual books. The Carmelites certainly tried, but “because of the dryness of the country” they failed, according to Fr. Angelus (Gazophylacium). Their printing (basmâ, *bâsma*) experiments took place between 1629 and 1642, when Fr. Bernard of St. Theresa handed the printing press over to the Vicar-General of the Carmelites in Isfahan. From 1648 till 1669 the press was kept in storage by the Dutch East Indies Company, which in 1669 handed the press over to Fr. Raphael Du Mans. In 1676 Fr. Angelus reports that the Carmelites still had the press, but from the context it is clear that it had not been used for a long time (Floor, *The first printing press*).

About the same time that the Arabic-Persian printing press was introduced in Persia, an Armenian press also was established in Qâlifâ (q. e. in Suppl.), the Armenian suburb of Isfahan. This was done at the initiative of Bishop Khac'atur Kesaraci in 1637. After 17 months of trial and error he succeeded in printing the Psalms in 1638. The Bishop's main problem was how to produce good quality paper and ink. Moreover, his type was not made out of lead, but of wood, copper and iron. He preserved and printed another two religious books, one in 1641 and the other in 1642. Both the letter types and the books can be seen in the Armenian museum at Qâlifâ (see Richard, *Un témoignage*...).

Despite his success, Bishop Kesaraci was troubled by technical problems. He therefore sent one of his pupils, Hovhannes, to Europe to obtain the required technical expertise. In 1644 Hovhannes printed a book in Armenian in Leghorn. He returned to Persia in 1646 to continue the work of Bishop Kesaraci, who had died in that year. To that end, Hovhannes brought lead types and a printing press with him. It was his intention to print the Bible, but “not having the way of making good Ink, and to avoid the ill consequences of the Invention, he was forc'd to break the press. For on one side the Children refus'd to learn to write, pretending they wrote the Bible themselves, only to get it sooner by heart: on the other side many persons were undone by it, that got their living by writing”, according to Tavernier. The latter argument also had constrained the introduction of the art of printing in the Ottoman empire, the Ottoman empire (see section 2, above). Tavernier was wrong in believing that the Armenian press had been broken, for in 1687 it was used again and this time nine books were printed. For unknown reasons, it fell into disuse again. It was only in 1771 that an Armenian printing press was established in Echmiadzin, in 1786 in Naghlevan and in 1796 in Ashtarak (Râ'în, *Armanian Armenians*).

3. Under the Kâdîrâs.

The art of printing was thus lost for a second time. Although the printing of the Armenian language was resumed fairly quickly, printing in Persian took somewhat longer. Persian language books were regularly printed since 1639, when in Leiden the first books in both the Persian language and characters were printed. After that date, both in Europe and towards the end of the 18th century also in India, many books in Persian were printed. The generally accepted date for the first book printed in Kâdîrâ Persia is 1233/1817, when in Tabriz the Dikhâdiyya by Mirzâ ʻIsâ Kâ'în-Mâkâm was printed on a typographic press. Because there is no thorough analytical study on Persian incunabula, it is impossible to settle the question of the earliest printing date. The author of the *Mašrûh al-mamâlik* ascribes the introduction of the art of printing (ʿalam-ʿal-tîfâ'â or *basma*) to ʻAbbâs Mirzâ, the heir-apparent and governor-general of ʻAdharbâyjân. Iʿtimâd al-Sâlîmâna (Mašrûh wa ʿalâther, 100), mistakenly, ascribes this initiative to Manûcîr Khân Mu'tamîd al-Dawla, an influential Tehran courtier. The early books were printed by Mullâ Muḥammad Bâqî Tabrizî, who in 1241/1825 also printed ʿAbd al-Razzâk Dunbulî's *Mašrûh al-sulâniyya*. In 1825 another printer in Tabriz, ʿAll son of ʿHâdîjî Muḥammad Husayn, printed the Nasâb al-sâbyân a well-known school text by Abû Naṣr Farâhî. By 1825, Tabriz therefore boasted already of at least two typographic printing presses (dâp-i surâh).

In that same year, Mu'tamîd al-Dawla established a typographic press in Tehran, which was operated by Mirzâ Zayn al-ʻAbîdîn Tabrizî. With the support of Muţâfî Muhammad, he printed 8,000 copies, he printed many books, mainly religious, which were known as “Mu'ta- madîs”. In 1815 ʻAbbâs Mirzâ had sent seven students to Great Britain to learn modern techniques. One of these students was Mirzâ Šâhîr Shîrâzî, who apprenticed himself in London to a master printer (dâp-sâr) who specialised in printing (dâp-sâd) the Bible in Persian, Hindi, and Arabic and other languages”. Mirzâ Šâhîr returned to Persia in 1234/1819, where he established himself as a printer in Tabriz. He shortly thereafter (1829) was sent to Russia as member of an embassy, from which he returned with a printing press. He was later engaged in printing in both Tabriz and Tehran.

Mirzâ Šâhîr in his turn sent a certain Mirzâ Asad Allâh to Russia to learn the printing trade. On his return to Persia in 1835, Mirzâ Asad Allâh stayed in Tabriz and, together with Akâ Ridâ, operated the first lithographic press (dâp-i sângî) in Iran. In that same year, Fath ʻAll Šâh summoned Mirzâ Asad Allâh to Tehran to start working there.

Because “printing in types is not relished by Persians, the characters being necessarily stiff and uncouth, and very displeasing to an eye accustomed to the flowing written hand” (Binning, i, 312),
lithography became very popular in Iran. Especially, the fact that lithography permitted Iranian artists to practice both calligraphy and illustrations in their normal way was an important advantage. Moreover, illustrated printed books became popular, which an increasing number, after the first items printed in 1259/1843, were produced in this way.

By 1850 there were five lithographic presses in Tehran (Sheil, 201) and in 1845 not less than 15 in Tabriz (Schwarz, 85). However, books also continued to be published "both in types and lithograph; but the execution is rather coarse; in the latter style in particular," Binning observed in 1851 (i, 312, ii, 217). In 1256/March 1840, American missionaries in Urmiya printed the first text in Syriac; moreover, this press could also print Persian and English (Perkins, 456).

Other presses followed in Shiraz, Isfahan, Bushehr, Maghād, Enzeli, Raqqh, Ardabil, Hamadan, Köhy, Yazd, Kazwin, Kirmānšah, Garrus and Kāshān (Māhūbū Ardaḵānī, i, 217). The list of early printers shows that a great variety of books were printed. Apart from religious texts, there were historical texts, popular works such as the Tawīl al-tawāniḥ, Iskandār-nāma, and a comic text such as Duzd wa Kādī. With the establishment of the Dār al-Funūn (q.v.) in 1852, a great number of scientific texts were printed on the school’s own printing press. The publications were in the field of engineering, chemistry, physics, mathematics, biology, medicine, geography, military science and music. With the establishment of the government press (dār al-tibā’i) and the state translation institute (ddr al-‘a), hundreds of translations were made from European authors. Further, Persian and Arab classics were printed, while contemporary official chronicles were solicited and published, such as the Rauṣūl al-safat-ī Nāsīrī and the Ṣafī-šāh al-taṣawwīrī. Under the direction of Ṣimāyā al-Saltana, who was in charge of the state press, translation, and censor’s bureau, many of these books were published. He himself also published a great many useful official chronicles, such as the Mirzāt al-buldān (3 vols.), the Mun’aṣṣam-nāsīrī (3 vols.), and the Muqta’ al-dālam (3 vols.).

A separate development was the publication of newspapers (kāhghāt-ī akhbār), of which the first listed Arabic newspaper was printed by Mirzā Ṣāḥib in Tehran on 25 Muharram 1253/1 March 1837. This paper had no special time, but only a long general heading, a shortened rendering of which is "Current news from Tehran" (Akhbār-ī Wākāyī). The paper, which lasted three years, offered foreign and local news, the latter focussing on the reforms initiating the latter part of the 19th century, occasional court activities. More effective in disseminating new political ideas were Persian newspapers printed outside Persia such as Kānīn (London), Akhār (Istanbul), Hālāb al-Maṭīn (Calcutta) andTHRAS (Cairo), which often had to be smuggled into Persia because of their unsettling contents. It was only with the advent of the constitutional movement in 1906 that newspapers started to play a very important role in political and cultural life of Persia.

### 4. IN MUSLIM INDIA

South Asia below the Himalayas remained beyond the diffusion of xylography from the Far East. Printing reached the subcontinent as European movable type technology introduced by Portuguese Jesuits who set up the first press in the College of St. Paul at Goa in 1556. In 1580 the Mughal emperor Akbar was presented with a copy of the Royal Polyglot Bible printed by Plantin at Antwerp, one of the finest products of the 16th-century European press, but the Mughal court did not adopt printing technology, being well served by its studio of calligraphers and artists. From the 1570s to the 1670s vernacular printing by the Portuguese in India to aid conversion was confined to Tamil, Konkani and Syriac, and that of the German and Dutch missionaries in the 18th century to Tamil and Sinhalese. Until the early 19th century, Christian literature in Arabic, Persian or Urdu was imported from Europe, such as Benjamin Schulze’s Urdu New Testament printed at Halle in 1758.

The earliest known specimen of Arabic printing in
India is a small woodcut New Testament quotation on the title-page of *Dialogus inter Moslimum et Christianum*, a Tamil polemic against Islam printed at the Tranquebar Mission Press in 1727. But Arabic, Persian and Urdu printing in India really began in Calcutta under the East India Company from the 1780s onwards. Of the three languages, Persian was paramount to the Company's interests and the medium of the law-courts and the land-revenue system inherited from Mughal Bengal. In the late 1770s the Governor-General Warren Hastings engaged Charles Wilkins, a Company servant with a gift for oriental languages, to manufacture Bengali and Nastā'īk types. With the Nastā'īk, Wilkins in 1780 printed Francis Gladwin's *A compendious vocabulary, English and Persian at Malda in north Bengal. In 1781 he became first superintendent of the Honorable Company's Press in Calcutta which issued a plethora of Persian translations of the regulations, notices and blank-forms required for the administration of Bengal. The first of these was a selection of Diwânī A'dālat regulations translated by William Chambers in 1781. From 1793 until 1837, when Persian ceased to be the language of the courts, Persian translations of Company regulations were reprinted in annual volumes. At Madras also Persian translations of local Company regulations were printed from 1802 onwards. Persian historical works valuable as sources on the Mughal system of government were printed at Calcutta, such as William Davy's edition of *Tuzukdt-i Timūr* (1785), Muhammad Sākhī's *Muntakhabdt-i A'limtgīn-i nāma* prepared by Henry Vansittart (1785) and Amir Haydar Bilgrāmi's *Risāla*, a treatise on land-revenue and tenure with Gladwin's translation (1796). A Sīvākāt fount (the earliest such?) was specially cast for printing Gladwin's *A compendious system of Bengal revenue accounts* (1790 and 1796). Some linguistic works were printed to help Company servants master Persian, Gladwin again preeminent with *A vocabulary, English and Persian* (1791, 1800) and *The Persian guide* (1800). As the classical literary language of Muslim India, Persian was studied by the British orientalists forming the nucleus of the Asiatic Society of Bengal (founded 1784). The first work of Persian literature printed was *Badshih-ye Harkaran* edited by Francis Balfour (1781). Other important texts printed were Gladwin's edition of Sa'dī's *Pānām-nāma* (1788) followed by Kuliyyāt-i Sa'dī prepared by J. H. Harington (1791-5), Sir William Jones' edition of Hāfīzī's *Laylī Magdān* (1788), the *Diwan* of Hāfīz (1791) and Nakhshabī's *Tūtī-nāma* with Gladwin's translation (1792). Arabic printing was far less extensive, but one important text printed before 1800 was *Al-Ṣajjadiwīdī's al-Sajjadiyah* (1792), published as part of Jones' digest of Hindu and Muslim law. A concordance to the Kur'ān was printed at Calcutta in 1811, but the Arabic text (together with 'Abd al-Kādir's Urdu translation) was not printed till 1829. The most famous translation of the Kur'ān printed in the subcontinent was Shāh Wāli Allāh's Persian rendering (Dihīl 1866, etc.). The leading scholar of Urdu in 19th-century Calcutta was John B. Gilchrist, who published *A dictionary, English and Hindostanee* (1760-7 to 1790), *A grammar of the Hindostanee language* (1796) and *The Oriental linguist* (1798). In 1789 *The new Asiatick miscellany* contained the first Urdu literary text to be printed, a *Rākht* of Wali Dakhani. In the same year, W. H. Bird's *The oriental miscellany* also printed the words and music of several Urdu songs. From 1793 onwards, Urdu translations of Company regulations in Bengal were required to be printed as well as Persian. At Madras in 1790 the physician Henry Harris published *A dictionary, English and Hindostany*, but his grammar was never printed.

Fort William College, founded at Calcutta in 1800, provided a further stimulus for the printing of Arabic, Persian and particularly Urdu texts. The Company published numerous translations in those languages. Gladwin presented Nastā'īk types to the College, and these Ghikrist used as Professor of Urdu to equip the Hindoostanee Press, which issued many celebrated Urdu works: Mir Ammān's version of "The Four Derivatives", *Bagh-o-bahār* (1802); Mir Shīr 'All Asīna's *translation of Sa'dī's Gul斯坦*, *Bagh-i Urdu* (1802); Mir Shīr Musān's *Hasān* (1803); Mir Shīr Haydārī's *Totakāhān* based on the *Tātī-nāma* (1804); etc. The largest book issued by this press was Kulliyāt-i Mir Tākī with 1,085 pages (1811). Besides some forty Urdu works, by 1820 about twenty Arabic and another twenty Persian texts were also printed for the College's use at various Calcutta presses: John Baillie's *Arabic syntax* (1801), Joseph Barretto's edition of *The Shāhān al-lughāt* (1806); Wali al-Dīn Muhammad al-shāhī's *A grammar of the Arabic language* (1813) and the *Diwan al-Mutanabbi* (1814); *Anwār-i Suhayli* (1805); Lumbden's *A grammar of the Persian language* (1810); Nizâmī's *Sikandar-nāma* (1812); Mirzā Abū Tāhī Khān's *European travelogue Masīr-i Tālībī* (1812); etc. At Madras, the equivalent College of Fort St. George also stimulated the printing of texts, as the *Anwār-i Suhayli* issued by the College Press in 1822.

The *matshīf* of Fort William College and the Rev. Henry Martyn were equally important in early missionary printing in Islamic languages in India. Mirzā Muhammad Fitrat's translation of St. Matthew into Persian and of the Gospels into Urdu (edited by William Hunter) were both calculated at Calcutta in 1805. In 1809 the Persian St. Matthew prepared by Nathaniel Sabat under Martyn's direction was printed at Serampore, the complete New Testament at Calcutta in 1816, and the Old Testament in parts (1828-38) by the Calcutta Auxiliary Bible Society. Sabat's Arabic New Testament was printed at Calcutta in 1816. Martyn's own translation of the New Testament into Urdu (the basis for all subsequent editions) was printed in 1814 at Serampore, where the Sindhi St. Matthew was issued in 1825. The mass of early 19th-century evangelical literature in Urdu, Persian, Panjabi, Sindhi, etc., was mainly printed by the various Christian tract and book societies formed (those of Calcutta, Benares, Agra, North India, Punjab, Madras (for Dakhani), Bombay, etc.).

The East India Company introduced lithography to India in the early 1820s, which rapidly displaced typography for Islamic printing as presses were established right across Northern India: Patna 1828; Kānpur 1830, Dīhlī and Meerut 1834, Āgra 1835, Lūdhiāna 1836, Mirzāzpār and Allāhhābd 1839, Benares 1844, etc. The earliest Urdu works listed were medical treatises by Peter Breton, the first being *Bāyān zaharīn kā* on poisons (Calcutta 1826), and in Persian editions of Sa'dī's *Gul斯坦* and *Bayān* (Calcutta 1827, 1829). The development of Lakhnaw as a major centre of Urdu and Persian printing exemplifies the transition to lithography. Nawwāb Ghāzī al-Dīn Haydar set up the royal press about 1817, its most famous product being the type-set Persian dictionary *Haft kulzum* (1820-2). His successor Nāṣīr al-Dīn Haydar brought Edward Archer's Asiatic Lithographic Press from nearby Kānpur to Lakhnaw in 1830, and the Arabic dictionary *Tātī al-lughāt* begun by typography was then completed (vols.)
iv-viii) lithographically. Under Wadjid, all lithographic presses in Lakhnaw were closed because the Nawwáb disliked a history of his family lithographed by one Kamál al-Dín Haydar. Some presses moved to Kánpur, while others continued surreptitiously and books were often issued without details of printer, etc., so that many early Lakhnaw and Kánpur imprints are indistinguishable. The single most important Lakhnaw press was that of Munshi Nawal Kháhór founded in 1858. By his death in 1895 he had issued about 500 titles, mainly religious, historical and poetical texts, particularly Urdu translations from Arabic, Persian and Sanskrit, subsidised by his newspaper and his printing for government. Sikandar Dihj, Nízám of Haydarábád (Deccan), acquired a press as a curiosity of western technology during Lord Minto's vice-royalty (1807-13), but did not apparently use it.

Bombay was not important for Persian printing until the introduction of lithography, although the Dastgír of 1818 printed with Náshik types deserves mention. Among the earliest works lithographed there were the Anwr-i Suhaylí and the Diván of Hádí, both in 1826. Bombay and Kárcáí were the twin centres of early Sindhi printing, one of the first Sindhi books lithographed being Sádasukh Lála's drawing manual Cita jí páj (Kárcáí 1852). Kárcáí had been the first city in what is modern Pakistan to acquire printing in the mid-1840s. The American Presbyterían Mission Press Calcutta, which had been printing extensively in Panjabi (as well as Persian and Urdu) since the 1840s, but the main centres of Muslim Panjabi printing were Láháwar and Síválkút, from the 1860s issuing kisáas and other popular literature. The first press in modern Bangladesh was at Dháká in the 1850s, but printing became widespread in East Bengal by the 1870s at Sylhet, Rajsháhi, Barisál, Jessoré, etc., and Calcutta also remained an important centre of Muslim Bengali printing. A number of Pashtó works were printed in Díhí, Pesháwar and Láháwar in the 1870s.
Muhammad and the deer (Abbottabad 1883) and T. C. Plowden’s Idiomatic colloquial sentences, English-Pakhto (Jal Press, Derā Gāzī Khan 1884).

According to Abd al-Rahmān Khān’s autobiography, he was the youngest of nine children of his parents (24). His family background was not exactly known when he became Amīr in 1880. But the first lithographic press (Matbā‘a-‘yi Muṣṭafawi) was set up under his predecessor Amīr Shīr ‘Allī Khān whose Persian polemic against the Wāhabīs, Risāša-yi ʿabīh-ī ʿabīh, was printed at Kābul in 1288/1871, followed by ‘Abd al-Kādīr Khān’s religious tract Tuhfāt al-ʿulamā‘ in 1292/1875. ‘Abd al-Rahmān attributed the introduction of printing to Mānūgī ‘Abd al-ʿAzīz dātī of Dīhlī who trained many Kābulī lithographers before dying of fever. Several of the Amīr’s own works in Persian were printed, including Nāṣīṭ-nāma, advice on Afghanīstān’s relations with Russia (1303/1886), and Mīra‘īt al-‘ulā‘ī, on human intelligence (1311/1894). Most famous of all was his tract advocating ḥiḥad, Kalimāt Amīr al-bilād fi ‘l-taḥdīth (1304/1887), printed at the Huṣaynī Press which also issued an almanac in the same year. The press was also used to promulgate laws, e.g. ʿAbd al-Rahmān’s desire to modernise his army is reflected in several military tracts printed, e.g. ‘Abd al-Muṣṭafawi’s id-i risāla on gunnery manoeuvres (1303/1885) and Kānātī-yi riṣāla on cavalry drill (1304/1887).

(G. W. SHAW)

MATBAKH (Persian) (abū, kitchen, cookhouse, a noun of place, defined by lexicographers as “the cook’s house” (bayt al-matbakh) from the verbal root meaning “the cooking of flesh meat”. The root b-kh is common to the Semitic family. Already in Akkadīan, OT Hebrew, Syriac, and post-Biblical Hebrew we find the further, related connotation of “slaughtering” in addition to that of “cooking”. Undoubtedly, the mediaeval domestic matbakh combined both these functions. By extension of the root meaning, the matbakh was the place where every conceivable kind of food, including flesh meat, was transformed from its raw state for consumption at the table.

1. In the mediaeval caliphate.

The kitchen has been described as the “birthplace” (Forbes) and the “foster home” (Needham) of innumerable terms, operations and apparatuses in the early stage of man’s development of technology. Laboratory operations employed by the ancient pharmacists and cosmetician reveal their origin in the preparation of food; so too do the techniques of crushing or disintegration (pressing, grinding, impacting), the technology of fermentation, the methods for the preservation of perishable organic material and, the oven. The chemistry and technology of cooking were thus realms of practical knowledge which the Islamic world inherited from the ancient centres of Middle Eastern civilisation. This inheritance was not, however, shared equally by all the population. Techniques which had perhaps originated or else been refined in the kitchens of the ancient temple and the palace were appropriated by the mediaeval urban cook, whereas the rural and nomadic populations retained the more primitive methods of food preparation. The technological gap between the urban and rural domains can be explained as a function of the distribution of power in the economic sphere and ultimately of social stratification and its ramifications in the political sphere.

Data relating to the kitchen in the classical period (ca. 200-800 A.H.) are found most abundantly in the specialist culinary treatises. Few of these, unfortunately, are extant. The social milieu reflected by the cookbooks is, however, that of numerous urban households, although it would be safe to assume that both palace and domestic kitchens shared a culinary lore and a range and type of utensils in common. Apart from this we know little of the operations and personnel of the palace kitchens in particular, except that they were of a far greater scale than those in the domestic sphere. For example, Hīlāl al-Ashāb narrates that in the time of the Mughals (ca. 289/902) the imperial “cook houses” (matbākh) were separate from the bakeries (matbāḥāz) and the caliph was served from his own private kitchen while the public’s needs were catered to from a different one. (Tuhfāt al-ʿumāra‘, fi taʾrīkh al-uẓarā‘, ed. ‘Abd al-Sattār Farādī, Cairo 1958, 20-2). Domestic households of a comfortable standard would have had their bread baked and food cooked in the same complex.

The concept and design of the kitchen in a traditional open courtyard house has probably remained unchanged from mediaeval times to the last surviving examples in modern-day Baghdad. Indeed, the essential characteristics of the mediaeval open courtyard house in Iran are said to be the Mesopotamian in origin and inspiration (see Suhib al-ʿAzzāwī, A descriptive, analytical and comparative study of traditional courtyard houses and modern courtyard houses in Baghdad, Bartlett School of Architecture and Planning, University of London Ph.D. thesis, unpubl.). The kitchen (the contemporary expression bayt al-matbakh being equivalent to the lexicalists’ bayt al-tabbakhā and matbakh) in multi-courtyard dwellings was a whole complex comprising the kitchen proper, opening on to its own courtyard with adjoining ancillary areas such as store rooms, latrine and bathwell, and possibly a cook’s room. The upper part of the courtyard, level with the first floor of the house, was surrounded by blank walls and open to the sky. The kitchen of a single courtyard house faced directly on to the courtyard itself and had either fewer or no ancillary areas attached to it. Larger multi-courtyard houses might have a second kitchen adjacent to the rooms where guests were entertained. Palaces of the caliph and the four-ASF princes were doubtless fashioned on a much larger scale but along essentially similar lines. Contrast this special function kitchen complex with Lane’s description of a peasant’s house in Lower Egypt in the 19th century, in which one room generally had an oven (Eg. farn) “at the end farther from the entrance and occupying the whole width of the chamber. It resembles a wide bench or seat and is about breast high: it is constructed of brick and mud, the roof arched within and flat on top.” During the cold months, the inhabitants would sleep either on top of a warmed oven or on the floor of the same room (Manners and customs of the modern Egyptians, London 1837, i, 30). Along the social spectrum, therefore, food preparation was performed in areas ranging from greater to lesser specialisation: from the separate public and private kitchens and bakehouses of the palaces to the shared kitchen-habitable area of the peasant’s dwelling.

The well-equipped kitchen in an urban household generally contained two major appliances. One was the baking oven, the tanārū, of Mesopotamian origin (Akkadian tiniru; see A. Salonen, Die Omen der alten Mesopotamier, in Baghdader Mitteilungen, iii [1964], 100-14). Another was the tāโหลด, which generally took the appearance of a large, inverted pot, from which it probably evolved. Fuel, preferably good charcoal, was
inserted through a side opening, ignited, and when the oven was sufficiently hot, baking could commence. The oven’s temperature could be adjusted to some extent by closing its open top, the so-called “eye” or “mouth” of the oven, and its other apertures, aithkab (see Fawzi Rasul, al-Tannūr wa-sinā’atuhu fi ‘l-Kitābih, in al-Turāth al-Shā‘īrī, iii/12 [1972], 95-116). The earliest extant culinary manuscript, of late 4th/10th century Ṭrājī provenance, provides a list of implements specifically used in baking bread in a tannūr (see Kūsh al-Tahābīi uwa-taṣlīh al-asfāhiyya al-maṣḥūdī al-ṣinā’atī al-maṣḥūdī, by Abū Muhammad al-Muzaffar b. Naṣr b. Sayyār al-Warrak, Oxford, Bodleian, ms. Hunt. 187; now ed. K. Öhrnberg and S. Mrouch, Helsinki 1987). These include a dough board (lawḥ); a small rolling pin (ṣhawbak) for the ordinary loaf (ragḥi) and a large one for the thin rikdā; a feather for coating the dough in certain preparations; a wooden bowl (ṣafna or mīṭqin) in which the dough was mixed and a metal scraper (mahfik) for cleaning it afterwards. Yeast was kept in a wooden container called a mkhab. A cloth (mamidī) was used to wipe a loaf clean before baking and another was used for wiping down the oven to remove unwanted moisture or condensation. A poker (ṣinā’āra) was used to remove the loaf from the oven if it fell upon the floor inside, and a metal instrument (mihruk) was used for raking out the embers and ash from the oven when baking was finished.

The tannūr was not used exclusively for baking bread. A recipe for a kind of chicken pie made in a pan (miklāb) is described as being lowered into the oven to cook and another dish, a meat, rice and vegetable casserole made in a pot (kidr) was placed in the oven to finish cooking. Both these dishes were called tannūrā; or oven-dish, which were often left to stew gently overnight in a slowly cooling oven and served the following day (al-Warrak, ṣab 87).

The second major cooking contrivance found in the kitchen was the so-called simply as the “fire-place”, mustaunikad. This was designed to accommodate several cooking pots and/or pans side-by-side at the same time. It was erected to about half-a-person’s height, giving easy access to the cooking food and was provided with vents allowing for an intake of air over the coals and for the expulsion of smoke. It is evident that many dishes required more than one pot in their preparation, hence several “elements” might be used in the preparation of a single meal. Another, apparently independent, type of mustaunikad was recommended for the preparation of sweetmeats. Its single element accommodated a miklāb or tangīr, the vessels in which sweetmeats were commonly made. These dishes required long cooking over a low heat accompanied by vigorous stirring of the pan’s contents. The shape and position of this mustaunikad would have made it easier to hold the pan and to control the heat (al-Warrak, fol. 13a).

Al-Warrak’s depiction of the mediaeval batterie de cuisine continues with a list of utensils employed in the preparation of the innumerable main dishes. Cooking pots (kudār, sing. kidr) made of stone, earthenware, copper or lead came in various sizes. The largest pots were reported to hold the carcasses of four goats (al-Mas‘ūdī, Mursūdū, viii, 54 = §3173). Such cauldrons, however, were more apt to be found in the palace kitchens or an army field mess than in a domestic kitchen; contemporary recipes do not suggest such crude bulk of ingredients. Judging from certain archaeolog- ical and textual data, it appears that the “pots” and “casserole” types appear more modest in size. Remains from a Byzantine pottery factory in Cyprus reveal that the largest restored cooking pot item was 0.27 m high and 0.31 m at its greatest diameter; the smallest was 0.135 m high and 0.21 m at its greatest diameter. Casseroles with lip-edge type rims which were probably provided with lids were smaller still, the largest restored item being 0.11 m high and 0.27 m in diameter. (H. W. Cadloug, An early Byzantine pottery factory at Dhosiros in Cyprus, in Levant, iv [1972], 1-82). These vessel sizes seem appropriate to the needs of even large domestic households.

Pans (sing. mīkhāl or mīkhālit) generally used for frying fish and the like were made of iron. A stone-made mīkhāl was used for other purposes, although the distinction between it and the former is unclear. Other utensils found in the kitchen were roasting skewers (sing. sāffūd); a copper basin (nudra) for washing smaller containers and vessels in hot water; a large copper rod-like instrument (mihabak) for stuffing intestines; a large knife for jointing meat and smaller ones for cutting up vegetables; several kinds of strainer (mīṣāf) made of wood or metal; a ladle (mīghara) and a mallet (mīshāb). Spices were crushed or powdered in a mortar (ḥā‘un) and kept in glass vessels. A similar but larger stone mortar (dajā‘un) was used for pounding meat or crushing vegetables; while meat was cut up on a wooden table or large wooden surface (djiwān).

As with bread-making operations, al-Warrak lists separately implements for making sweetmeats (haṭırat). Frequently these dishes were served shaped in the form of a fish or bird fashioned thus by means of a mould (kālab, pl. kāwédīb). In other cases sweetmeats were presented at a table decorated in a manner appropriate for the occasion. The thick syrupy substance which was the base of many kinds of halwā was stirred slowly in a pan over the fire with utensils called an ṣī‘ām and a kathā fāṭiriyā. Some preparations were rolled out after cooking on a marble slab (rūkdhīmā) before being cut into individual pieces. (The above data may be compared with Athenian household utensils in the classical period in B. A. Sparkes, The Greek kitchen, in. f. of Hellenic Studies, lxiii [1962], 121-37.)

The separate lists of utensils for different tasks mentioned in al-Warrak’s work suggests that at least in the larger, prosperous households both a baker and possibly a sweetmeker might have been retained in addition to a cook and other assistants. It may indeed be the case too, as Pellat has proposed, that the baker’s (al-DAQIBH) initial function evolved into that of a chief kitchen steward or even household majordomo (al-Dajāb, Buchjud, tr. Ch. Pellat, Le livre des astres, 213, 258). The sweetmeker, on the other hand, may have been more often a market-based specialist commissioned to make his wares in people’s kitchens when the need or occasion demanded. By and large, therefore, a household’s status was marked socially, in part, by its degree of independence from the commercial cooked food establishments of the market which catered more to the needs of other sections of the population. Despite allusions in the Thousand and One Nights to “sending out” for food cooked in the market, the ṭisha manuals convey the impression that such fare was to be regarded with some suspicion. This impression is underlined by the existence of one market institution which must have served many urban households. Dishes initially prepared in the kitchen could be taken to the communal oven (furn), cooked there and returned to the kitchen to be garnished and served. To be cooked in the oven as adjoin spices. Preparation of such a dish in the kitchen ensured a control over its quality; for its part, the furn
served the needs of households which possessed neither adequate kitchen space, equipment or labour for meal preparation or else catered for a household’s special tastes or catered for a very affluent establishment’s needs in terms of confidentiality and security. The facilities served the needs of the Sultan’s palace, to the elite and to the charitable institutions. By fulfilling charitable duties as prescribed by Islam and by leading to the accumulation and redistribution of wealth, these organisations played a crucial role in Ottoman social life and in the economy in general.

a. Special feasts and foods. Feeding people or giving public feasts had an important ritualistic-ceremonial and political function among the pastoral nomads of Eurasia. In the Kök-Türk inscriptions dated 732–5 A.D. (ed. H. N. Orkun, IC 10, ID 16, 17), the primary task and accomplishment of a Kaghan was described as “the feeding and clothing of his people”. In the Katadug bilig, a royal advice book written in 1070 in Turkish, being generous and “entertaining people with food and drink” were counted among the chief virtues of a prince (tr. R. Dankoff, 107; Inal-Paşa, Katadug Bilig de’er...). Later references to this custom indicate that “feeding his people” was institutionalised within the state organisation. To give a public feast was a privilege and a duty of the ruler. The institution was known as toy in Turkish (in Mongol toyilgan: Manghel-un an toy, a “royal advice book” written in Turkish). In this context, people were invited to eat in the palace, and the custum was then repeated at the same or similar organsations.

Finally, the kitchen or kitchen complex of the single or multi-court yard house (hast mutfak) allowed a sheep or goat and several fowls to occupy the yard awaiting slaughter and the cooking pot; thus meat could be kept and cooked fresh. Fruits, herbs and certain vegetables were also dried and then stored in the kitchen’s ancillary area along with food prepared by pickling and special condiments such as mum. Homemade beer and wine could be stored there as well. The wide range of activities associated with the transformation of food into “raw to cooked” state (clearly reflected in the treasury of contemporary recipes) indicates the central importance of the kitchen and its management not only to the smooth running of day-to-day family life but also to the broader social and political aspects of food preparation and consumption which existed within the enclosed world of the domestic compound.

Bibliography: In addition to works cited in the article, the following items have been selected which contain data more closely related to kitchen technology than to cooking as such: R. J. Forbes, Food and drink, in A history of technology, ed. C. Singer et alii, Oxford 1957, ii, 103-45; idem, Chemical, culinary and cosmetic arts, in ibid., i, 270-85; J. Needham, Science and civilisation in China, Cambridge 1980, vi/4, 1-210; M. M. Ahsan, Social life under the Abbasids, London 1979, 76-164; Margaret Arnot (ed.), Gastronomy: the anthropology of food and food habits, The Hague 1975; D. Waines, Prolegomena to the study of cooking in Abbasid times, in School of Abbasid Studies, Occasional Papers, no. 1, St. Andrews University 1986, 30-9. (D. Waines)

2. In Ottoman Turkey. In Ottoman society, matbaakhir, in vernacular Turkish mutfak, the kitchen, had a central importance not only because the members of the ruling elite had to feed their large retinues but also because, as a social institution, it served to establish and symbolise patrimonial bonds in society. Feeding people gave rise to a variety of formal organisations related to the Sultan’s palace, to the elite and to the charitable institutions.

work involved in the procurement of provisions and the preparation and distribution of food within the Palace was under the responsibility of the kilerdji-bashi, also known as sar-kilari-i khasia, or the Head of the Imperial Larder. He was the chief of the third of the Imperial Chambers which were in direct contact with the Sultan. The staff under the kilerdji-bashi grew considerably over the course of time, from 20 in the early 16th century to 134 in 1090/1679 (Uzunçarşı, 315). The number of cooks in the ten Imperial Kitchens also increased considerably, as follows:

The cooks, ashdjisi or tábbaḫkısı, were organised in an odjak (corps), which was divided into bołaks, in the same way as other military corps at the Porte. The corps was headed by the sar-tábbaḫkısı-i khasia, also known as baş-ı ashdjiğ-i-başı with the rank of ashdjiğ. As in other corps, the ashdjisi was assisted by a kdtib, or the Head of the Imperial Chambers which were in direct contact with the Sultan. He was the chief of the third of the Imperial Chambers which were in direct contact with the Sultan. The staff under the kilerdji-bashi grew considerably over the course of time, from 20 in the early 16th century to 134 in 1090/1679 (Uzunçarşı, 315). The Sultan’s cooks competed to please the Sultan by preparing special dishes of their own cooking. The Sultan showed his pleasure by giving a reward (inşâm) (records in Belğeler, ix, 300, 305). Thus the Ottoman Palace was considered as a centre where Ottoman Turkish cooking excelled and where creative chefs were trained (see A. Muhtar, Ay-er). Detailed records on the ingredients used are to be found in the kitchen expenditure books (see the registers called Muhasebesi i kilerdjiğ-i khasia published by O. L. Barkan, Belğeler, ix, and the Bayekkâlet Archives, Istanbul, K. Kepeci

tasmifi, Mattabakh-i Âmira muhasıbe defterleri; for Ottoman cookery in the mid-17th century, see Seyyid Mehmed, Sobhet-nâme, Topkapı Sarayı Library, Hazine K. 1425 and 1418). Provisional palaces were to be supplied regularly to the imperial kitchens under the supervision of a mattabakh emini, who organised their delivery. Also responsible for book keeping and accounts, he was assisted by a kâtib-i khasi, two kâtibs (scribes) and a larder attendant (kilerdji). A bureaucrat of the rank of kilerdji was nevertheless a dependant of the kilerdji-bashi (for the functions of the emini, see, e.g. Muhasebe defteri, BA, K. Kepeci no. 7921). Provisional palaces were supplied either from the market or as sülüsye or odjogli (see MUKATA[N] regularly procured from the resources under the control of the finance department. The tremendous amount of meat consumed at the imperial palaces give rise to a vast organisation under a kásába-bashi, who was financially dependent on the mattabakh emini. For the kitchens of the Topkapı Palace alone, the annual consumption of lamb was about 1,270 tons, costing 12 million akças. The other three palaces consumed 458 tons annually (IFM, xvii, 295-8). The kitchen expenditures of the temporary embassies were met by the Porte. In 1079/1669, e.g., the Russians received provisions worth 347,000 akças.

The organisation of the kitchen in the houses of the elite was a miniature replica of the Sultan’s one. It included two separate kitchens, one for the lord and the other for the servants. Both had master cooks (usta) and apprentices or assistants (şâfiyân). In 1082/1671 a vizier-governor, 'Umar (Omer) Paşa’s kitchen personnel (see M. Kunt, 15-22) consisted of one mattabakh emini, also known as wakil-khârî, six cooks, six pantriesmen (kilârî), two shopping boys and one butcher. Expenditure for provisions through the wakil-khârî amounted to about 8,600 gold pieces or 16.7% of the Paşa’s total expenditure. Members of the élite spent an unusual amount of money for kitchen expenses, not only because they had large retinues to feed (in 'Umar Paşa’s case, 220 persons) but also because they were expected “to keep the house open” to visitors. In the houses of the élite and well-to-do, the mattabakh and the furun (oven) were to be found often as separate constructions in the courtyard. c. The 'Imâret and Zâviyes. The 'Imârets functioned as an extensive network of social aid in Ottoman society, particularly in the cities. Numerous
'imaret provided food for thousands of people who did not have an independent source of income. Charity, materialised through the institution of 'imaret, was a key component of a more general system of public soup kitchens, which, in the wake of the religious and political turmoil caused by the Ottoman expansion and settlement, when hundreds of 'züveyes and similar institutions were established throughout the empire; in 936/1530 there were 626 'züveyes and 145 'imarets, 1 kolonizer-kâhi and 1 meceler-kâhi in the province of Anatolia (western Asia Minor).

As a rule, a 'züvey encompassed two sections, a tekke (convent), where the dervishes performed their religious rites, and a mabâkh or ikâ-roi, where food was prepared and distributed to the dervishes, to travellers and to the needy. The mabâkh was considered so important that in the early eleventh century it was elevated to a single religious structure, and took up by far the largest share of the 'züvey's revenue (see Faroqui, Der Bektashi-Orden, 48-75). In the urban 'züveyes, the residents of the quarter where the 'züvey was built set up additional ikâfs to supplement the salaries of the servants or to pay for the preparation and distribution of food on holy days (sandals). Thus the 'züvey, like the mosque of the quarter, constituted a common religious centre as well as a charitable institution (see Istanbul vakiflar, ed. Ayverdi and Barkan) in the mahalla (q.v.).

For better service, a tawzî-i-nâmâ, or regulation for distribution (ed. A. S. Unver, Fâthî aşkânîn tezî-nâmîsî, Istanbul 1953) was drawn in 952/1545. The food, when left over, was further distributed among the poor in the neighbourhood, with widows and orphans getting priority. Those benefiting from an 'imaret are listed, in order, as the fakûn (destitute) coming first, and then masûfîn (those unable to make a livelihood) and musâfirîn (travellers). Sometimes poor orphans (yatîn) and school children are also mentioned in the 'imaret deeds among the beneficiaries. Der-"vîzî 'züveyes are included in the category of establishments which offered food and shelter to travellers and the needy. In the documents granting arable land as mulki-'âzkâf to the 'shâykh of a 'züveye, it is always stipulated that his primary duty is to provide food and shelter to travellers (see Vakıflar Dergisi, iii, 304-53). In the countryside, the 'züveye was thought indispensable for people travelling and a factor promoting settlement and prosperity. Anyway, helping travellers was included among the zakât [q.v.] duties and the performance of this duty in the name of the Sultan was given to the care of a dervish community, as an old Islamic tradition. The 'züveyes of the aâhîs [q.v.] were particularly active during the first period of Ottoman expansion and settlement, when hundreds of 'züveyes and similar institutions were established throughout the empire; in 936/1530 there were 626 'züveyes and 145 'imarets, 1 kolonizer-kâhi and 1 meceler-kâhi in the province of Anatolia (western Asia Minor).
MATBAKH 813

i, Turkish tr. A. Temir, Istanbul 1954, 306-9. See also Dhabihallah Sağaf, Gidhshumdri wa-djashnhd-yi ghi ... fluctuations in prices); the livestock would be fattened under the care of the cooks; a kitchen-garden was also

established to provide a continual supply of fresh vegetables. Livestock was slaughtered outside the city or camp by a river or tank, and the meat washed and sent to the kitchen in sealed sacks; within the kitchen it would again be washed in selected water taken from sealed vessels before being cooked. During the cooking processes, in which every dish would be under the supervision of one of the sub-bakāwals, awnings would be spread and lookers-on carefully kept away; the finished dishes, after being tasted by the cooks and the bakāwals, would be served in utensils of gold or silver, tinned copper or earthenware, tasted by the mīr bakāwāl, tied up in cloths and sealed, with a note of their contents, before being sent to the table; as an additional precaution a storekeeper would send also a list of the vessels used, so that none of the dishes might be substituted by an unauthorised one, and the used vessels had to be checked against the list when they were returned. As the food was carried from the kitchen by the bakāwals, cooks and others, guarded by mace bearers, a similar procession would be sent from the bakery, the ābār-khāna, and the mēwā-khāna, all dishes again sealed by a bakāwāl. Some dishes from the Imperial table might be sent, as a mark of special favour, to the queens and princesses; but of course the kitchen was kept busy the whole time, apart from the meals required for the emperor’s table, in providing meals for the zamāna.

As remarked above, s.v. Ganga, the water of the Ganges had a special reputation for purity, and here perhaps pre-Mughal usage is perpetuated in that Muhammad b. Tughluk is known to have used special couriers to bring Ganges water to his court; Akbar while at Agra or Fatehpur Sikri is said to have obtained Ganges water from Suron (miscalled Sarun in Blochmann’s tr. of Akbar, a’un 22), a town of some antiquity now no longer on the main channel of the Ganges, and while in Lāhowr from Hardwār. His practice was followed by later Mughal rulers. This was used for drinking water; but even water for cooking purposes had a small amount of Ganges water mixed with it. Trustworthy persons drew the water and despatched it to court in sealed jars. Drinking water was at first cooled in sealed containers stirred in a vessel containing a solution of saltpetre, although after the court moved to the Pandjab, ice was regularly used, brought from the Pandjab hills by land or water. For all these arrangements the ābār-khāna was responsible, and also for the provision of shrabat when required; indeed, in the reign of Džahāngīr the ābār-khāna was known as the shrabat-khāna. On the march or in camp, drinking water was cooled by being carried in a tinned flask covered with a cloth wrapping which was kept constantly moist, so that the contents were cooled by evaporation from the surface, as in the modern army water-bottle (the evidence of Mughal paintings shows a simpler method, still in use): the water is kept in a large earthenware vessel (suraḥ), only lightly glazed or unglazed, mounted on a simple stand and placed so as to catch any breeze.

The mēwā-khāna received much attention from the Mughal emperors. Bābur, in a touching passage in the Tāzuk, recalls the delights of the grapes and melons which had been brought as presents from India; but such luxuries were later regularly imported after the conquest of Kābul, Kandahār and Kashmīr, and Akbar settled horticulturists from ‘Irān and Tārān’ for the cultivation of fruit trees in India. Abu ‘l-Fadl, ā’in-i Akbari, ā’in 28, gives a list of some two dozen imported fruits and nuts, three dozen native Indian sweet fruits, and a score of sour and sub-acid fruits. A special ‘fruit’ described in this section is the pān, a heart-shaped green leaf smeared with lime and catechu, to which is added slices or granules of betel-nut with aromatic spices, sometimes camphor, musk, or costly perfumes, and rolled into a bōrī, which may then be finished with silver or even gold leaf. A pān was often presented to a courtier as a mark of royal favour, and Mughal brass pandāns, with compartments to hold the leaves, nuts and other requisites, were also presented as gifts.

Abu ‘l-Fadl’s account shows further what kinds of dishes were prepared for the Imperial table, and he gives thirty specimen receipts—or rather lists of ingredients, since there is no information about the cooking processes involved. These are divided into three categories: bēg-yātī (meatless), ‘commonly called sufyaṇa’; gōlij hi-birdānd, meat with rice; and abāzīr, spiced dishes. The categories, however, do not seem to be mutually exclusive. There is already ample evidence for the Indianisation of the Mughal fare, in both the ingredients (including cardamoms, cinnamon, saffron, ample fresh ginger root, asafoetida, turmeric and others among the spices; chilies are conspicuously absent, and sumāk, a favourite Persian condiment, appears only once) and the nomenclature (dāl, lentilts; sāg, a spinach dish; čapāšt among the breads; kēhīrī among the rice dishes). Abu ‘l-Fadl’s list of current market prices for common commodities (ā’in 27) refers to many by Indian names (e.g. mūng and mōth among the lentils) and includes such Indian favourites as mangoes-in-oil and lemons-in-oil, among the pickles.

The large number of meatless dishes calls for comment. Akbar declared a number of sufyaṇa days in which he ate no meat, including Fridays, Sundays (because, according to Džahāngīr, it was the day of his birth), the first day of each solar month, and throughout the month of Aḵān and at least part of Farwārdīn, and on many other days detailed by Abu ‘l-Fadl; he increased the number of sufyaṇa days each year, and on these days no animals were permitted to be slaughtered. Džahāngīr, whose Tāzuk shows him to have been a connoisseur of good food, ate sufyaṇa meals on Sundays in his father’s memory, and on Thursdays to commemorate his own accession.

The kitchen department had also obviously to provide for the wine and other intoxicants used in the court, for although the official chroniclers are too freely, to judge by the fate of Akbar’s sons Murād and Dāniyāl, and many others!)

Since the ingredients (including cardamoms, cinnamon, saffron, ample fresh ginger root, asafoetida, turmeric and others among the spices; chilies are conspicuously absent, and sumāk, a favourite Persian condiment, appears only once) and the nomenclature (dāl, lentilts; sāg, a spinach dish; čapāšt among the breads; kēhīrī among the rice dishes). The kitchen department had also obviously to provide for the wine and other intoxicants used in the court, for although the official chroniclers are too freely, to judge by the fate of Akbar’s sons Murād and Dāniyāl, and many others!

A subordinate kitchen department, not part of the household, existed to provide food in the langar-khāna, soup-kitchen, established as a charity among many of the royal courts to provide simple food for the poor.

Bibliography: The most complete information is to be found in Abu ‘l-Fadl’s Aḏālī, ā’in-i Akbari, i, ā’in 22-8. Sporadic information in Tāzuk-i Bābur, Gubaldan Begam, Humayun-nāma; Kḥān- damīr, Kāṁūn-i Humayūnī, Tāzuk-i Džahāngīr. Occasional light is thrown by the accounts of European travellers, especially Manucci, Storia do Mogor; Monserrate, Mongolicae legationis commentarii, Eng. tr. J. S. MATERIALISTS [see DAHRIYYA, MADDIYYA].

MATGHARA, the name of a Berber tribe belonging to the great family of the Butr [q.v.]; they were related to the Zanāta and brethren of the Banū Fatin. Like the other tribes belonging to this group, the Matghara originally came from Tripolitania; the most eastern members of the Banū Fatin, the Matghara of the Central Atlas do not seem to have played any part in politics; but they nevertheless retained their independence. From the 11th/17th century, they seem to have been supplanted on their territory by invaders from the south. As to the Matghara of the shore, settled in the region of Nadrūma, their alliance with the Kumiya gained them considerable political importance, when the latter became supporters of the Almohads. It was at this period that they built the fortress of Tawunt. They then rallied to the Marinids [q.v.] but this brought upon them the wrath of the ruler of Tlemcen, the celebrated Yaghmurās, who finally crushed them.

Ibn Hazm, Djamharat ansāb al-'Arab, ed. Lévi-Provençal, 496, and Ibn Khaldūn use the form Madghara instead of Matghara; in Moroccan texts of late date we also find Madghara.

MATHAL [A., pl. mathalū] proverb, popular saying, derives—similarly to Aram. maṭḥa, Hebr. madghara, and Ethiop. mesē, mesāt—from the common Semitic root for “sameness, equality, likeness, equivalent” (cf. Akkad. msqal “equality” mèsqal “half”). In Arabic, to create a proverb is fa-arsala(th), or dja(sal)th maṭṭal, fa-larabah(t) bihi l-mathal; to become proverbial is dušbah bihi l-mathal, mathalū yadrubu fa-djababah(t), or djanā’gara l-mathal, or, simply, fa-sara maṭṭal.

Bibliography

The Arabic philologists have since Abū ‘Ubayd (d.224/838) repeatedly defined the concept of mathal.
They have discerned and set forth its three essential characteristics: comparison, sc. the metaphorical way of expression (taṣḥīḥ); brevity (ṭāqāz al-lafs); and familiarity (ṣābīr). They have established (a) that amthāl are based on experience and therefore contain practical wisdom, e.g., guidance (kīmās); (b) that by their use facts can be stated pointedly and intelligibly in an indirect way (kinnāyā); and (c) that by making use of amthāl it becomes possible to communicate matters that it would be difficult to communicate in a more straightforward way. This quality of the mathāl is owing to the fact that it can be used individually to represent all, even only remotely, analogous cases and can always remain unchanged in the process, even though the origin of the mathāl may long be forgotten. Abū ʿUbayd stresses the fact that the mathāl “accompanies” the discourse; in doing so he exactly defines the etymological meaning of proverb, nazzūqa in Greek (cf. also the more recent ṣayf al-ḥālāq), and in the Latin adagio, adagium as well as in the later proverbia. Al-Zamakhshāri (d. 538/1144) correctly remarks, that—corresponding to its true etymological meaning—ṣirāf should be considered to be the basic meaning of mathāl, cf. R. Sellheim, Die klassisch-arabischen Sprichwörtersammlungen, insbesondere die des Abū ʿUbayd, Ph.D. thesis, Univ. of Frankfurt am Main 1953, The Hague 1954, 8-20; idem, Arabic, revised and enlarged edition, al-Amthāl al-arabiyah al-kadima, tr. R. Sellheim, Beirut 1971 (repr. 1979), or A. Abd al-Tawwab, Beirut 1391/1971 (repr. in „Oriental wisdom, six essays of the sapiental traditions of the Arabs”, and its pre-Islamic times were very much alive in the centres of urban civilisation and much in demand at court and in various offices. Whatever in them ran counter to Islamic notions, laws and bans, was excused as having happened in the Dāhiliyya and as being worth preserving. In the struggle for survival under desert conditions, solidarity at any price among tribesmen is insisted upon: wāf al-ʿamthāl min al-mashaf “as your brother whether he is right or wrong.” (Abū ʿUbayd [see below, iii, 1], no. 397: 519, further references here, as for all the following quotations); the father sets an example for the son: marʾan wa-l-khadramu wa-mā zalama “who does as his father does, cannot be wrong—whatever be the merits of the deed” (ibid., no. 408, 833), and the daughter admires him and his exploits unreservedly: kalīb faṣīd bi-abīhā ma-ṭaṣbih (ibid., no. 402). In the permanent search for new pastures for his never-satisfied livestock, the Bedouin must necessarily be irked when he stumbles on pasturages without having his camel with him: ṣubḥān wa-l-ṭārīm “fresh herbage and no camel” (ibid., no. 581); of course, he knows how to appreciate the quality of the fodder, so he measures a normal pasture with the ʿaʾdān plant, which is optimal for camels: marʾan wa-l-kaʿa ‘l-ʿaʾdān (ibid., no. 370). Figurative and metaphoric speech has with great tenacity held its ground among the Semites and especially among the Arabs, and plays an important part even in the higher forms of literature. To the Bedouin, illustrations taken from the animal world around him most easily come to mind. He knows the habits and the reactions of wild animals from his own lifelong experience and observation: ma yajdumu ʿayna ʿl-ʿardat wa-l-ʿamān “what could bring a mountain goat and an ostrich together?” (ibid., no. 898), if two things are incomparable, for the goat lives among the rocks and the ostrich on the desert plain! Allusions to human beings are expressly added: innā huwa ʿl-ṣināʿa min ḍabbīn “he is trickier than a hunted lizard” (ibid., no. 1229; cf. no. 597), or ʿayna kalan maḥīk kušaʿya “a kite-fire is not like a ʿaṭāʾ-ṣibyan” (ibid., no. 993), or al-ṣādīr wa-sāʿiš li-ṭāʿūsh “the wolf waylays the gazelle” (ibid., no. 180), or, expressed in the earthy Bedouin style: la-ḥabīla man bālat ʿl-ṣayāt “be more watchful, or shining, or sharp-eyed than a raven!” (ibid., no. 319), the comparison involving a comparative (cf. below, ii, 4) as a figure of speech is widely used (ʿaṣrī min ṣaḥīh) “sleepier than a c奇特” (ibid., no. 1215 [see FAHĐ]), or innahu ʿl-ṣaḥīḥūr, ʿaṣār, ʿaṣār min ḍarrūhū “more: watchful, or shining, or sharp-eyed than a raven!” (ibid., no. 1210ff); cf. T. Fahd, Psychologie animale et comportement humain dans les proverbes arabes, Revue de Synthèse, iii série, liii-lixiv (1971), 5-43; bx-lxvi (1972), 43-63; lxxv-lxxvii (1974), 233-56; xcii (1978), 307-56.

(a) Some such amthāl about animals occur in connection with a fable. In these, different kinds of animals customarily are assigned well-defined parts: the hyena (dhabū), e.g., appears as stupid (ibid., nos. 77-80), and the lizard (dabb) as clever (ibid., nos. 296, 597, 1229); cf. C. Brockelmann, Fabel und Tiermärchen in der älteren arabischen Literatur, in Islamica, ii (1926), 96-128 (cf. below, i, 1, b); Gholam-Ali Karimi, Le conte animalier dans la littérature arabe avant la traduction de Kalila wa Dimna, in BEU: OR., xxviii (1975), 51-6; M. Ullmann, Das Gespräch mit dem Wolf, Munich 1981 (= SB Bayer. Ak., 1981, 2).
(b) Much more numerous than these fables with animals for characters are the stories of the type of the *akhir* of the *ayyám al-‘Arab,* which are rendered with preference according to al-Mufaddal al-Dabbi or Ibn al-Kalbi; cf. the lists of *ayyám al-‘Arab* in al-Fāghrī (see below, iii, 4), no. 442 (360), and al-Mavdānī (see below, iii, 12), ch. xxix. The "heroes" in these stories are sometimes known from tradition or genealogy, as e.g. al-Basūs [q. e.], whose she-camel triggered a forty years’ war between the Banū Bakt b. Wā’il [q. e.] and their kinsmen, the Banū Taghlīb b. Wā’il (ibid., no. 1260), or al-Mundhūrī, or al-Nu’mān b. al-Mundhūrī, the prince of the Lakhdīmīs, who had the innocuous poet Ḥibīb b. al-‘Arabī [q. e.] killed in order not to break an oath (ibid., nos. 1048, 1150), or the nameless poor butcher dealer, who was violated by a ruffian after he had caused her to close tightly the necks of two butter-filled skins with both her hands at the same time (ibid., no. 1278). Many of these mostly short stories may have originated in an actual happening. Time and place however remain, as a rule, undefined. Their etiological character is obvious: the storyteller is interested in the question of who used the saying first, or of how it came to be coined at all, that is, in the *awā’il [q. e.]* problem. The information which they contain can be exploited to answer questions concerning names and genealogies, but they are not historical, at the most anecdotal; cf. esp. the *Kitāb al-Amdahl* of al-Mufaddal al-Dabbi (see below, iii, 1, a; Sellheim, op. cit., 47ff., 75ff., and 27-39, 50-63). Many of them are overgrown with myths, legends, and fairy tales; internationally disseminated themes have thus found their way into them, most likely by way of the Lakhdīmī court at al-Hira as an intermediary: the letter of Uriah (sahīfah al-Mutalammis [q. v.]), the legend of Zenobia, the reward of Sinimmar (cf. Sura XVIII [Lukman], 18), and its original meaning had long been forgotten, as e.g. the proverb of al-Nabīgha al-And., xxxvii [1972], 249-323). It ought in the verse of pre-Islamic times, as e.g. "you cannot pluck grapes from thorns" (sheep, bull) who digs up his own slaughtering knife out of the ground with his hooves, in Greek: ζυγός οὐ πλάκας. Abu ’l-‘Ubayd gives four different versions: ῥακτικα καὶ ταβάθανα ὑποκείμενα τοῦ μῦθου (Abu ’l-‘Ubayd, nos. 106, 107, 110, 113), p. 166). Furthermore *fa-dqadat* “like the one (ostroch) who wanted horns and ended up with cut-off ears” (ibid., no. 796; cf. no. 527 and al-’Askārī [see below, iii, 7], no. 47), a *mathāl* which has equivalents in Greek (camel): ἡ κυρήκυς ἐπιθυμοῦσα κεριῶν καὶ τὰ δωδεκάδεκα, in the Talmud (Sanhedrin, 106a) and in the different versions of Kalīya wa-Dimna (ch. x. 2: ass for camel). Zuhayr b. Abī Sulmā was wont to insert *amthāl* into his verse, and Kābī b. Sā’d b. Ḥagāwī, who already extends into early Islam, was for the same reason called Kāb’ār al-Amthāl. In their majority, these *amthāl* belong to the category of gnomic sayings, as e.g. the *jawāl* verse of Zuhayr: ... *wa-man lā yaqālīm* ‘l-nas *yaslihū* “and whoever does not wrong his fellow-men, will be wronged [by them]!” (Abu ’l-‘Ubayd, in no. 282); cf. A. Bloch, Zur allarakischen Sprachrichtung, in Weststatische Abhandlungen (Festschrift R. Tschudi), ed. F. Meier, Wiesbaden 1954, 181-224.

(d) *Amthāl* of this kind are likely to have been written down already in ancient times as *kikīm* on, e.g., small scraps of leather or parchment (*madqāla*), papyrus, or palm-leaves (sahīfā), bone, wood-tablets, or on stones (see below, iii). In the Kur‘ān, these dicta of ethic content usually are ascribed to the legendary Lukmān [q. e.] (cf. Sura XVIII [Lukmān], 16), and all the more in later literature (cf. Solomon’s Book of Proverbs in the Old Testament!). The paroemiographers have joined to him the no less legendary umpire of the ancient Arabs Akīmā b. ʿAyīs [q. e.] (cf. al-Maṣūrī, x/3-4 [1402/1981], 161-8); small collections of his *amthāl* can be found in books on *adab,* e.g. in the *Kitāb al-Mu‘ammadī* of Abu Ḥātim al-Sijdīstānī (ed. I. Goldzīher, Leiden 1899, 9-18), or, together with *amthāl* of the equally legendary Sāsānīd wa‘zīr Buzurgmīr [q. e., see x̄awwāljan khirād in Suppl.] in the *Kitāb al-‘Ilāmad al-farid* of Ibn ʿAbī Rabbīh (ed. A. Amin et alii, Cairo 1372/1952, iii, 76-80; cf. E. García Gómez, in der Al-ānd., xxvii [1972], 249-523). It ought to be stressed that among the sayings of Akīmā can be found Matt. vii, 16, innaka lā tagāni min ‘l-‘tashqīk *‘l-adhab* ‘you cannot pluck grapes from thorns’ (Abu ’l-‘Ubayd, nos. 949, 970; cf. Ibn Ḥāshim, 124f.). This and related material, e.g. "beam in thine own eye" (Matt. vii, 3) quoted by
Abū Ubayd (no. 152; cf. below, ii, 6), seems to have been in circulation as amthdl al-huk amd*. In the ... 65, 146, 560, 636, 954, 1058, 1068). Some examples: asmacu

but I see no flour” (Abū Ubayd, no. 1057), in English “much talk and little wool”, or inna 7-bulaghdth a... regard
to me like nits, whilst there is in his own eyes some-
thing like ajar” (ibid., ii, 254, 17/ch. xxviii, no. 78),

(5) It can be said in a very general way that parallel-
isms in the Arabic proverbs in other languages
and related cultures can be shown the more frequently
to occur the younger these are, the question whether
any particular mathal has in fact been newly coined,
or borrowed, or modelled on an existing proverb must be
left unanswered in most cases; for, as concerns the
social surroundings against the background of which
the amthal must be observed, there are scarcely any
differences any more (cf. above, ii, 1, c). In the case
of similes and comparisons which spontaneously offer
themselves to the mind, foreign models must not
always be sought, much as they may obtrude on our
attention, e.g. man hafara mughawawa = uka’a fisāh
(ibid., no. 872; al-Tabari, ii, 1142), in English “hoist
with one’s own petard”, a proverb which can already
be found in Ps. vii, 16 and Ivī, 7, as well in Prov.
xxxi, 6 and al-Fd’khir, 94 (modern). To this category
belong, even if not expressly identified as
amthdl muwallada,

(2) There is a high degree of likelihood that the well-
known Latin saying re ad triarios redit, redit, or venit,
that is, in order to arrange a completely bungled
affair, is at the bottom of the mathal: šara ‘l-amr ilā ‘l-
naza’at (ibid., no. 438). The question is more difficult
to answer in the case of a mathal like the following one:
man stars ‘l-ili ‘l-zalam a = ‘he who makes the wolf a
shepherd, is in the wrong” (ibid., no. 759). A saying
familiar to the Greeks as of old: λόγος ποντρίου.
The Romans know the simile of the hawk who is entrusted
to answer in the case of a...

(6) In al-Mudānī’s collection of amthal can be
found anonymous sayings from the New Testament;
among these is a saying, familiar to the Gentiles as of old,
that is, “if you talk of the wolf, he

(3) An example of an internationally
known Latin saying is not far off, is probably present in the “new” say-
ings found anonymous from the New Testament; e.g.,

(4) Amthal in the form of af’al min. Reminiscences of Penelope come to the surface in akhrak min nātikatīg ha’zlihā “stupider than a woman who con-
tinually undoes her spinning (weaving)” (Hamza [see below iii, 6], no. 204), a simile that certainly has its
source in Kurān, XVI, 92, or of Sisyphus, aima’s
min kalīm “the one who is more covetous than the one who
turns over the rock” (Hamza, no. 431). As a matter of
course, both persons, female and male, from the
pre-Islamic past are designated by their names and
genealogies! How much or how little account can be
taken of this so-called “historical” tradition becomes
still more evident in the following instance: amthal min hadīl Qurūf “fuller of artifices than the stories
of Khūrāfā” (Hamza, no. 641). Here ēghara (‘fairy
tale” (actually “nonsense”, cf. EP, iii, 369 b, s.v. HIKĀYA), is personified, as happens, too, in the
proverbs and sayings of other peoples (cf. Sellheim,
op.cit., 35-8, 59-62). Even the Prophet is reported to
have told his wife the story of Khūrāfā (al-Fd’khīr, no. 280: typical fairy tales)! This group of amthal of the
af’al min type, in which—like in Greek—attributes
from “intelligent” to “stupid”, from “cleansighted” to
“trustworthy”, etc., and names—among them that of the
Owl’s character Ēdūhā [q.v.] (Hamza, no. 125)—pseudo-names, animals, plants, etc. can be
exchanged indiscriminately, has proliferated into our
own times.

(5) Amthal muwallada. The widely Latin say-
ing labūs in fahāla, that is, “if you talk of the wolf, he
is not far off; or, the probably more metaphorical
expression idhā dhaltara ‘l-dhib ‘a ṭa’āfu (al-Mudānī [see below, iii, 12], i, 57/uFreytag, ch. i, no. 436), which
already Abū Ubayd knows in its abstract form
-urlūsh ‘l-dhib ‘a yaktarib; or, urlūsh ‘l-dhib ‘a ṭanīh (Abū
Ubayd, nos. 140f.), in English “speak of an angel,
and you hear his wings”. Of internationally-known
sayings we may list inna li ‘l-hārī ‘alāram (am-
thdl al-Mudānī, i, 57, 21/ch. i, no. 427), just as, e.g., in
the Midrash, in Persian (cf. M. Grūnbaum, op.cit., 43)
and in English “walls have ears”; or idhā kunta sin-
dānī fa ‘shir wa-udhku ‘l-djicttfa ‘l-mu^tarid? fi
-awesdīj (ibid., i, 58, 18/ch. i, no. 465), in English “hammer and anvil”;
or farra mina ‘l-maitar wa-ka’ada tahtā ‘l-mizāq
(‘fleeing the rain he is sitting under the drippings
(from the roof)’ (ibid.), ii, 25, 5/ch.xx, no. 112; just
as in German; cf. R. Jente, German proverbs from the
Orient, in Publs. of the Modern Lang. Assoc. [of America],
xxviii [1933], 17-37), in English “he jumps out of the
frying-pan into the fire”; or al-harakat barakatīm (ibid.,
i, 155, 20/ch. vii, no. 244), in English “bliss is in
action” (Pope) or “action gives satisfaction”
(modern). To this category belong, even if not
explicitly identified as amthal muwallada, e.g. in kutna
kāt2 ‘a kut2 sūrīt fa-awedīj (ibid., i, 49, 15/ch. i, no. 366),
in English “his liar must have a good memory” (just as
in Latin); or ka l-sāhik bayna ‘l-firāshgīyēn (ibid., ii, 64,
7/chxxii, no. 89), in English “between two stools one
sits on the ground” (just as in Latin); or ka-anaku kādān ‘ala ‘l-rafdī (ibid., ii, 74, 18/ch.xxii, no. 197),
in English “to be on tenderhooks” (cf. above, ii, 1, c;
3, b, 4).

(4) Amthal in the form of af’al min. Reminiscences of Penelope come to the surface in akhrak min nātikatīg ha’zlihā “stupider than a woman who con-
with a verse that renders the NT text word by word; cf. I. Goldziher, in ZDMG, xxxi (1877), 765ff.; idem, Mino. Studii, ii, 191; furth. A. Müller, in ZDMG, xxxii (1877), 519ff., 4524. There is Matt. vii, 15, with its generally-known simile of "the wolf in sheep's clothing", in dhi'bas fi maski sagkulat (ibid., i, 192, 23/ch. ix, no. 70). There are several versions of Matt. vii, 16, the "parable of the "grapes picked from thorns"", an older one (ibid., i, 34, 8/ch. i, no. 210 = Abu 'Ubayd, cf. above; cf. ii, 120, 8/ch. xxii, no. 350), and a younger one (ibid., i, 336, 31/ch. xviii, no. 255, according to Ibn Jan. [no. 490], with further variants, one of them in verse — ibid., i, 182, 4/ch. xxiv, no. 367). Matt. xix, 24, with its well-known parable of the "camel and the ear of a needle" (ibid., ii, 113, 23/ch. xii, no. 316) was known already to Muhammad (Kur'an, VII, 40; cf. above). Matt. xxiv, 24—"...the parable of the "straining at gnats and swallowing camels"—is known in a slightly changed form as a mathal: ya kulu 'l-fil yaqulu 'l-fil (ibid., ii, 73, 2/ch. xxii, no. 185; cf. Ibn Hisham, 124f.; cf. above, ii, 3, b). As for wise sayings that can be shown to have parallels in the Old Testament, see Matt. (cf. al-Maydani, Abu '1-Hasan al-Bayhaki, proves a great exception (see below, iii, 14).

(8) At times the paroemiographers make note of the fact that a certain mathal is currently locally, e.g., in Syria (Abu 'Ubayd, no. 1070), or in 'Umayn (Hamza, no. 443), or in Medina (Hamza, nos. 56, 224, 340, 397), or in Mecca (Hamza, no. 115), or in al-Baṣra (al-Maydani, i, 145, 16/ch. vi, no. 149; cf. Abu 'Ubayd, no. 1144; below, iii, 8). It is interesting to learn by way that in Syria in the 3rd/9th century the Greek fileri "says he" was much used by the Arabs (al-Fākhrī, no. 137), a fashionable expression then, similar to today's American "O.K." of worldwide acceptance. Already Abu 'Ubayd (no. 1349) has recorded: ʻayr ʻl-barnaṣ—or ʻl-barnaṣa—hawa (cf. al-Djawālī, al-Mu'arrab, Cairo 1361/1942, 45), in other words, the Aramaic barāṣa ʻbn Sōn (cf. al-Iṣāṣī, no. 239); one finds this expression recorded: ʻayr ʻl-barnaṣa—or ʻl-barnaṣa—hawa (cf. al-Dhubaib, [cf. below, ii, 135]; in its closest parallel, one may cite ʻl-barnaṣa ʻuwa-lā 'l-kīl ʻl-hayḍaha (a free woman starves herself rather than eats for the price [she is paid for] her breasts') (ibid., no. 569), i.e., she prefers starving to hiring herself out as a wet-nurse, which becomes distorted into the quite meaningless ʻl-kīl ʻl-hayḍaha "and does not eat her breasts". From a misunderstanding of a verse of al-Farazdak in which the way the "free woman" is depicted (ibid., no. 1127; Yākūn and Lane, s.v.) is mentioned, this expression became typical of taking the wrong way (cf. al-Fākhrī, no. 496; Hamza, no. 423).

(9) The few examples adduced here show that for the majority of the amthal a certain formative process can be shown at work, and that includes the inner form—the shaping of the thoughts—and an outer form which exists in the shape of linguistic, stylistic, and metrical peculiarities. Both these phenomena cannot be pursued here (cf. al-Dhubaib, Study [cf. below, iii, 12]; Ch. Pellat, Sur la formation de quelques expressions proverbiales en arabe, in Arabica, xxxii [1976], 1-12). Well-known, appreciated and much-quoted verses, so-called abya size s'ara, were compiled in special collections, e.g., Hamza al-İsfahani's_Kisāb amthal al-İsfahani (an bayda al-dahr) (Brockelmann, i, 132; Sezgin, viii, 20f.; a Cairo edition is under way). Poets like Şāhīb b. Šāhīb al-Ďuddūs or Abu '1-Atāyah have also made use of many amthal in their verse (cf. above, ii, 1, c); the figurative sayings which can be found in al-Mutanabbi's_divān, were, e.g., already extracted and arranged in the poet's own century by al-Ďalālī (d. 1385/995). Such abya size s'ara and countless amthal are spread far and wide across the whole body of Arab literature. This is amply proved when it is noted that literature from al-Ďalālī to al-Ďabīṣ (cf. Mahmūd Ghānīyām, in

nightly storm, which frightened the Baghdādis out of their wits and provoked the caliph al-Mahdī and his retinue to do such penance (al-Maydānī, i, 176/ch. vii, no. 140), is not to be pursued here (cf. al-Dhubaib, [cf. above, ii, 135]; in its closest parallel, one may cite ʻl-barnaṣa ʻuwa-lā 'l-kīl ʻl-hayḍaha (a free woman starves herself rather than eats for the price [she is paid for] her breasts') (ibid., no. 569); the "free woman" is depicted in the way of al-Farazdak (ibid., no. 1127; Yākūn and Lane, s.v.) is mentioned, this expression became typical of taking the wrong way (cf. al-Fākhrī, no. 496; Hamza, no. 423).
In no other branch of classical Arabic literature—cause us to look at later assertions, as e. g. in the Fihrist of Ibn al-Nadim (d. 380/990), that well-known early philologists, as for instance Abu Amr b. al-‘Ali, Yūnus b. Ḥabbā, Abu Zayd al-Anṣārī or al-Asma’ī also wrote books of amthāl, with a wary eye. Information of this kind is all the more doubiful, as also later authorities on the matter, as, e. g. al-‘Irākī (Pseudo-al-Wakidi; see below, iii, 11), expressly speak of a book “ascribed” (al-mansīb) to him in the case of the Kitab al-Amthāl of al-Asma’ī (see below, iii, 1, b; 2, 5, a). Amthāl become available in book form—and moreover in the original draft of their author himself—only in the Kitab al-Amthāl of Abu ‘Ubayd al-‘Irākī (d. 474/1083). It is needed for his plentiful materials—in so far as he has not gathered them himself (cf. above, ii, 3, a)—to the tradition, chiefly according to his teachers, among others, to the above-named philologists. This clearly results from instances where he writes “I do not know from whom I have heard the maθal (nos. 349, 1088), or “I have heard it from somebody other than Abu ‘Ubayda, I think, from Ibn al-Kalbi” (no. 59), or similarly (nos. 1228 and 134, 253, 492, 744). His quotations in the name of al-Mufaddal which he uses to introduce in an impersonal way, e. g. hukma an..., ruzzya an..., mā balaghantu anku..., or correspondingly, can only partly be found in the Kitab al-Amthāl of the author in the version of al-Ṭūsī (see above); of his quotations in the name of Mu‘arridj, whom he always introduces with kalā— as he also does with the other philologists (see above)—none at all can be exemplified in the Kitab al-Amthāl of that authority in the version of al-Yazidī (see above). The kutub al-hikma quoted by Abu ‘Ubayd once (no. 663; cf. nos. 152, 250 and 48, 250, 271, 658; above, ii, 1, d) probably stand for nothing but loose leaves (kitāb [q. v.] on which wise sayings were written, for the purpose, e. g., of being stuck up on the wall of a room. His contemporary al-Dhahīrī (q. v.) knows his haqīqa allāh that with sayings only of the caliph al-Manṣūr which was familiar to the scribes of Baghdaḍ (al-Ṭaṣābur, Cairo 1368/1949, iii, 367). Ibn al-

In the air” (al-Hamadhānī, Rasā’il, Cairo 1368/1949, iii, 367). Ibn al-‘Aṭīf, Haifa, vi (1985), 165-87; U. Marzolph, in OC, ibis [1985], 121-63 and al-Thā’labī (regarding al-Suyūṭī and Bāḥā’ al-Dīn al-Maṣūr) which was familiar to the scribes of Baghdaḍ (al-Baydāwī, Cairo 1368/1949, iii, 367). Ibn al-‘Aṭīf, Haifa, vi (1985), 165-87; U. Marzolph, in OC, ibis [1985], 121-63 and al-Thā’labī (regarding al-Suyūṭī and Bāḥā’ al-Dīn al- Maṣūr) which was familiar to the scribes of Baghdaḍ (al-Baydāwī, Cairo 1368/1949, iii, 367). Ibn al-
Mu'tazz's collection exists in the form of his Kitāb al-Amthdl, ed. I. Kratchkovsky, in Le Monde Oriental, xviii (1924), 56-121. Wise usage of this kind was also called al-ţıkār, not only by Abū ʿUbayd (nos. 153, 794, 795), and philological explanations, together with verses commenting on the amthdl in the stricter sense of the word muḥāwarāt, conveys in its loose, unsystematic form the atmosphere of spontaneous lecturing and conversation. In the madżālis of this generation, the roots of the pseudepigraphic collections of the time of the Umayyads must be looked for, e.g., Abī b. Ṣahrya al-Djurhum, ʿĪlākā b. Kurhum (Karīm) al-Kīlābī, Suhār b. al-ʿAbbās (al-ʿAyāsh) as-Ṣāḥibī and the somewhat younger al-Shārī b. al-Ḳutāmī; cf. Orens, ix (1956), 135; below, iii, 12 and 14; to the early philologists, above, iii (rectify Sezgin, i, 260ff. and xiv, 7, etc.).

(2) A small fragment containing 7 amthdl of the qa‘al min type, allegedly by Muhammad b. Ḥabīb (d. 245/860) of whom—as the literature about proverbs and bibliographical literature maintains—a Kitāb al-Amthdl al-sāli‘a al-ʿal ‘el min as is said to be containing 390 amthdl, is known; ed. Muhammad Ḥamidallah, in MMFT, Baghdād, iv (1956), 44 f. (cf. R. ʿṢeṣen, Nawdul al-maǧdlis, Beirut 1975, i, 68, no. 63). According to Ḥamza (see iii, 6), he owes his materials chiefly to the collection of Abū ʿUbayd and to the “books” (notes taken down in lectures, cf. iii, 5, a) of al-ʿAṣmā‘ī and al-Līḥyānī. For two further “quotations”, see Abī ʿI-lā‘ar ʿa-l-Ma‘ārrī, al-Fustā wu l-ʿayyāt, Cairo 1556/1938, 61, and al-Khālīfī, al-ʿalā‘ al-ghalīb, Cairo 1325/1907, 170.

(3) Aikrma Abī ʿImrān al-Dabbī (d. 250/864), Kitāb al-Amthdl, ed. Ramādān Abī al-Tawwāb, Damascus (1394/1974). 111 amthdl, chiefly muḥāwarāt, with many verses of reference, no system; quotations in the name of al-Muṣaddāl in only one instance in the text of al-Tūsī; judging from the introduction, the booklet was conceived as such and not dictated.

(4) Al-Muṣaddāl [II] b. Salama v. Ṣāḥīb al-Dabbī (d. after 290/909), al-Fāṭhir, ed. C. A. Storey, Leiden 1915 (here quoted according to nos.; repr. Cairo 1942/1982); ed. Abī al-Rahmān b. al-Nūrī b. al-Ḥasan, Tunis 1353/1934 (?); ed. Abī al-ʿĀlī al-Ṭāhwāwī and Muhammad ʿAlī al-Naḍdār, Cairo 1380/1960 (nos. identical, exception Storey 442 = Nadjarī, 360: 361-441 = 442; 443 = 443; cf. Storey 442 = 1-123; Gābiyy al-arab fi ma‘ānti ma ʿaydiṭi al-sāli‘a as-lum as-sīmma fi amthdlihim wa muḥāwarātihim min kālam al-ʿArab, in Khams rasāl, Constantinople 1301/1884, 232-63. A total of 521 amthdl, partly muḥāwarāt, mostly circumstantial amthdl stories (cf. above, i, b); quotations in the name of al-Muṣaddāl can, as a rule, be demonstrated in the text of al-Tūsī (cf. no. 123), likewise, the only quotation in the name of Muṣaddāl in the lecture-notes of 263/876. The author was the son of that Salama who glossed the amthdl of Abī ʿUbayd (see above).

(5) Abī Bakr Ibn al-Anbārī (d. 329/940), al-Zāhir fi ma‘ānti kalām al-ḥarṣ, ed. Ḥātim ʿṢāliḥ b. ʿĀdām, ii, Baghdād-Beirut 1399/1979. A total of 896 amthdl, similar to ii, 3, authorities are mentioned; the cited materials can, in part, be found in their works, e.g., in Abī ʿUbayd's G̣hārib al-ḥadīṯ and al-Qāhar al-muṣammāt, and in part they are derived from the oral madżālis-tradition, e.g., the quotations from Abū ʿIkrama. Cf. furthermore Ḥusayn ʿṢāliḥ al-Nāʿūnī, in MMFT, xxxi/3 (1400/1980), 383-97.

(a) The so-called Kitāb A‘fāl min kālṣa of Abī ʿAlī al-Kālī (d. 356/967) represents an example of the oral madżālis tradition, ed. Muhammad al-Fādil Ibn ʿAṣāhrūn, Tunis 1399/1972. A total of 363 amthdl al-sāli‘a al-ʿalā‘ min contained in notes taken in lectures (cf. above), no systematics; quotations, for instance in the name of Muhammad b. Ḥabīb (see iii, 2), diverge.
widely, in parts completely from the parallel tradition (cf. iii, 6 and 12). This fact shows that the oral handing-on of am†hl materials, too, was common practice still in the 4th/10th century, and that it was very variable and loose into the bargain; about particular ones, cf. Sellheim, Ab†`A†f al-Qalı`, in Studien zur Geschichte und Kultur des Vorderen Orient, Festschrift für Bertold Spuler, Leiden 1981, 362-74.

(6) Hamza al-Isfahānī (d. between 350/961 and 360/970) [q. e.], Kitāb `Abd al-M^aml al-`ajāf min or, cf. Durra al-fdkhirafi `l-amthdl al-sd^ira, [c.] Abd al-`A†f b. al-Fadl b. al-Muwashshah, Cairo 1391-219712; supplement, in al-Tha†`al bi Khat′s al-khäs, ch. 3, Cairo 1326/1908, 29-37. The author has enlarged the collection of Muhammad b. Habîb to more than 1,800 am†hyl of the qaf沐 min-type, amongst them more than 500 maw^dala, arranged alphabetically according to the first letter, augmented by 500 more linguistically special features (naawdir. compounds containing ab†, umn, tbn etc., and dual forms); partly circumstantial am†hyl stories; he distinguishes, occasionally, between al-mathal al-kadîm, al-isldmî and al-muwâsaal.

(7) Abu Hîlâl al-`Askarî (d. after 395/1005), Qumhart al-am†hyl, Bombay 1307/1889; edd. ii (printed in the margin of the text of al-Maydâni [see iii, 12]), Cairo 1310/1893; i-ii, ed. Muhammad Abu `l-Fadl Ibrâhîm and `Abd al-M^adjîd Kâtâmis, Cairo 1384/1964 (1389/1693) [quoted here]. Barely 2,000 am†hyl, including approximately 800 am†hyl `alâ `a†f al min, arranged alphabetically according to the first letter. The author proceeds from Hamza's work whom he, being a purist, reproaches with having included too many "new ones" (maw^dadala), and accumulates the materials transmitted from his teachers, and their authorities, in the maqâdisî, the only quotation in the name of Abu `Ikrîma (i, 296) is missing in latter book (see iii, 3); he takes pain to tighten the innumerable philological and "historical" annotations, rejects am†hyl which are linguistically incorrect and now and then distinguishes between alm^hyl al-kadîm and al-muwâsaal or al-mudâda. The am†hyl of his collection are largely "literary" ones and have not too much in common any more with everyday "oral" sayings.

(8) Abu `l-`Hasan `Abî b. al-Fadl al-Mu'ayyadî al-`Tâljâkâni, Risâïl al-`A†f al-am†hyl al-baghâdîsya, ed. L. Massignon, Cairo 1313/1911. The most ancient local collection with more than 600 am†hyl (maw^dâlala), in contrast to ii, 7, topical and not literary, arranged alphabetically according to the first letter, as a rule accompanied by short explanations, in many cases for the proper application of the maqâdisî in question; forerunner of later collections containing am†hyl in dialect; compiled by the author and read during lectures in Baghdad in 421/1030; cf. too `Abd al-Rahmân `Abîd al-Qâfbar Tâlîb, in Sumer, xxxii (1936/1976), 237-338; al-`Abî, above, ii. 9.

(9) Abu `l-Fadl al-Mîkâlî (d. 430/1040) [q. e.], Nasîbî `alâ am†hyl al-am†hyl al-Mâikiîîî, edition in preparation. A small collection (ca. 250 nos.), arranged alphabetically, divided up into sub-chapters, each one beginning with one or more sayings from the Kûr`ân and hadîth (cf. Oiens, xxxi [1988], 353 and xxixi).

(10) Anonymous (5th/11th cent.), Kitâb al-`A†f, Hyderabad 1351/1932. Just under 400 am†hyl; a "medium-sized al-`A†f" (see iii, 7). For no obvious reason, the catalogues, al-Mutâl al-M^amîrî-Osmania, and consequently Brockelman, I, 237, ascribe the book to Zayd b. Rîfâ` (d. ca. 400/1010), while Brockelman, S III, 1195, lists it among the writings of Ibn al-Sîkît (d. 243/857).
Europe already in the 18th and 19th centuries [see A.L.-ZAMAKHSHARI].

(14) Abu '1-Hasan al-Bayhaki (d. 565/1169), Ghurar al-amthdl wa-durar al-akwdl, ed. in part Hussain El-Saghir, Ph.D. thesis, Univ. of Frankfurt/Main 1984 (complete edition in preparation). About 2,900 amthdl, including the "new ones" (mawaddal), in alphabetical order according to the first letter. Al-Maydani’s pupil has retained a high degree of independence in regard to his teacher, clear grouping: matfiah, lugha, fbd, ma‘udna, sabah, dark, hal, hikjya; good philological comments; many of the amthdl are inserted into the context of "world", local and family personal experience by lively stories and reports; a revealing document of its time, esp. as regards Khurá ssín; at some time or other the author quoted pseudepigrapha (cf. El-Saghir, op. cit., 88-9, 97-8, 116-17; iii, 1, b and 12) and, like Hamza and al-‘Askari (see iii, 6 and 7), Persian proverbs. A second work containing amthdl in four volumes and two collections of sayings (?), which he itemises in his autobiography (Yákit, Udabá, v, 212) have not apparently survived; cf. Sellheim, Eine unbekannte Sprichwörteransammlung, in Isl., xxxix (1964), 226-32.

(15) Rafá al-Dín Abu Sa‘íd (Abú ‘Abd Alláh) Muhammad b. ‘Ali al-‘Iráki (d. 561/1166), Nuzhat al-amthdl wa-‘l-madhnd wá-‘l-madhnd (cf. above, ii, 1, b). It is arranged alphabetically according to the first letter. Al-‘Iráki’s pupil has retained a high degree of independence in regard to his teacher, clear grouping: ma‘am, fdb, madd, sabah, ofka, hikjya, wafer, and, often, quite frequently quite long-winded stories dealing with the awdil-problem (awwáb man kášhu) (cf. above, ii, 1, b). It is arranged alphabetically in 29 chapters. The author, a pupil of the well-known philologist Abú Zakaryáyá al-Tibriti (v, q.v.), draws from the ‘Iráki madhílí tradition. Only one manuscript, damaged at the beginning, is known to exist (Gotha [Penzak], no. 1290; cf. Brockelmann, I, 333); an edition is being prepared. Al-‘Iráki’s Kitab al-Wasit fi l-amthdl is mainly only an abridgment of the Nuzha, comprising about a quarter of its volume. Its editor (cf. iii, 11) has erroneously ascribed this "median" collection to Abu ‘1-Hasan al-Wáhidí (d. 468/1076), the teacher of al-Maydání, following in this (?) the defective unicum in a Maghribí hand (Khartoum [Penzak], no. 8729; cf. A. M. Haddad, Abú ‘Abd Alláh al-Maghribí: Mawdúd fi l-Andalus, ed. in part Hussain El-Saghir, Ph.D. thesis, Beirut 1402/1982; a revealing document of its time, esp. as regards Khurásán; at some time or other the author quoted pseudepigrapha (cf. El-Saghir, [Berlin], no. 8729) little can apparently survived; cf. Sellheim, Eine unbekannte Sprichwörteransammlung, in Isl., xxxix (1964), 226-32.

(16) Abu ‘l-Máhásín al-Shaybí (d. 837/1433), Timghál al-amthdl, i-iii, ed. As‘ad Dhibyán, Ph.D. thesis, Lebanon University, Beirut 1402/1982; printed in part as First half of the book Timghál al-amthdl of Jamál al-Din al-Sághi, ed. Muhammad Bahá al-Máqhdí, unpubl. Ph.D. thesis, Punjab Univ. Lahore 1961. The majority of the 441 amthdl in alphabetical order were extracted by the author from the two collections of al-Maydání and al-Zamakhshari; the remainder he owes to literature as, for instance, to the Kitab al-Aghámi, or to the verses of poets; only in a few cases is the source not mentioned; not infrequently, he reproduces stories at length.

Of other collections of this time and of later times (cf. the list in A.W. [Berlin], no. 8729) little can be expected to be forthcoming in regard to the classical amthdl—witness the work of al-Shaybí, or Mušafí b. Ibráhím’s Zubdah al-amthdl of 999/1591 (Khartoum [Penzak], no. 631; one of the 200 amthdl are nos. 339), and Ibráhím Sárkis’ (d. 1302/1885) al-Durrá fi l-yatíma fi ‘l-amthdl al-kádim, Beirut 1288/1871. In any case, the Maghíl al-‘akwíd fi ma‘únî l-amthdl of Muhammad b. ‘Abd al-Rahmán b. Abú ‘l-Baká, hence the grandson of the noted Baghdadí philologist Abú ‘l-Baká al-Uktári (d. 616/1219), deserves the attention of the researcher. Of his work in six volumes, parts are preserved in the author’s autograph of the year 665/1267; he makes use of 30 sources which are conscientiously identified by characters the meaning of which is given in the preface; cf. A. J. Arberry, in JAL, i (1970), 109-12, and in reference to that, Sellheim, in Isl., i (1973), 341ff. New and revealing are the collections of amthdl in dialect form which date from the 7th/13th century onwards:

iv. Modern collections.

In Egypt, the interest in printed Arabic proverbs was aroused towards the end of the 16th century (cf. Sellheim, op. cit., 1-7, 13-20). These literary amthdl survived for generations into the 19th century in readers and exercise-books, especially for the supplementation of Hebrew studies. E. Pocock’s plan of 1761, to edit the whole of al-Maydání’s collection, was only realised by G. W. Freytag in the years 1839-43 (cf. above, iii, 12). Since that time, European learned travellers and linguists have recorded and published Arabic proverbs—mostly in dialect form—in great numbers. They have been succeeded by Oriental collectors, especially after the end of the Second World War. The following deserve to be quoted:

2. In Persian

Persian, despite its elegant literary uses, has always remained a true speech of “the folk”, the language (until very modern times) of an essentially simple, unlettered society based on agriculture and pastoralism, crafts and trading. It is therefore hardly surprising that it should be extremely rich in idioms and proverbial expressions. Most of these are brief and pithy, but some are fairly elaborate in both content and construction. The high-culture literature itself—particularly ethical works and such edifying-enteraining writing as Sa’dī’s Golestān—abounds in proverbial material, and (as, for example, with Shakespeare) it is often virtually impossible to determine if the author himself invented a proverbial story or coined an aphorism which subsequently gained general currency, or whether he merely appropriated anecdotes and saws already in common use. Even such ostensibly remote literature as the ghazals of Hāfez lend themselves, by their often atomistic, line-by-line structure, to easy sententious quotation or divinatory employment.

Overall, at least until affected by a marked modern tendency towards updating, the corpus contains obviously archaic features of vocabulary, grammar and style, most of which are undoubtedly genuine, though some may have been more or less consciously manufactured in an urge to offer authenticity of the “ye olde” type. Part of the material seems to have been rendered from Arabic (probably in the early centuries of Islam); other items have parallels or equivalents in Turkish, and the traffic may not always have been from Persian to the latter language. A considerably body of proverbs is dialectal, with the most generally attractive and appropriate instances being also rendered into more or less standard Persian at some point. Given all these varied factors, as well as the rapid transformation of Iranian society and the decline of traditional education over the last 50 years, the same tendency has arisen as in Western culture for many proverbs no longer to be perfectly understood, accurately cited, or rightly applied. Fortunately, individual scholarly (and even amateur) initiatives have assured their survival, at least in libraries both in Iran and around the world.

While there must inevitably be a certain common humanity to all proverbial literature, generally considered, it is rarely true that any given adage in Persian will exactly match an item in almost unvaried use
across the broad spectrum of Western languages. A good sampling of the uniquely Persian flavour and idiosyncratic reference-frame can be gained from the following works, where it is possible to compare translations, parallels, and originals: R. Levy, *Persia viewed through its proverbs and apologies*, in *BSOS*, iv/3 (1952), 540–9; L. P. Elwell-Sutton, *Persian proverbs*, London 1954; L. Bonelli, *Deti proverbi shi persiani*, Rome 1941; S. Haim, *Amthâl-i Farsi–Inglîsi*, Tehran 1354/1955. As usual, stupidity, incompetence and dishonesty are deprecated, but the terms used extend to such items as donkeys. Islamic religious functionaries, minarets and water-melons; resignation to modest station is enjoined by the consideration that a grand house demands hard work to clear its vast, flat roof of the winter snows that fall on the Iranian high plateau; everything should be in season, like a sheepskin cloak worn for the month of Day (December–January), and not at the sudden arrival of the Persian spring; and so on. As in other cultures, many of the proverbs contradict each other if taken too literally.

Additional minor or peripheral items can be found at the head of the article by Levy cited above.

(G. M. Wickens)

3. IN TURKISH

In Turkish, *Mathâl*/Modern Turkish *mesel* is often used in the phrase *durâb-i meselî* (pl. *durâb-i emthâlî*), this pejorative form which may be translated as "stated by an example"; has also passed into the spoken language.

The terms *mesel* and its variants *metel, matal, metal* are also used to designate a riddle, and *masal* is a story. Other terms attested in the written sources, in oral tradition and in learned terminology to denote a proverb are: *sce* (Karâkhânîd Turkish), *atalarsozi* (plural *atalasîleri*, old Osmanli, Azerbajjani, Turkmên and Karâkapak as well as in the modern terminology of Turkey), *sim-söz* (dialect of Chinese Turkestan), *ulgârsos* (Altay), *ulgârs-söz* (Nogay), *tensîl, makal* (Karâkapak), *sarpmelesi* (Karâyîm of the Crimea), *nakîl* (Turkmên), *hikmet* (plural *hikâm*, Iranian Azerbajani) and *deşîet* (dialect of *Icel* in Turkey).

The proverb being the concise and stereotyped enunciation of a rule of conduct, an axiom or a statement and the fruit of long experience, is used as a means of giving speech a greater persuasive force; this being the case, it has no independent existence, but is integrated into speech. Besides its frequent usage in day-to-day conversation, it constitutes a corroborative and ornamental element of literary, scholarly or popular creation. In the epic tradition, for example, a series of linked proverbs, often alliterated or rhymed together and in the metre adopted for the epic narration, serve as a kind of preamble to the story proper.

Through this functional characteristic, the proverb is distinguished from the other genres of oral literature. It has been noted, however, that among the Karâyîm of the Crimea and in the popular tradition of *Icel* in Turkey, the proverb is used independently as the essential element of a verbal game. This is in the context of a competition in the course of which two teams (or two persons) confront one another; each in turn utters a proverb beginning with the same letter of the alphabet; the winning team—or person—is the one who succeeds in reciting the greatest number of proverbs.

Classified according to their themes, a first category of proverbs contains those which pronounce a simple judgment; among them, some imply a moral or suggest a rule of conduct. In a second category, are those which make a statement, on daily life, on human nature, on natural phenomena, or on "works and days", sometimes implying criticism or practical advice. Finally, a third category, of exclusively local or regional origin and usage, consists of the opinions regarding one another held by various communities—ethnic, religious, etc.

In the formal and stylistic context, there are four categories to be distinguished: (1) Proverbs stated in simple prose; (2) Proverbs containing prosodic elements. In this category the texts are of various types: in one type, the proverb is stated in the form of a verse or a distich in traditional metre (the two lines are rhymed); in a second type, the text is composed with alliterations or internal rhymes between the various component parts. Finally, a third type is that where several proverbs of different themes, rhymed or alliterated together, are joined in sequence, such as are encountered in the epic texts, e.g. in the *Oghuz Kisdî-d Ded Korkut* and in the *Kîrîğ Manas* (*q. v.*). (3) Proverbs and proverbial statements which have an anecdotal structure. Sometimes, this is a "miniature narrative" without direct speech; elsewhere, the narrative is reduced to a minimum, or disappears completely, and the text takes the form of a dialogue. (4) The proverbs of this third group are to be distinguished from those which have an anecdotal "origin". The latter allude to a historical event, or to an anecdotal character; such are the proverbs and proverbial sayings which refer to one or another of the facetious stories of Narseddîn Hoca.

From the 2nd/8th century, some proverbs are attested in the Kök Türk inscriptions. Later, after the 4th/10th century, a greater number of examples is found in the *Uyghur* texts. As many as 290 proverbs, of which a large number have survived into the present day, are contained in the dictionary of Karâmûd Kâzîghârî (*q. v.* 5th/11th century). The two most ancient Ottoman Turkish collections, both the work of anonymous compilers, are the Risâle min kelmîmâl-i Oghuzsâmîn al-mesbîr bi-atalarsozi, undated, probably from the 9th/15th century; and the Kîdîbî-i Atalâr, compiled in 885/1480–1. The *Pend-nâme*, by the Ottoman poet Gûwâhî (*q. v.* 10th/16th century), is a collection of proverbs from oral tradition cast in the form of classical prosody. (For collections of more recent date, still in manuscript, see the bibliography in Aksîy, 1977, 1267–70.)

Numerous poets of the Ottoman era, including Thâbit (*q. v.* 15th/17th century) and Hîfîz (*q. v.* 12th/18th century), have a reputation for embellishing their poetry with proverbs. (For a more complete list of the proverbs used in literary works, see Eyüboğlu, 1973–5.) Others, including Rûbiî of Bagdâd (*q. v.* 10th/16th century), Nâzî (*q. v.* 11th/17th century), Rûhîb Pâçu and Kâni (*q. v.* 12th/18th century) and *Qâbi* (*q. v.* 13th/14th century), are, on the contrary, admired for...
their verses and couplets which, with the passage of time, have acquired the status and usage of proverbs.

It was in the second half of the 19th century that westernized Turkish intellectuals began to show an interest in the collection and comparative study of proverbs. The first anthology of this type is the Durūb-i emnāh-i ʿOṯmānīyye (1863) of Şinākī; in the second edition (1870), the number of proverbs and proverbial sayings amounts to 2,500; in the third, edited by Abu ʿl-Dīyāʾ (Bīzāzīyī, Thawfīk in 1865, 4,000. The collection of Ahmed Wefik Pasha, entitled Muntakhabat-i durūb-i emnāh-i turkīye (1871) contains 4,300 proverbs. (On later collections and studies, see the bibliography of the present article and that of Aksoy, 1977, 1271-1328, which included 716 titles.)

**Bibliography:** Omer Asum Aksoy, Ataşöleri ve deyimler, Ankara 1965; idem, Bolge azillerindaki atasöleri ve deyimler, Ankara 1971; idem, Ataşöleri ve deyimler sızılgızı, i. Ataşöleri sızılgızı, Ankara 1971; i. Deyimler sızılgızı, Ankara 1976; ii. Dizin ve kaynakça, Ankara 1977; Ilhan Bağcı and A. Tietze, Bilmence. A corpus of Turkish riddles, Berkeley-Los Angeles-London 1973; Ferit Birtek, D政务服务-i-Türk Dwdil-i dırısmaları, Istanbul 1973; the two main sources are the Qurdan and the Hadith. Scholars will quote the Kur’dan in Arabic, then inter-
pret its contents for the people in Swahili. Every quotation from the KurDan is accepted as an...considerable number of individuals and families. In addition, al-Mascudl (Muruaj_, v, 480-1 = § 2235) mentions a work and we vie in praising ourselves for our virtues"; Swahili translation in print. Especially popular are the quotation from the Kurth.l.b., which means "to criticise, to blame, to hurtful." Although it is not a Kurth., it had a specialised usage, for it was broadly applied to disgrace, etc. (see further, Wehr). hadiths", "forty...exploited by the enemy. Furthermore, even if malaedlib were not exclusively concerned with asil, it is not surprising that some relatively objective genealogists should be eager to take up the faults mentioned in them and make them more widely known, at the risk of attracting dangerous hostility (see, e.g., the case of 'Akil b. Abil Tilib, who was keenly disposed to take note of malaedlib, al-Djahiz, Bayan, ii, 323-4). Those who specialised in such descriptions were accused of nourishing deep hatred, and this became something of a proverbial expression (daghinah buflas al-malaedlib, in al-Djahiz, Risalla fi 'l-adid wa 'l-hazl, ed. Kraus and Hadjiri, 65; ed. Harun, Ras'il, i, 236). Goldzihder again refers to the relationship between malaedlib and genealogies when discussing the famous Daghfal (see al-Mas'udi, Murjud, index, s.v.). Among the authors of works which contain this term in their titles is 'Abd al-Malik al-Haytham b. 'Adi; these last remarks appear in the chapter on the Shu 'ubiyya and its different manifestations in Muh. Studen, i, 191, Eng. tr. i, 176-7. Although accusations are made against him (see Goldzihder, op. cit., i, 187, Eng.tr. i, 173), it would probably be wrong to count as an opponent of the Arabs and a supporter of the 'Adjajm the famous writer Ibn al-Kalbi (d. 204/619 [g.e.]). The author of the Kitdb Mathalib al-'Arab (Fihrist, ed., Cairo 141; Yskot, Udadla, ii, 191, where it is stated that "Allan (see below) used the same classification of the tribes; Brockelmann, S I, 212; Sezgin, GAS, i, 270, ii, 61). However, it should be noted that Ibn al-Kalbi had already used the same term as this of a work containing a severe criticism of the three first caliphs, the Kitdb al-Mathalib al-'Arab, in his Kitdb al-Mathalib al-'Arab, fihrist, Cairo, 80; Sezgin, GAS, ii, 272 in two versions (one longer, the other shorter, according to Ibn al-Nadim (Fihrist, Cairo, 145), as well as the Mathalib Rubin, the Arabs from the North. Abil 'Ubayda (d. ca. 209/624 [g.e.]) was vigorously criticised for having provided the Shu 'ubiyya with arguments for their cause, just as all the other writers of malaedlib were criticised, and even accused of Shu 'ubiyya doctrines. However, he does seem to have shown some objective judgement when he wrote not only a Kitdb Maedlalib al-'Arab and a Kitdb Maedlib Qotafin, but also the Manakkil Bihila in opposition to his Mathalib Bihila (Fihrist, Cairo, 80; Sezgin, GAS, ii, 61, 321). Al-Mas'udi (Murdv. vii, 80 = § 2765) refers to his Kitdb al-Malaedlib (cf. Brockelmann, S I, 162), and shows that recording the Arab genealogies with all the vices that were embodied in them naturally led him to make certain serious accusations which, by their very nature, must have displeased a considerable number of the tribal genealogists and families. In addition, al-Mas'udi (Murdv. v, 480-1 = § 2235) mentions a work
attributed to Abū 'Ubayda, "or to another Shu 'ubi," though the exact title of this work cannot be established. It must presumably have contained the manākib and the mathālib of the Arabs as well as the entitlements to glory and shameful deeds of the various tribes of the north and south of Arabia, as presented by their supporters and by their detractors in the meeting-room of Hishām b. 'Abd al-Malik, who apparently inaugurated discussions on these questions in the manner of those in which he made up the genre al-mathākin wa l-i‘rāsāt [q. v.].

A few decades earlier, Ziyād b. Abīhi, nicknamed "the just," was credited with having written a book of mathālib, which was used by some of the authors already mentioned (see Sezgin, GAS, i, 261, as well as 249, 257, 265, ii, 24, 60). According to Hammād ʿAdrij [q. v.], the zinād named Yūnus b. [Abi] Farwa sent a book (or a letter, kitāb) to the Emperor of Byzantium about the mathālib of the Arabs and the vices (‘ugāb) of Islam (al-Djahīz, Haywān, iv, 448; cf. al-Djahīshīyārī, 125; al-Huṣrī, Dām al-dāja’ārīk, 256; al-Murtadā, Amālis, i, 90; Ibn Ḥadījār, Lisan al-‘māzin, vi, 334; Brockelmann, S I, 109). This appears to be the one real case of treason which has been recorded; since the Persian ʿAllān al-Warrāk al-Shu ‘ubi, who maintained relations with the Barmakids as well as doing the job of court historian at Bāvest al-Ḥamdānī, ap. 55, had been subsequently for al-Ma‘mūn, cannot really be blamed for his work; he is indeed the author of a Kitāb al-Mahdānīn which collects together, tribe by tribe, all the mathālib of the Arabs, from Kuraysh to the Yemenis. The list of tribes and clans which have their shameful matters recorded occupies a whole page of the Fihrist (Cairo, 154), in which it is stated that the classification adopted there is the same as that of Ibn al-Kalbī. ʿAllān himself also seems to have been objective in his judgement, for he wrote other works, among which may be mentioned a Kitāb Fadā’il Kinnāna and a Kitāb Fadā’il Rabi’a (see Yākūt, Udbāb, xii, 191-6, with a passage borrowed from al-Djahīshīyārī, which does not appear in the Kitāb al-Wuzarā). But which has been reproduced by M. ʿArwād in Nasīrāt da’āt ‘am mīr Kitāb al-Ma‘mūn b. Ziyād b. Abīhi (Cairo, 1864, 24, 271, i, 61). Sezgin (i, 603) also mentions a Kitāb al-Mathālib of Ibn Bishr al-Ashīr (d. 260/874), and (ii, 62) the Mathālib Thakīf wa-sdīr al-ʿArab by someone named al-Daymarrī. Although it is likely not to have held that later authors continued to use the word mathālib in the titles of polemical works against some tribes, for the general situation hardly encouraged this kind of literature to survive. It must have come to an end quite quickly. We have seen that mathālib are to be contrasted with muṣḥīn, muṣḥīkh and manākib (see above); even so, it proved impossible for a parallel to be maintained between works devoted to the praise of groups of people and individuals and those which aimed at discrediting an enemy. The short list that has been given here and what we know of comparable works suggest that Godzihel was correct, for over the centuries the divisions between the tribes weakened so that a growing feeling of fellow-citizenship could develop. Moreover, writers seem to have heeded the hadīth which condemns al-ṭa‘āfī fī l-‘anādik wa l-nīsābī wa l-anwāüğ, and consequently they avoided the temptation of attacking genealogies. On the other hand, as a result of an understandable semantic evolution the term mathālib has been used in a meaning close to that of hidajī and has been applied to individuals; see e.g. the Kitāb Mathālib Abī Nuwās by Ahmad b. ‘Ubayd Allāh al-Thaqāfī (d. 314/926; see Yākūt, Udbāb, iii, 240) and the famous Mathālib al-wasannah by Abū Hayyān al-Tawhīdī (d. 414/1023 [q. v.]).

Bibliography: Given in the article. See also J. Sadan, Phénomènes et écris conceptuels Chahîliyya-Islam à travers les belles-lettres et les recueils de Mathālib, in From Jahiliyya to Islam, Jerusalem 1987. (Ch. Pellat)

AL-MATHĀMINA, the name given by the Yemenite historians to eight noble families of South Arabia who, before Islam, enjoyed important political privileges, either in the kingdom of Himyar (from the end of the 3rd century AD to 520 [or 525]), or under the Abyssinian and Persian régimes which followed. Mathāmina is a plural noun whose singular, which is not attested, could be *Muthman or *Muthman (since these participles mean "repeated eight times", "to the number eight") It is certainly from the Arabic number *thamantîya "eight," and not from the concept of price or value also contained in the root, that the name of these eight families is derived, since they could also be called al-Thamānīya ("the Eight"), as in al-Hamdānī, al-Dimgha, 64.

Mention of the Mathāmina is to be found in the works of only three authors, all Yemenite. The oldest is al-Hasan al-Hamdānī (280-after 360/893-after 971) [q. v.]. According to him, Nadjran b. al-Nahwān b. al-Hasanī al-Wazirānī, who died in Dār ‘l-Hijdājā 573/June 1178 (on this author see al-Akwa‘, Nasḥāā). The third is the Rashidūl ruler al-Malik al-Aghfrī Umar b. Yūṣūf b. Rāṣūl, who reigned from 694 to 696/1295-7 (Sayyid, Sources, 396). It is to be noted that the non-Yemenite Arab historians, notably Hishām Ibn al-Kalbī [q. v.] appear to ignore these Mathāmina.

The definition of the historians. These three authors give somewhat divergent definitions of the Mathāmina. Dealing with the descendent of Dḥū Djdān, al-Hamdānī (al-Bīlī, ii, 283 ff.) mentions incidentally that four of the sons of Shurāḥullī b. al-Ḥārīb lived as Mathāmina "eight lineages (abāf) between whom power was shared after the death of Dḥū Nuwās" (a phrase follows whose meaning is obscure). This scholar, like the other Yemenite historians, knew that Dḥū Nuwās [q. v.] was the nickname of a Himyarite king called Yūsuf (for al-Hamdānī, see for example al-Dimgha, 63-4, and al-Bīlī, x, 22; for Nashāā, we may refer to Mulūk, 147-8). The full name and exact title of this ruler are known thanks to a South Arabic inscription engraved by the commanders of one of his armies and dated 563/573 of the Himyarite era (July 518 or July 523 AD, since there is some question as to whether the Himyarite era begins in 115 or 110 before the Christian era): "Yūsuf Asʿar Yathār, king of all the tribes" (Yūsuf ʾasʿar Yaḥṭār kān al-fārāʾīn) (the name of the king should thus be corrected in the article Yūsuf [q. v.]).

The dates of the reign of Yūsuf, a ruler especially known for having persecuted the Christians of Najrān, which led to an Abyssinian intervention that challenged him and drove him to suicide, are not established with certainty. He came to power between June 516 (or 521) and June 517 (or 522) (according to the evidence of Ry 510 and Ja 1028/8-9) and was overthrown by the Abyssinians shortly after Pentecost 520 (or 525) (Beeston, Judaisms, 272 ff.; Huxley, Martyrdom, 51). After the death of Yūsuf, the kingdom of Himyar passed under the tutelage of Abyssinia for fifty years; then, in the year 570/1178, it was conquered by the Sāsānids and remained under Persian domination until it was won over to Islam during the lifetime of Muhammad. For al-Hamdānī, the Mathāmina were
thus the noble lineages who dominated Yemen after the fall of the Himyarite dynasty, that is, during the Abyssinian occupation and perhaps after that. This scholar in the meantime neglects to mention that the Himyarite throne did not remain vacant; the Abyssinians placed on it a Himyarite Christian, Samyafa (amldk), he adds: ‘Thamaniya: descended from him’. In 16, under the root ThMN, c gives two different definitions of the Mathamina. It is given in two pieces of verse. The first is that which Nashwan devoted to the annals of the Himyarite Empire. It is a compromise between the H1 and H2 versions: of the two innovations in H2, it retains only the replacement of Dhu Manakh by Dhú Hazfar. The author justifies his list by citing, in the commentary on his poem, ‘Alkama’s verses already encountered on his poem, to the genealogists, the “son” of Dhú Sabar (see notably Nashwan, Muluk, 156, and al-Hamdam, al-

(thesocrosses+indicate the number of occurrences of the list in the work of the author considered)

Awka', it is necessary to correct Dhu 'Ukhulān to Dhu Ukhulān; besides, the list only consists of seven names (in place of the eight announced in the text), without our knowing whether it is a case of an error by the editor or a deficiency in the unique manuscript. In fact, it is necessary to add Dhu Makār, as is proved by the five verses attributed to 'Alkama b. Dhi Diqādan, which al-Hamdānī cites to justify this list and which he takes from Muhammad b. Ibrāhīm b. al-Mahālī al-Kalāfī. In this fragment of 'Alkama (a great Yemenite poet who was a contemporary of the Prophet Muhammad: al-īkīl, ii, 300-1; on this poet, see also Löfgren, 'Alqama), the Mathamina are treated as if they already belonged to past times. Unfortunately, we cannot conclude anything from this, for the authenticity of these verses seems doubtful; al-Hamdānī himself did not find any trace of them in the work of 'Alkama.

H2 = al-Hamdānī, list no. 2: see al-īkīl, ii, 294-5. It is given in two pieces of verse. The first is that which serves as a justification for H1, but with some variants, notably the replacement of Dhu Manakh and Dhu Sirwāb by Dhu Hazfar and Dhu Kayfān; al-Hamdānī takes it from an Arab of San'a who attributes it, not to 'Alkama, but to a Himyarite. The second piece, which numbers six verses, is ‘the famous saying of ‘Alkama b. Dhi Diqādan on the Mathamina in his poem’; it gives the same names as the preceding.

N1 = Nashwan, list no. 1: see Muluk,156-7. It is provided by the Kasīda himyariyya, a nostalgic poem that Nashwan devoted to the annals of the Himyarite Empire. It is a compromise between the H1 and H2 versions: of the two innovations in H2, it retains only the replacement of Dhu Manakh by Dhú Hazfar. The author justifies his list by citing, in the commentary on his poem, ‘Alkama’s verses already encountered with the support of H1 (but attributed in H2's statement to a Himyarite), with new variants. The same list is found in a piece of three verses, without the author's name, that Nashwan cites in the encyclopedia dictionary that he composed entitled Shams al-īlām, under the root SHR, 48.

N2 = Nashwan, list no. 2: see Shams al-īlām, under the root THMN, 16. It follows N1, but replaces Dhú Sabar with Al Murāthid. This list is provided by a poem attributed to an Arab from the North (from the tribe of 'Attāk b. Aslam b. Yadhkur b. 'Anaza b. Asd b. Rābi'ā b. Nizār). It is a variant without real significance, seeing that Dhú Murāthid is, according to the genealogists, the “son” of Dhú Sabar (see notably Nashwan, Muluk, 156, and al-Hamdānī, al-

Iklil, ii, 317-18). Al-Hamdani himself (al-Iklil, viii, 159) considers Dhu Murathid as one of the Mathamina, although this lineage does not appear in his own lists. The preference shown for Dhu Yazan among the Mathamina, not even in the root RThD, 40).

Dhu Yazan among the Mathamina, not even in the root RThD, 40).

It differs from Nl in one name, Dhu Murathid (a doublet of Dhu Murathid in this text of Nashwan may have a personal motive; this author claimed descent from Hasān Dhu Murathid b. Dhi Sahar (Shams al-ʿulām, under the root RThD, 40).

The Mathamina, mentioned in archaic poetry, and they knew, however, 7 of the 13 lines of Mathamina recorded above (Casket, Gamhara, index): Dhu Sahar (sic), Dhu Khallī, Dhu ʿUthkulan, Dhu Djadan, Dhu Makar, Dhi Hafṣar. So it is at a late date that the tradition of the Mathamina enjoyed a certain vogue, when the Yemenite scholars, beginning with al-Ḥamdānī, raised it from oblivion. It is probable that they only had at their disposal in order to dx> this some allusions from archaic poetry, which would explain the notable differences of definition from one author to another.

The interest that the Yemenites showed in these Mathamina from the 9th-10th centuries onwards probably has a political cause. The dissolution of the Ḥabbāsid empire left the field open to many ambitions, particularly in Yemen where the struggles for power became fierce. In this context, prestigious Himyarite ancestors gave an incontestable historical legitimacy, even if the religious authorities saw in it a manoeuvre against Islam. It was probably impossible to claim a royal ascendancy, whether it was owing to public knowledge that the rulers of Himyar had had Himyarite kings (on this, see Bāfakhī, al-Hārīṭī). It would seem that the traditionists had integrated in the same branch of this genealogy two bodies of traditions, on one hand that of the tribe of Ḥimyar in the strict sense, on the other that of the Saabaean ʿulāmāʾ of Maʿrib. Finally, we will observe that in Yemen in the 9th-10th centuries AD, numerous clans, lines and even villages were claiming descent from the Mathamina; an eloquent picture is supplied by the works of al-Ḥamdānī, notably in the genealogies of Ḥimyar.

The later vogue of the Mathamina. The tradition of the Mathamina is certainly ancient: it is based on some fragments of reputed archaic poetry, whose antiquity can be confirmed by the mention of Dhu ʿUthkulan, an authentic pre-Islamic Saabaean line which is known to the authors only from these fragments. We may assume that it dates back to the Himyarite period (end of the 3rd century AD - beginning of the 6th), after Ḥimyar had annexed Sabaʾ around 275 and at a time when the ancient noble Saabaean lines had to defend an authority that was being increasingly threatened.

Meanwhile, this tradition seems to have been neglected by the earliest of the great traditionists, whose work established the genealogical outline of the Arab tribes, notably Ḥishām Ibn al-Kalbī (around 120-204 or 206/around 737-819 or 821) and Ibn Durayd al-Azdl (223-321/837-933) [q.v.]. Ibn al-Kalbī knew, however, 7 of the 13 lines of Mathamina recorded above (Casket, Gamhara, index): Dhu Sahar (sic), Dhu Khallī, Dhu Djadan, Dhu Makar, Dhi Hafṣar, Dhu ʿUthkulan, an authentic pre-Islamic Saabaean line which is known to the authors only from these fragments. We may assume that it dates back to the Himyarite period (end of the 3rd century AD - beginning of the 6th), after Ḥimyar had annexed Sabaʾ around 275 and at a time when the ancient noble Saabaean lines had to defend an authority that was being increasingly threatened.

We may assume that it dates back to the Himyarite period (end of the 3rd century AD - beginning of the 6th), after Ḥimyar had annexed Sabaʾ around 275 and at a time when the ancient noble Saabaean lines had to defend an authority that was being increasingly threatened.
Mašār owed their success, among others, to the prestige of these ancestors. The addition of ḏū Mašārī in list no. 2 of al-Malik al-Aṣghar could be explained in the same way; would the Rasulids not have needed a prestigious local ancestry in order to establish their power better? Mašārīs, even the modest ones, attempted to ennable themselves in the same way, by claiming to have one of the Mathamīnā for an ancestor.

To supply arguments for certain princes seeking historical legitimacy and roots, it is probable that some scholars did not hesitate to replace one name with another in the poetic fragments and in the list, to such an extent that the number of variants increased. We know the bad reputation that the genealogists had; was not al-Hamdānī himself accused of falsification for payment (Bāfakīh, al-Ḥārīth, 428)?

Finally, one should mention that the name Mathamīnā was also borne by a branch of the ʿAlīds of Yemen (see al-Malik al-Aṣghar, Tafsīr al-ʿaṣābī, 116).

CHR. ROBIN

AL-MATHĀNI [see al-kūrān].

MATHEMATICS [see MARR, HANDASA, ḢISĀB].

MATHNAWĪ (a.), the name of a poem written in rhyming couplets.

1. In Arabic literature, see muzuḏawīḏ.

2. In Persian.

According to the prosodist Shams-i-Kays (7th/13th century), the name refers to “a poem based on independent, internally rhyming lines (abyāt-i musīkīt-i musarrāt). The Persians call mathnawī because each line requires two rhyming letters.... This kind (nawī) is used in extensive narratives and long stories which cannot be treated in poems with one specific rhyming letter” (al-Muṣīqīd, ed. Tehran 1338/1959, 418f.). The first part of this definition mentions the single characteristic which separates the mathnawī from all other classical verse forms, namely its rhyme scheme aa bb cc, etc. Otherwise, the name is given to poems differing greatly in genre as well as in length.

Etymologically, it is often explained as a nisba adjective to the Arabic word mathnā, “two by two”; but mathnawī (according to al-Dīwānārī, the equivalent of the Persian da-baytī, “which is a song”) is mentioned as another possibility in the Tādī al-ʿarās (cf. Lane, s. v.). It is reasonable to think that the term was coined by the Persians in spite of its Arabic derivation. The Arabs used the term muzuḏawīḏ [q.v.] instead. By this they designated poems with rhyming couplets, usually written in the trimeter of the radāg which has either eleven or twelve syllables. Such poems were composed at least since the beginning of the 8th century A.D., but the verse form remained of little importance in Arabic literature (cf. G. E. von Grunebaum, On the origin and early development of Persian muzuḏawīḏ poetry, in JNES, iii [1944], 9-13, repr. in Islam and medieval Hellenism, London 1976).

The much more successful Persian mathnawī is first known from the Sāmānīd period (4th/10th century). Although it made its appearance at a much later date than the muzuḏawīḏ, the mathnawī is regarded by nearly all modern scholars as a continuation of an Iranian verse form and not of its Arabic counterpart. Yet this theory meets with a few thorny problems pertaining to the history of prosody in Iran. Prior to the Islamic period, rhyme—the most prominent feature of a mathnawī—was apparently not in use as a characteristic of a verse form. The metrical system of pre-Islamic Iranian poetry is still very imperfectly understood. The early opinion of modern scholarship was that it must have been governed by the principle of syllable counting. On the basis of this assumption, an Iranian origin of some Persian metres, which were frequently used in early mathnawīs, was held to be likely (cf. G. E. von Grunebaum, Islam. Essays in the nature and growth of a cultural tradition, London 1955, 177-80).

The syllabic principle was rejected by W. B. Henning and M. Boyce in favour of the theory that the pre-Islamic metres were accentual and allowed a variable number of syllables within certain limits. It has been shown more recently that a rather great irregularity in the length of verse lines was permitted, probably under the influence of the accompanying music (see S. Shaked, Specimens of Middle Persian verse, in W. B. Henning memorial volume, London 1970, 395-405, with further references). L. P. Elwell-Sutton, on the other hand, arguing in support of his thesis that the metres of classical poetry continue the system used in pre-Islamic Iran, opted for the principle of syllable quantity (Persian metres, 168f.). It has often been observed that the Persian mathnawīs are written in a restricted number of metres. These metres always have eleven or, more rarely, ten syllables. A verse form marked by such inflexible rules for its rhyme and the number of its syllables can only have developed in the early Islamic period. It is most likely, therefore, that the mathnawī came into being through a process of adaptation of pre-Islamic verse forms to the prosody of the Islamic period which was dominated by the
metric principles of Arabic poetry. The stages of this process can no longer be traced from the scant remains of pre-classical Persian poetry which have been preserved (cf. e.g. Chr. Remps, Die ältesten Dichtungen des orientalischen Islam, DZMO, Halle 1955; 235-8; Fr. Meier, Die schöne Makhtat, Wiesbaden 1963, 9ff.; G. Lazard, Les premiers poètes persans, Paris 1964, 10ff.).

In the view of the classical poets, the mathnawi was undoubtedly a part with other forms of poetry. To Gurgâni [q.v.], the treatment in a mathnawi of the story about Vis and Râmnî, known up to this day only in an unadorned "Pahlawi" form, amounted to bringing it to the level of poetic expression (Vis-i Râmnî, ed. Tehran 1337/1959, 20). The poems of Nizâmî [q.v.] show which heights of stylistic art could be reached in this form. In some respects, however, it was also akin to prose. The narrative and didactic contents of many poems could equally be dealt with in prose works. In principle, there were no limits to the length of a mathnawi. A few works of exceptional size like the Şâh-nâma, some of the later heroic poems, and the Mathnawi-yi ma'na'awi left aside, most of the better-known poems fall within a range of 2,000 to 9,000 bayts, but the form was also used for texts of a much lesser extent. Fragments of no more than a few lines with the rhyme scheme of the mathnawi can be found as inserted lines in prose works, for example in the work of Sa'dî [q.v.], who sometimes wrote an entire story on this scheme in 10 or 12 bayts.

Other poems were occasionally inserted into a mathnawi text, either with or without the use of their specific rhyme scheme. The first poet to do the former was, to our knowledge, Ayyûkî (fl. in the early 5th/11th century), who put short poems in monorhyme into the mouths of the protagonists in his work Aûlûglî (ed. by Dîh. Safâ, Tehran 1343/1964). This insertion of ghâzâl was also a characteristic of the Dâh-nâma genre and occurs sometimes in versions of the legend of Ma'dun Laylâ [q.v.], notably in the poem of Malikâbî (9th/15th century). Lyric poems adjusted to the pattern of the mathnawi can be found frequently in the works of Firdawsi [q.v.]; Gurgâni, Nizâmî and others.

Poetry and prose were in some cases used alternatively, e.g. in the Wâld-nâma of Sultan Walad [q.v.]. The Tuhfat al-Irâkîn of Khâkânî [q.v.] is in most copies introduced by a prologue in ornate prose; a similar prologue belongs to one of the early versions of the Hadîkât al-bakâa of Sanâ'î [q.v.], but was certainly not written by the poet himself. Dîhâl al-Dîn Rûmî [q.v.] therefore does not have a composition of this kind to each of the six books into which his Mathnawi is divided.

The composition of mathnawis shows the same variety as most of their other features. Yet certain conventions can be recognised in a number of poems and can be used therefore as the basis of a classification. A common type is exemplified in mathnawis with a clear distinction between introductory sections and the proper text of the poem concerned. The former (which are often collectively designated as the dibsâ, a term also applied to prologues in prose) deal with a series of topics, some of which can be regarded as obligatory whereas others were added at the pleasure of the poet. To the first category belonged praise of the One God and prayers (tawhid, munâdâ'î), a eulogy of the Prophet (na'î), which usually included the praise of his Family and his Companions, a dedication to the poet's patron, and digressions on the occasion for writing the poem, its subject matter, etc. Reflections of the value of poetry, usually referred to as sakhtan, meaning both "speech" and "logos" (see e.g. J. Chr. Bürgel, Nizâmî über Sprache und Dichtung, in Festschrift für Fr. Meier, Wiesbaden 1974, 9-28), and other sections of a moralising nature have frequently been added. A distinction of this kind can be found in the Şâh-nâma together with a series of sections on the origin of the world which form a prelude to the subject-matter of Firdawsi's epic. The obligatory part of the text was further enlarged by Nizâmî, who added it to the treatment of the mi'âdâ [q.v.] of Muhammad following upon the na'î. Stûfi poets like Amir Khûrâw and Dâmî [q.v.] inserted the praise of their spiritual guides. In some poems, a few sections of the dibsâ were placed at the end by way of an epilogue.

Less frequently found is a type of poem introduced by the description of one particular object treated as an emblem from which symbolic meanings relevant to the following poem are derived. This device may have been borrowed from the nasîb of kašânâ. Such emblems were: the wind in Sanâ'î's Kâr-nâma and Sayr al-'ubâdât 'l-ta'âf, the sun in Tuhfat al-Irâkîn, the flute in the Mathnawi-yi ma'na'awi, and the rabâb in Sultan Walad's Rabâb-nâma.

A distinction between an introduction and the poem itself cannot always be recognised. This is especially not possible in many of the shorter mathnawis and in some didactic works like the Hadîkât al-bakâa.

Several devices could serve to articulate the contents of poems. Firdawsi inserted passages of various kinds into the Şâh-nâma to introduce the major stories contained in the text. The night scene describing how the poet was inspired by a "beloved idol", who brought him a lamp, and the theme of the tale of Bîzâhân and Manîzâh, is the best known example. The genre of nature poetry provided Nizâmî with the means to mark transitions in the structure of his romances; reflective intermezzi could fulfill the same purpose. More systematic was his use of short addresses to the cupbearer (sâ'î) and the singer (mughânt) respectively in the two parts of the Iskandarnâma as introductions to each section of the narrative.

Didactic poems were often, like treatises in prose, divided into sections, the first being a kind of introduction. The larger poems nearly always contain passages of other genres than the one they are mainly concerned with. Sections dealing with ethical, philosophical or religious themes are hardly ever missing in narrative poems. The didactic poet, on the other hand, used both long and short tales to exemplify the ideas propounded in his works. They can be found already in one of the oldest specimens of the didactic genre, the Afgân-nâma of Abû Shâkîr Bahîlî [q.v. in Suppl.].

The mathnawi was also a useful tool to present factual information on account of its memotaxic advantage. An early example of this is Ḥâkim Maysarî's Dânîsh-nâma, the oldest integral text in rhyming couplets which has been preserved. It was completed in 370/980-1 and treats of medical matters (partial edition and translation by G. Lazard, Les premiers poètes persans, Tehran-Paris 1964, ii, 178-94; i, 163-80, see also 36-40). A wide range of subjects pertaining to the religious and the natural sciences, astrology, alchemy and the arts were treated in the same fashion.

The choice of a metre for a mathnawi was deter-
mined by convention and not by some intrinsic quality of the metre concerned. A clear example is provided by the metre mutakābāt-i maddamun-i maddahīf, which, because of its occurrence in the Shāh-nāma, was mainly chosen by most poets who subsequently wrote heroic maddawīs. Already in the time of Ferdowsī, however, it was used also in a didactic poem by Abū Shākir and in a love story by ʿAyyūkī. Similar divergences of use can be noticed in the case of other metres. A decisive factor was the tendency towards the imitation of authoritative models according to their most important characteristics of form and content. The classical poets tried to bring their originality to bear through the emulation of predecessors. This consisted both of repetition and of change. The former made it clear that they were following the example of a great master; the latter that they were clever enough to find new variations on one aspect or the other of their model. The long series of imitations based on the khamasa [q.v.] of Nizāmi provides the best-known instance of the workings of this artistic principle. The metre was usually among the features which were retained in an imitating poem. The metre of a genuine work was also carefully maintained in pseudoeuphorical forgeries as they were based, e.g., on the works of Sanāʾī and ʿAttār [q.v.]. On the other hand, a change of the metre could also serve to demonstrate a poet’s independence with regard to a model followed in other respects, e.g., in the case of maddawīs and ghazals, which were written from the beginning of the 8th/14th century onwards (cf. T. Gandjeī, The Genesis and definition of a literary composition: the Dāh-nāma (“Ten love-letters”), in Isl., xlvii [1971], 59-66). Another example is the even longer sequence of Sākī-nāmas which had its origin in the call of the cup-bearer used by Nizāmī in the c’s name. The didactic genre includes several masterpieces which were fashionable in the 10th-11th/16th-17th century, shahābīs or shahābigīs, poems dealing with the playful description of young craftsmen and artisans which also exist in the form of series of quatrains (cf. A. Gulīnī Maʿṣūmī, Shahshāhī dar ḥafs-i farsī, Tehran 1936/1967); sārābā, devoted to the description of an ideal human body “from top to toe”; sūr-ū gudz, the description of painful experiences (see for a specimen, Šāhīzād-e Amuī, Kulliyāt-i ażīr, ed. Tehran 1936/1967, 193-208); and Ḵādījāt u kadar, stories about the workings of fate (cf. Armaḡān, viii [1306/1927], 120-3; x [1308/1929], 458-64, 554-60: speciments by Rūkūn Maʿṣūmī Khānī and Muḥammad-Kuli Sālim). Biblical themes were taken as the subject of maddawīs in Judeo-Persian literature [q.v.].

In modern literature, the maddawi prove still to be a useful medium for the Persian poets as long as they were mainly interested in a renewal of contents. Imitations of the Shāh-nāma with a nationalist tendency were the Nāma-yi bāstān or Sāfār-nāma (1313/1895-6) by ʿAṭā Khān Kirmānī [q.v. in Suppl.], the Kayar-nāma by Abdīl ʿAbdīl Hāgīāūari [q.v. in Suppl.] and the Pahlavī-nāma, an unfinished history of Islamic Iran in heroic verses by Nawbakht, published in 1926-8. Social and political criticism was voiced in maddawīs by Amīrī [q.v. in Suppl.] and Parwīn [q.v.]. Ḵᵛājā Mīrzā (1874-1924) used the form for satire in his ʿArf-nāma and for a modern love story in Zuhra-va Manāwī. The Indo-Persian poet Muḥammad Ibsāl [q.v.] adopted it for some of his most famous works, like the famous and widely imitated Gafrul-ʿardī, an imitation of the short mystical poem of Muḥammad Shabistārī. The last major maddawī to be written by a Persian poet was the Kūr-nāma-yi zīndān by Malik al-Šīrāzī Bahār [q.v.]. It contains the account of the poet’s imprisonment and exile during the 1930s in the style of the great didactic poets of the past (Divān-i ažīr, ed. Tehran 1345/1966, ii, 2-126).

Other poetic forms—stanzic poems and even kasīdas—were however increasingly used for epic poetry, even by poets who remained faithful to the classical canons. The experiment with a maddawī-yi mustażād made by Bahār (op. cit., ii, 234-8) was not pursued. Under the influence of the theories of Nīmā Yūḥūsī [q.v.], the Ḵẖīr-i nay poets of the period after the Second World War abandoned the maddawī, mainly because the rigid isochronism of its verse was considered to be an impediment to the expressive use of metre (see e.g. Mahdī ʿAkhjavān-Ṭalīthī (M. Umid), Bīdātā va ba ṭadāt-i Nīnā Yūḥūsī, Tehran 1357/1978, 70 ff.).

Persian literary theory had little to add to the brief definition of the maddawī given by ʿShams-i Kāyā. A few remarks on the subject by later writers were assembled by H. Blochmann, The prose of the Persians, Calcutta 1872, 87-90. Works on maddawīs sometimes pay attention to the corrections of the dihāba of a maddawī (one of such works is quoted by Ahmad ʿAlī, Haft Ašrām or History of the Masnavi of the Persians, ed. Blochmann, Calcuta 1873, 41-2; ʿAlī’s book contains the introduction to an unfinished work on maddawī poets).
MATHNAWI

3. In Turkish.

The Turkish *mathnawi* developed late under the influence of that of Persia and alongside it. The oldest monument of Muslim Turkish literature that has been chanced to be preserved, the *Kutadgu Biliq* [q.v.], is a long didactic *mathnawi* (R. Dankoff, *Yüzaf Khâys Hâjîh. Wisdom of Royal Glory (Kutadgu Biliq)*, A Turko-Islamic Mirror for Princes, Chicago 1983). Turkish and Persian *mathnawîs* shared a great stock of authoritative models, ranging from the themes themselves to the choice of the appropriate metres (*mutâbakâb* for the heroic genres [see *Hâmasâ*], *ramât* for the religio-didactic type and *hâzâtrî* for the romance). Up to now, this division into three genres has served as the main principle of organisation. But more attention needs to be paid to the social and cultural context in which these works were written, and to the way in which the three genres overlap. Turkish *mathnawîs* had the same architectural framework as their Persian counterparts [section 2 above]. The authors' possibilities lay in the 'internal' significance of the details rather than in the 'external' aspects of plot and metre, the choice of the formal means being largely determined by the theme, for which terms as *kışna* [q.v.], *dâstân*, or *kikâyâ* [see *Hikîyâ*, iii] were used.

The chief element of the narrative *mathnawi* was the plot, turning on love between two chief characters, male and female, who gave it its title. Opening chapters dealt with the reason for writing and its true purpose, incidentally drawing the patron's attention to his skills as a poet. Structure and contents of the framework could be modelled on that of the *kisâda* [q.v.], without the tautness of that form. Changing metres could be used as structural boundaries dividing parts of the prologue. In his religious exordium, an author could combine the praise of the One God with a meditation on the works of creation. The eulogy of the prophet Muhammad and his heavenly journey [see *Mâtqâq*] have been treated in all Islamic poetry, whereas the praise of the four first caliphs would only be found in the *mathnawi* of a Sunni author. In the dedicatory passage, a local patron could be praised next to the ruler. If there was no response, the dedication might be removed and replaced with a complaint to Fate. Since it was the poets' desire to prove their own superiority, they hardly ever felt the need to mention their immediate predecessors. An attitude of reverence for the great classical models was present in the poets' reflections on the value and essence of poetry. A favoured way of expression was that of mystically-coloured love poetry, depicting the author in a dialogue with the 'speaker of the heart', the cupbearer, *sâtî*, or the pen, *kâtâm*. In the epilogue, the date and the author's name could be transmitted. The author would seek to disarm adverse criticism, justifying his adaptation of a foreign classic or an old 'native' story in the Turkish of his own time and environment. Disavowal of the vernacular in general need not prevent a poet from praising his own elegant idiom which he had substituted for the obsolete language of the original.

As for his narrative, the themes being familiar and spacious could be comprised in a medley, an author could trust his audience to appreciate the significance of his particular treatment. In this way, the *mathnawi* could combine religious teachings, offer historical truth, serve as tool of learning or simply offer entertainment. Chapter headings divided the more voluminous texts. Short *(jâhâr)* and *majâtâhî* belonged to poetry in the Ottoman Turkish literature, in *suppî* poetry acted as breathing spaces. Without shifting his point of view, the author presented the inmost thoughts of his protagonists, using lyrical monologues, dialogues of the lovers or the old technique of inserting letters; he could also express his own feelings in signed *gâhâl*, using mystical images (R. Dankoff, *The lyric in the romance*, in JNES, xii [1984], 9-25). Much research is needed into the great mass of Turkish *mathnawîs* in order to relate them to the social and cultural contexts which define their significance. Most of the old poems did not appear in print before the Republic. Only a fragment of this material has been translated into a modern language.

Mystic-didactic *mathnawîs* were introduced into Anatolia by *Djalâl al-Dîn Rûmî* [q.v.] and his son *SultânWalad* [q.v.]. The short *Çâhîh-nâmâ* seems to have been overvalued as compared with *Gûlîhên* [q.v.] *Manîfîk al-fâyâr* and *Ashîf Pasha* [q.v.] *Ghârîb-nâmâ* Sûleyman Celebi's *Weleît el-nâsjî* (*Melaîdî*) on the birth and miracles of the Prophet, completed in 1812/1409, has remained immensely popular (N. Pekocay, art. Sûleyman Celebi, in IA). *Khusrav and Şîrîn* (q.v.) was a popular romance, *Yûsûf and Zulaykha* were loved as moving romances; such compositions were often religious in their purport, even though the actions and emotions they displayed did not always accord with an orthodox ethical code.

In Çâghatay, Azeri and Ottoman literatures, great poets like Mir *Îlí Shir Nawâtî* [q.v.] and Fudullî [q.v.] deployed all the resources of Persian and Turkish literature in the perfection of this form. From the 8th/14th century onwards, Turkish poets supplied inventive translations and adaptations of Persian originals. The anonymous author of the *İcîk-nâmâ* (S. Yûkses, *Mehmed. İcîk-Nâmê Incelmé metin*, Ankara 1965) already made satirical use of the stock formulas of the epic with its exciting adventures in strange lands. The anonymous author of *Cenl-nâmê* [q.v.] composed early versions of the *Yûsûf-Zaîla* [q.v.] theme, to which *Kemâlâpasha-zêde* [q.v.] later was to contribute a *mathnawi*; *Kûbî and Fakhîrî* (both 8th/14th century), must now be looked upon as pioneers in the Turkish *Khusrav-Şîrîn* versions. Weighted with a heavily Persianised vocabulary, *Şeyyîtî* [q.v.] (F. K. Timurtaş, *Şeyh in Hüsref ve Şîrîn*, Istanbul 1963), in which Fakhîrî's verses can be traced, had a great influence on later poets. Under the Ottomans, new subjects were added to the répertoire. Dâfi [q.v.] contributed an allegorical *Ceng-nâmê* Lââmî [q.v.] dealt with comparatively new (Salâmân and Absâl) or nearly forgotten themes, such as *Vis and Râmîn* [see *Gurûgânî*], and *Wâmîk and Âdîrâh*. It is doubtful whether he ever saw a complete copy of the latter poem in the version of *Unsüry* [q.v.] who ultimately drew from a Greek source (see M. Nazif Salihoglu, art. *Unsu*, in IA; art. *Vâmîk u Azrâ*, in IA; B. Utas, in Orientalia Suecana, xxxiii-xxxv [1984-6]). Lââmî and Dâfi [q.v.] both composed a *Şehr in Persânê*, Fadîl [q.v.] introduced the Gûl ve Bûlbûl theme. Dja'Far Çelebi [q.v.] wrote an original *Hoez-nâmê*; to Meshîhî (d. 918/1512 [q.v.]) the first Ottoman *şehr eniniz* is attributed, a genre later to be elaborated as a social satire by Fakhîrî [q.v.]. Indeed, as in the *kâzîyê*, praise could turn into satire and invective; Ahmâtî [q.v.] in his medical *Târaîh el-erwaî* flung abuse at the people of Bursa who had obstructed his work; the *Khân-nâmê*...
by Sheykhi [q.v.] contains a vigorous satire on the bad luck of a poet who is robbed of his timdr (F. G. W., 1975, 540-41). Ahmedi appended the first versified chronicle of the Ottomans to his Iskender-nâme. The term ghâzâvât-nâme is used with reference to narrative poems celebrating the military triumphs of the Ottomans. Epics to honour contemporary sultans in Persian and Turkish in the 10th-16th century (see LUKMÂN; H. Sohrweide, ed. H. H. Roemer and A. ÖZALP, in Studia preottomani e ottomani, Naples 1976, 101-4; H. Ayan, “Books of victory” on the wars of the Ottomans to his Iskender-nâme. Some last passages in his written sermons on religious and moral subjects remain in demand. Nabi’s long didactic Khayriyye, completed in 1825. As late as 1874, Diva (Ziya) Pasha published a three-volume anthology of classical poetry, with a long and popular study (HOP, v, 78-83; NÂMÎK KEMÂL [see KEMÂL, NAME] responded in prose. The vitality of the maftüna was sustained right to the end of Ottoman literature; the Islamist poet Mehmed 3ÂKÎ [q.v.] Ersoy brought a new ease to it, using it for conversational verses as well as rhetorical passages in his written sermons on religious and moral subjects.

4. In Urdu

The development of the Urdu mathnawi falls broadly into three periods: early, middle and modern. The early period is associated mainly with the Dakkani phase of Urdu literature. In Dakkani verse, the mathnawi constitutes the most popular form, and is represented by a large output of both religious and secular poems. Many of these are long pieces comprising several thousand couplets. Often they are translated or adapted from Persian sources, but not a few of them are works of an original character. The mathnawi reached its most productive stage in the 10th/16th and 11th/17th centuries with the emergence of Bidjapur and Golkonda as the main centres of Dakkani literature. Hitherto, the mathnawi was more concerned with religious subjects, but subsequently stories of love and heroism began to find increasing prominence in their content. In Bidjapur, under the enlightened patronage of the Adil Shahi dynasty (895-1097/1490-1686), many mathnawis were written during this period. In 1081/1670 by Tabrīzī, a love poem, written in imitation of Ibn Husain’s Persian epic of the same name, follows the model of Dāsāīn-i AmharHamza, and also borrows some topics from Firdawsi’s Shah-nāma (“The book of the East”). This poem, written in imitation of Ibn Husain’s Persian epic of the same name, follows the model of Dāsāīn-i AmharHamza, and also borrows some topics from Firdawsi’s Shah-nāma (“The book of the East”). This poem, written in imitation of Ibn Husain’s Persian epic of the same name, follows the model of Dāsāīn-i AmharHamza, and also borrows some topics from Firdawsi’s Shah-nāma (“The book of the East”). This poem, written in imitation of Ibn Husain’s Persian epic of the same name, follows the model of Dāsāīn-i AmharHamza, and also borrows some topics from Firdawsi’s Shah-nāma (“The book of the East”). This poem, written in imitation of Ibn Husain’s Persian epic of the same name, follows the model of Dāsāīn-i AmharHamza, and also borrows some topics from Firdawsi’s Shah-nāma (“The book of the East”).
critics. The mathnawi of Muhammad Mu'min Khan Ku'm (1215-67/1800-51), like those of Mir, provide a record of the poet's emotional involvements, whether real or imaginary, and have won recognition from literary authorities.

In the poetic creations of Nawab Mirza Shawk (1197-1288/1783-1871), whose real name was Tashad-dik Husayn, the Urdu romantic mathnawi with a personal motif reached its maturity. Shawk, who devoted his talents almost exclusively to the writing of mathnawi, is the author of three works in that genre, namely Farid-i 'ishk ("The Deception of Love"), Bahar-i 'ishk ("The Spring of Love") and Zaher-i 'ishk ("The Poison of Love").

Sharing honours with Mir Hasan's Sihr al-bayan ("The Magic of Eloquence"), which was finished in 1199/1784-5, and comprises approximately 2,500 couplets. It is a fairy tale of the conventional type containing a description of the rose-garden of Na'sin ("The Rose-garden of Na'sin") written in 1838 by Pandit Daya Shankar Na'sin (1811-43). This work has left a marked impact on contemporary and later poets, as seen from the mathnawi composed after its example. Its central plot revolves around the adventures of prince Tadj al-Muluk, whose search takes him into a fairyland where its terse description, its flights of fancy, and its choice of similes, words and idioms.

The modern Urdu mathnawi in its modern phase dates from the latter part of the 19th century, and its origin is linked with the campaign initiated at that time to achieve literary reforms. The reformers, dissatisfied with the glaza, advocated the adoption of the nash or "thematic poem" pattern after Western models. The mathnawi, with its tradition of continuous themes and a comparatively less inhibiting rhyme scheme, provided a ready-made form for the nash, and it came to be employed by the reformers as an effective literary instrument to popularise the new trends in Urdu poetry. The predominant theme of the modern Urdu mathnawi is social. As such, it differs from the earlier mathnawi which was identified with romantic subjects. In other respects also, it evokes differences from older models. Lengthy mathnawi like those composed in the past are now extremely rare, and the restriction imposed by custom on the type of metres to be employed by the mathnawi is no longer observed.

(Munirah Raḥmān)

MATHURA (earlier English spelling, now dis-continued, “Mutra”), an Indian city lying between Dīhī and Āgra, of considerable antiquity and of high reputation in India as a place of high religious sanctity for Hinduś and, formerly, for Dājīns and Bhuddhistś also; it was already a place of some renown when it became the eastern of the two Kūshāna capitals. It is, surprisingly, not mentioned in the Ḥadīth al-‘ālam, and only incidentally by al-Bīrūnī, although for Ptolemy it had been Mōdhura in his Geography. Its great reputation led to its being plundered by Mahmūd of Ghaznī in 408/1018 and by many later Muslim rulers, more in an excess of iconoclastic zeal than in a settlement of the district; notably by Sikandar Lōdī ca. 905/1500, who is reported to have destroyed many idols and to have prohibited head-shaving and ritual bathing. Some temples were allowed to be built in the tolerant reign of Akbar (the temple of Govind Deva at Bīndābād in the Mathurā district, built by Mān Singh [q. v.], even shows architectural borrowings from north Indian Muslim art); but Shāh-djāhān in 1646/1636-7 appointed a governor to “extirpate idolatry”, Arawgīzī some thirty years later destroyed its finest temple and built a mosque on top of it, and Ahmad Shāh Durrānī in 1703/1757 not only plundered the temples but butchered a large group of pilgrims. Otherwise, it saw little of Islam, the Mūwattīs, in whose territories it lay [see mīrū ṭa], not being renowned for their orthodoxy. A Dājīnī mosque, built in 1071/1660-1 (inscr. chronogram) by ‘Abd al-Nābī, a governor under Akbar, is an excellent building for its period, with fine inlay in encaustic tilework, four tall minārs, and two side pavilions with the curved-cotnic “Bengali” roof flanking the courtyard which stands 4 m. above road level; Arawgīzī’s own mosque is rather effete.

Bibliography: F. S. Growse, Mathura: a district memoir, Benares 1874 and many subsequent reprints, is highly praised but barely acknowledges the presence of Muslims. The mosque has not been adequately published. (R. F. Chisholm’s account of “Tiruomal Naik’s palace, Madura”, listed in Creswell, Bibliography, s.v. Mathura) is not at Mathura at all but at Madurā, the former capital of the Madura sultanate = Ma‘bar [q. v.].)

(John Burton-Pagge)

AL-MATLA (A.), the rising point of a celestial body, usually a star, on the local horizon. This concept was important in Islamic folk astronomy [see anxīl and manāzīl on some aspects of this tradition], as distinct from mathematical astronomy [see ‘ilm al-ḥay’a], because it was by the risings and settings of the sun and stars that the kibla [q.v.] or direction of Mecca was usually determined in popular practice. The terms used for the rising and setting points of the sun were usually maḥrūk and maḥrūk, maṭlā‘ being generally reserved for stars. The directions of sunrise at the equinoxes and solstices were usually associated with the corresponding zodiacal signs [see muntakār] or seasons, thus e.g. maḥrūk al-dājūn and maḥrūk al-dājūn both refer to winter sunrise, since the sun enters the sign of Capricorn at midnight.

In pre-Islamic Arabian folklore, the directions of the winds (see kibla) were defined in terms of astronomical risings and settings (see Fig. 1) and one such wind scheme is associated with the Ka‘ba itself (see Fig. 2). These wind schemes are recorded in later Arabic treatises on lexicography, folk astronomy, cosmography, as well as in encyclopaedias and various legal treatises on the kibla. The major axis of the rectangular base of the Ka‘ba points towards maṭlā‘ Suhayl, the rising point of Canopus, and the minor axis roughly towards maṭlā‘ al-ṣuyūţ, the rising point of the sun at midsummer. The later Islamic attempts to define the kibla for different localities in terms of astronomical risings and settings stem from the fact that these localities were associated with specific segments of the perimeter of the Ka‘ba, and the kiblas adopted were the same as the astronomical directions which one would be facing when standing directly in front of the appropriate part of the Ka‘ba (see Mārka iv).

The term maṭlā‘ was also used to denote the “time of rising” in the expression maṭlā‘ al-ṣā‘īr, daybreak or the beginning of morning twilight.

Bibliography: That given in the article KIBLA is to be supplemented with the information con-

Fig. 1. Four early Arabian wind schemes defined in terms of astronomical risings and settings and attributed to early Muslim authorities. I Khālid b. Sa‘fāwān. Limits of winds: 1-4 cardinal directions (defined in terms of the Pole Star and sunrise and sunset at the equinoxes); names of the winds: a sābā, b dānāṣ, c dābār, d ṭamāl. II ‘Alī b. Abī Ṭālib. Limits: 1, 2, 4 cardinal directions; names: as in I. III Ibn Dījandharī. Limits: 1 north, 2 summer sunrise, 3 winter sunrise, 4 south, 5 winter sunset, 6 summer sunset; names: a nakhbī, b sābā or khabīl, c ma‘tū, d qanīb, e dābār, f ṭamāl. IV Ibn al-‘Arafī. Limits: 1 setting (or rising?) of the Banāt Na‘ṣr, 2 rising of the Pleiades, 3 rising of Canopus, 4 setting of Vega; names: as in I.
Fig. 2. The most popular early Arabian wind scheme, in which the four winds strike the walls of the Ka'ba head-on. The rectangular base of the Ka'ba points in astronomically significant directions, and so the limits of the four winds are likewise astronomically defined. The rising of Canopus and the solstitial risings and settings of the sun were widely used for finding the kibla in popular practice, in order to ensure that one would be "facing" a particular wall of the Ka'ba, that is, standing in a direction "parallel" to the appropriate axis of the Ka'ba.

MATMĀTA, name of a large Berber people mentioned as early as the middle of the 3rd/9th century in the geographical work of Ibn Khurradadhbih as being among the thirty most important Berber tribes of this period. According to the majority of Berber genealogists cited by Ibn Khaldūn (including Sābīk al-Matmātī), the Matmāta, who were brothers of the Matghara, Sadina, Malzūza, Madyūna and Lamāya, belonged to the great Berber family of the Butr; they constituted, with the above-mentioned tribes, the family of Fājin, son of Izāzūt. However, some other genealogists mentioned by Ibn Khaldūn hold that the Matmāta belonged, along with the Barghāwāta and Azdāḏīja, to the Berber stock of Barānis (Brānes). There is also another genealogy of the Matmāta, according to which this tribe is regarded as belonging, along with the Barghāwāta and Azdāḏīja, to the great Berber family of the Zanāta, being descended from Djiūnā, ancestor of the Zanāta.

1. Tunisīa. It seems that the original homeland of the Matmāta, a people who were early converts to Islam and who adopted, around the middle of the 2nd/8th century the beliefs of the Ibāḍī sect, was the land situated in the south-east of Tunisia and more exactly to the west and south of the town of Gabēs, ancient Barghāna, Kābīs of the medieval Tāqānae, Kābīs of the mediaeval Arab geographers. They were called by this name by around 196/811, at the time when the Ibāḍī imām of Tāhār ʿAbd al-Wahhāb b. ʿAbd al-Raḥmān b. Rustām sent, on the occasion of his siege of the town of Tripoli, the Ibāḍī general Kāfān b. Salma al-Zawāgī to Kābīs with orders to besiege it. We owe this information to the Ibāḍī historian Abu ʿl-ʿAbbās al-Šākmākī (928/1522), who used it in his work several much older sources. In speaking of Kāfān b. Salma (in another passage of al-Šākmākī's work this person is called Salma b. Kaṭa), who was appointed governor of Kābīs in this period by the imām ʿAbd al-Wahhāb, the Ibāḍī historian in question adds that under this governor's régime, the Berber tribes of the Matmāta, Zanzafa, Dammar, Zawāgīya and others were still living outside Gabēs. It seems that the Matmāta in this period were already occupying the mountainous country called Djabal Matmāta, situated about 30 or 40 km. south of Gabēs. This country was also at one time called Djabal Lawāta, owing to the Lawātī family which lived there with the Matmāta. The survivors of the Matmāta and Lawātī still live there today. Apart from this area, the Matmāta also inhabited, in times gone by, the town of al-Hāmma (ancient Aqāe Tactapitanē), situated 23 km. to the west of Gabēs. According to Ibn Khaldūn’s Histoire des Berbères, al-Hāmma was founded by the Matmāta. According to the Khād al-Iṣbāy of ca. 587/1191, al-Hāmma was a very ancient town inhabited by the Matmāta. The Tunisian scholar of the 7th/14th century al-Tīḏānī mentions, in his account of a journey from Tunis to Tripoli, this place by the name of Hāmmār Matmāta, although in the view of this scholar, the Matmāta may already have left, ceding the place to the Zanāta who were divided into three groups: the Banū Tūḏiān, Banū Wartāḏiūn and Awlād Yūsuf.

The later history of the Tunisian Matmāta (who, apparently having adopted in the 9th/10th century the beliefs of the Ibāḍī sub-sect of the Nukkāriyya [q. v.], as had their neighbours the Banū Dammar, established in the south of the area occupied by the Matmāta in the Djabal Dammar) is little known. It seems that the Matmāta living in the Djabal of this name recognised the authority of the last representative of the Almoravīd family of the Banū Ghāniyā, Yahīya, who, having his seat and base of operations in the Bilād al-Djārid, extended his power, around 1200 A.D., over the whole of Ifrikiya. In any case, the sayyid Abū Ibāš who pursued, in 603/1207, in his name of the brother the Almohad caliph al-Nāṣir, the Almoravid rebels in Ifrikiya, subdued the country situated behind Tripoli and chastised, according to Ibn Khāldūn, “the Banū Dammar, the Matmāta and the Naẓūsī,” the inhabitants at that time of the vast mountainous crescent which stretches from Gabēs to ancient Leptis Magna, on the edge of the plain of Dījīfā (Djeffāra). Under the domination of the Turks, the inhabitants of the Djabal Matmāta and the Djabal Dammar who, until this period, had remained practically independent and had not recognised the authority of the sovereigns of Ifrikiya, refused to pay taxes. The Turkish bey of Tunisia, Muḥammad Bey (1631-63 A.D.), had a fort built in the Matmāta Mts. in order to contain the rebels. We owe this information to the Tunisian historian Ibn Abī Dinār, who dealt with this event in al-Mu‘īns fi ʾibāb irīkiyya wa-
In the 18th and the first part of the 19th century, in the central Maghrib. One should mention here a clan of this tribe living to the west of Ouarsenis and Sersû and to the west of the town of Yalal (Hill of our maps) under the domination of the dynasty descended from Muhârîd b. al-Hasan, related to the Idrîsids of Morocco, who ruled in this period in Tlemcen and the district around it. This clan of the Matmâta had nothing in common with the Matmâta of Ouarsenis, who were Ibâdîs and who recognised the suzerainty of the Rustamîd imâms of Tâhârt. One of the clans of the Matmâta of Tlemcen was in control of the town of Ayzrâdji (?) situated near the western fringes of Tlemcen, probably in the area of the modern Algero-Moroccan frontier.

The history of the Matmâta of the Tâhârt district, after the fall of the Rustamîd imâmâte and the forced conversion of this clan to Shî'î beliefs at the beginning of the 4th/10th century, is little known to us. We know, however, that they took an active part in the war which broke out between the Zirî princes Hâmâd b. Bulûgûn (405-19/1015-28) and Bâdîs b. al-Manṣûr (396/406/996-1016), Ibn Khâldûn even mentions a famous amîr of the Matmâta of the Tâhârt district; he was called Zîrî and lived towards the end of the 4th/10th century and beginning of the 5th/11th; defeated by the Sanhâdja Zîrîds, he was forced to go to Spain.

The survivors of the powerful Matmâta clan of the Tâhârt district were still living in this area in the 19th century. They were living to the north of the plateau of Sersû, in Thaza (Tâza) and the surrounding district.

3. Morocco. Some advanced groups of the Matmâta pressed on, probably a little before the 4th/10th century, as far as Morocco. A group of this people settled in the territory of Nûkrû, in the eastern Rif, where they are mentioned by al-Bâkî in the 5th/11th century. Al-Yâkûbî (3rd/9th century) mentions also the clans of Matmâta settled in the town of Fûlûsûn (?) situated to the east of the town of Nûkrû. Another clan of the Matmâta lived on the upper course of Wâdî Moulouya, in an area called Matmâta Amâskûr, to the south of Fâs. It is mentioned by al-Bâkî and by Ibn Khâldûn. The latter author also speaks of a mountain called Matmâta situated between Fâs and Sefrou (Sufrây). One should add that there were also some Matmâta between Fâs and Tâza; furthermore, a place in this area still bears the name Matmâta.

Finally, there was also a group of Matmâta settled in the far west of Morocco, in the region called Tâmâsnâ, where there existed in the Middle Ages a kingdom founded by the anti-MuslimBerber tribe of Barghawâta. [9.5.2.2.3.6.7.9.76] The Matmâta of Tâmâsnâ formed part of the confederation of Barghawâta and professed the faith of this tribe. We know of it through the account of Zammûr, sent by the Barghawâta to the caliph of Cordova in 352/963, which is cited in the Kîtâb al-Ma'idîl uwa l-mamâlik of al-Bâkî. Zammûr gives in this account two lists of Berber tribes of Tâmâsnâ under the suzerainty of the Barghawâta empire, that is, those who profess the Barghawâti faith and the Muslims. The Matmâta of Tâmâsnâ are mentioned in the first of these lists. The history of this clan of the Matmâta is entirely unknown to us; however, we know, thanks to al-Idrîsî, that it still existed in the 5th/12th century.

4. Spain. There were also some Matmâta groups among the Berber tribes who went across to Spain at different periods. We know this from Ibn Khâldûn, who gives us some details in his Histoire des Berbères. We have already mentioned a famous Matmâta amîr of...
the central Maghrib called Ziri, who lived towards the end of the 4th/10th century and beginning of the 5th/11th century; this amīr was originally chief of the Matmātā of the Wānhār (Ghirānīs) plateau, as well as of Qaţādū, a mountain dominating the country around Tāḥart. Defeated by the Sanḥādja, he crossed into Spain, where he went to see the powerful Umayyad waẓir al-Maṃṣūr b. Abī 'Amīr [q.v.], who received him with alacrity and enrolled him among the Berber amīrs admitted to his service. It is very likely that Ziri was accompanied, on his journey to Spain, by members of his household and perhaps by several Matmāt warriors; he soon became one of the most distinguished officers in al-Maṃṣūr's Berber corps. After the latter's death in 392/1002, his sons al-Μuẓaffar (d. in 398/1008) and 'Abd al-Rahmān continued to treat Ziri with the same favour as their father. However, from the time of the revolt of the Umayyad Muhammad II b. Ḥiṣām b. 'Abd al-Dabāb, who had become caliph with the title of al-Mahdī. The end of Ziri is unknown to us. According to Ibn Khaḍūn, he stayed in the service of al-Mahdī until the great revolt of the Berbers in Spain. The year of his death is unknown.

AM, lord of 40/1036-48, or the Hammudid prince in the service of al-Mahdī until the great revolt of the Berbers in Spain, is Kahlan b. Abl Lawa, one of the most famous Berbers in Spain. The year of his death is unknown. According to Ibn Khaḍūn, he probably originally came from Wānšaṭarīg and Qaţādū and who crossed into Spain, is Khālīn b. Abī Lawā, one of the most famous Berber genealogists. He made his way to al-Nāṣir, first ruler of the Banū Hammūd dynasty (is this the Muhammad, lord of Al-Qādisiyyah who reigned in 428-430/1036-48, or the Hammūdī prince al-'Abī, lord of Malaga in 1001-21 and 1022-25?).

Finally, one should add that the greatest Berber genealogist, Sābkū b. Suleymān b. Ḥarāb b. Mūlāt Ibn Dunās, who is one of Ibn Khaḍūn's sources, belonged to the Matmāt tribe.

LA (s.v.), which specifies that it is the plural matmār which should be applied to underground silos where grain is stored. In fact, the singular currently denotes a silo, and the plural, a group of silos guarded by a tamāṭar and called mars in Morocco (ratba in Takrūna, where the guardian is known as ratāṭā; W. Marçaux, Glossaire de Takrūna, v, 2408-9, with discussion of the figurative expressions drawn from the root).

In the Maghrib, in addition to the communal granaries [see AGADIR], silos were the most usual method of storing cereals. The authorities sometimes dug out such silos, which reached vast sizes. Thus the 'Alawīd sultan Muhammad b. 'Abd Allāh [q.v.] caused to be built at Marrakesh, between 1173 and 1181/1760-8, two enormous silos on top of which was an inclined plane from which the grain, brought thither by beasts of burden, was despatched down chutes to the different parts of the subterranean storehouse, which was not visible from the outside (G. Höst, Nachrichten von Marokos und Fes, Copenhagen 1781, 75-7; cf. J. Delacrozières, Habs Zebbaa à Fès Djedjīd, in IV Congrès des Soc. savantes, ii, Algiers 1929; G. Deverdun, Marrakech, i, 495). In Algeria, as early as 1848, an officer had presented a project for setting up reserve silos (or "matmore") and this was actually done some years later (see Capasset, Mémoires sur le commerce du tabac, Paris 1908, Algiers 1913, 409-53).

The technique for the excavation of silos differs little from one region to another. In general, the opening is narrow in such a way that it may be hermetically sealed, and the cavity is enlarged lower down, although attaining no great depth. If the nature of the soil requires it, the interior walls are lined with the object of protecting the cereals stored from humidity. But the latter must also be shielded from some subtle dangers, so that ensilage, entry into a silo and the withdrawal of a quantity of grain, are surrounded by precautions of a magical nature which, as regards Berber Morocco, have been fully documented by E. Laoust, Mots et choses berbères, Paris 1920, 409-53.

The singular matmār (or matmār, from matmār, with the genitive also has the sense of "pit") is a toponym which may also be frequently encountered (see Le Strange, Lands, 138). It is in any case the name of a locality in 'Irāk close to Hilwān (see al-Maṣūdī, Marājī, § 359; Ibn Hawkal, 358, Fr. tr. Kramers-Wiet, 350; Ţāhī, ed. Ţāhī, 562), while Ḥāṣṭ Maṭmār, or simply Maṭmār, was the name for homes of cave-dwellers situated in the "Syrian March" (see A. A. Vasilev, Byzance et les Arabes, ii/1, Brussels 1968, 82; M. Canard, H'undanides, 730; cf. Ibn Hawkal, 200, Fr. tr. 194-5; al-Maṣūdī, Tanbihī, ed. Šāwei, 151, which seems to give to maṭmāra the sense of "village of cave-dwellers"); it should be noted that the (subterranean?) cells of monks are called maṭmāra by al-Dǎlībī, Hayawān, iv, 458-9.

Besides the chateau from the Spanish comedy (Matamores) whose (masculine) name in French is Matamore, the traveller Jean Moquet has noted in his Voyages en Afrique, etc., 1617, 166, a feminine matamore denoting a large and deep pit, and C. P. Richelet (Dictionnaire français, ed. of 1693) supplies the following definition of the same term: "It is a prison where tormenting the slaves. A flight of 20 or 30 steps leads down to it. Air and light are supplied only through a
small aperture. The slaves there are horribly over-
crowded ... A. Gallard, Histoire d'une ... on mathe-
matics was written in 923/1517 and dedicated to Sellm
I (918-26/1512-20). He had started by this time also
beneath fortresses or in the country, the only contact
with the world outside is through very narrow ven-
tilators” (see also R. Brunschvig, Hafside, i, 449-50
about a matmuna in Tripoli). Dozy’s account applies to
Muslim Spain, where matmuna has given rise to the
Spanish word mazmorra (see J. Corominas, Diccionario
critico etimologico de la lengua castellana, Berne 1954-7, iii,
306-9), which denotes, like the Portuguese mazmorra or
matamorra, a subterranean prison (on those which have
been discovered at Granada, see L. Torres Balbás,
Las mazmorras de la Alhambra, in al-And., ix/1 (1944),
198-210; see also R. Arié, L’Espagne musulmane au

MATN (A.), a term with various meanings, of
which that of text of a hadith [q.v.] is to be noted.
Matn already appears with the sense of “text” in
pre-Islamic poetry, and has been used thus in Arabic
literature up to the present day. It denotes especially
the text of a book as distinguished from its oral
explanation or its written or printed commentary.
In connection with traditions, matn denotes the content
or text itself, in distinction from the chain of
traditionists who have handed it down (ismā’ [q.v]).
The choice of this term to designate the body of a
hadith led Goldziher to put forward the view that the
traditions were put into writing at an early date, but
he recognised that he was unable to determine the first
occurrence of this. However, it should be remarked
that the matn has rarely been the subject of textual
criticism on the part of the fakāhā and, as G. H. A.
Juyboll observes (The authenticity of the tradition
literature, Leiden 1969, 139), if the criteria which
modern authors enumerate had been applied, there
would have been very little left of the “authentic” col-
lections.

MATRAH (lat. 23° 38 N., long. 58° 34 E.) the
largest city and major port of the Sultanate of
Oman. Matrah was only a small fishing village in
September 1507 when Afonso d’Albuquerque an-
chored his fleet there in preparation for the sacking of
Maskat [q.v.]. The Portuguese later fortified Matrah
with one fort on the waterfront and a second on a hill
at the southwest corner of the town. The Ya’āribī
imān Sulṭān b. Sayf expelled the Portuguese from
Matrah in 1651. During the Omani civil war of the
early 18th century, the city was occupied by Persian
troops, who were driven out by Ahmad b. Sa’id of
the Al Bā Sa’id [q.v.] in 1741. Since the establishment of
the Al Bā Sa’id dynasty, Matrah has been subjected
to attacks by opponents of the régime on several
occasions.

Matrah’s rise to commercial prominence began
during the period of Portuguese occupation. Maskat
was the entrepot for Portugal’s trade, but that city was
made inaccessible to the rest of Umān by the moun-
tains surrounding it. Matrah, with its excellent har-
bour and ease of access to both Maskat, only 4 km.
distant by water, and to the population centres of
interior Umān via Wādī Samā’il, came to dominate
the domestic trade. In addition, Matrah had impor-
tant weaving and ship-building industries. With Maskat’s decline as an entrepôt during the 19th cen-
tury, Matrah’s commercial importance increased,
and the construction of Miḥnā Khāsī in the early 1970s
has insured the city’s dominant position.
Because of its commercial activity, Matrah
historically has had a cosmopolitan population, with
Arabs, especially Banū Dījbīr and Banū Hasan
tribes, Balūcīs, Africans, Persians and Indians all
residing there. Among the Indians, the Liwātīyya
from Sind are distinctive. The Liwātīyya (sing. Lītī’),
who were originally Khāleda Ismā’īlīs but converted
their Ismā’īlī faith under Iğnā ‘Aḥṣaf Shī’ism in the 1860s, have been in
Matrah for more than 100 years. Although very active
in business, the Liwātīyya were, until recent times,
so socially isolated in a walled portion, probably the
original Portuguese fort, of Matrah known as Sūr
Liwātīyya, from which all outsiders were excluded.
During the 19th century, many Hindu Banyans
began leaving Maskat and settling in Matrah to take
advantage of Matrah’s international flavour.

Bibliography: The best description of Matrah
during the Portuguese period is Pedro Barreto de
Resendes, Livro do Estado da India Oriental, 1464,
mss. B. L., Sloane 197, Sch. no. 11690, fols. 124-7.

Liwātīyya.

(C. H. Allen, Jr.)

MATRAKČI, NAṢŪḤ AL-SILĀḤĪ AL-MATRAKĪ, OR Nasīḥ b. Karagöz b. ‘Abd Allāh al-Būmawī (d. 1271/1754), outstanding knight, inventor of new forms of the game of matrak (a contest with a stick, cudgel or rapier for training and knight-
errantry), mathematician, historian, calli-
ographer and painter of the period of Suleyman the Magnificent (926-74/1520-66).
He was a student in the Palace School during the
reign of the Bayezid II (886-918/1481-1512). His first
book, Qomāl al-kutub wa-kamāl al-kusūf al-matmūt al-
mathematics was written in 923/1517 and dedicated to Selim I (918-26/1512-20). He had started by this time also
to distinguish himself as a knight. He began his career as an historian to translate al-Tabarî's famous history from Arabic into Turkish in 926/1520. The title of his translation was as an historian to translate al-Tabarî's famous history from Arabic into Turkish in 926/1520. The title of his translation as the fourth volume of his work, which includes the history of the Ottomans from the beginning to the year of 998/1581. We have manuscripts from this period dealing only with the time of Bayezid II, Selim I and Süleyman I, such as Ta'rikh-i Sultan Süleyman wa-Sultan Selim, the illuminated copy of Ta'rikh-i Sultan Selim, the illuminated copy of Ta'rikh-i Sultan Bayezid, the illuminated copy of Beşyân-i Menazzî-i Sefîr-i Ta'rikh (944/1537), Süleyman-name (926-44/1520-37), Feth-name-i Karabogaz (945/1538), the illuminated copy of Ta'rikh-i Feth-i Şahsî (950/1541), and the second part of the Süleyman-name (950-8/1541-53).

He was also the painter, with a group of other artists, of his illuminated historical works indicated above. He participated in different expeditions and sketched at least the outlines of his documentary paintings of towns and cities in their own localities. Meanwhile, a letter of 936/1529 of Sultan Süleyman praises him as the master knight of his time, incomparable in the whole Ottoman Empire. He completed his Tuhfat al-ghazâât on the art of using various weapons in 939/1532, and the second part of the Shiklos history, the Umdat al-hisâb (939-41/1532-5). Feth-name-i Karabogaz (944/1537), and the second part of the Ta'rikh-i Feth-i Suleyman-ndme (1543-51).

He was also the painter, with a group of other artists, of his illuminated historical works indicated above. Feth-name-i Karabogaz (944/1537), and the second part of the Ta'rikh-i Feth-i Suleyman-ndme (1543-51).
posteriora, including the commentary of Alexander and Themistius's paraphrase, the Sophistici eloqui (revision of an older version, cf. Badawi (ed.), *Manṭiq Āristi*, 75-234) contains the *Analytica* posteriora in Book 11 of *Organon* (cf., its paraphrase by Themistus, *De generatione et corruptione* with the commentaries of Alexander and Olympiodorus, the *Meteorologica* with Olympiodorus's commentary, and book Lambda of *The Metaphysica* with Alexander's commentary as well as Themistius's paraphrase. Only three of these have survived:

(c) Mattā's translation of the *Ars poetica* (edd. D.S. Margoliouth, London 1887; J. Tkatsch, Vienna 1928-32; cf. Badawī, Medīnat al-ulmūn, ed. A. Amlin and A. al-Zayn, ii, 153-4; G. Endress, *Ars poetica*, ii, 153-4; A. G. Brown, *Averroes and the Christian philosophers in Baghdad*, notably `Ibād b. Zur`a, al-Ḥasan b. Suwār, and the Muslim Abū Sulaymān al-Sijistani [q.v.]. On the other side, a vehement polemic, surging since the traditionalist reaction of the mid-9th century, was directed by the religious establishment of the *ṭalāf* al-ṣalāhyya against the claim of Greek logic and philosophy to universal truth, and more especially against the influence of logic apparent in the works of his contemporaries like Ibn al-Sarrād [q. v.] and his pupil al-Rummānī [q. v.] (cf. *Fihrist*, 62; Ibn al-Anbārī, *Nuzhah*, ed. Amer, 189). The attack led by Abū Sa`īd al-Sirāfī against Mattā in the *mašīf* of the vizier Abū `l-Fāth Ibn al-Furāt in 326/937-8, as reported by al-Rummānī to Abū Hāyān al-Tawhīdī (al-Imārī *wa l-mu'āna*, i, 107-28), is an impressive illustration. The leader of the logicians (depicted by al-Tawhīdī's infortunates as a covetous drunkard who sells his learning for profit) is shown, not without malicious tricks, to be unable to defend the philosophers' claim that logic is a tool necessary "to know truth from falsehood, veracity from lying, good from bad", and to dispute his opponent's argument that the only way to "logical speech" (*našī`u*) is through the grammar of a particular language. But if Mattā had no more to say to his unsympathetic audience than the report credits him with, his pupils al-Fārābī (cf. G. Endress, *The works of Y. b. `A*, 45f.), defending logic as universal grammar while assigning to grammar the rules peculiar to the utterances (*ta`āf*) of a particular language, made up for his silence.

MATTER [see hayûla].

ALMATURIDt, ABU MANSTtR MUHAMMAD B.
MUHAMMAD B. MAHMUD AL-SAMARAKANDI, Hanafi theologian, jurist, and Kûrû' commentator, founder of a doctrinal school which later came to be considered one of the two orthodox Sunni schools of kalâm (see MATURIDIVYA).

His nisba refers to Mâturid (or Maturit), a locality in Samarqand. On the basis of a misunderstood reference of al-Sâmânî (fol. 498b) to his son-in-law, some late sources consider him of distinguished Medinan descent and call him al-Anšâri. His main teacher, Abû Naṣr Ahmad b. al-`Abbâs al-`Iyâdî, was killed between 261/874 and 279/892, probably closer to the latter date. Al-Mâturidi thus must have been born before 260/873, especially since he is described as having been highly esteemed by his teacher, who would not engage in scholarly debate except in his presence. According to some late authors, al-Mâturidi also studied under another of his teacher's teachers Abû Sulaymân al-Djûşdîjânî, Naṣâyîr b. Yâhâyâ al-Bâhî (d. 268/881-
2) and Muhammad b. Mukâtîl al-Râzî (d. 226/841). The latter cannot have been his teacher, and the report is most likely unreliable also in respect of the other two. Not much else is known about his career. He is described as leading an ascetic life and as occasioning miracles (kamâlâ). The death date given by the later sources, 336/947 and 332/943. Al-Mâturidi's tomb in the cemetery of Djâkarîfizâ in Samarqand was still known in the 9th/15th century. Among his students were Abû Ahmad al-`Iyâdî, son of his teacher Abû Naṣr, Abû l-
Hasârî, and Abû al-Kârim b. Mûsâ al-Bâzdawî (al-Pâzdâwî), great-grandfather of Abu l-
Yûsîr al-Bâzdawî.

Of al-Mâturidi's works, the published text of the Kîsâb al-Taṣâlî (ed. F. Kholeif, Beirut 1970) is definitely authentic. The book, however, seems to have existed in different versions since some quotations from it in Abu l-Mû`în al-Hasaﬁ's Ta'bîrat al-
adillâ is missing in the edited text (see D. Gimaret, Histoires de l'Acte humain et théologie musulmane, Paris 1980, 175-8). Al-Mâturidi's extensive Kûrû' commentary K. Ta'wîlât al-Kûrân (vol. i, ed. Ibrahim `Awadâyân and the Sayyid `Awadâyân, Cairo 1391/1971) was, according to its commentator `Alâ' al-Dîn Abû Bakr Muhammad b. Ahmad al-
Samarkandî (d. ca. 540/1145), assembled by his pupils and therefore less obscure than his other works which were written by himself. Also attributed to al-
Mâturidî are three short published works, a Risâla fi l-
`Askâ`î'd, a K. al-Taṣâlîh (both ed. Y. Zûrûrîn, Islam akadîne dair eki metiner, Istanbul 1953), and a Sâghr on Abu Hâfîs al-Fîkh al-akbar. These works appear to have been composed by later representatives of the school on the basis of his doctrine. Abu l-Mû`în al-
Hasaﬁ does not list them among his works. He men-
tions, on the other hand, the following, apparently lost, books: K. al-Mâkûlât; K. Bayân wa`m al-Mu`tazîa; refutations of three books of the Mu`tazîa Abu l-
Kâsim al-Bâhî (al-Kâbî) (d. 319/932), his K. Awâdî al-adillâ, K. Ta'bîrat al-qâdsî, and his K. fi u'ddî al-
fu'a'd; a refutation of al-Uñîs al-kâshîma by the Mu`tazî Abu `AbdAllâh al-Bâhî (al-`A`zî); a refuta-
tion of a K. al-Inâma by an Ùmamî Shî'î author; two refutations of the Ùsmâ'îls (Karâmîa); and two books on legal methodology (Uñîs al-fîkî), K. Mu`âkîal al-sharî`î'î; and K. al-qâdsî.

In contrast to al-Ashârî, the founder of the other Sunni kalâm school, who espoused the doctrines of Hanbali traditionalism, al-Mâturidi adhered to the doctrines of Al-Farabî. His works were transmitted and elaborated by the Hanafi scholars of Bâlkh and Transoxania. He developed previous Eastern Hanafi teaching systematically in arguing against the positions of the Mu`tazîa, in particular, their chief representative in the east Abu l-Kâsim al-Bâhî; of the Karrâmiyya, Sunni traditionalists (Haqîwiyya); of the Ùmamî Shî'â; and of the Ùsmâ'îls, represented in Trans-
oxania by Muhammad b. Mu`zîad al-Hasaﬁ (d. 332/943). Of other religions, he refuted the views of Christians, Jews, Zoroastrians, Manichaeans, Bardesanes and Marcionites (see G. Vajda, Le témoignage d'al-Mâturîdî sur la doctrine des Manichéens, des Dayâsâtiyân et des Marcionites, in Arabica, xii [1966], 1-38, 113-28). His doctrine was in substance generally more rationalist and, with the exception of his Murji`î def-
inition of faith (imãda), closer to Mu`tazîzam than al-
Aší'ârî's. In his concepts and technical terminology he was, however, less influenced by the Mu`tazîa than al-Ashârî, who had been a trained Mu`tazî before his break with them.

In substantial agreement with the Mu`tazîzi posi-
tion, al-Mâturidi held that man is able and obliged to gain knowledge of God and his obligation to thank Him through reason independent of prophetic revela-
tion. In respect of the attributes of God, he, like the Mu`tazîa, allowed and practised metaphorical inter-
pretation of anthropomorphous expressions in the Kur`ân, though he rejected some specifically Mu`tazî interpretations. In other instances he relied on the traditionalist bîla kayf formulation, insisting on unquestioning acceptance of the revealed text. Against the Mu`tazîa, he considered divine attributes like knowledge and power as real and eternally subsis-
ting in his essence (kâmûna bî l-dhâtî). Although he accepted the conceptual distinction between attributes of essence and attributes of act, he main-
tained, against the Mu`tazîa and al-Ashârî, that the attributes of act are equally eternal and subsistent in the divine essence. Thus he insisted that the expres-
sions "God is eternally the Creator" and "God has been creating from eternity (lam yasal kalîmî)" are equally valid, even though the created world is tem-
poral. In particular, his doctrine that the takwil, bringing into existence, was eternal and distinct from the makawwam, the existing things, became a famous point of controversy with the Aší'ârîs. Al-Mâturidi affirmed the vision (ru`ûya) of God by the faithful in the hereafter, but consistently rejected the possibility of tâhîk, which he understood as grasping, of God by the eyes. He held speech (kalâm) to be an eternal attribute of God which could, however, not be heard. Like the Mu`tazîa, he thus affirmed, in respect to Kur`ân, IV, 165, wa-kallama lâhu Mûsâ takîmî, that God created a voice which He made Moses hear.

In regard to predestination and human free will, al-
Mâturidi's position was intermediate between the Mu`tazîa and al-Ashârî. He affirmed that the acts of man are created by God, subject to His will and decree. While they are thus acts of God in one respect
They are in another respect really, and not metaphorically, man's acts and his free choice (al-'ihtiyāt). Al-Māturīdī insisted that God will lead astray (adfalla) only those who, He knows, will choose the wrong way and will guide only those whom He knows will choose the straight path. The initial choice is man's, not God's as for al-Ashʿārī. Al-Māturīdī thus also rejected the predestinarian interpretation of the primordial covenant (miḥābāt), according to Kurān, VII, 137, according to which God separated the chosen from the condemned before creation and the latter confessed belief in His Lordship falsely under duress, though it might be said such incantation is valid for opposite acts. Capability (istiṭṭāʿa) is of two kinds, one preceding the act, the other simultaneous with it. The imposition by God of something beyond man's capacity (takfīl maʿā l-yūtak) is in principle inadmissible.

Faith (imān) was defined by al-Māturīdī essentially as taṣdiq bi l-kalb, inner assent, expressed by verbal confession (ṣīrār bi l-lisān). Works (asrāʿ) are not part of faith. Faith cannot decrease nor increase in substance, though it may be said to increase through renewal and repetition. Al-Māturīdī condemned istiṭṭāʿa, adding the formula “if God will” to the affirmation “I am a believer”. The faithful sinner may be punished by God but will eventually enter Paradise. The traditionalist tenet backed by al-Ashʿārī that faith is uncreated was rejected by al-Māturīdī.

Theological doctrine of the Hanafi scholars of Samarkand spread in the 4th/10th and 5th/11th centuries throughout Transoxania, eastern Khurāsān, Balkh and among the newly converted Turks in the Karakhanid territories of Central Asia. In the 4th/10th century there were some differences on a few theological questions with the Hanafi scholars of Bukhara, who were more strongly influenced by traditionalist, anti-rationalist tendencies. These were mostly harmonised by later Māturīdī scholars with compromise solutions. Māturīdī teaching remained virtually unknown west of Khurasan, where the traditionalist tenet backed by al-Ashʿārī was more readily recognised as the founder of a theological school na-

Most important in the dissemination of Māturīdī doctrine was the creed ('Aqā'id) of Naḍim al-Dīn Abū Ḥāfīz al-Nasafī (d. 537/1142) which closely followed the ideas of al-Muḥiṭīn's formulations in his Tashrīṭ al-adīlā. It achieved many commentaries and glosses for scholastic teaching and was repeatedly revised. Another popular Māturīdī creed in verses, known as al-Lāmiyya fi 'l-tawhīd or al-Lāmiyya fi 'l-tawhīd wa Badr al-ammīr, was composed by 'All b. Uṣūhī al-Abū (d. 569/1173) and was later explained in numerous commentaries, some in Persian and Turkish. Also in the 6th/12th century, there were Nūr al-Dīn al-Ṣābīnī al-Bukhārī (d. 580/1184), whose K. al-Bidāya min al-kifāya, extracted from his larger K. al-Kifāya fi 'l-khiṣaṣīya, has been published.

During the later Māturīdī authors, Abu 'l-Barakāt al-Nasafī (d. 710/1310) composed a popular brief treatise Umdat al-'aḥkām li-ahl al-ṣunnah with his own commentary entitled K. al-Imām fī 'l-ṣayla, both strongly influenced by Abu 'l-Muḥiṭīn al-Nasafī's Tashrīṭ al-adīlā. A theologian with a more personal pro-
c

thesis, he himself seems to have progressively moved towards Aḥṣā'arī positions. This is apparent in his later K. al-Makāṣīd and his own commentary on it, which were patterned after al-Iḍāqī's K. al-Mawdūf, and its commentary by the Ṣāfir al-Djurjānī. The Egyptian Hanafī theologian Kamāl al-Dīn Ibn al-Ḥumān (d. 580/1184), whose K. al-Biddya min al-kifāya, his acts, and the Murdžī definition of faith as assent of the equality of Ashārī and Māturīdī, and its commentary by al-Ṭabarī, i, 3026). One would assume the ṣimil or ẓāhīb al-ma'ṣūna of this period to have been a fiscal officer, especially as he was often appointed to the ḥārādī as well, or to the civil administration in general (al-Ṭabarī, i, 2486, 2524; ii, 755; Ibn Sa'd, v, 277); ma'ṣūna is even used as a global term for private income from public funds (al-Ṭabarī, i, 3026). One would assume the ẓāhīb as bringing accused persons to court, executing verdicts and collecting fines (Ḥilāl al-Ṣabīr, Rusūm ddr al-

MAURITANIA [see MūRĪTANIYĀ]. MAURITIUS, an island of the south-western Indian Ocean, one of the three Mascarene Islands (together with Réunion and Rodrigues), located some 2,300 miles (3,680 km) north-west of Cape Town, a similar distance south-east of Aden, and 2,000 miles (3,200 km) south-west of Colombo.

Although probably known to Arab navigators from as early as the 12th century A.D., none of the Mascarene Islands (or of the more northerly Seychelles) were ever colonised by Muslims—or any other—peoples before their discovery by Europeans in the early 16th century A.D.

During subsequent centuries, the Island of
Mauritius (named by the Dutch, after the Stadthouder Maurice of Nassau in 1598) passed successively under Dutch, French and British suzerainty, falling to the latter power during the Napoleonic Wars on 3 December 1810. While Europeans discovered Mauritius in the early 16th century made no attempt to settle or develop the Mascarenes, Dutch settlers began the colonisation of Mauritius in 1638 when numbers of European convicts, together with slaves from Indonesia and Madagascar, were landed on the island. It is probable that most of the Indonesians, and certainly some of the Madagascar slaves, were Muslims. By 1710, however, Dutch attempts at settling Mauritius ended in failure, and during the subsequent French administration of the island slave labour was imported almost exclusively from Madagascar and the Swahili Coast. Few of these enforced settlers are likely to have been of Muslim origin, however, for the African Muslims of the Swahili Coast tended to be the controllers, rather than the victims, of the Arabian Sea slave traffic.

Muslims, therefore, came to Mauritius in large numbers only after the British seizure of power in 1810 and, more particularly, after the abolition of slavery in 1835 and the introduction of large-scale indentured labour from the Indian subcontinent, for work in the sugar plantations, at about the same time. Indian migrants to Mauritius during the mid-19th century tended to be drawn mainly from the poor labouring classes of Bihar, the United Provinces (Uttar Pradesh), Orissa and Bengal (migrating via Bombay and Calcutta), or from similar social groups in Tamil Nadu and southern India (migrating via Madras). In this way, nearly 450,000 Indians entered Mauritius between about 1835 and 1807, with a few additional South Asians entering the colony in 1922-3. The indentured labourers who made up the great majority of Indian migrants were generally engaged on five-year contracts, but during the whole period of immigration only 160,000 were returned to India, the great majority remaining behind the end of their contracts to swell the population of Mauritius. In addition to these poorer, indentured classes, comparatively well-to-do Indians, particularly Muslim traders from Gujarat (erroneously known as "Arabs" in contemporary Mauritian circles) and Chettiar port. The mosque is the focal point of Mauritian Muslim society, around which are formed some of the larger mosques (constituted as a wakf) are also well represented (ca. 7%), whilst smaller identifiable groups include the Shi'a (0.8%), the Bohras (q.e.) (0.3%) and (counted as Muslims for census purposes) a flourishing Ahmadiyya [q.e.] community (ca. 9%). According to Benedict (1965), in general terms Muslims Mauritians are more highly organised on a religious basis than the Hindu Indo-Mauritians. This is related to their minority status, to the appearance early in Mauritian history of wealthy Muslims who supported their religion through waqf endowments, and "most of all to the nature of Islam itself, which lays down tenets for a religious community." In 1965, there were 65 mosques on the island, governing of each being in the hands of a mutawali or manager, usually elected by the congregation. All but one of these mosques have been constituted as a waqf endowment for purposes of support. The mosque is the focal point of the Mauritian Muslim society, around which are formed jamaat or religious associations. In 1952 the total Muslim population of Mauritius was listed as 77,014; by 1962 this had reportedly risen to 110,332.

MAWAKIB (a., sing. mawkiib), processions.

1. Under the 'ABBASIDS AND FATIMIDS

The basic meaning of procession (mounted or unmounted), cortege, is found in hadith (al-Bukhari, Bad' al-khalk, 6; Ibn Hanbal, iii, 213; al-Darimi, 2695). This is the precise sense given in the dictionaries, and that used by the Umayyads, 'Abbasids and Fatimids, often to describe the cortège of an amir, waizir, or other official (see, e.g., al-Tabari, ii, 1731; Hilal al-Sabi, Rusum dar al-khilafa, 9-10, 12, 14H).

By the 4th/10th century, it had acquired the broader meaning of audience as well as procession. Examples of the usage of mawkiib abound in the literature. In addition to the references for the 'Abbasids in Sourdrel, Vizirat, ii, 452, 653, 684, 685, see also Ta’jdir al-amum, 195 (yasaam mawkiib wa-daadaa gidida), and al-Sabi, Rusum, 71-2 (under rules for hajjaha), 78, 90; for the Fatimids, al-Kalkashandi, Subh, iii, 481, 494 (qatlas al-khalifah fi l-mawkiib). The phrase most often designating an audience is qawm al-mawkiib. In both 'Abbasid and Fatimid sources, this seems to refer specifically to the general audiences held on Mondays and Thursdays (Hilal al-Sabi, Historical remains ... ed. Amedroz, Leiden 1904, 242, 244 (Thursday); Ta’jdir, 195, refers to a Monday; al-Kalkashandi, Subh, iii, 494, 496, 518, 523). For details on audiences, see MARASIM.

There was a strict protocol to be observed when accompanying the ruler (al-mu'asir) in procession. The most important and off-repeated exhortation was to be vigilant in keeping to one’s assigned place (yalzam al-mawdi^ alladhi fihi rutbatuhu), reflecting the emphasis on tariqah, arrangement of the mawkiib according to rank. The rider must know the position of the caliph, without, however, turning too often to see him. He must maintain a silent and dignified bearing, speaking only in response to the caliph’s questions. He should not ride where the caliph will get wind of his horse or where dust will be kicked up into his face.
He should not enter the caliph's shadow; but he must ride on the sunny side of the mawkib to shade the caliph from the sun.

If a person was chosen to accompany the caliph, he was not permitted to consider this as a permanent position but rather as a privilege granted each time the caliph invited him. If the caliph decided to walk, all had to follow suit. If he were to dismount because of a call of nature, everyone had to dismount because they may not be mounted while he stands on the ground. If he diverts to prayer, they should pray with him. And if he drinks something, they should divert their glance (further elaboration in al-Sabi, Rusim, 86-9; al-Kadi al-Mun'man, Kitab al-Himma, 116-19; al-Dhaihizi, K. al-Tajd, 72, 77-83).

There are precious little data on the processions of the 'Abbasids, almost certainly a reflection of the static and non-processional character of 'Abbasid ceremonial. Neither of the two mawakib about which we have significant details (al-Sabi, Rusim, 9-10, the mawakib of Nizam; 12-14, Byzantine embassies) describes a caliphal procession.

The Fatimids had, perhaps, the most elaborate processions of any of their contemporaries. This has been attributed to the influence of Byzantium (see M. Canard, Le ceremoniel fatimide et le ceremonial byzantin: essai de comparaison, in Byzantion, xxix [1951], 408ff.). Where there is a dearth of information for the 'Abbasids, there is an abundance for the Fatimids. This is probably due largely to the fact that most of the sources for the Fatimids were transmitted by Mamluk authors, reflecting the Mamluk predilection for elaborate public processions.

The Fatimids staged grand processions on the New Year, the first of Ramadan, the last three Fridays of Ramadan, the Two Festivals and the inundation of the Kalâma. The most complete descriptions are those of Ibn al-Tuwair, the late Fatimid-early Ayyubid historian. Both Ibn Taghrirbirdi and al-Kalkashandi rely almost exclusively (albeit without attribution) on his undated descriptions. Only al-Makrizi, in the monumental Khitat and his history of the Fatimids, Itti'dz al-hunafat (published in 3 volumes, Cairo 1967-72), relies on the dated accounts of Ibn Zulal, al-Musabbihi and Ibn Ma'mun al-Butadhi, in addition to Ibn al-Tuwair. These dated accounts reveal considerable changes in processions over the course of time, although many general features remained constant.

Al-Kalkashandi enumerates the insignia of sovereignty (al-alat al-milaykaya) used in processions (Subh, iii, 468-71; cf. Ibn Khaldun, Maksudatlna, tr. Rosenthal, ii, 48-73, and Canard, Ceremonial fatimite, 388-93): crown (taj) — not a crown per se, but an elaborate turban worn in a particular fashion; sceptre (kadib al-mulk), held by the caliph during the procession; sword (al-sayf al-khass); inkstand (dawari); lance (rumb); shield (daraka); hafr, "horseshoe", a crescent-shaped red ruby affixed to a piece of silk and attached to the top of the taj; parasol (mizalla, carried over the head of the caliph); flags (a 'lam); fly-swatters (mighabba), arms (sabla); drums (wakibi); and tents (al-khyam wa 'tisadiat).

Not all of these insignia appeared in every procession. For example, on the processions for the 'id al-nahr and the anointment of the Nilometer during the time of Ibn Ma'mun, the caliph carried no kadib (al-Makrizi, Khitat, i, 436, 473). Ibn al-Tuwair notes that the caliph did not have a mizalla on the procession to the anointment (ibid., i, 476). The mizalla was not carried in the palace. When the caliph rode in a procession in which the mizalla was carried, it was customary for him to visit the tomb of his ancestors (al-turba al-mu'izziyya) upon his return to the palace (ibid., i, 407). The costumes of the caliph and his retinue, and of the wazir, produced in the dar al-kuswa (see subh, iv, 409-13) were different in each procession; the caliph sometimes changed costume for the return to the palace (ibid., i, 436, 471).

The rukib on the New Year (awwal al-fum) is considered as the prototype for Fatimid processions by Ibn al-Tuwair, a claim not made by other historians of the Fatimid period, and perhaps representing later practice (see al-Makrizi, Khitat, i, 445-50; Ibn Taghrirbirdi, Nus'am, iv, 758-59; al-Kalkashandi, Subh, iii, 499-505; and Canard's translation of al-Makrizi's text, La procession du nouvel an chez les Fatimides, in AIEO Alger, x [1952], 364-98, with copious annotation, based on Inostrantsev, La sortie solennelle des Califes Fatimides, St. Petersburg 1905 [in Russian]).

The preparations for the New Year procession began in the last ten days of Dhu 'l-Hijja, when the army, swords, saddles, shields, spears, flags, banners, mounts and costumes were brought out of their respective treasuries for inspection. On the 29th, the caliph sat in the ghabak (grilled loge) to review the horses and costumes chosen for the procession.

On Muharram, the caliph's mawakib was arranged in bayn al-kayrun, the parade ground between the two palaces. When the caliph appeared at the gate of the palace, wearing a mizalla with the yatta, girded with the maghribi sword and holding the sceptre, the drums were struck and trumpets sounded. The mizalla, which matched the costume of the caliph, was unfurled. The caliph's entourage mounted up, and the whole cortège began to move.

The prefect of Cairo (wali al-Khina) and the ifshafid rode up and down the length of the procession, keeping the route clear and maintaining order. The caliph was surrounded by his isbyan, who were followed by the wazir and his entourage. Then came the bearer of the lance, detachments of soldiers, standard bearers, and squadrons of the cavalry. The mounted soldiers numbered more than 3,000.

The mawakib departed from Bab al-Nasr and re-entered through Bab al-Futuq (sometimes vice-versa), when the caliph was ready to return to his house and his respective treasuries for inspection. On the 30th, the mosque was furnished and carpeted with precious rugs by the xibaba bayt al-mdl (wall al-Khidira) and the Kirkat al-Khidira. Under al-Hakim, the Rashida mosque was also the palace of al-Amir in 517/23 October 1123, a fact that the procession was modelled exactly on the rukib of the New Year (al-Makrizi, Khitat, i, 491; al-Kalkashandi, Subh, iii, 509). Only two accounts are imbedded in a historical narrative. Al-Musabbihi describes the procession of the caliph al-Zahir and his troops on 1 Ramadan 415/6 November 1024 with a mizalla and rumh (al-Makrizi, Itti'dz, ii, 158-9; al-Musabbihi, Akhbar Misr, ed. Ayman Fu'ad Sayyid and Thierry Bianquis, IPAQ, 1978, 61). Ibn al-Ma'mun provides a very brief account of the procession of al-Amir in 517/23 October 1123 (Itti'dz, ii, 102).

The caliph rode in procession to lead the prayer on three Fridays during Ramadan. The locations of the prayers varied somewhat. Ibn al-Tuwair reports Friday prayers at the Anwar, Azhar and 'Atik mosques. Under al-Hakim, the Rashida mosque was also the site of Friday prayer (see Subh, iii, 509-12; Ibn Taghrirbirdi, Nus'am, iv, 102-4; Khitat, ii, 280-2; Itti'dz, ii, 20, 58, 96-7, 104, 109, 118-19, 160).

The mosque was furnished and carpeted with tapestries and rugs by the sabib bayt al-mdl (director of the public treasury). On each side of the minbar, curtains embroidered in red silk, containing the baimala,
fāṭhah, and Sūra LXII on one and Sūra LXIII on the other, were hung. The caliph delivered the khutba under a perfumed kubbah, which was fastened to conceal him from view (mentioned as early as 388996 and 415/1024, al-Makrizi, Ittiṣāz, ii, 20, 161). Then the caliph descended to the mīṣrāb and led the prayer from inside the maṣṣūra [see MĀṢĪṬ].

On the ʿid al-fīr and ʿid al-aḍḥā (or al-nabī), the caliph rode in procession to the masjīd outside of Bāb al-Futūh. Muzzinans, sitting upon maṣṣūbās from Bāb al-ʿId to the masjīd, pronounced the takbūr continuously while the caliph was en route. The caliph wore his full costume with the mizālīa and the yāṭīma. Like prayer during Ramadān, the mīṣrāb was hung with two curtains, one on the right with the basmāla and Sūra LXXXVII, on the left with Sūra LXXXVIII (Ḳātāb, i, 451-7; Ittiṣāz, i, 137-8; ii, 5, 58, 79, 82, 87, 97, 109, 160-1; iii, 60, 83-168-9).

Upon returning from the masjīd, a banquet was held in the tawrīs (in some periods, in the bāṣMt al-dghab), when the silver māda called al-mudassaran was set up, covered with magnificent foods, including sugar castles made in the ḍdr al-fitr. There were two banquets on ʿid al-fīr, one before and one after prayer. People were encouraged to carry food away from the banquet and redistribute it (on banquets, see Ḳātāb, i, 387-8).

On the ʿid al-nabī, the caliph sacrificed animals either in the masjīd or the manbar, which were then distributed to notables of the state (see Ḳātāb, i, 436-8; Subh, iii, 523-4; Ṣudūr, i, 97-8). Ibn al-Maʾmūn describes in detail the inventory of sacrifices and distributions for the years 515 and 516 (Ḳātāb, i, 437, and Ittiṣāz, ii, 95-6). Ibn al-Ṭuwaryr reports three consecutive rūḵās on the first day to the masjīd; on the second and third to the manbar next to Bāb al-Rih (cf. Ibn al-Ṭuwaryr’s description of the way the caliph slaughtered, with the general rules as described in art. ʿaṣb). These rich details about the distribution of portions constitute important data for the as-yet unwritten social history of ritual (for individual years, see Ittiṣāz, i, 141-2; ii, 7, 37, 41, 59, 79, 83, 88, 91, 104, 110, 124).

Two processions took place at the time of the inundation of the Nile (wāṣir al-Nīl), one to announce the Nilometer (taḥkkīk al-mṣīṣā) and the other to cut the canal (ṣawb al-khālidīj, faḥ al-khālidīj). When the water reached sixteen cubits, the ḍayaṣ, Ibn Abi ʿl-Raddād (always called thus), sent a formal announcement to the caliph. The height of the rising water was measured every day, but a policy established under al-Muʿizz prohibited public announcement until it was only a few marks short of sixteen (Ḳātāb, i, 61; Ittiṣāz, i, 138-9).

The preparations for the announcement of the Nilometer began as soon as the caliph received word that the water was close to inundation. The kūrdū spent the night in the Nilometer, recting the Kurūn continuously. The next day, the caliph went in an ʿawṣir (Nile boat) to the Nilometer (without a mizalla, Ibn al-Ṭuwaryr, Ḑīb, i, 476, 1. 16). He entered along with the ʿawṣir and the muḥarrak waṣāṭa. The caliph and the ʿawṣir each prayed two rūḵās. Then the director of the public treasury brought out saffron and musk, which the caliph mixed in a vessel and then handed over to Ibn Abi ʿl-Raddād. The ḍayaṣ threw himself into the ḩaṣṣīya, took hold of the pillar with his feet and left hand, and anointed it with his right hand, while the kūrdū recited.

The next day, Ibn Abi ʿl-Raddād received a robe of honor (kubbah) [s. v.]; see an early reference in Ittiṣāz, ii, 150). On the third or fourth day following the anointment, the caliph went out in procession to the banks of the Nile, passing through Fustāt (decorated by its residents) and crossing to the west bank, where grand tents had been erected for the occasion. The magnificent ṭamārīs from Bāb al-Máṣīṭ (so-called because someone was invariably killed when it was set up) was put up (Ḳātāb, i, 471; Ḑīb, ii, 73-2). The canal was cut and the ʿaṣbārīs sailed in it. The caliphs used to take up residence in one of two pleasure-houses (manzaras) during the days of these festivities (for complete descriptions, see Ḳātāb, i, 470-9; Subh, iii, 518f.; Ṣudūr, i, 99-100; Schefer, Relation du voyage de Nasiri Khosrau en Syrie, en Palestine, en Egypte, en Arabie, Paris 1881, 136-7; particular years, in Ibn Muyassar, Ākhār Mīr, 44; Ḑīb, i, 319, ii, 59, 148-50, 50, 72-3, 81, 108, 129).

These major processions were announced to the provinces in letters from the dīwān al-insāṣ. A number of these literary specimens remain, most from the pen of the celebrated kāhīb Ibn al-Ṣayrafi ʿId al-fīr, Kūtāb, i, 456-7 (536/141-2); al-Sūdlījī al-muṣtanṣārīn, ed. ʿAbd al-Munṣīr Māḏjīd, Cairo 1954, no 1 (451/1059), no. 13 (445/1053); Subh, viii, 320-4. ʿId al-nabī: Ḑīb, i, 437-8; Subh, viii, 324-8; Sūdlījī, no. 64 (476/1083). New Year: Subh, viii, 314-15. Ramadān and Friday prayer: Subh, viii, 316-19. Nile: Ḑīb, i, 479; Subh, viii, 328-9. An unidentified procession is described in Raḥāl al-ʿĀʾmidī, ms. 4059 [Cat. 4365], fols. 24-5, in the Garrett Collection, Princeton University Library).

There were several minor processions, called abbreviated (al-mawdkīb al-mukhtāsara) between the New Year and Ramadān, but there are almost no details on them except that they took place on Tuesday and Saturday, four or five times. They were much less elaborate than the major processions (see Subh, iii, 521-2).

The only ʿShīʿi holiday marked by a procession was the ʿId al-gerdān on 13 Dhuʾl-Ḥiḥāḍ, commemorating the waṣṣiya to ʿAlī by the Prophet [see ʿAṢR]. In the early part of the Fatimid period, it was essentially a popular celebration of the ʿShīʿi population. During the time of Ibn al-Maʾmūn, it had become a court ceremony modelled on the rituals of ʿid al-nabī, with a procession to the manbar.

At the end of the Fatimid period, it had acquired a much different and complex character. Now an internal palace procession, attended only by professed Ismāʿīlis, it took place at the Shrine of Husayn and the ṣawr. The caliph delivered a kubbah, but rode without insignia or mizālīa. Upon returning to the ṣawr, the text of the nasīḥ of ʿAlī was read to the assembly. This late procession was, in fact, a ceremonial polemic against the Tawībis (on the history of the celebration, see al-Makrizī, Ḑīb, i, 273, 276, 280, 284, ii, 24, 67, 74, 91, 168, iii, 96; Ḑīb, i, 388-90, 436, 492-3; al-Musabbībi, Ākhār Mīr, 84-5; on the late Fatimids, see S. M. Stern, The succession to the Fatimid Imām al-Amīr, the claims of the later Fatimids to the Imamate, and the rise of Tawībi Ismaʿilism, in Oriens, iv [1951], 193-255).

2. IN MUSLIM SPAIN

The sovereign power of the amīrs and caliphs of al-Andalus showed itself in the etiquette [see MARĀṢĪM] of public audiences and during their official movements when, surrounded by their processional retinue (maṣākib), they went into or came out of their residence. This was generally at the departure for a military campaign, to review the troops or to travel from one residence to another.

According to Ibn Khadhūm’s Mukaddama, “the
insignia of sovereignty are the displaying of flags, the beating of drums and the sounding of trumpets, and horns, but as it happens, the historical sources for Muslim Spain have not preserved any traces of this use of wind instruments. Among the Caliphs of Cordova the prince Abd al-Malik was carried off by a gust of wind at the same time as the kādī's kubba (Ibn Hayyān, Muktabas, iii, 36, 40, 95, 120). These processions were held in the courts of Ibn 'Abd Rabbihi (Crónica anónima, 40).

The first riding forth of al-Nāṣir was in order to go hunting. In 322/934, it seems, at the time of his departure for the Osma campaign, 'dressed in a coat of mail, with his sword at his side, mounted on a chestnut-coloured charger and surrounded by his generals and his troops', this was the first time that 'the eagle standard was unfurled'. In 326/938, Muhammad b. Hāšām al-Tūqībī had the honour of accompanying him on horseback from the caliphal palace to the residence at al-Ramlā. For the attack on Osma and on Ega, the caliph had his maszalī raised. It would thus appear that we have here a tent or a fixed canopy and that the maszallī is synonymous with the kubba. But there was also a mobile 'parasol' or sunshade, for at the time of the attack on Galatayud, al-Nāṣir rode along until the evening in full exposure to the sun (ghayr muṣallāl).

The caliph used to travel along surrounded by guards, who on one occasion killed a madman who threw himself at his mount's head. The caliphal procession was regarded as something of a serious occasion, and imitating or parodying it was considered to be a 'crime' on the part of al-Nāṣir 'when he set aside a mount his female buffalo Rāsān, riggèd out in a kalansuwa and a sword' (Muktabas, v, 22-3, 34, 109, 124, 225, 269, 287). Kettledrums were known and must have formed an element of the procession since al-Nāṣir sent some of them to the rallied Maghribīs (ibid., 239, 290, 312).

In 361/972, the street of the Furr Burrièel proved too narrow for the procession of al-Hakam II; it was after one of these march-pasts that he ordered the burning of the Berber saddle of one of his ghulāms. Surrounded by his fātās, his approach was regulated by the ashāb al-madīna of Cordova and al-Zahrā, and the people kissed the ground and greeted and blessed the caliph before making known their petitions. The route was always 'lined with the troops'. To march past was a signal honour which was given to the emigrés Di̇afar and Yābāy b. ʿAli, who marched along preceded by the heads of the fallen Zirids and by flags and escorts by the troops, Abu l-ʿAyyāb, the fālā Fālik and Gahlīb, returned victorious from his campaigns in the Maghrib. The maszalī continued to be an attribute of the sovereign which he delegated for the expedition against the Magdiūs [q. v.] in 361/972 or else to the Dhu l-Sayfayn Gahlīb (Muktabas, vi, 45, 67, 79, 115, 152, 173, 190, 195-6, 212).

In 387/997, after having thwarted the plot of Subh, the caliph Highām II 'clothed in a kalansuwa wound round with a white turban, whose ends were flowing from his head, riding in his hand a handsome black kubba and bare head. The caliph rode forth with its standards unfurled and the kettledrums ready' (Dhikr, 170). It Ibn Ammar [q. v.] entered Silves at the head of 'a splendid procession, followed by black slaves and guard' (al-Muʿtamīd [q. v.] mocked in him enter Cordova 'in the most shameful manner, mounted on a mule, between two sacks of straw, bare-headed and loaded with fetters, and having ordered everybody, nobles and plebs, to come out and see the spectacle' (al-Marrākūshī, Muʿṣīdī, 80, 86). When the kādī Ibn Diḥḥāl [q. v.] of Valencia got rid of al-Kādir b. Dhi l-Nūn [q. v.] he behaved like a sovereign ruler, surrounded by royal pomp — he only mounted his horse when preceded by black soldiers and guards, escorted by troops, whilst his creatures decorated the streets, shouting out blessings and praises' (Ibn ʿIdhārī, Nuevo fragmentos, 69-70).

The processions of the Almohads or Muwahhidūn [q. v.] were rich and complex. The caliph rode forth surrounded by the great leaders of the Mahdi. The caliph was accompanied by his sons, standard-bearers and a hundred kettledrummers, and followed by the high dignitaries of state. The caliph would mount at the entrance of his tent or his residence, whilst the vizier walked at the side of his stirrup. The order of precedence was immutable and fixed by custom (ṣaʿa) (Ibn Sāḥīb al-Salāt, al-Mann bi l-imdāma; al-Marrākūshī, Muʿṣīdī; Ibn ʿIdhārī, Bayān, ed. Huici Miranda, Tetouan 1963). Certain items of clothing were special to the caliph. In 582/1186, during his campaign of Gafsa, 'al-Mansūr inspected the assemblage before his audience chamber ... he reminded them of the usages of royal power which they should respect and should refrain from imitating the royal privileges and using the royal colours'. In 568/1172, during the siege of Huete, Abū Yaʿṣūb was 'surrounded by his guard, accompanied by the sons of the ḍāma ʿa and by those of the Fifty, by the alḥ al-bayt and by the slaves; behind him came his brother, the Sayyid Abū Hafs and his other brothers, followed by standards and a hundred kettledrums playing' (Mann, 493). When in 578/1182 his remains were brought from Santamir to Seville, the great men of state, in order to conceal his death, 'began to walk, in accordance with the customary procedure, at the side of the animals bearing his litter, then they mounted their horses and the litter was covered with a green flag' (Muʿṣīdī, 192).

We do not possess any exact information about the processions of the Nasrids [q. v.]; one can only suppose that they were very simple, in view of the exiguousness of their territories. Ibn Khālidūn seems to confirm this, mentioning that 'the Banū l-'Abmar used only two musical instruments in their processions'.

(P. Chalmeta)
3. IN IRAN

From ancient times, processions were connected with court ceremonial. Religious and triumphal processions are illustrated on ancient monuments. In Islamic times, the purpose of processions was mainly connected with court ceremonial. Religious and triumphal processions took place from time to time to the Friday mosque for the performance of the Friday prayers and also to the musalla, the place outside the town where prayers were held to celebrate the breaking of the fast at the end of Ramadan ('id al-fitr) and on the 'id-i turban ('id al-a'dha). On such occasions, he would be accompanied by a cortège formed by his officials, officers and followers, and standard-bearers would bear his standards before him (litav, 'alam [q.v.]; see also Spuler, Iran, 349). Sometimes a parasol (qat, see miqalla) would be held over his head.

Whereas the mule was customarily the mount of the common people and of some nobles, of the kings and the ruler, it was the mount of him who held temporal power. The point at which a visiting ruler or envoy dismounted was a frequent cause of contention and the privilege of remaining mounted when entering the presence of another ruler was eagerly contested (see further Spuler, Iran, 343). 'Abd al-Dawla, the Buyid, sent a message to the caliph al-Ta'if in 367/977-8 asking permission to enter the court (asb-i nawbati) of the caliph's palace (dir al-khutba) mounted (Fakhlí, Shdhinshah T-i 'Adud al-Dawla, Tehran, AHS 1347/1969, 59; Híilí al-Sábi, 80).

The custom of having a saddled horse (asb-i naubati, faras al-naub) at the palace gate on which the ruler could mount in an emergency or on other occasions apparently existed from the 2nd century A.H. The practice appears to have been started by Abú Muslim. According to Džzdzjí, a saddled horse was always kept ready for the ruler at the palace, which had been built for him in Marw-i Sháh-Djáhán until the Mongol invasion in 617/1220-1 (Tabákát-i Náširi, ed. 'Abd al-Hayy Habíbí, Kábul 1964, i, 107; see also Muhammad Táki Danishpážuh, Asb-i naubati bar dar-i káhí Abú Muslim, in Ráma'má-yi kitáb, xi [AHS 1340/1967-8], 225-8). The anonymous author of the Mughmal al-tawání states that the 'Abáááídcaliph al-Mánáár mounted the asb-i naubati during operations against the Ráwání (ed. Malik al-Shú'ará' Bahár, Tehran, AHS 1318/1939-40, 329). The Sámirid rulers Ahamam b. Ismá'il (295-301/907-14) and Nasr II (301-319/914-43) always had a saddled horse ready at the gate of the palace (Spuler, Iran, 352; see also Browne, LHP, i, 317). The Saddjús of Kirmán also appear to have kept a saddled horse ready. Afdal al-Din Kirmání relates an occasion when Muhammad b. Arslángah (537-541/1142-56) gave the asb-i naubati—an Arab horse with magribíi harness—to one of his intimates, Muhammad al-Dín 'Uthmán (Badýál) al-asmán wa wáq'átí 'Kirmán, reconstructed text by Míhlí Bayáni, Tehran AHS 1326/1947-8, 26; Muhammad b. Ibráhím, Tárikh-i Saljukshíyán-i Kirmání, ed. Th. Houtuma, Leiden 1886, 31).

Whether the asb-i naubati was used for processions or not, saddled horse, magnificently caparisoned, were an important part of royal pageantry. They were also often given by rulers, together with kálás [q.v.] to high officials, visiting envoys and others [see MARÁSÍM: 3]. The Gháznawíds kept many elephants, and Mas'úd probably more often rode an elephant than a horse. The most significant occasion for a special procession was that when Mas'úd went from Gházná to hold a masálím court, he was mounted on an elephant. It was an occasion of great pomp and splendour. Three hundred ghuláms, magnificently apparelled, and many elephants and led horses, including 30 caparisoned with jewel-encrusted harness and 50 with golden harness, were in his train. The ghuláms of the palace, equipped with bows and arrows and golden and silver staffs went on foot in front with armour-bearers from Marw and 3,000 footmen of various origins and other soldiers and the notables and the ‘pillars of the state’ (Abú 'l-Fadí Bayhákí, Tárikh-i Mas'údí, ed. 'Alí Akbar Fayyád, Maqálaí AHS 1350/1971, 373-2).

When the ruler rode out to a garden or to summer quarters, or made a progress through his domains, he would be accompanied by his retinue. Royal marriages and betrothals, the sending of the marriage portion of the bride (mahir, sádbák), and funerals were other occasions for processions. When the daughter of the Kará Kháánid Kádir Kháán Yúsuf of Turkistán, who had been betrothed to Mas'úd b. Mahmúd, was brought to Gházná in 425/1032-3 (Ta'rikh-i Samání, ed. Muhammad Houtsma of the afternoon prayer, the women of the great men at Mas'úd's court, accompanied by eunuchs, set out to greet the bride with a cortège ‘such as no one could remember’ (Bayhákí, 548-9).

Processions took place when envoys and others came to the ruler's court. When the caliph's envoy arrived at the court of Mas'úd b. Mahmúd in Baljí at the end of 422/1032 to announce the death of the caliph al-Kádir and the accession of al-Kátím, he was brought with great ceremony into the presence of Mas'úd on 1 Muharram 423/19 December 1031. Four thousand palace ghuláms, magnificently attired, were drawn up at the palace in several lines; half of them held silver maces and half were armed with swords and carried bows and three wooden arrows. Three hundred ghuláms of the royal bodyguard with golden maces stood near the throne. The great men of the court, provincial governors and chamberlains in their court dresses were also there. The marátaídarán stood outside the palace. There were also large numbers of elephants [see rit. 2. As beasts of war]; soldiers with their arms and standards were drawn up in two lines, between which the envoy was to pass. The rasáldar with led horses and a great crowd went to fetch him from his lodging, mounted him on one of these horses and, amid the sound of drums and trumpets, brought him to the palace where Mas'úd was awaiting him (ibíd., 382). On the following Fri., Mas'úd went to the Friday mosque for the pronouncement of the khutba in the name of the new caliph. The scene was again one of great splendour. The procession was led by 4,000 splendidly dressed foot ghuláms, followed by the Gháznawí general Beg Tághhlí and the royal ghuláms with the ruler’s banner, the mardíbar, and his chief, the chief chamberlain. Mas'úd, preceded by the chief chamberlain, set out along the road from the palace to the mosque, which
had been decorated on his orders by the notables of the city. Behind him came his chief minister, more chamberlains and the notables of the court. They were followed by the khaṭīb, Khaḍīja ʿAli Mikālī, with the caliph’s envoy on his right, the kādīs, ḵubakāhā and ʿulamāʾ and the headman (ażīm) of Bahlī. As the procession slowly approached the mosque, “no sound was heard except the sound of the whips and the shouts of the marṭabātārān to clear the way” (ibid., 384-5).

The following year when an envoy from al-Kāʿīn rejoined Rayy on his way to Masʿūd’s court, with a diploma from the caliph, Masʿūd ordered a reception (sīḥīh) to be prepared for him. An escort was sent with him from Rayy and when he reached Nishāpūr on 8 Rābiʿ I 424/11 February 1033, the ḵubakāhā, kādīs and notables of the city went out to meet him. On the following day, the marṭabātārān and rasīlārān also went to welcome him. The road from the Rayy gate to the Friday mosque was decorated, as also was the bazaar. Durāns and dinārs and valuable objects were scattered before him. A week later, after the envoy had rested from his journey, he was brought to Masʿūd’s presence with great ceremony. Crowds assembled along the road from the residence of the envoy to the gate of the garden in Shāḏayḵ, where Masʿūd was to receive him. The soldiers, notables and army leaders were mounted and held standards in their hands (ṣimbāl). The ṭarṣūdūr stood in front of the mounted soldiers. The marṭabātārān were drawn up in two rows. Army leaders (ṣālārān) and chamberlains were also present. A chamberlain, together with several attendants, led horses and a mule, was taken early in the morning by the rasīlār with twenty ḵīlās to the envoy’s residence to bring him to Masʿūd, who was to receive him sitting on his throne on a platform (ṣāḏ). The ṭarṣūdūr caused the envoy and the enuch (ḵhādīm), who accompanied him, to mount and had the ḵīlās which the caliph had sent with them put in boxes on mules. The cortège set out amid the sound of drums and trumpets preceded by treasury officials (ḵhūrdān-i khāzīnā) and eight horses with golden saddles and harness led by their bridles. Then came the envoy, preceded by the royal chamberlain and ṭarṣūdār. The rasīlār caused the envoy and behind him two horsemen, one carrying a standard and the other the diploma and letter of the caliph rolled up in black brocade (ibid., 471-2; see also MActsīm. 3).

A new feature of royal ceremonial was introduced by the Saljūqs, namely the ḡatājīya [q.v.]. This was a kind of saddle-cover, probably covered with precious stones, which was carried before the sultan in processions. This custom appears to have died out in Persia after the Saljuqs, but was found later in Egypt (see Ghasiȳa, and also Ibn Baṭṭūta, Travels, tr. H.A.R. Gibb, Cambridge 1956-71, iii, 664). When Togrul Beg brought the ʿAbbasid caliph al-Kāʿīn back to Baghdad after he had left the city on the attack of al-ʿAṣāṣārī in 450/1059, he dismounted at the gate of Baghdād but was told by the caliph to remount (Rwandi. Ṯabat al-rudūr, ed. Muhammad Ikhāl [see London 1921, 110, and see Spuler, op.cit., 343]. On entering Baghdād, it appears that Togrul Beg again dismounted and carried the ḡatājīya in front of the caliph until they came near to the caliph’s palace, when Togrul took the bridle of the caliph’s mule and walked beside him until they entered the Bāb al-Ḥujra (the Privy Chamber Gate) (Ṣadr al-Dīn al-Ḥusaynī, Alkhaṭīb al-maṣūm al-Saljuqīya, ed. Muḥammad Ikhāl, Lahor 1933, 21).

On an earlier occasion, when Togrul Beg was to have an audience with the caliph in 449/1057-8, the caliph’s boat was sent to bring him down the Tigris to the caliph’s palace. He was accompanied by his intimates (ḫuṣnān), some in boats and some mounted on elephants. Alighting from the boat, Togrul mounted one of the caliph’s horses which had been sent to meet him and entered the caliph’s palace, preceded by the sons of Abū Kālidjīr b. Būya and Kutlumūsh, army leaders and Daylamis and nearly 500 unarmored Turkish and Gīfānī ḡālāms. When he reached the gateway of the passage (dihādīz) leading to the audience hall, he was kept waiting for a long time on his horse until the gate was opened for him and then he entered on foot (Ṣub Ṣbn al-Dīwāzī, Mīrṭū al-amān, ed. Ali Sevim, Ḵanbara 1968, 25). On a subsequent occasion in Muḥarram 455/January 1063 when Togrul came to Baghdād, the caliph excused himself from going to meet him and sent instead his waṣīr Ibn Dāhir, who took with him two horses and other presents. On the following day, Togrul entered the Dār al-Mamlūk in a boat sent by the caliph (ibid., 97).

In 480/1087, when the caliph invited Malikshāh to the Dār al-Khīlāfā, he sent a boat for him. Disembarking at the Bāb al-Ḥurūbā, Malikshāh mounted a richly caparisoned horse sent for him by the caliph, which carried him to the gate of the caliph’s audience chamber (ibid., 244-5). In Muḥarram of that year, when Malikshāh saw the marriage portion (ḡahā) of his daughter to the caliph, to whom she had been betrothed, it was carried by 130 camels (a second instalment being apparently carried by 74 mules on the following day), preceded by 30 led horses, all splendidly caparisoned. The cortège was led by Saʿd al-Dawla Gūhar-ʿĀṭīn, the shīḥa of Baghdād, and the amīr Burṣūṣ. The city was decorated for the occasion and as the cortège went through the Nahr Muṣallā quarter the people cast dinārs and precious stuffs before it. The sultan had meanwhile left Baghdād on a hunting trip, and so the caliph sent his waṣīr Abū Ṣudūh b. Ṭerken Khāṭūn, Malikshāh’s chief wife and mother of the bride, with some 300 men bearing lanterns with a litter to bring the princess to the caliph’s palace. She set out by night riding in the litter, supported by the amīr. In the gate of the palace there were 34 mounted men and 560 Turkish slave girls on splendid mounts, preceded by the women of the amīrs and others, led by Niẓām al-Mulk, the muṣattāfī Abū Saʿd and the amīrs, all bearing lanterns (ibid., 245-6; Ṣbn al-Dīwāzī, sub anno 480; Ibn al-Dīwāzī, al-Muntazam, Ḵyderabad 1539/1940-1, ix, 36-7). Processions do not appear to have been a special feature of Ilkhānī or Timūrī rūmīrity. Women of the royal house took part from time to time in public ceremonies. Clavijo describes the cortège which accompanied Timur’s chief wife on the occasion of a public audience which he gave in the Great Pavilion in Samarkand. She was attended by some 300 women and eunuchs. “Over the head of the princess was borne a parasol, a man holding it, and the stick was a pole the size of a lance. This parasol was of white silk, dome-shaped and round like the top of a tent, with wooden ribs that kept the stuff extended; it was very carefully held over her head as she walked to keep the sun off her face. In front preceding her and the ladies of her suite marched many eunuchs ... Thus the procession advanced entering the Pavilion where Timur was already seated. The Great Khanum now took her place beside his Highness but slightly behind on a low dais” (Embassy to Tamerlane 1403-1406, tr. from the Spanish by G. Le Strange, London 1928, 259-60).
sions (ibid., 260-1). Clavijo also mentions the presence of elephants at Timur's court. They appear to have been used to entertain visitors (ibid., 257).

Clavijo states that when Shah 'Abbās returned to Kazwīn in 1007/1598 after crushing the Ozbegs in Khurasan, Sir Antony Sherley described the ceremony as known by the term ĵistikból. When Shah and his party, which included, among others, Abel Pinçon, had already been some three weeks in Kazwīn awaiting the return of the shah, the entourage of five miles of the city he encamped. He ordered Sherley and his party to come out two miles outside the gates of the city to meet him. Abel Pinçon describes the shah's triumphal entry in the following words: "When our company had approached to within five or six steps of the King, he pretended the whole time to look in another direction. After we had kissed his boot he spurred his horse sharply and guided a hussarily, dabble. Across the camp after the manner of the country … In his hand he carried a battle-axe, playing with it, carrying it now high, now low, and now and then placing it on his shoulder with rather strange movements.

In his triumphal entry he caused to be carried on the end of strong and heavy spears twenty thousand heads of Tartars whom he had defeated in Usbég, which appeared to me a hideous spectacle. After he who carried the heads came young men dressed like women richly decked, who danced in a manner and with movements which we had never seen elsewhere, throwing their arms about and extending them above their heads even more than they raised their legs from the ground, to the sound of ĵatâbles (sc. drums), flutes and certain instruments which are provided with strings, and to the sound of a song composed on the victory which they had gained, this being sung by four and certain instruments which are provided with strings, and to the sound of a song composed on the victory which they had gained, this being sung by four

Chardin, describing Shāh Sulaymān's coronation in Isfahān in 1077/1667, states that after the ceremony he sat until 10 o'clock in the Tālār-i Tawīla to receive the homage of the grandees of Isfahān who came to kiss the ground before him, and then "rising from his Seat took Horse; and that was the first time that ever he rode out of the Place where he was born [having been immersed in the haram]. And according to the Custom of the Persians, he made a Cavalcade round his Palace very leisurely, and with little attendance, riding in the middle of the distance of twenty Paces from them that marched before and, those that followed after, only twelve Footmen went on each side before and behind his Horse; and all this to the end he might be the better seen by the People" (The coronation of Solyman III. The present king of Persia, published with Tred's Travels of Sir John Chardin in the East Indies, London 1691, 56). Normally, however, when the shah rode abroad he was accompanied by a large retinue. Kaempfer describes the procedure under Shāh Saif (by which name Shāh Sulaymān was known after his second coronation). In the case of the shah's daily ride, when he came out of the haram and prepared to proceed along the Ėbār Bāgh, the master of the horse would lead out three horses, one of which the ruler would choose. Two groups of the bodyguard, on foot and armed, would set out in front, followed by the ûsâkkâtâ-bà bi on horseback and the kavâl-bâbi, and behind them some twenty mounted troops with their leader, all wearing red twelve-sided head-dresses, adorned in the case of some by a magnificent plumage of feathers. They rode without any discipline, but watched over the safety of the shah. The shah followed, surrounded by twelve qâlîrs (runners); behind him rode the grand wâzi' or some other high dignitary. The presence of the shah was indicated by his fâtir carried by a standard-bearer. Among the retinue, not in any special order, there would also be some twenty eunuchs, some white, some black, who carried the weapons, water-pipe and other paraphernalia of the shah. Then came those courtiers whom the shah had bidden to his table and the sons of the great men, for whom it was considered an honour to be allowed to accommodate the shah. When possible, there was also a physician and an astrologer present. Officials armed with axes would be sent in front of the procession to remove any obstacles in the way of the shah's progress (Am Hofe des persischen Grosskönigs 1684-1685, tr. W. Hinz, Tübingen-Basel 1977, 237-8. Cf. also Du Mans, Estat de la Perse en 1660, ed. Schefer, Paris 1890, repr. 1969, 33).

On certain special occasions, the shah also rode out. Kaempfer describes the celebration of the 1d-i kurdâ in 1660/1661 in the Hazâr Dīarbī district of Isfahān. A large and fine camel was prepared for the sacrifice. For ten days preceding the 1d on 10 Dhu 'l-Hijjâd, it was paraded through the different quarters of the town. On the day of the sacrifice it stood in the appointed place, with its feet tied, surrounded by thousands of people, waiting for the arrival of the
As soon as he arrived, he dismounted and was given a lance with which he struck the camel. After its head was cut off and its corpse divided into twelve parts, one for each quadrant of the city. The shah then remounted and rode back as he had come, while the people of the city assembled round their banners and accompanied their portion of the camel, which was laid on a horse and went before them to their several quarters to the sound of trumpets and drums (op. cit., 239-40; see also Du Mans, op. cit., 74-5; The Travels of Monsieur de Thoemöl into the Levant, London 1687, 107 (ibid., 108(bi))).

Exceptionally, the shah rode out himself to welcome distinguished guests. In the case of a guest of royal blood, he would go half-a-mile, having sent his representative with a company of kurcis one farsakh (or one hour's ride) in advance. The townspeople, in festal dress, would line the streets and spread precious stuffs in front of the horses of the royal guest. Such was the procedure when the Özbeg khan 'Abd al-Äzîz came back after performing the hajj in 1670 and when Akbar the son of Awrangzîb came to Persia in 1099/1688 (Kaempfer, op. cit., 242).

If the shah went hunting and took his women with him, he was accompanied by a large cavalcade, and when he moved to summer quarters in Mâzan-dârân an enormous train accompanied him. Men would be sent in front to choose a suitable place for the camp; when they came back with their report, if the shah approved, some 7,000 camels with tents, carpets and household equipment would be sent in advance. Some days later the kurûkîs would follow to clear all males from the neighbourhood of the road along which the royal cavalcade would travel. The shah's women, or those of them whom he decided to take with him, travelling in litters and accompanied by eunuchs, would follow. After them would come the shah with his retinue. In front would be the master of the horse with his subordinates and five or six led horses richly caparisoned, with sixty or so of the bodyguard, also mounted. Then would come the standard-bearers followed by the tshakâkasi-bâghi, the kurcî-bâghi, and the master of the hunt (mir-shikâr), accompanied by falcons with falcons on their wrists, and the chief kennelman with hunting-dogs led by attendants on foot. Then would come the shah with twelve personal attendants. Immediately behind the shah came the great men of the court, and finally numerous mounted slaves, among them the water-pipe carriers and those in charge of boxes of ice, sugar and other condiments carried on mules, and carpet-spreaders with carpets, mats and cushions for use on the way and light tents, and lastly water-bearers with water-pipes on camels or mules for the use of men and animals. Twelve dancing girls of great beauty, who were always present when the shah went on a journey, followed several hours behind (ibid., 242-5).

The Dastûr al-mulâtî mentions an official called the kurcî-yi rikâb, who was always in attendance on the shah. When the latter went riding, it was the duty of the kurcî-yi rikâb to hold the bridle of the horse which the shah was to mount with one hand and to help him mount with the other. In the royal assembly, the kurcî-yi rikâb sat below the muhtasib al-mamâlik (ed. Mahammad Taki Dânîshpûhî, in Rev. de la Faculte des lettres et des sciences humaines, Tehran, xxxi (1968), 318).

Hanway describes the procession of the Afghan Mahmîd on his entry to Isfâhan after Shâh Sultân Husâyin had resigned his throne to him on 29 Dhu 'l-Hijjâ 1134/11 October 1722): "The procession was opened by ten officers on horseback, and about two thousand cavalry, among whom were several lords of the PERSIAN court. Next came his master of the horse, at the head of fifteen led horses magnificently caparisoned: this officer was followed by some runners on foot, and then by a thousand common infantry. Immediately after came the grand master of the ceremonies, in the midst of three hundred negroes dressed in scarlet cloth: these negroes had been chosen from among the slaves of ISFAHAN to compose the conqueror's guard. Forty paces from thence was MAGHMUD, mounted on a horse, of which the VALî of ARABIA had made him a present, on the day of the abdication. The unfortunate HUS-SEIN rode on his left. The princes were followed by about three hundred pages on horseback" (The Revolution of Persia, London 1762, ii, 182). Mahmîd's chief officials followed, and behind them came the principal officials of the dethroned monarch. The procession was closed by a hundred camels carrying arquebuses, preceded by a great band of musicians and followed by nearly six thousand horse. Having crossed the Shirzâr bridge, Shâh Sultân Husâyin was sent to his place of confinement, and Mahmîd continued alone. Arriving at the gates of the town the inhabitants laid rich stuffs under his horse's feet and filled their air with perfumes. The guns on the camel's backs were often fired as they marched along; and in the intervals, the ten AFGHANS who walked at the head of the procession, without noise or sound imprecations against the followers of ALLAH" (ibid.).

The practice of kurûk, i.e. the prohibition of men and boys from any place where the king's wives were to pass, though probably not new, was rigorously enforced under the Safawîs and caused great inconvenience to the population. Olearius states that when the shah went hunting, taking his barâm with him, runners were sent in advance through the streets so that the population remained in their houses and the streets were empty (Vermehrte Neue Beschreibung der Muscatinschen und Persischen Resie, Schleswig, 1656, ed. Dieter Lohmeier, repr. Tubingen 1971, 529). Chardin claims that Shâh SâFi commanded no less than 62 kurûks as he went abroad with his wives visiting places around Isfâhan during the five months of his concomitant to the year 1078/1667 (Corona- tion, op. cit., 77. Cf. also Jean-Baptiste Tavernier, Voyages en Perse, Geneva 1970, 186-7, 188). The custom continued under later rulers. According to Hanway, the consequences to those who failed to get out of the way when notice of Nâdîr Shâh's approach was given were sometimes fatal (op. cit., 1, 169).

Under the Kâjârs, processions took place very much on the same sort of occasions as under earlier rulers. Special importance was attached to the ceremony of istikbâl. This was de rigueur when the shah or one of the princes visited some town or village or when he returned to his seat of government after absence on some expedition or other. On these occasions, civil and military officials and local notables would take part in the istikbâl, while wrestlers, jugglers, tumblers and other would display their skills; the slaughter of oxen, cows and sheep and the breaking of vessels containing sugar candy in the way of the prince was also customary. Morier states that when Fath 'Ali approached Tehran on his return after an expedition to Khurâsân in 1815, rows of well-dressed men were drawn up at some distance from the road and made low bows as he passed, while members of the religious classes were drawn up nearer the city. Ozen and sheep in great numbers were sacrificed as he passed and their heads thrown under his horse's feet. Glass vases, filled with sugar, were broken before him
and their contents strewed on his road. Dervishes
made loud exclamations for his prosperity, while
their rabsis, who raised on high a carved representation of wood or	tabernacle.... In all the bustle I perceived the King
continuously looking at the watch carried by Shatir
Bashi, anxious that he should enter the gates exactly	at a time prescribed by his astrologers" (A Second Journey through Persia, Armenia, and Asia Minor to Constantinople 1819-20, London 1818. 387-8).

Fraser, describing the return of Fath 'Ali to Tehran in April 1833 after a visit to Kumm, states that half the town went out to welcome him, while the other half lined the bazaars to make a show upon his entrance. "A confused assemblage of horsemen of all ranks and distinctions, from whom were continually issuing individual pairs to skirmish and show off, were followed by those of more respectability... who preceded a couple of hundred topechees, or artillerymen,
than a number of shatirs, or running footmen; and then after a long vacant space came the Envoy's horse, a ceremony never practiced in Persia to any but royal personages" (ibid., 84-5).

Displays of wrestlers, jugglers and tumblers, as in the case of receptions welcoming the shah, often formed part of the istikbal. Lady Sheil describes the welcome given to her husband in Tabriz on his way to Tehran as envoy to the court of Persia in 1849 in the following words: "There were princes and priests, and merchants, and mollahs, and mountebanks, and dervishes, and beggars; there were Koordish and Toork horsemen, ashraf, and shamans, and shamans, and shamans. The cavalcade began four miles from the town, and each step brought a fresh reinforcement to the procession" (Glimpses of Life and Manners in Persia, London 1856, 86). Writing of the procedure for her husband's return to Tehran, she states: "The village we were residing in was three miles distant from Tehran, and we were obliged to return a mile towards Tabreez, to receive the congratulations of the Shah's representatives" (ibid., 120-1).

The shah or one of the royal princes used to take part in the procession on the 'Id-i kurbdn. Fraser, describing the celebration in Tehran on 20 April 1833, states: 'It was customary for the king himself, or, in his default, for one of the elder princes, in a grand cortege of the rest, and their followers, to superintend the ceremony, which consists of a procession to a particular appointed place, where a camel is provided for the sacrifice. The king or elder prince, taking a knife, draws it across the animal's throat, which is then despatched and cut up on the spot .... On the present occasion not one of the princes attended, except Saheb-keran Meerza (aged about ten) .... nor was he accompanied by a single person of distinction.'

"The first part of the show which issued from the gate was a parcel of ragamuffin musicians with kettle-drums, and horrid screeching pipes, who preceded a number of mules and horses, strangely caparisoned and painted, having tawdry trappings on, and gold and silver tinsel, with ostrich feathers on their heads, and along with these came sundry flags of silk, red, green, and scarlet, and some striped like shawks; and the animals were mounted and ridden to and fro at speed by the fellows who brought them. These, as I understood, were intended to carry away pieces of the unhappy camel when he should be cut up; they were attended also by a number of dervishes, in their caps and patched robes. Next came six of the King's trumpeters, in their scarlet coats, with tippets and hoods; then came three or four led horses; then a couple of hundred topechees, or heavy loggers, in
two lines, forming a street, through which rushed thirty or forty furoshes with sticks, and gholaums with shields. After these came the little prince, gallantly dressed in a scarlet coat, well bedizened with embroidery of pearls and diamonds, his sword-belt full of match, and having handsome diamond ornaments on his cap and on his breast, and a pretty little sabre depending from his side. He was mounted on a fine horse. Behind the prince at due distance, came a rabble of horsemen, tofungkinies, etc. ... Before the gates of the Nigaristan ... the poor camel lay bound and ready." (A Winter's journey, ii, 73-5; see also Mu'ayyir al-Mamalik, op. cit., 95-5; and for a description of the procession in Isfahan, see Mirzá Husayn Khán b. Muhammad Ibráhim Khán Tahwilddá, *Djughrdfiyd-yi Isfahan*, ed. Mu'rifí Sotoodeh, Tehran (like that of the circumcision festival of Prince Curzon writes that formerly the Shah's court ceremonial was a blaze of splendour but that "he now affects a simplicity of costume in striking contrast to his predecessors. The bediamonded sword and the flashing airgette, which was so familiar on his first visit to England in 1873, had disappeared in 1889; and in Tehran I have seen him walking in the streets in a braid frock coat with prodigious skirts ... holding a walking stick in his hand. Upon other occasions he either appears on horseback, or, more commonly, is driven through the streets of the town in a sort of coach with glass panels drawn by six or eight white horses with henna-dyed tails. In front and behind ride a small detachment of the royal bodyguard or gholaums, whose full number stands at 2,000, or two corps of 1,000 apiece, who are recognizable by their gold-bridaed tunics and by the muskets, wrapped up in red cases, which they wear slung across their shoulders. A number of the liveried harlequins, or royal runners ... are also in attendance to clear a way, while the less ornamental ferashes, with their long switches, keep back the crowd." (Persia, London 1892, i, 396). The royal runners or *sháhir* (whose dress was a faithful representation of that worn by the *sháhir* of the Safawid kings) preceded the Shah whenever he went out riding or in his carriage (ibid., i, 332).

(A. K. S. LAMBERT)

**4. IN THE OTTOMAN EMPIRE**

Ottoman processions (Tk. *aýd*), were frequently assembled on festal and solemn occasions. The Ottoman court celebrated the birth and circumcision of a prince, or the marriage of a princess, a victory of the army, a new campaign of a sultan, or his succession to the throne, the arrival of a royal guest, or an important foreign ambassador, with imperial festivities, which sometimes lasted 50 days and nights (like that of the circumcision festival of Prince Mehemmed, later Mehemmed III, in 990/1582) or more (the festival of 853/1449, under Murád II, to celebrate the wedding of his son, Prince Mehemmed—later Mehemmed II, the conqueror of Constantinople in 857/1453—and Sitti Khári, which continued for three months). Sometimes an occasion for a public rejoicing was created after an unsuccessful campaign or a defeat of the Ottoman army, with the intention of turning the attention of Sultan's subjects elsewhere and to falsify the result of a battle (the best examples of such festivities are in 862/1457, after Mehmed II was compelled to draw back from Baghádád; and in 937/1530, when Süleyman the Magnificent had to retreat from the siege of Vienna; and also in 990/1582, after the failure of Murád III in the war against the Persians). The wedding and circumcision ceremonies very often and deliberately coincided with *mubáhrá* and *mubárak*: the festivals and ceremonies of such festivities, which were organised merely to solemnise the pilgrimage of the Prophet (among others, a recent one was in 1866, under Sultan 'Abd al-'Azíz). All these festivities were enriched by spectacular and colourful processions, which consisted *inter alia*, of architectural displays, festival palms, sugar work in figures and of artificial flower gardens; these are considered below. One should note as a preliminary the following three definitions, before proceeding to examine the different types of processions: 1. *Aýd-i Hümáýun*, Imperial procession. A customary procession organised when the Sultan or the Grand-Vizier started for or returned from a campaign, on a route between the palace and the barracks at Dáwád Pagá (a district in Old Istanbul). 2. *Aýd Kánání, Code for processions*: the Ottoman code pertaining to the rules for the arrangement, order and the sumptuous of the viziers, scholars, high officials, staff and the military personnel, who were prescribed by the government to participate in the imperial processions. 3. *Aýd Köşık, Kiosk for spectacles*: a kiosk built especially for the Sultan and his harem, from where they watched the processions, celebrations and the festivities. This kiosk was generally used by the Sultans and the ladies of the court. The Sultan had a special room with attendants.

**Bibliography:** A detailed description of such processions is to be found in Djeláli-záde, (Muşáfá b. Djeláli), *Tabáká al-memalik ve derezat el-meslúlak*, ms. Nationalbibliothek, Vienna, H.O. 41; and in *Telgírfátízâde Mehemmed b. Ahmed's Defter-i teşkírlí*, ms. Nationalbibliothek, Handschriften-Sammlung, Mxt. 301; the processions in the festival of 1086/1675, in Edirne, under the reign of Mehemmed IV, are given by Hüseyin Hezár-fenn, *Telgíçí al-beyrân fit kawáini-i'Al-i Öflümân, ms. B.N., Fonds Turc, 40; 'Abdíf, *Sür-i pur sûrûr-i humáýun*, ms. Millet Kütüphanesi, Istanbul, Ali Emiri Kit. 343; John Covel, *Diary*, ms. B.L., Add. 22,912; vivid sketches of the processions in the 17th century may be seen in *Köprüli, Bizans müesselerinin Osmanlı müesselerine te'siri*, in *Türk hukuku tarihine dair tetkikler*, Istanbul 1931, 277, in which the author indicates that the Byzantine Greek word *alagion* is the source of the Ottoman word *aýd*.

The different types of procession.

1. BAYRAM ALAYI, "Holiday procession", traditionally organised to accompany the Sultan to the mosque and back to the palace, on the first days of two religious holidays, Kurban Bayrami (festival of sacrifices) and Seker Bayrami (the feast during the first three days after the Ramadan fast). The respective order of the participants in this procession was generally as follows:

- the Khidies of the imperial palace, on foot;
- the Chief White Eunuchs, on foot;
- the Director of the Registry of landed property, on horseback;
- the second and third Accountants, on horseback;
- the Finance Minister, on horseback;
- the Master of Orders, on horseback;
- the Steward to the Grand Vizier, on horseback;
- the Grand Vizier and the viziers, on horseback, on both sides the Janissaries, on foot;
- the Steward to the chief white eunuchs, carrying a silver sceptre in his right hand, and wearing a short fur-coat, a selimi turban, Tatar baggy trousers of violet velvet and a pair of Circassian shoes, on foot;
- the first and the second Masters of the horse, on foot;
- the Sultan, on horseback; on each side walked the bodyguards with their red and light brown conical hats and five-edged sceptres in their hands; lackeys and messengers; the clothing masters, wearing large wadded headgears with bejewelled crests;
- the Chief Lifeguard of the Janissaries and the Chief Clothing Master, both wearing bejewelled knitted caps with tassels, loose robes embroidered with gold threads, over it valuable robes of honour, girdles made of pearls and bejewelled daggers;
- the Head of the Black Eunuchs, wearing a selimi turban, an embroidered robe with a bejewelled girdle and a four-sleeved sable skin coat;
- the Masters of the Porte, with selimi turbans;
- the Chief Treasurer and the officials of the palace, wearing headgear, bejewelled daggers and knives and with bracelets of solid gold.

E. Koçu, Osmanlı sarayında Bayram tebrîkî ve Bayram Alayı, in TM, xii (Jan. 1972), 6-11; for an extensive article, see Das Fest der Kurban-Beiram in Konstantinopel, in Globus, xiii (1866), 148-52.

2. BEŞHİK ALAVI, 'Cradle procession', customarily organised to conduct the cradle of a new-born prince or a princess through the streets to the birth place of the baby. There were two specific processions for such an occasion: one was the procession disposed by the Sultan-Mother, and the other was arranged by the orders of the Grand-Vizier. The procession of the Sultan-Mother took place subsequent to the birth of the baby. The cradle, the bejewelled quilt and the valuable blanket were all taken from the old Saray and brought to the Topkapî Palace. This procession consisted respectively of the following participants:

- the guide, uniform;
- the officers of the Harem, two in a row;
- all the stewards of the lady who gave birth to the child, with their ceremonial girdles, equipments and headgears;
- numerous itinerant vendors, carrying trays of fruits, candies, flowers and cakes;
- the master vendors of sweetmeats, carrying the silver trays;
- numerous coaches with lattice-windows, and two eunuchs at the sides of each coach: in these coaches were the visiting ladies;
- the Messenger to the Chief of the Flag, and the Head of Musicians;
- the musicians.

The procession walked most of the way to the accompaniment of rhythmical beats of a kettle-drum. When the procession was over, various presents were given to the participants.

The procession disposed by the Grand Vizier was much more spectacular and crowded. It was a custom to put on this display six days after the birth of the child. The Grand Vizier, immediately after the imperial baby was born, ordered a cradle, a quilt and a blanket, embroidered with pearls, diamonds, emeralds and with other precious stones. The procession comprised the following participants in respective order:

- the guide, together with the attendants of the imperial house;
- the officers of the Grand Vizier's Harem;
- the Clerk of the Attendants and the Superintendent to the Attendants;
- the stewards to Sultanas;
- the Messenger to the Chief of the Flag, and the Superintendent to the Grand Vizier;
- the vendors, carrying trays of fruits and flowers;
- the tekkâşi (an official charged with making summaries and reports);
- the bodyguards;
- the Assistant of Ceremonies, and the Treasurer of Ceremonies;
- the Master of Ceremonies;
- the stewards to Sultanas;
- the Head of Musicians, carrying the blanket, and the footmen holding the blanket from its four corners;
- the Second Clothing Master, carrying the quilt;
- the First Clothing Master, carrying the cradle;
- the Steward to the Grand Vizier;
- the military band.

When the procession was completed, presents were given to all the participants, according to their ranks. The procession looked like a huge flower garden. The coloured turbans, caps and headgears, various fur-coats, yellow, red, green shoes, light boots, top-boots, etc., the artificial flower gardens, and hundreds of sugar boxes in different colours gave the atmosphere of a spectacular celebration.

Bibliography: The principal source is 'Akif Bey's Telkhisî-nâmî; the author was the master of ceremonies of the court during the reign of Mustafa III (second half of the 18th century), tr. Rado, 4-5; for the festivities of 1189/1775, to celebrate the birth of Khâdije Sultan, the daughter of Abd al-Hamîd I, on 20 Dju 'l-Ka'da 1189/14 February 1775, see Topkapî Archive E. no. 1562; for an illuminating example of a letter of congratulation,
see the letter of the Grand Vizier written for the birth of Khayriye Sultan, the daughter of Mahmud II, on 8 Shawwāl 1246/21 March 1830, Topkapı Archive, E. no. 5932, for the celebrations of the birth of Sultān Sulṭān, the daughter of Mahmud II, see Uzunçarşılı, op. cit., Çagatay Ulucay, Harem, ii, Ankara 1971, 78-9.

3. DJAÍZ ALAYI, "Procession of the trousseau" arranged to transport the trousseau of an imperial bride to the house of the bridgegroom. Before the procession started, the festal palms (nakhils) were brought to the palace very early in the morning, and were included in the procession as symbols of fecundity of the bride; for this reason, the festal palms prepared for a bride should be made of fruits, candies and flowers. The procession started after the prayer for the newly-wedded was completed. The respective order of the participants in this procession was generally as follows:

— the Commander-in-Chief of the Janissaries, with ceremonial dress;
— the Steward to the Commander-in-Chief, with crest;
— the chiefs of various Janissary corps, with crests;
— the Chief of Cavalry and the Chief Lifeguard of Janissaries, with their men;
— the Chief Reciter of the Kurān, accompanied by his assistants;
— the Chief of Police, accompanied by the policemen;
— the Police Superintendent, with his men;
— the court messengers;
— the court functionaries;
— the khudās and the scholars of the court;
— the Chief of the White Eunuchs;
— the Steward to the Sultan's Mother, and the Steward to the favourite wife of the Sultan;
— the Chief Architect, and the Steward of the Dockyards;
— two artificial sugar gardens with figures made of sugar, and numerous festal palms of gold and silver, adorned with fruits, candies and flowers;
— the vendors and attendants, carrying the boxes prepared for them as guests at the feast given by the Sultan. At both sides of the vendors and the attendants, walked the guards to watch over;
— the Chief of Messengers;
— the Minister of Foreign Affairs and the two Chief Military Judges;
— the viziers;
— the Grand Vizier and the Šaykh al-Islām;
— the Captain of the festal palms;
— artificial fruit gardens;
— the imperial military band;
— pure-bred rams guarded by the black eunuchs, one at each side;
— the concubines of the trousseau, and the Chief of Palace Guards, accompanied by his men. The furniture and the big pieces were carried by mules, adorned with precious clothes, such as brocade, satin and silk.

When the procession arrived at its destination, the participants were rewarded according to their ranks, with gold coins fur coats and silk robes.

Ulucay, Fatma ve Safiye Sultanlarımın düğünleri, in İstanbul Emtibāsı Me'marî, iv (Istanbul 1958); idem, II, 104; Nuktu, op. cit., 63-4.

4. EŞNAF ALAYI, "Procession of the guilds or corporations", held in the presence of the Sultan, where each guild displayed its own profession, as well as acted scenes mostly concerning the special field with which the guild was occupied. Some of the guilds, however, had clowns, rope dancers, illusionists, equilibrists, some others, mimics and actors; and the bigger corporations possessed all of these.

It was a custom in the imperial festivals that the procession of the guilds should take place always in the afternoons, and that they should appear in alphabetical order. Only four or five guilds were allowed each day to have a procession; for example, the processions of 181 guilds in the festival of 990/1582, which started on 11 June and ended on 6 July. Before the procession was over, each guild had to give to the Sultan its gifts, which were determined long before by the treasurer of the court. The representatives of the guilds, after presenting their gifts, would pray for the Sultan. After the ceremony, all members of these guilds would take their seats at dinner tables prepared for them as guests at the feast given by the Sultan.

All the guilds and the corporations had their own pennants; for example, the guild of lady's slipper-makers had a pennant with golden and silver threads and tassels, the cord-makers had a red and a white pennant, and the sword-makers had a red and green one. The weavers had two different pennants: one, red, and the other red, yellow and green. Sometimes these guilds included wild animals in the procession, just for the sake of attracting the interest of the spectators. Some guilds, which preserved the tradition of having warriors, namely swordsmen and archers, would include them into the procession as symbols of traditional combatants; these men walked with their traditional uniforms and demonstrated their skill when the time came.

The representative scenes of each guild, showing the profession, were exhibited on carts, pulled by horses or oxen. The bakers, for instance, while passing ceremonially, displayed their profession on two
successive carts: on the first, the millers ground wheat with an all-functioning miniature mill, while on the next the bakers baked bread in a burning furnace; and the priests in there presented to the Sultan and given to the spectators. The guild of tailors, in the festival of 990/1582, sewed an interesting and valuable dress, which could be worn on both sides; one side of this dress was red and yellow, the other white and blue.

Another kind of demonstration was either to show skills or to perform farces of mythological stories, in which the actors and clowns generally had stylised phallic gestures on their hands and wore costumes of cloth, paper and grass.

Most of the guilds presented gifts related to their profession: for example, the weavers presented the cloth they had been weaving during the procession. A few of the guilds presented things other than their profession: the haberdashers, for instance, presented to the Sultan, in the festival of 1086/1675, the following items: 2 silver decanters, 2 silver trays, 4 ornamented silver candlesticks, 8 silver candlesticks, 1 okka (öksye, equivalent to 1283 gr.) of rose-water, 2 plates with a tray full of musk-soap, 4 jars of sugar candy, 18 bottles of incense water, 60 bottles of flower-water, 3 trays full of dates, 6 plates full of sugar, 15 plates of candy, 4 plates full of sugar candy (of a different sort) and 7 kaşka glasses.

In every festival, the procession of the guilds were the centre of attraction, with presentations of products, displays of professional occupations, demonstrations of skills and performances of plays. Bibliography: For the display of professional occupations, see Georges Lebelski, La Description des yeux et magnifiques représentées à Constantinople…, 1584, 63-4; Nicholas von Haunolt, Particular Verzeichnuss mit das Ceremonien Gepraeng und Pracht das Fest der Beschneidung..., in Lewenkław, Neuehe Chronica Türkischer Nation..., Frankfurt am Main 1595, 481-509; Hezar-fenn, fol. 154a-172b; Covell, Diary, fol. 216a; for the costumes of the furriers, Pétis de la Croix, Mémoires, ii, Paris 1684, 119; Seyyid Huseyin Wehbi, Şir- nâme, ms. F. Abbot, Under the Turk in Constantinople: a record of Sir John Finch’s embassy, 1674-1681, London 1920; for the rules of ceremony, Findiklı Mehmed Agha, Silahdar-teâbi, ii, Istanbul 1928, 645; further reference to the procession of the guilds is to be found in Nurtu, op. cit., 73-6; and in Metin And, Osmanlı şenliklerinde Türk sanatları, Ankara 1982, 227-48.

5. GELİN ALÂFY. “the Procession for the bride”, to chaperone the bride to the house of the bridegroom. Up till the 18th century it was deemed lucky to have the bridal procession on Thursdays. This solemnity surpassed the pomp of the procession organised for the transportation of the trousseau. Almost all the viziers, the scholars and the high officials of the state took their places in this ceremony. The respective order of the train was generally as follows:

- the Chief of Police;
- the Viziers of the palace;
- the holders of the fief;
- the Khâgân, the scholars of the court, and the Chief of Artillery, the Chief Armourer and the Steward to the Commander-in-Chief;
- the Master of Janissaries and a commanding officer of a division;
- the chiefs of various Janissary corps, cavalry and the Chief Lifeguard;
- the Chief White Eunuch;
- the Minister of Finance, Master of Orders and the Commander-in-Chief;
- the Chief of Messengers and the memoranda officials;
- the Şerîf of Mecca and the Küdî of Istanbul;
- the Chief Military Judges;
- the paşas, who act as intimates of the bridegroom;
- the Grand Vizier and the Șayîk al-Islâm;
- the Inspector and the Accountant of the Prophet’s Tomb at Medina;
- the Revenue-collectors and the Senior officials of Mecca and Medina;
- the Stewards to the Sultana-Mother and to the bridegroom;
- the Steward to the bride;
- two big festival palms carried by the dockyard stewards, the stewards walking at each side, and the white eunuchs in the middle;
- the Steward to the palace guards and the Secretary to the Chief Black Eunuch of the Sultan’s Harem;
- two smaller festal palms of silver carried by the dockyard stewards;
- the guards of the old serail;
- two other silver festal palms, followed by the secretary of the guards of the old serail, on horseback, holding a Kurân with a bejewelled cover and case;
- the Chief Saddler to the Chief Black Eunuch, leading thoroughbred horses, which were richly equipped;
- the Chief Black Eunuch; the guards of the old serail at each side, and in front of the Chief, the men carrying purses and throwing gold pieces to the spectators;
- the bride in a silver or a bejewelled coach;
- numerous carriages of accompaniment, with the ladies of the court;
- the military band;
- numerous coaches carrying the ladies of the Harem.

The horses of the coaches were generally covered with expensive cloths, such as brocade, silk and satin. All the coaches were surrounded by the black eunuchs on horseback. The stewards, who carried the silver palms were richly dressed. This procession was so long that it usually took one hour or more from the beginning to the end. Bibliography: A detailed description of the bridal procession of the eldest daughter of Murâd III may be seen in von Haunolt, Verzeichnuss des Hochzeitlichen Fest..., in op. cit., 532-5; the bridal procession in the festival of 1086/1675, ‘Abdi, fol. 17a; Hezar-fenn, fols. 177a-178b; Covell, Diary, fol. 216a; and also Thomas Coke, A True Narrative of the Great Solemnity of the circumcision of Mustapha, Prince of Turkey, eldest son of Sultan Mahomed present Emperor of the Turks, London 1676; Sür-i Hâmapaş, Nationalbibliothek, Vienna, cod. H.O. 95, fols. 10a-14b; a brief section on the wedding of Sâlihâ Sultan, the daughter of Ahmed III, may be seen in Topkapâi Archive, E. no. 277; Hâşim Âli, Veli Ahmed Efendi, Bab-ı Hayrân-i Hicribânî, ms. Süleymaniye Kit. 55, fols. 155a-b; a further discussion on the ceremony may be seen in the same author, Hâtib-i Hicribânî, ms. Süleymaniye Kit. 75, fols. 108b-109a, and in the same author, Hâtib-i Hicribânî, ms. Süleymaniye Kit. 75, fols. 108b-109a.

For a vivid description of the procession in 1832, see Ein Volksfest in Konstanzer Magazin fur Literatur des Auslands, Berlin 1833, 531; also Uluçây, Haremde mektuplar, Istanbul 1956; Ayse Osmanoglu, toplanti, 63, op.cit., 27, 88; Uluçây, Harem, 63, 87. Bibliography: This is only very limited for this period; see, however, Halit Ziya Uşaklıgil, Saray ve êsi, i, Istanbul 1941, 129-34; Leyla Saä, Saray ve harem hatürlarim, in Yeni Tarih Dergisi, Istanbul 1958, 539; Ayse Osmanoglu, Babam Abdüllahim, Istanbul 1960, 88; Safiye Unûvar, Saray hatürlarım, Istanbul 1964, 110; Uluçây, op.cit., i, 163.

The procession was generally composed of the following persons: the Grand Vizier, the Shâhîd-êl-İslâm, the Chief Military judges, the Sherif of Mecca, the Viziers, and certain number of high officials.

The ceremony was usually directed by the Shâhîd-êl-İslâm and sometimes by the Sherif of Mecca. After the ceremony, the Sultan visited the tombs of his ancestors, and returned to the palace in procession order.

The tradition was started by Selim I. It was a custom that every Sultan issued money, sacrificed sheep and distributed these to the poor. It was the task of the Steward to the Chief White Eunuch and the First Master of the Horse to take the petitions of the subjects while the procession was on its way to the palace.

7. KALÎÉ ALÂVî, "The Procession to gird on the sword". The Sultan, as Caliph of all Muslims, had to take the oath of allegiance when he succeeded to the throne. The procession would usually take place two weeks later. The place of this ceremony was the tomb of Abû Ayyûb al-Ansârî in Eyiîp (a district named after this tomb). The Sultan, with a long train of high officials and soldiers would go to Eyiîp either by boat or on horseback. If he went to Eyiîp via the sea, then he would return via the land, or vice-versa.

The procession was generally composed of the following persons: the Grand Vizier, the Shâhîd-êl-İslâm, the Chief Military judges, the Sherif of Mecca, the Viziers, and certain number of high officials.

The ceremony was usually directed by the Shâhîd-êl-İslâm and sometimes by the Sherif of Mecca. After the ceremony, the Sultan visited the tombs of his ancestors, and returned to the palace in procession order.

The tradition was started by Selim I. It was a custom that every Sultan issued money, sacrificed sheep and distributed these to the poor. as the others, but was nevertheless effective and colourful.

On entering the mosque, the Sultan was met by the Commander-in-Chief and the Trustee of the Pious Foundations. It was the duty of the Commander-in-Chief to take off the boots of the Sultan and offer him slippers. It was an honour given to him by the Sultan. If it was the first time that the Commander was doing this, he was rewarded with a dagger with diamonds on the handle. After this welcome, Sultan was escorted to his private pew by the Commander and the Chief Lifeguard. On leaving the mosque, the boots of the Sultan were put on again by the Commander.

In the procession back to the palace, the Commander walked in front of the Sultan’s horse and the Trustees, carrying censers at each side, until they were dismissed by the Sultan.

**Bibliography:** For such a procession, see Hezâr-fenn, fols. 170b-171b; Çeşmi-zade Muşafa Reşid, Çeşmi-zade tağlığı (1180-2/1766-8), ed. Bekir Kürkçoğlu, İstanbul 1959, 47; a vivid description may be seen in Ayse Osmanoğlu’s autobiography, 59-61; and in Safiye Ünivâr’s one, 103; also see, Midhat Sertoğlu, Osmanî impara-torlugu devrinde mevlid alayî, in TM, iv (April 1976), 45-9; also op.cit., ii, 160.

10. Nigâni âlavî. “Procession of engagement”, held on the engagement of a sultan or a princess. In this procession, the gifts of the bridegroom were taken to the bride’s house with an escort, which was generally composed of the following persons:

- the guide;
- the Chief Saddler of the palace;
- the Steward to the Chief White Eunuch;
- the Superintendent to the Grand Vizier;
- the Steward to the Grand Vizier;
- the Steward to the bride;
- the vendors and attendants carrying the gifts;
- twenty festal palms, each carried by two Janissaries;
- thirty large, ornamented trays full of confectionery;
- two artificial gardens made of sugar;
- one silver festal palm, at each side of which silver boxes of jewelry, carried by the attendants;
- bejewelled girdles, diamond rings, earrings with precious stones, bejewelled clogs, shoes, light boots, slippers, all carried by the white eunuchs and guarded by palace watchmen;
- the Stewards to the bridegroom;
- the pâhas, who act as intimates of the bridegroom;
- the Captain of the Sea, with his men;
- the Janissaries;
- the military band.

The gifts were delivered to the Chief Black Eunuch, who showed them to the Sultan, and upon the Sultan’s approval sent them to the Harem with the black eunuchs.

**Bibliography:** Sîr-nâmé, Nationalbibliothek, Vienna, cod. H.O. 95, fols. 2b-2a; N. M. Penzer, The Harem, London 1936; for the values of the gifts, Uluçay, op.cit., 100-1.

11. Sunnet âlavî. “Procession of circumcision”. This escorted the prince, who was going to be circumcised, from his residence to the field where the festivities took place. The respective order of the train was generally as follows:

- the Janissary corps;
- the adjutants, the messengers, and the white eunuchs of the court;
- forty small festal palms, twenty at each side, each carried by three Janissaries;
- the Chief Architect and the Steward to the Dockyards;
- two giant festal palms, “as high as pine trees”, each carried by 160 to 200 dockyard slaves, who according to the custom, were released for this occasion. These palms were balanced by the captains of the sea, holding ropes tied to the top of the palms; on each rope hung three different kinds of expensive cloth, each adequate in size for one dress;
- artificial gardens made of sugar: these gardens were full of trees, flowers, birds, domestic and wild animals; and in these gardens were jets of water running from the fountains, with nightingales singing;
- the viziers;
- the Grand Vizier and the Şayḫ-al-Islâm;
- the Master of the Horse, followed by thoroughbred horses, the harnesses of which were adorned with jewels;
- the Prince on horseback, with the private bodyguards on each side of him;
- the Chief Black Eunuch, followed by black eunuchs;
- the gentlemen-in-waiting, and the Chief White Eunuch;
- the Chief Usberis;
- the military band;
- the Chief Lifeguard, followed by the guards;
- the Chief of Cavalry, followed by the cavalry corps;
- the Chief of Artillery, with artillerymen;
- the Chief Armourer, with armourers.

When the procession was over, some of the festal palms would be set up in front of the imperial tent, and the others would be stuck up before the kiosk where the prince was going to be circumcised, as symbols of power and virility.

**Bibliography:** For the order of this procession, Georges Lebelski, A True Description of the Magnificent Tryumphes and Pastimes, represented at Constantinople, at the solemnizing of the Circumcision of the Soldan Maumet, the son of Amurath, the thyrd of that name, in the year of our Lorde God 1582, in the Monathes of Maie and June, in Francois de Billerberg, Most Rare and Strange Discourses of Amurathe, the Turkish Emperor that now is, London 1585 (no page number); Haanolt, Particulier Verzeichis…, in op.cit., 469-9, 472-3; Jean Palerne, Peregrinations du S. The main gallery in Yuzulukaya (east of Ankara) show the Hittite phallicomorphic symbols. In the region of Afyon and Konya (central Anatolia), during the reign of the Phrygian kings, the symbols headed ritualistic processions, mostly in spring.

In the Ottoman palaces, these nakhils had an important place not only in the weddings, but also in the circumcisions ceremonies. For the weddings, they were prepared by the bride’s family, and in the circumcisions by the parents of the boy. In these ceremonies, the palms were carried in front of the procession, and if it was an imperial celebration, the Grand Vizier, the viziers and the high officials walked behind them. If the nakhils were in various sizes, the biggest would generally be carried first, and it would be followed by other smaller ones, together with gardens of sugar work, sweets in gold, silver and bronze trays, gold and silver decanters of şerbet (a sweet, cold drink, made of various fruit juices), bundles of the bride’s troussseau, coloured purses full of silver coins, and caskets full of precious stones. Of course, the arrangement of the nakhils differed according to the taste of the superintendents of the processions.

There were special craftsmen who constructed these festal palms. Ewlîyâ described them in his travel journal as esnaf-î nakhîldijîn-î sârî himayûn (”guild of nakhîls-makers for imperial festivities”). According to him, the guild had four workshops in Istanbul, with 55 skilled members in the 17th century. The founder of this guild was Meyser Ezerî. These craftsmen, Ewlîyâ writes, “constructed nakhîls” in wax as tall as the minaret of the Suleymaniye Mosque, with coloured ribbons, silver and golden threads, which could also be illuminated”. The iron-structured gigantic nakhîls “were carried by hundreds of galley-slaves supervised by guards, who gave with whistles such orders as: ‘pull it to the right, to the left,’ etc.” A similar scene is described in detail by an English priest, Dr. John Covel, who had the occasion to see the festivities of Sultan Mehmed IV, in the summer of 1086/1675 in Edirne. He witnessed these guards—generally dockyard stewards—with whistles, directing each group, carrying gigantic nakhîls, approximately 25 metres high. The lower end (approximately 4.50 to 5.50 metres in diameter) had eight or ten long parallel bars, and the slaves carried the nakhîls, holding these bars. There was someone who directed them: he commanded the slaves to rest or to carry on at the sound of the whistle.

The gigantic nakhîls were so big that in order to carry them through the narrow streets of old Istanbul, very often, the projecting parts of the houses, such as eaves and balconies, were pulled down and afterwards rebuilt. Although the rebuilding of the houses required a great deal of money, the value of the nakhîls were: almost twice the expenses thus incurred. The most important fertility symbols were each a work of art and very expensive. Some of them were entirely in silver and some were adorned with jewelry. At the wedding in 931/1524 of Khâdîjî Sultan, sister of Suleyman the Magnificent, one of the nakhîls consisted of 40,000 and another of 60,000 pieces of hand-made silver coins, and caskets full of precious stones. Of course, the arrangement of the nakhîls differed according to the taste of the superintendents of the procession.

Adjuncts of the processions included:

1. nakhîl, “Festal palm”. This phallicomorphic symbol sometimes took the form of a wreath or a fir branch, but generally it was made in the form of a cypress. In earlier periods it was in the shape of a date palm decorated with different kinds of ornaments, mouldings, fruits and emblems. We observe such emblems in Anatolia as far back as the Hittites and Phrygians (terracotta panels with reliefs decorated in coloured glaze from the Phrygian city of Pazarh, near Ankara, show such palms as fertility symbols). The excavations at Altinteppe, situated on the plain of Erzincan (eastern central Anatolia), have revealed panels decorated with palmettes belonging to the period of Urartu in Anatolia; also, the sculptures of...
Processions in India are of great popular appeal, from the panache of the simple wedding ceremonies to the most astonishing works in sugar were the ones in bigger sizes, such as models of a mosque, a castle, a town, a kiosk, a garden or a fountain with running water.

Apart from these models and the figures, there were also large circular trays or large boxes of confectionery, carried by two or three attendants and sometimes by three or four. In the festivities of 1086/1675, for instance, there were 200 coffers of confectionery, all distributed to the spectators.

**Bibliography:** An illuminating description of sugar figures may be seen in Gerlach’s Tagebueh., 97, 255; for the confectionery and the confectioner, Haunolt, Particular Verzeichnuss., 472, 476, 489-90; and idem, Verzeichnuss des Hochzeitlichen Fest...., 528, 534; Abdi, Sür-name, fol. 8b; Covel, Diary, fol. 215a; Hezar-fenn, fol. 168a, 174b; Sür-name of 1137/1724, ms., Nat. bibl. 3. YAPMA BAĞÇE, “Artificial garden”. In the processions organised for weddings, and circumcision celebrations, the artificial gardens were one of the exhibits, which interested the spectators, together with the festal palms and the sugar figures. These models were approximately 2.70 m or 3.60 m in size, with fruit trees, flowers, kiosks and fountains. There were nightingales singing on the trees, and water running from the hill tops. If the model was going to be presented to the Sultan, it was decorated with precious stones, mostly turquoise and mother-of-pearls. These artificial gardens moved on four, six or sometimes eight wheels, and each garden was pulled by four or six dockyard slaves, who were later liberated by the Sultan. In some cases, there were also real musicians on these models, playing for the public.

In short, the artificial gardens were pieces of artistic composition.

Dr. Covel witnessed the demolishing process in Edirne: some of the houses were completely pulled down, and the streets of the festival palms and the sugar figures. These exhibits, which interested the spectators, together with the festal palms and the sugar figures. These models were approximately 2.70 m or 3.60 m in size, with fruit trees, flowers, kiosks and fountains. There were nightingales singing on the trees, and water running from the hill tops. If the model was going to be presented to the Sultan, it was decorated with precious stones, mostly turquoise and mother-of-pearls. These artificial gardens moved on four, six or sometimes eight wheels, and each garden was pulled by four or six dockyard slaves, who were later liberated by the Sultan. In some cases, there were also real musicians on these models, playing for the public.

In short, the artificial gardens were pieces of artistic composition.

5. IN MUSLIM INDIA

Many of the terms used here have already been defined in the account of court ceremonial above, for which see MUKH. Proccesions in India are of great popular appeal, from the panache of the simple wedding ceremonies to
the pomp of royal ceremonial; and even these extremes have something in common.

The wedding (for full details see NIKAH) involves a preliminary exchange of presents (sādāk) between bride and groom, the bride's night procession (mehndī) to anoint the bridegroom with henna, and the bridegroom's procession in which he comes to carry away his bride; even in the simplest forms the bridegroom is mounted on a decorated horse, or the bride carried in a palanquin (pālīk) or on a litter (dīfī) [see MARI] accompanied by friends on foot and by a musical escort. The essentials of Muslim weddings in India (which incorporate many details derived from Hindu customs) are described, especially for the Deccan, in Dża'far Shāhīf, ch. viii; but the difference is only one of degree from such an elaborate wedding ceremony as that of the (Anglo-Muslim) granddaughter of Col. W. L. Gardeń at Kasganj in 1835 to a grandson of Shāh Alam II, sultan of Dihlī, described in Fanny Parks, Wonders of a Pilgrim in Search of the Picturesque, London 1850 (repr. Karachi 1975), i, 420-50, and similar in its lavish ostentation to the processions, for various purposes, of the royal court: the escort for the bride's dress in 'amāris on elephants and in covered bullock-carts (rathā) and palanquins with 100 trays of presents carried on men's heads; a similar procession to escort the bridegroom's dress; the sādāk procession, with fully caparisoned elephants and horses, nākīs, palanquins and rathās [see nārkī], 200 earthen pots, covered with leaf silver, containing sweetmeats and carried on bamboo screens and had triumphal arches at intervals, all lighted with thousands of small lamps, fireworks were let off all along the route, and the usual elephants, horses, nākīs, palanquins, rathās, and the portable stages, were lit up by men carrying 5,000 torches; and the bridegroom's procession to carry away his bride (described as an old Tartar, or Timūrid, custom; but Ibn Battūta does, however, write of a similar ceremony at the marriage of the sister of Muhammad b. Tughluk), similarly accompanied by many musical bands and innumerable flags, with the young prince at the head on a horse with an ornamental armour made of flowers, flanked by an alfādīr and followed by a gold-embroidered chan; besides the usual train of elephants and horses, etc., carrying the escort, and the portable stages, there were added a great number of led horses, and a small forest of artificial trees of wax and paper, decorated with gold and silver foil and mica. Not mentioned in the above account, but known from other sources, are the distribution of small copper coins from one of the elephants to the bystanders lining the route, and the liberation of caged birds at frequent intervals.

Descriptions of royal processions are less frequent than notices of other ceremonial observances. Ibn Baṭṭūta, however, describe, sketchily, certain processions in the time of Muhammad b. Tughluk: on his return to his palace from a journey, wooden pavilions were set up at intervals on the road from city gate to palace gate, several storeys high with well-dressed singers and dancing girls on each storey; the street walls were hung with silk cloths, and silk cloths carpeted the space between the pavilions for the sultan's horse to walk on. He was preceded by several thousand of his own slaves on foot, sixteen brocaded and jewelled elephants bearing sixteen parasols, and the ghādhīya, and followed by mounted troops; three or four small catapults set up on elephants might scatter silver coin among the populace (iii, 237-8, tr. Gibb, iii, 668; another ceremonial entry is described at iii, 395-6, tr. Gibb, iii, 744). At the reception of a person of rank (e.g. the amīr Ghiyāth al-Dīn Muḥammad, descendant of the 'Abbasīd caliph al-Muṣṭaṣir bi'llāh) the sultan sent envoys to a distance to meet him, and himself rode out ten miles to greet him personally, dismounting to pay homage and offer a āḥāna before the sultan himself, preceded by a kālan. Foreign dignitaries later in the procession were also mounted on elephants. Behind the sultan were his 'honours' [see MARATĪB] and all the members of his personal entourage, and then his half-brother, his father's adopted son, his nephew Firūz b. Rāqībat, the ważīr, and some half-dozen 'great amīrs who are never separated from his company', all mounted and followed by their marāṭīb and troops; other amīrs rode without 'honours'; those riding in the procession wore armour, both on themselves and on their horses. At the gate of the 'āshur, the procession halted and the judges, the principal amīrs and the "chiefs of the foreigners" (envoys from other courts?) entered before the sultan; after the prayers and the address by the swānī, the sultan protected his dress by a silk overall and himself stabbed the sacrificial camel in the throat with a spear before returning to his palace. Ibn Batṭūta also describes (iii, 109ff., tr. Gibb, iii, 600-2) a river-journey with the governor of Lāhārī in Sind: the governor rode in a central raised cabin in an ahāsara (possibly connected with the Hindī hātā, a cargo boat of some 35-55 tonnes; here evidently a state barge) rowed by 40 men; of the fifteen vessels which made up his baggage-train, four flanked the ahāsara, two carrying his marāṭīb and two carrying singers. Singers and the instruments of the marāṭīb performed alternately until the midday meal, when the ships closed up and gangways were set between them; at dusk the parties disembarked and set up camp on the river bank. When the procession moved to land, six horsemen rode ahead with drums and reed pipes, followed by the governor's hātīfīn, flanked by singers, and his personal troops, and the governor himself.

There is little difference on the composition of royal processions over the years, as far as can be determined from the limited evidence available; certain practices mentioned later, such as water-carriers walking ahead of the procession to lay the dust, may in fact not be innovations. When the Mughal ruler moved out of his palace, he was accompanied almost always by the bearer of the flywhisk, and invariably by the kār, as described above s.v. MARAŚĪM. 5; the ruler's person would be further guarded by mace-bearers (gurzīsārā), who obviously inherited the functions of the dārūsh or dārbār, as described by Amīr Khursāw and Barānī. Processions are the subject of frequent illustration in Mughal painting; the use of the ghādhīya seems by now to have been discontinued. There is evidence of some rulers taking part in processions on
foot on grounds of piety; Akbar so covered part of the journey to the shrine of Mucm al-Dln CishtT at sardca each camping site, and his own red and tent to be erected within it, carpets, cook-
Firuz-Shdhi, (white trimmed with blue) before any other and torch-bearers for night travel. The sultan selected everything, grass-cutters for fodder for the animals, (dola), swivelguns, each with two gunners and driver, then a body of artillery, two troops of armed cavalry, and a regiment of militia, all in new uniforms of different colours; the horses were caparisoned with embroidered horsecloths, silver ornaments and necklaces, with tails and manes dyed red with henna. These were followed by the mounted kettledrums, these with horse and rider ornamented with the royal fish emblem (representing the makh-marath; see under maratib. 5. Fanny Parks remarks, op. cit., i, 178, that the royal pleasure-boat on the river Gomai was "made in the shape of a fish, and the golden scales glittered in the sun"). The ruler followed in an open silver carriage drawn by four elephants with costly carries, and guarded by cavalry, and followed by the king's horses, led by grooms; other elephant-carrigages, with two elephants apiece, conveyed the British Resident, the waizir, and other favoured nobles. The golden naik followed, with a golden palanquin and a state carriage drawn by eight horses with a European coachman. Some fifty ridden elephants followed, with the Euro-
peans of the King's court and the umars and the great officers of state, and the regiments, both horse and foot, marching with their colours unfurled, and their bands "playing English pieces". After the sacrifice at the 'idgah, the procession returned to the royal palace in the same order, where the king held court firstly to receive nafris [g.v.], then to garland his favoured guests and to award distinctions and present basts; a feast followed, with animal fights, music and dancing, and fireworks. "This magnificent style of celebrating is perhaps unequalled by any other Native Court now existing in Hindoostan." The royal hunt—highly esteemed in India since it is best considered in three contexts.

foot, marching with their colours unfurled, and their

1. In written sources.

Among the "seven arts" al-funun al-sab'a [see karn]—non-classical verse forms are always made to number seven, although the lists are not identical—the mawaliyya is given pride of place next to the mawaliyya and the zadjal, on the ground that its
r.

Two traditions place its beginnings in Iraq in early
\'Abb\'a\'sid times. One is that non-Arab (mawali) labourers in the orchards of Wasi\'i sang it, using the words ya mawaliyya ("O, my master!") as a refrain. The other is that a slave-girl of the Barmakis, herself called Mawaliyya, created the form to circumvent H\'ur\'un al-Rashid's ban on poetry praising her disgraced masters, the contention being that since the language was uninflected, the composition could not be said to be thar. Both accounts are suspect as they occur only in late sources and appear to have been fabricated to account for the otherwise unexplained appellation.

The form was, however, well-established by the
it is described as *abyad* ("white, blank"); if so ornamented, it is either *ahmar* ("red") or *akhdar* ("green"). The distinction most often made—"but not consistently applied—between these two being that the first deals with sad themes and the second with joyful ones.

The following illustrates the rhyme scheme,metrical variations, and the *zahr*, with the normal pronunciation of the punning rhymes added between square brackets:

The form is a favourite in Arab lands, extending all the way from 'Irâk to North Africa. Variations are almost innumerable, and the observations that follow relate to prevalent practice in Egypt alone.

The terminology is often vague and inconsistent. The word *maωawyîyâ* itself is still used, especially in writing, but in common parlance the composition itself is always almost called a *maωawyîl*, and a master of the art is known as *rayyîr il-maωawyîl*.

The metre is seldom as regular as the pundits would have it, but if the composition can be scanned at all it is recognisably in the *basîl*, with two variations added to those allowed by the classical prosodists: the *fâli*un foot is often reduced to two long syllables even in the body of the line, and the *mustaufîlun* foot is occasionally changed to *mutafâli*un. It may therefore be scanned:

\[
\begin{array}{cccc}
\ddagger & - & \ddagger & -
\end{array}
\]

What in classical prosody is a hemistich is here clearly the basic metrical unit, for it is always rhymed, occurs more often in odd than in even numbers, and is never enjambed. In this entry, it will be referred to as a line.

The most marked development has been in rhyme schemes. The monorhyme quatrain (aaua), called *raβâ-i* or *mirâbâa*, is now comparatively rare. Variations appear to have been created mostly by insertions between the third line and the last. The first three lines are then called the *†ataba* ("doorstep")—although the term is also sometimes applied to each of the three lines—or the *farâh* ("spread, mat"), and the last line is then the *qâfâ* ("cover") or, in longer compositions, the *šâdîyya* ("skull-cap").

The simplest elaboration consists of the addition of a rhymed line in fourth place: aaua. This line is said to be *šârîj* ("lame"), and the *maωawîl* itself is *aωradj*.

Another augmented form has the rhyme scheme aaua zzz a. The composition is then called *sabînî* or *mišâbët* ("seventh"), *nuωmâni*, or *baghdâdî*.

Yet another elaboration is brought about by adding a number of lines, usually six, with alternating rhymes after the *fâli*un—*aωka ωkîh zzz a*—the last line also having an internal *z* rhyme. The setest of alternating rhymes is called *shâfâra* ("tree") or *ridâfa* ("alternate") or, else each of the two rhymes is called a *ridâf*, and they are distinguished from each other as *dakar* and *întâya* ("male" and "female"). The *maωawîl* is then said to be *mardîf* or *Šâdîdî* ("Upper Egyptian"). By multiplying the number of setests, or by using any variety of the *maωawîl* as a stanza, the composition can be extended indefinitely, particularly for narrative purposes.

A somewhat rare further refinement is the addition of internal rhymes to some of the lines; these are then called *mišâkka†* ("clapping or roofed").

Another feature strongly associated with the folk *maωawîl* but not exclusive to it is the expansion of the rhymes into all-palatal paronomasias, achieved by deliberate distortion of the normal pronunciation. The art is called *zahr* ("flower"). A *maωawîl* devoid of

(Ed.) AL-MÁWARDÍ, ABU 'L-HASAN 'ALI B. MUHAMMAD B. HÁBÍB, ǦÁWZÍL (LA F. 1058) was born in Basra in May 1058, aged 86 years. He became a teacher. The renown which he acquired, owing to the extent and the depth of his knowledge, drew to him the attention of the authorities; he was appointed kádi and fulfilled the responsibilities of this post in various towns, in particular at Ustuwa, near Nishapúr, before being entrusted with the role in Baghdád itself. In 429/1037-8, he was awarded the honorific surname (lakab) of ǧáddar or supreme kádi in spite of the opinions of eminent jurists, including al-Tabari, who denied the legality of this title. In addition, he was on four occasions chosen by the caliph al-Kaárím (422-67/1031-74) to perform diplomatic missions in 422/1031, 428/1042-3, 434/1047-8 and 433/1043-4. Anecdotes confirm that his rank and his vast learning did not in any way detract from his modesty and that he was an enthusiastic and eloquent speaker. He was furthermore highly regarded by the preceding caliph al-Ḫájír, who was then the ruler of Iraq (al-Mawardí was only in the conduct of his negotiations with the Buyids who were then the rulers of Iran) (1968), 11-92. See also MAZALIM.

(Selection from works of Al-Mawardí chosen by Brockelmann, C. 1968)

The most striking example is that of the ǧáddar declared in 429/1037-8 against the Buyids, al-Dhahabí, who was demanding from al-Kaárím the right to bear the title of ǧáddar. However, al-Mawardí did not escape the suspicions of the orthodox, and the great ǧáddar al-Šaafií jurist al-Šubkí (d. 756/1355) speaks of Muţázírí views for which he was criticised (Tabkáští al-šáfi'íyya, iii, 303, v, 12).

As regards the works of Al-Mawardí, the classification followed is that of Muşáfá al-Šaâkí, in the introduction to the Addá al-dánuy wa l-ǧi'din (ed. in the margins of the Kaškálí of Al-Šámi, Cairo 1316/1898-9; ed. M. al-Sakka, Cairo 1955).

2. Works of a political and social nature: Kitáb al-akhirání al-sulájiyya, translated notably by Fagnan (Algiers 1915; new edition, Paris 1982) under the title of Traité des statuts gouvernementaux ou Constitutions politiques; this is the work which made Al-Mawardí known in the West, and it is considered a classic work of public law; Kitáb Šawáni al-ţáriqa wa-ṣ-siyyát al-muání, on the adab of the viziers (ms. in Vienna). Kitáb Táshkíl al-maşrúr wa-ta'lí'íl al-saţar, on politics and different forms of government (ms. in Gotha); Kitáb Násíf al-malúk (ms. in Paris).

3. Studies of language and of adáb: Kitáb l-ţanáh, on grammar (lost); Kitáb al-ţáshkíl wa l-ţikam, collection of 300 traditions, 300 proverbs and 300 verses (ms. of Un. of Leiden); Kitáb Addá al-takallum (selection from works of Al-Mawardí chosen by Muhammad b. Ǧáli Al-Zahra; ms. of Un. of Leiden, Or. 989-9), Kitáb Addá al-ţáddi, which in fact represents two of the thirty sections of the Ǧádi (ed. Baghdád 1971); Kitáb Muṣțuíʕ al-fadá, Tractatus paroemeticus de virtutibus moribus, attributed to Al-Mawardí (ms. Escurrail).

(C. Brockelmann)

MAWÁLÍYÁ — MAWÁT (A.), juridical term designating dead lands.

Fiqh makes the practical distinction between dead land (ard maouâl) and living land. According to Abú Ǧáfír, dead land is that which is not well cultivated and is without water; for al-Shaâkí, it is all that is neither cultivated nor dependent on a cultivated place. Dead land is of two kinds: that which, from time immemorial, has always been in this state, of a kind that bears no mark of cultivation and concerning which no property right has been established; whereas dead land of the second category is that which, once cultivated, has then been neglected, become dead and allowed to lie fallow.

But dead land can be brought to life. Revivification (išká) is a task performed on the land and intended to make it usable. Both near neighbours and those at a greater distance have the right of revivification. For Malik, however, the nearest neighbours are the most qualified to undertake the work of revivification. Giving value to the land allows the one who has carried out the task of revivification to become a man of property. A piece of dead land that has been revivified becomes the property (milk) of the revivifier. According to the Hanáfí, revivification of the land is only allowed with the caliph's authorisation, but, according to al-Shaâkí, the one who revivifies dead pieces of land becomes the owner with or without the caliph's permission.

On the nature of what constitutes giving value to land so as to create a property right, the different juridical schools are not in agreement: according to the Malikís, it is not enough to enclose the land, to sink a well in it or to pasture a flock on it. One must,....
for example, find a spring and then exploit the spring by means of water channels, or else clear the land in such a way as to make it usable, or even build; in short, giving value to it must consist of useful and productive work. The Mālikis, however, appear less demanding than the other juridical schools on the subject of the conditions required to acquire the soil by reactivation.

The land surrounding the reactivated land (harirri) also becomes reactivated land, but on this the four juridical schools are not in agreement on the extent of the conditions required to acquire the soil by reactivation.

The portion of the treasure also received al-Rahba and al-Rakka on the Euphrates as well as Edessa or al-Ruha. The portion of the treasure that has been reserved can lose its character as a reserve, under certain conditions, if someone comes to reivate it. In the same way, if dead land granted as a concession is reivated by an individual who has not been granted the concession, the right of the reiviver does not prevail over that of the concessionary; in any case, where dead lands are granted as concessions, the beneficiaries of the concessions do not really become the owners before having reivated them. According to the Prophet’s saying “To the one who quickens a dead piece of land, that land belongs.” In practice, one can understand all the importance that could be attached to making an ownerless and abandoned land usable and productive, a fiscal importance especially, since quickening involved the payment to the public treasury of the tax for the land, tithe or kharaj, in accordance with regional conditions.

MAWĀZIN [see MAKĀVĪN]

MAWŪDĪ s. ʿIMĀD AL-DĪN ZANKĪ, KUṬB AL-DĪN, AL-TĀHĪB [see ATABAK] of AL-MAWSĪL.

ʿImād-al-Dīn Zankī, on his death on 6 Rābi`a II 541/15 September 1146, left four heirs: of these Mawūdī b. ʿImād-al-Dīn Zankī, Kuṭb al-Dīn al-Ar`ādji, the youngest of his sons, was only sixteen years old. The eldest, Sayf al-Dīn Ghāzī, represented his father at al-Mawsīl of which Zankī [q.v.] held only the usufruct; the second son, Nūr al-Dīn Mahmūd [q.v.], twenty-nine years old, accompanied his father in his campaigns; the third, Nūrāt al-Dīn Amir-Āmīrān was named as heir presumptive when the former was ill, in Ramadan 552/October 1157, and later sent to Harrān as governor. Mawūdī also had a sister who married the amīr Nāṣir al-Dīn al-Sūrī. The task of appointing Zankī’s successor was in the hands of two trusted counsellors: the vizier Djalāl al-Dīn Muhammad b. ʿAlī al-Djīwād al-Iṣfahānī, and the chamberlain (ḥāfīz) Salah al-Dīn Muḥammad al-Yāḥṣīyānī, titular amīr of Ḥamāt.

At the time of his illness, Sayf al-Dīn Ghāzī I transferred power to his youngest brother Kuṭb al-Dīn Mawūdī at the request of his loyal counsellors Djalāl al-Dīn and Zayn al-Dīn Kūčī, who had previously served him. The young prince associated with this trust was another loyal supporter of Zankī, a jurist, the kādī Kamāl al-Dīn Abū l-Fadl Muhammad al-Ṣḥahrāzūrī. On his assumption of power, Kuṭb al-Dīn Mawūdī, succeeding to the eldest of the family, took up residence in the governor’s palace and ordered the imprisonment of his elder brother Nūr al-Dīn Amīr-Amīrān who had sought to establish a faction of amīrs. Nūr al-Dīn, for his part, had favoured the installation of Mawūdī at al-Mawsīl. Recognized by the army and the population as sovereign of the entire Djiyarī, his position was confirmed by the investiture of the Saldijjāk sultan Maṣūdī b. Muḥammad [q.v.] and that of the caliph al-Muṣṭaفا [q.v.]. Shortly after his accession to power, Kuṭb al-Dīn Mawūdī married the princess Zumurrūd Khatūn, daughter of Timūrṭāsh, the Artūkid prince of Mardin [q.v.] who had previously offered her to Sayf al-Dīn as a means of sealing an alliance with the Zankids.

A crisis soon erupted in 544/1149 between Kuṭb al-Dīn and his elder brother Nūr al-Dīn regarding the town of Sindjār [q.v.], where a third of the treasure of Zankī was stored in the citadel. The amīr ʿAbd al-Malik, governor of Sindjār, receiving no reply from Aleppo to the overtures that he had made to Nūr al-Dīn, made his way to al-Mawsīl to pledge allegiance to Mawūdī. Meanwhile, his son Shams al-Dīn had offered Sindjār to Nūr al-Dīn on condition that he himself should retain the treasure. On Monday 10 Rajdāb 544/13 November 1149, Nūr al-Dīn occupied Sindjār and succeeded in winning over to his side the amīr Fakhr al-Dīn Kara Arslān b. Dāuíd of Ḫusn Kaylā, a rival of Timūrṭāsh of Mardin, the father-in-law of Sayf al-Dīn. Learning of the forthcoming alliance of the Aleppo and the Artūkid troops, Mawūdī returned to Sindjār. Accused of improperly appropriating the treasure, Nūr al-Dīn was able to argue his right of superior age in his defence; he expressed his wish to discuss with Mawūdī the problems raised by the succession to Sayf al-Dīn, and drew his attention to the considerable number of amīrs who had rallied to his cause. Mawūdī’s counsellors feared desertions to the side of Nūr al-Dīn and considered that if the ruler of Aleppo were to emerge the victor in the confrontation, the sultan would come to attack al-Mawsīl which, enfeebled, would be incapable of resisting him. On the other hand, if Nūr al-Dīn were to be defeated, the most reliable bastion against the Crusaders would collapse and the Franks would then be able to expand still further. With the threat from common adversaries, the Saljuk sultan to the East and the Crusaders to the West, the only solution was to make peace between the members of the Zankid family. The negotiations, skillfully conducted by Djalāl al-Dīn al-Djīwād, led to an agreement between the two brothers. Nūr al-Dīn returned Sindjār in exchange for Ḫims which had been given to his brother Sayf al-Dīn to reward him for his support against the second Crusade. Nūr al-Dīn also received al-Raḥba and al-Raḥkā on the Euphrates as well as Edessa or al-Ruḥā [q.v.]. The portion of the treasure...
of Zanki stored at Singar was to be used to finance the 
guhd of Nür al-Din.
In 553/1158, when ill, Nür al-Din named his brother Kūt愍 al-Din Mawdūd as eventual successor and 
made him his own promise to obey him. Mawdūd, crossing the Euphrates between Siffin [q.v.] 
and al-Rakkā, made his way towards Damascus to 
visit his brother. Meanwhile, having recovered, Nür 
al-Din had returned to northern Syria; the two Zankid 
princes set out to take Harrān, which they entrusted 
to the isfahālār Zayn al-Din ‘Ali Kūčīk.
In the following year, Mawdūd arrived with powerful 
reinforcements to assist Nür al-Din, who was 
threatened at Aleppo by the advance of a Frankish-
Byzantine coalition. In Dhū ‘l-Hijjah 554/December 
1159-January 1160, news came of the death of the 
Sulghūk sultan Muḥammad b. Muḥammad [q.v.] at 
Hamadān. This was an event of importance to 
Mawdūd, who was holding prisoner at al-Mawsil 
Sulaymān Shāh, one of the candidates for the succe-
ssion. After long negotiations, Mawdūd agreed to 
release his prisoner on condition that he be appointed 
Atabeg of the new sultan and that the latter take 
Djamāl al-Dīn al-Djāwād as vizier and ‘Ali Kūčīk as 
commander of the sultan’s armies. Escorted by troops 
from al-Mawsīl, Sulaymān Shāh set out for Hama-
dān, but, the victim of a conspiracy, he was poisoned 
and died on the way. Mawdūd’s troops turned back, 
and there were no further links between al-Mawsīl 
and Kūt愍. In Ramadan 555/August 1164, Mawdūd 
received an appeal yet again from Nür al-
Dīn, who wanted the assistance of his allies in causing 
a diversion in northern Syria with the aim of averting 
an invasion of Egypt by the Franks. Mawdūd 
responded by sending considerable contingents which 
laied siege to Harrān, which the Barsanid prince took to 
Harim. During the second campaign of the amīr Shirkūh in 
Egypt, Mawdūd sent, at the request of Nür al-Dīn, 
reinforcements to take part in operations against the 
Count of Tripoli.
At the end of summer 562/1167 he returned to al-
Mawsīl with troops exhausted by the campaign and 
by the fast of Ramadan. In token of gratitude to his 
brother, Nür al-Dīn ceded al-Rakka to him. Having 
learned that after the death on 27 Ramadān/17 July 
of Kara Arslān, the prince of Hisn Kayfa and of Diyar 
Bakr, his succession reverted to his son and 
designated heir, Nür al-Dīn Muḥammad (562-
81/1167-85), Mawdūd wanted to attack the territories 
Designated heir, Nur al-Dīn Muhammad (562-
81/1167-85), Mawdūd wanted to attack the territories 

ceded to the young Artuku d prince; but Nur al-
Dīn, who wanted the assistance of his allies in causing

Designated heir, Nur al-Dīn Muhammad (562-
81/1167-85), Mawdūd wanted to attack the territories 

married one of his cousins, the daughter of Nūr al-
Dīn Muḥammad. Fakhr al-Dīn, who conducted affairs of 
state at al-Mawsīl, did not approve of this decision, 
since he wanted to withdraw from the tutelage of the 
ruled of Aleppo, who did not like him. He decided to 
engineer the downfall of Imand al-Dīn, and allied 
himself with one of the wives of Mawdūd, the 
daughter of the Artukīd Huṣām al-Dīn Timrūğ b. 
Iḥṣāzī and mother of Sayyid al-Dīn Ghāzī. The vizier 
succeeded in making his master revoke his decision. 
Mawdūd, being close to death, summoned his amirs 
together and made them pledge allegiance to his 
younger brother. It was thus that the young Sayyid al-
Dīn Ghāzī acceded to the throne as legitimate heir when 
his father died following his illness on 22 Dhū 
‘l-Hijjah 565/6 September 1170. Fakhr al-Dīn ‘Abd 
al-Masīḥ continued to administer all the business of 
al-Mawsīl, while Nūr al-Dīn lost the control which he 
had exercised over the city during the lifetime of his 
younger brother.
One of the daughters of Mawdūd, ‘Aẓīzat al-Dīn 
Aḥkāmshār Khāṭūn, wife of al-Malik al-Mu‘azzam, 
constructed in 610/1213, on the banks of the river 
Tārāw, at Sābiliyya, the Hanafi funerary madrasa of 
al-Māridānīyya. One of his grand-daughters, Tarkan 
Khāṭūn, daughter of ‘Izz al-Dīn Masūd b. Kūt愍 
al-Dīn Mawdūd, wife of al-Malik al-Aḥraff Mūsā, who 
died in 640/1242, constructed at Kāsīyān [q.v.] in 
the same suburb of Damascus the Shāfī‘ī funerary madrasa of al-Āthābīyya.
In the writings of western chroniclers of the 
Crusades the name of Mawdūd is transcribed in such 
renderings as Malducus, Maldutus or Manduit.

(NE. ELISSEEFF)
He was probably born in 401/1010-11 or 402/1011-12 as the eldest son of Mas'ud b. Mahmūd [q.v.], and during his father's reign was closely associated with the sultan on various military expeditions. When Mas'ud was deposed and then killed in Džumādī I 432/January 1041, Mawdūd made himself the avenger and protector of his son. When his grandfather, his uncle Muhammad b. Mahmūd. He marched from Balkh, secured the capital Ghazna, and met Mahmūd’s army coming from India near Djalalābād, at a place subsequently named Fathabad, for Mawdūd completely defeated the rebels in Radjāb 432/March 1041. Mahmūd and all but one of his sons were executed, and a threat from Mawdūd’s younger brother Madjdud, governor of Multan, scotched by the latter’s mysterious death, so that Mawdūd became uncalled ruler now in Ghazna.

He faced formidable problems in combatting the Saldjuks in eastern Khurāsān and Sistān. He attempted an alliance with the Saldjūk’s Karakhānīd enemies in Transoxania [see ILEK-KHANS], and in 435/1043-4 invaded Turkānīstan, but was repulsed by Chāghri Beg’s forces. Another Saldjūk, his younger brother Madjdud, governor of Multan, passed definitively to the Saldjūks, and a further endeavour by Mawdūd to organise a grand coalition of anti-Saldjūk princes in Transoxania and Persia was cut short by his own death. Early in his reign, Mawdūd sent forces into Sistān in order to retain Ghaznawī overlordship over the Saffarids there and to exclude Saldjūk influence, but the local āmir Abu ‘l-Fadl Naṣr b. Ahmad had to pursue a policy of balance between his two powerful neighbours. The concerns of India latterly much occupied Mas'ud, but his violent end provided an opportunity for the reassertion of independence by various Indian tribal rulers. A coalition of rājdūs recaptured Hansī, Thānesar, etc., but was however driven back from Lahore in 435/1043-4.

Mawdūd died of an internal complaint just at the beginning of his new attempt at a revanche against the Saldjūks, probably in Džumādī II 440/December 1048, although the sources diverge on this. He was clearly a skilful commander and able ruler who managed to pull the empire together after the cataclysms which had come upon it and who withstood the eastwards pressure of the Saldjūks; but even had he been granted a long reign, it is doubtful whether he would have been able to recover the lost western provinces.

Bibliography: The main primary sources are Gardīzī, Džūdžānī, Ibn al-Āṣīrī, Ibn Bābār and Fakhrī Murdabīr; these are used in C. E. Bosworth, The later Ghaznavids, splendour and decay. The dynasty in Afghanistan and Northern India 1040-1186, Edinburgh 1977, 20-37. (C. E. Bosworth)
MAWDUDI, SAYYID ABU 'L-'ALĀ (commonly anglicised to Mawdūdī, intellectual, major influence in the politics of Pakistan and one of the leading interpreters of Islam in the twentieth century. He was born on 3 Radjāb 1321/25 September 1903 at Aurangabad in India’s Hyderabad State. His family claimed direct descent from Khānāda Ǧūd b-Din Mawdūdī Ǧūstī (d. 577/1181-2); his ancestors migrated to the subcontinent in the later 9th/15th century and produced many spiritual leaders. His father, a lawyer, came from Dīlīh and was associated with Sayyid Ahmad Khān [q.v.], but preferred to live in Hyderabad, which was the last significant centre of the Mughal tradition. When young, Mawdūdī was carefully insulated from western culture and the English language; educated at home, and briefly in

one of Hyderabad’s madrasas, he experienced neither the typical schooling of the Shālm nor that of the British Indian government. After Mawdūdī’s father died when he was sixteen, he supported himself for a decade as a journalist, most notably as editor of al-Djam‘īyyāt from 1924 to 1927, the organ of the Djam‘at-i Hind. Supported by the Jamaat-e-Islami, he embarked on an exhaustive study of the doctrine of djihād [q.v.]. This work, which was first serialised in al-Djam‘īyyāt and then published under the title al-Djihād fi ‘l-Islām, heralded most elements of his later thought. The effort of composition greatly intensified his understanding of his faith, and in 1928 he retired to Hyderabad to do further research and writing. In 1932 he undertook the editorship of the monthly journal Tardjumān al-Kurān, which was to be the main vehicle of his ideas for the rest of his life. He knew now what he had to do: “The plan of action I had in mind was that I should first break the hold which Western culture and ideas had come to acquire over the Muslim intelligentsia, and to instil in them the fact that Islam has a code of life of its own, its own culture, its own political and economic systems and a philosophy and an educational system which are all superior to anything that Western civilisation could offer. I wanted to rid them of the wrong notion that they needed to borrow from others in the matter of culture and civilisation.” (Sayyid Abul Ala Mawdoodi, Twenty-nine years of the Jamaat-e-Islami, in The Criterion, v6, 43). The intensity of this feeling runs through the pages of his Risāla-yi Dinṣūyā of 1932; the fear of the corrupting influence of western civilisation is manifest in his articles on pardah first published in 1935.

The last decade of British rule brought new fears: that independence would bring the absorption of the Muslim identity into a secular Hindu-dominated nation-state, and that the Muslim response of aiming to found a separate Muslim nation-state of Pakistan was not the right one. Mawdūdī then intervened in politics. In a series of articles, later published under the title Musalmaṇ awr mauwūda sīyāsī kashmakash, he reminded Muslims that they were a separate nation in the Indian environment, while at the same time emphasising that they were not one in any European sense, as the All-India Muslim League was suggesting. Muslims were in danger of forgetting that they had a message for all humanity. The way to carry this message forward was to establish not a nation state of Muslims but an Islamic state in which every constituent part would reveal Islam in ideal and practice. In August 1941 Mawdūdī founded the Djam‘at-i Islāmī, a carefully-selected righteous elite of which he was the leader, to put these ideas into effect.

The emergence of Pakistan in 1947 gave Mawdūdī a forum in which he could act. From 1948 to 1956 his writing intensified. In 1952, supported by the Djam‘at-i Islāmī, played the key role in directing Pakistan away from developing the form of the secular state which its founders had in mind towards the goal of an Islamic state. His pressure was primarily responsible for the Islamic content of the “Objectives Resolution” of the Constituent Assembly (March 1949) which laid down the main principles on which Pakistan’s constitution
was to be based. His leadership brought the representatives of all groups of Ulama to agree in ... of resurgent Islam, New York 1983, 99-133; Aziz Ahmad, Islamic modernism in India and Pakistan, 1857-1964, London.

It was in large part his achievement that the constitution-making the benchmark of the "conservative" process. It was in large part his achievement that the first constitution, which was promulgated in 1956, looked towards reconstructing "Muslim society on a truly Islamic basis and revising all existing laws in the light of the Qur'an and Sunnah". In 1953 Mawdudi was for a period condemned to death; he was imprisoned during the years 1948-50 and 1953-5.

From 1956 the discussion of the role of Islam in the constitution died down and Mawdudi, until restricted by ill-health in 1969, travelled widely outside Pakistan. He was a particularly frequent visitor to Saudi Arabia, where he took part in both the establishment and the running of Murtaza's Islamic university and the World Muslim League. Whenever an Islamic issue arose in Pakistan, like the Muslim Family Laws Ordinance of 1961 or the Ahmadiyya question in 1974, he was prominent. Throughout he opposed the regimes governing Pakistan and, although he resigned from the headship of the Jama'at-i Islami in 1972, he was behind its involvement in the movement to overthrow Z. A. Bhutto in 1977. General Danyal (Ziya) al-Haqq's regime, with its promise of Islamisation, was the first that he felt able to support. When Mawdudi died on 22 September 1979, he did so knowing that Pakistan was at last ruled by a government that was trying to realise a version of his Islamic order.

Mawdudi's academic output was voluminous: tradition, law, philosophy, history, politics, economics, sociology and theology being amongst the subjects covered. Many of his works have been translated, some into over a dozen languages. His masterwork is his Kur'an commentary, Tafhim al-Kur'an, which took him thirty years to finish. His Islamic vision, nevertheless, is scattered through many different publications, many of which were written to meet problems of the moment. Good points of access are a series of radio talks he gave in 1948, Islam kā naẓīm-i hayāt, and the collection of his writings on the Islamic state The Islamic law and constitution.

Central to Mawdudi's vision is the belief that God alone is sovereign; man has gone astray because he has accepted sovereigns other than God, for instance, kings, nation states or custom. All the guidance which man needs can be found in the Shari'a, which offers a complete scheme of life where nothing is superfluous and nothing lacking. Political power is essential to put this divinely-ordained pattern into effect; the Islamic state has a missionary purpose. Moreover, because God's guidance extends to all human activity, this divinely-ordained pattern into effect; the Islamic state has a missionary purpose. Moreover, because God's guidance extends to all human activity, this state must be universal and all-embracing, and the state must be universal and all-embracing, and the state has a missionary purpose. Moreover, because God's guidance extends to all human activity, this state must be universal and all-embracing, and because the state's purpose is to establish Islamic ideology it must be run by those who believe in it and comprehend its spirit—those who do not may just live with the confines of the state as non-Muslim citizens of the state, with whom, in consequence, the ruler must consult in the process of government. So Mawdudi describes his policy as a "theo-democracy" in which the whole community of Muslims interpret the law of God within the framework supplied by the Shari'a. The ruler (amir) is to be elected by whatever means are appropriate, providing that they ensure that the man who enjoys the greatest measure of national confidence is chosen. His legislature (maqdis-i dini) is also to be elected by whatever means are appropriate, providing that they ensure the choice of men with the confidence of the people. Legislation itself takes place in four ways: by interpretation, by analogy, by inference, and, in that area of human affairs about which the Shari'a is silent, by independent judgement.

The major feature of Mawdudi's thought is to have transformed Islam into an ideology, an integrated and all-embracing system. He aimed to set out the ideal order of the time of the Rightly-Guided Caliphs. The outcome is the most comprehensive statement of the nature of the Islamic state in modern times, and one which, while conjuring an ideal from the past, has been shaped by contemporary concerns and modes of thought. His exposition, as might be expected from a man who was primarily a theologian, is strong on general principles but weak on detail.

Mawdudi is amongst the most influential of those Muslims who have felt, as the 20th century has progressed, that the answer to western domination need not be formulated in terms of nationalism and secularism but in terms of Islam. Himself inspired by Ibn Khaldūn, Shāh Wali' Allāh, Muhammad Iqbal and Hasan al-Banna (q. e.), he has influenced in his turn men ranging from the leaders of Islamic movements in Egypt, Syria and Iran to many ordinary Muslims throughout the Islamic world.

(F. C. R. Robinson)
foreign merchants and colonists under imperial pro-
tection, the non-Arab population of pre-Islamic
Arabia consisted of Jews, slaves and freedmen of
African and Middle Eastern extraction, half-bred
descendants of caravans, and presumably also ethnic
and occupational parish groups of the type attested in
modern times (Kawâwîla, Bayâ-dir, Sulûbis, etc.).
There is no reason to doubt that all were known as
maudlí in the sense of "kinsmen", in so far as they
were free and came under Arab protection (cf. the
modern use of the word âdh "brother"), but the ques-
tion is, what this implied. Are we to take it that all
non-Arabs were individually assigned to Arab tribes
and acquired partial membership of Arab tribes
through them, having no social organisation of their
own? Or did they form social groups of their own, so
that they were collectively placed under the protection
of Arab tribes in which they acquired no membership
at all, merely becoming their satellites? The first solu-
tion is that enshrined in Islamic wâlî; but it is the
second which is attested for Arabia.
Thus it is well known that the Jews of Arabia
formed tribal groups of their own. In fact, Jewish
tribes were sometimes strong enough to escape Arab
protection altogether (and thus also the status of
maudlí). But this was hardly the common pattern. The
Jews of Fadak, for example, paid protection money to
Kalb (M. J. Kister, On the wife of the goldsmith from
Fadak and her progeny, in: J. Juda, ed., The Jewish
people in the Arabian peninsula iv, Berlin 1889,
Wellhausen, München 1911, 290); Kalb of the Jews of
Wâdir a-Kura similarly paid what was to be known as
khuwwa to Arab overlords (al-Bakri, Mu§qam mî ista^djam, ed. F. Wüstenfeld, Göt-
tingen 1876-7, i, 30); and those of Yathrib were
reduced to client status by the Aws and Khazraj (q.v.)
some time before the rise of Islam (J. Wellhausen, Slüzen and Vorbeien, iv, Berlin 1899,
79f.). Naturally, client status weakened the tribal
organisation of the Jews; the same is true of modern parish groups. But the Jewish tribes were
dissolved, nor were the Jews assigned to individual
patrons; clientage was a relationship between groups.
Similarly, the Arabised descendants of the Persian
workmen and prostitutes of Hadjar clearly formed a
quasi-tribal group of their own under 'AbdI, but they adopted the rules of their protector
(al-Tabâri, i, 986).
The question is thus, whether freedmen were
treated differently? On this point, the evidence is less
conclusive. Continuing relations between manumitter
and freedman were clearly common, and there is
evidence that the pre-Islamic Arabs practised
manumission with what the Greeks called paramanê, a
classic function of the freedman to stay with the
manumitter for a specified number of years or until
the latter died (P. Crone, Roman, provincial and Islamic
law, Princeton 1987). But continuing
relations between manumitter and freedman in no way imply that the latter was incorporated in the manumitter’s
kin; the paramon or freedmen only became a member of
his household, and then only for a specified time;
and one would in general have thought the pre-
Islamic Arabs as reluctant to contaminate their
agnatic kin with non-Arab freedmen as were their
descendants in more recent times. The freedmen (and
indeed slaves) of modern Arabia formed lineages of
their own, and it was through them, not through their
manumitters, that they acquired their rights and
privileges in respect of marriage, successorship and
inheritance; and it was to the manumitters’ tribe as a
political entity that they stood in a relationship of
dependence, paying the latter military assistance and/or
khwās (J. L. Burchhardt, Notes on the Beduins and the
Wahābîs, London 1830, i, 181f.; A. Jaussen, Coutumes
des Arabes au pays de Moab, Paris 1948, 125f.; cf. A.
Musil, The manners and customs of the Rawaâ Beduins,
New York 1912, 176f.); and, as we shall see,
it should be noted that non-Arabs were not
generally affiliated as confederates. Hîf (q.v.) was a
mechanism for the partial or total incorporation of
foreigners, individually or as groups, and it is fre-
quently regarded as ancestral to Islamic wâlî. But hîf
was used only for Arab foreigners, or more precisely
for foreigners with full tribal status. The Jews thus
qualified on occasion, as did others such as the Abnas
(q.v.) but only to the extent that they escaped client
status (though there are admittedly ambivalent causes);
non-Arab freedmen never qualified (cf. Goldziher,
Muh. Stud., i, 106). The hîf is thus irrelevant to the
question. By the same token, so is most of pre-Islamic
poetry. The vast majority of maudlí mentioned in this
poetry (where the word is exceedingly common) are
Arabs from whom help of one sort or another could be expected: real, fictitious or metaphorical kinsmen (cf.
ibid., 105 n.; many more examples are given in
Crone, Roman, provincial and Islamic law). Con-
 federates are occasionally singled out as maudlí l’-
 ymin, “kinsmen by oath”, as opposed to maudlí l-awlîlah or karâba, “kinsmen by birth/kinship” (G. W. Freytag, Hamasa carminia, Bonn 1828, 187; C.
Lyall, ed. and tr., The Majallâfîyû, Oxford 1918-21,
no. 12:3; Ibn Hîdîâm, 467; Nûbûga al-Djâdâlî,
Dîwân, ed. and tr. M. Nallino, Rome 1953, no.
12:41). But the distinction is usually quite neutral,
and though confederates could obviously find them-
selves in a subservient position so that the dividing
line between them and client groups was blurred (as
it is in Nâbîgha; cf. Juda, Apêkte, 14-15) they were
followers of a type quite different from that of non-
Arab clients. It is only when the poets distinguish
between samîm (or sarîb) and maudlí that the latter
would seem regularly to encompass servile and non-
Arab elements, and the same is perhaps true when
they speak of “tails” and “fins” of tribes (cf.
Goldziher, Muh. Stud., i, 105-6); but these passages
are perfectly compatible with the proposition that
freedmen and other non-Arabs should be seen as
members of satellite groups rather than as persons
“assimilated to the tribe by affiliation” (Goldziher).
2. The Râghîdîn calîphs and the Umay-
yads.
With the conquests, the Arabs found themselves in
charge of a huge non-Arab population. Given that
it was non-Muslim, this population could be awarded
a status similar to that of clients in Arabia, retaining
its own organisation under Arab control in return for
the payment of taxes [see DHIMMA]. But converts posed a
novel problem in that, on the one hand they had to be
incorporated, not merely accommodated, within Arab
society; and on the other hand, they had “forgotten
their genealogies”, suffered defeat and frequently also
enslavement, so that they did not make acceptable
hîf; the only non-Arabs to be affiliated as such were
the Hamrâ’ and Aswâra, Persian soldiers who
deserted to the Arabs during the wars of conquest in
return for privileged status (al-Balâdhûrî, Futûh, 280,
373). It was in response to this novel problem that
Islamic wâlî? was evolved, presumably by the authorities and at an early stage, though nothing can
be said with certainty about its emergence.
(a) Early Islamic cafrâ’? What follows is based on
a collation of information in classical legal (below,
section 5), hîf and historical sources. All non-Arabs
who aspired to membership of Arab society had to

procure a patron (an "upper" mawla in the terminology of the lawyers). Freedmen automatically acquired a patron (an "upper" mawla in the terminology of the lawyers). Freedmen automatically acquired a patron in their manumitter, unless the latter denounced the tie. Free persons and those freed without wāld had to acquire one by agreement. Contractual clientage was known as wāld of mawldūt ("inclination", "attachment"); the term generally used in Hanafi literature, tīša ("following"); al-Tabari, ii, 1853), tīšma ("service"); Aghāni, xii, 48) or islām; conversion: whoever converted "at the hands of" another became a client of the other according to a familiar hadith (man aslama 'al-yad ghāshīh fa-ba'da mašūghīh wāldūhū). Wāld was a solution to the problem of affiliating non-tribesmen to a tribal society, and though most such non-tribesmen were clearly converted, conversion was not necessary for the legal validity of the tie. A fair number of non-Muslim clients, both freeborn and freed, are attested (Crone, Slaves, n. 358; al-Tabari, i, 3185).

From the point of view of the authorities, the main role of the patron was to provide the client with an 'ākla (q.v.). The patron and his agnates were required to pay compensation ('ādīyya (q.v.) for bodily harm inflicted by the client, to the extent that the latter had no agnates of his own. Refusal to pay seems to have been a common problem (al-Kindi, The governors and judges of Egypt, ed. R. Guest, Leiden and London 1912; 335f., 335f.). Conversely, if the client was killed they were entitled to blood-money in compensation for him (cf. al-Kindi, op. cit., 333f.). In return for his obligations, the patron acquired a title to the client's estate, though not an indefeasible one. The classical rules of exclusion are not, on the whole, favourable to the patron, but it is not known whether they applied in pre-classical law. The role of the client, on the other hand, was purely passive. He did not contribute to blood-money, payable for damage inflicted by the patron, nor did he share in the receipt of blood-money if the patron was killed or acquire a title to his estate. He was not formally obliged to render obsequium. The patron by manumission could make over the patronate to a third party by sale, gift or bequest, and the parties to the contractual relationship could terminate theirs (in which case the client would need a new patron). If not, it would pass to the descendants of the patron or to his heirs (practices of the classical period, though it would lose legal (but not necessarily social) importance as the client acquired agnates in Islam). Muslim clients could and frequently did have clients of their own.

From the point of view of the client, the main role of the patron was to provide him with access to a privileged society, and in practice the patron's rewards were far greater than those provided by the authorities. For one thing, the patron might qualify his grant of freedom with stipulations requiring the freedmen to pay regular sums, gifts or labour services to himself or a third party for a specified period, or reserving part or all of the freedman's estate for himself regardless of the presence of heirs (practices condemned in early hadith; cf. Crone, Roman, provincial and Islamic law). For another thing, freedmen were notoriously loyal. They would stay by their manumitters in danger (al-Tabari, iii, 300ff., ii, 1959; cf. Ch. Pellat (tr.), The life and works of Fāṭima, London 1969, 215, 260), share their sorrows (cf. al-Tabari, ii, 384), assist them in need (though for one who refused, see Aghāni, xvi, 107), attend to them in death (al-Tabari, i, 3046, ii, 1751) and seek to avenge them (ibid., ii, 1049; al-Baladhuri, Anṣāb, v, 338). Concerning the services provided by contractual clients, we are less well informed. Like freedmen, they clearly went to swell their patrons' retinues, both military and civilian (M. J. Kister, The Battle of the Harra, in Studies in memory of Gaston Wiet, Jerusalem 1977, 44; Crone, Slaves, 53f.), and they must have performed other types of khidma too. But patrons preferred freedmen to mawilī in Umayyad society. No formal disabilities seem to have attached to the status of client in public law. In principle, clients were in a dependent position only vis-à-vis their patrons, enjoying the same rights and duties as other Muslims in society at large (lahsun mā lanā wa-'alayhim mā 'alaynā). In practice, no less often, there was massive prejudice against them. The Arabs generally equated them with slaves, partly because they were unwantable agriculturalists (Hassān b. Thābit, Dīwān, ed. and tr. H. Hirschfeld, Leiden and London 1910, no. 189: cf. Dhu 'l-Rummā, Dīwān, ed. C. H. H. Macartney, Cambridge 1919, no. 29:48), partly because they had suffered spectacular military defeat ("O men, do you not see how Persia has been ruined and its inhabitants humiliated? They have become slaves who pasture your sheep, as if their kingdom was a dream"). Nābiqā al-Dhāqādī, no. 8:12f.), and, finally, because the majority of clients were freedmen. Christian and Muslim sources are agreed that the Arabs took enormous numbers of prisoners-of-war during the wars of conquest. "He killed and took prisoners" is the standard expression for the activities of a conqueror in the Muslim ones (Khalīfa b. Khayyāt, Ta'ārah, ed. S. Zakkar, Damascus 1967-8, i, 127, 163, 168, 171, 178, 237, 242; Sebeos, Histoire d'Héraclius, tr. F. Macler, Paris 1904, 100f., 110, 146; Bar Penkaye in A. Mingana, ed. and tr., Sources syriques, Leipzig [1907], "i47 = 175; Michael the Syrian, Chronique, ed. and tr. J.-B. Chatot, Paris 1899-1910, iv, 417 = ii, 422); and the usual late of prisoners-of-war was enslavement. Moreover, many localities were required by treaty to supply a specified number of slaves to the Arabs, such as 30,000 or 100,000 once and for all and for a smaller number annually (al-Tabari, ii, 1238, 1245, 1246, 1321, 1299, 1667; al-Baladhuri, Fatḥāb, 208; C. E. Bosworth, Sīṭān under the Arabs, Rome 1968, 17; M. Hinds and H. Sakkout, A letter from the governor of Egypt to the King of Nubia and M ISAFA concerning Egyptian captives brought to him by the Avars and Cossacks, in Islamica 1, 427, 1912; Judah, Aspekte, 64-5). Victims of war and their descendants thus outnumbered freeborn clients, and "slaves" was the standard term of abuse for a client of any kind (al-Tabari, ii, 1120, 1431; al-Baladhuri, Anṣāb, i, 247, v, 356; Aghāni, xvi, 107). Naturally, such men were subject to numerous disabilities in the society of their conquerors. Slaves and clients were "wile" (TA, s.v. h-u-y), and clients of clients were "the most miserable persons to walk on earth" (al-Baladhuri, Anṣāb, ibv, 10; cf. al-Farazdak in Lāh and TA, s.v. u-l-y). Thus a mawālī who married an Arab woman risked both penalties and the dissolution of his marriage (Aghāni, xvi, 106f.; cf. also Goldziher, Muh. Stud., i, 128ff.), though such marriages are unlikely to have been officially prohibited (below, (d)). A mawālī's life was felt to be worth less than that of an Arab, so that an Arab should not be killed in retaliation for a client (al-Baladhuri, Anṣāb, i, 220), while conversely, retaliation inflicted upon a client failed to compensate for harm suffered by an Arab (al-Tabari, ii, 1849). A mawālī was not worth avenging (though Kutayba b. Muslim [q.v.] invoked a moral obligation to do so in an unusual situation where the client was a Transoxiana nobleman, al-Tabari, ii, 1249). It was by way of insult to their victim that Arab avengers would claim to have killed so-and-so for a mere mawālī or slave (al-
Azdi, Ta'rikh al-Mawsil, ed. A. Habiba, Cairo 1967, 62; al-Dinawari, al-Akhbar al-tiwdl, ed. V. Guirgass, Leiden 1888, 350; al-Tabari, i, 3276, ii, 710). All mawdli were felt to be unsuitable for positions of authority, such as that of prayer-leader, judge or governor (Goldziher, Muh. Stud., ii, 109 n.; S. a-Alli, Ta'rikh al-tigidmiyaa wa 'l-iktisadiyya fi 'l-Basra', Beirut 1969, 96f.; Ibn Kudama, al-Mughni, ed. T. M. al-Zayni and others, Cairo 1968-70, vii, 33; Judah, Aspekte, 182-f); as late as 133/750-1 the mawdli of Khulfa (or the Indian KTkdniyya. There were divisions in the Egyptian army already at the end of the First Civil War, when a freedman from Balhah was made 'arif [q.v.] of the mawdli of TudjJ. But the 'arif in question belongs to the end of the Second Civil War (cf. al-Kindi, Governors, 51), and it is only after the Second Civil War that such divisions are regularly mentioned, be it in Egypt, Khurassan or elsewhere (Crone, Slaves, 38). There were mawdli in the Syrian army too, for all that mawdli divisions are not mentioned after 'Abd al-Malik (cf. ibid., 274f.; we are incidentally given to understand that the Syrian troops in Egypt in 125/742-3 included mawdli al-Hims (al-Kindi, Governors, 83), and that those brought to Spain by Baldj b. Bishr [q.v.] included mawdli of the Umayyads, clearly among others (Lévi-Provençal, Hist. Esp. mus., i, 198;
Mawlā

cf. also Juda, Aspekte, 84–5). Mawali also participated in the revolt against al-Walid II, but whether as an excluded people passively exposed to the Umayyad treatment of such mawldī should not be seen as a violation of the law; the law on this question was what the later to command the Syrian army against Byzantium Tabari, ii, 1790). The Djazlra received its first non-Arab governor of B. Nasr (or Azd) who themselves. Sulayman chose Muhammad (or Umar II appointed Isma'il bin Ubayd Allah b. Yazid, a mawdlī of the Umayyads (Ibn al-Muhabbar, 'Adab al-Asa'id, ivb, 123). In Khurasan, the B. Shu'aybiyah, authored the B. Jaḥdar, envoy, position of eminence among the Rabi'ā and intervened in the local feuds during the Second Civil War (al-Tabarī, ii, 491f.). In the Third Civil War, a certain Muha'lab b. Mūsā, mawdlī of the B. Yashkur, emerged as 'azīm al-badr in Fārs, where he took to expelling Umayyad governors (ibid., 1976f.). And of Harīṣ, a mawdlī of Khuzā'ī who joined the 'Abbāsid revolution, we are told that he was 'azīm ahl Nazā (al-Dinawarī, Akhbār, 341).

All in all, the mawdī must thus be said to have penetrated Arab society extremely fast. They played a predominant role in most activities outside the world of politics, controlled the civil administration almost from the start and made their presence felt in military politics within a generation of the conquests. Certainly, the Arabs retained their control of military politics until the end of the Umayyad period, most governorship and other politically influential posts being allocated to them; but the popular image of mawdī as an excluded people passively exposed to Arab whim and prejudice is quite wrong. Given the cultural and numerical discrepancy between the conquerors and their subjects, it is not really surprising that the latter acquired influence so fast: the conquerors simply could not govern without non-Arab help, as later Shu'ūbīs were to point out; indeed, they needed their advice even in matters of food and drink (al-Süli, Adab al-kutub, ed. M. B. al-Athāri, Cairo 1341, 193). What is surprising is that the Arab integument of Muslim society withstood the pressure.

(c) Fiscal status. The secondary literature generally associates mawdī with fiscal disabilities. Thus all the Umayyads other than Umar II are said wrongly to have collected poll tax (dirhām [q. v.]) from converts and to have refused them registration in the army, being assisted in this by the leaders of the non-Muslim communities who had an interest in penalising conversion (J. Wellhausen, The Arab kingdom and its fall, Calcutta 1927, ch. 5; D. C. Dennett, Conversion and poll-tax in early Islam, Cambridge Mass. 1950; H. A. R. Gibb, The fiscal rights of 'Umar II, in Arabica iv/1 [1953], 1-16). But this view is in need of modification. On the one hand, the vast majority of mawdī were freedmen and descendants of freedmen who had never paid any poll-tax at all; and free converts who acquired a respectable patron also escaped fiscal disabilities (Crone, Slaves, 52). The conventional picture applies only to a special type of convert, the fugitive peasant. On the other hand, the Umayyad treatment of such mawdī should not be seen as a violation of the law; the law on this question was what the
Umayyads themselves decreed. The fact that the classical rules of taxation have been attributed to 'Umar I does not mean that they in fact existed so early (cf. K. Morimoto, The fiscal administration of the Umayyads, 1st ed. [Kyoto, 1981]). There would have been carriers had they been asked. Thus the classical rules lay down that the convert should be freed of his poll-tax, but not of his land-tax (khaddāfī [q.v.]). In the Umayyad period, however, no converter left without leaving his villages and thus also such land as he might possess: the distinction between a dhimmī poll-tax and a religiously neutral land-tax was quite irrelevant. Converts invariably left their land because the attraction of conversion lay in its promise of access to the ranks of the conquerors: converting without joining these ranks would have been pointless and, locally, extremely unpleasant. To convert was thus to make a hijra (q.v.) from the land of unbelief to the land of Islam, that is, the garrison cities, as 'Umar II explained (Ibn 'Abd al-Hakam, Strata 'Umar b. 'Abd al-'Aziz, ed. A. 'Ubayy, Beirut 1967, 931); and the problem confronting the Umayyads was not whether converts should be freed of this or that part of their fiscal burden, but whether they should be allowed to make their hijra and thus escape their fiscal burden altogether. Naturally, Umayyad policies varied. 'Umar II accepted such converts (his problem was thus the fate of their land, cf. ibid.). But most Umayyads adopted a harsh policy vis-à-vis fugitives regardless of whether they claimed conversion or not (cf. Morimoto, Fiscal administration, 120ff.; Crone, Slaves, 52), resettling them in their villages or at best allowing them to stay where they were in return for continuing fiscal liability. Three points follow from this. First, the fugitives in question were required to pay all their customary taxes, whatever these might be, not merely a religiously neutral land-tax: having been denied access to the conquest society, they were not Muslims at all in the eyes of the authorities; and all their taxes, not merely the poll-tax, were regarded as dhimmī taxes at this stage. Secondly, such converts were not eligible for membership of the army. Naturally, when 'Umar II decided to admit them to Muslim society, he admitted them to the army as well; but the fact that others refused them entry to the army does not mean that mawāli as such were kept out of the dawān. The numerous mawāli who fought in the army without pay were runaway peasants who were still being held to their fiscal obligations and were fought as volunteers in the hope of being picked up by a patron, as is clear from the story of Yūnus b. 'Abd Rabīḥ, who acquired a patron in Nasr b. Sayyār (Crone, Slaves, 52f.). Thirdly, it was such converts, not converts in general, who were open to penalisation by the leaders of the Christian, Jewish and Zoroastrian communities; had their hijra been accepted, they would of course have been placed under Muslim administration (cf. al-Tabārī, ii, 1688; Dennett, Conversion, 124ff.).

It should be clear that the entire problem of the fiscal treatment of converts was a problem for dhimmī, not for mawāli. It was dhimmīs who were frustrated by the closure of the "gate of the hijra" (cf. Ibn 'Abd al-Hakam, Sīra, 94); a mawālī, by contrast, was somebody already admitted. It was accordingly also dhimmīs, not mawāli, who would enrol in the service of anyone who promised them tax-relief. "Whoever converts is freed from khāridī" is a slogan on a par with that addressed to slaves, "whoever joins us is free" (cf. Crone, Slaves, nn. 399-400, 647). Both are addressed, usually by rebels, to malcontents outside free Muslim society, not to oppressed elements within it; it was only on responding to such slogans that the non-Muslims and slaves in question acquired client status.

(d) The issue of assimilation. The Umayyads are generally credited with an active policy of discrimination against non-Arab Muslims (cf. most recently, M. A. Shaban, Islamic history, I, Cambridge 1971). This impression arises largely from their treatment of fugitive peasants. But though they discouraged flight from the land and no doubt shared the common prejudice against non-Arabs, they do not seem to have had an actual policy of discrimination against accredited members of Muslim society. Practically every Umayyad caliph is known to have appointed a mawālī governor. Al-Hajjāj, a man notorious for his harsh treatment of runaway peasants, appointed the first non-Arab judges in Trāk (al-'Ali, Ta'zīmat, 96 n); he also appointed a mawālī to his ghāra (al-Ya'kūbī, ii, 326), an unusual step (for a later example, see al-Kindī, Governors, 70). 'Umar II, a caliph famous for his encouragement of conversion, is said to have disapproved of intermarriage between Arabs and mawāli (al-'Ali, Ta'zīmat, 96 n). But no prohibition of such unions has been recorded, and mawāli are known to have married female relatives of other Umayyads (al-Baladhuri, Anbā, i, 247; al-Tabārī, ii, 1420); the right to repudiate or endorse such unions presumably rested with the guardians of the bride (cf. also Jāda, Aṣākeb, 1288f.). The fact that mawāli formed quasi-tribal groups of their own in the army reflects the tribal organisation of this army, not a policy of segregation; and it was the Umayyads themselves, not Abū Muslim, who abolished this organisation in Khurāsān (Crone, Slaves, 38). The belief that mawāli were relegated to the infantry rests on a failure to distinguish mawālī inside Muslim society from runaway peasants trying to enter it: governors and generals such as Tārik b. Āmr, Dīnār b. Īsār, Nūsārī b. Ziyād or Irbrāhīm b. Bābahām were scarcely disqualified from riding horses. (See also al-Tabārī, ii, 111ff., 1599; Lévi-Provençal, Hist. Esp. mus., i, 98.) Conversely, the enemies of the Umayyads do not seem to have regarded assimilation as an issue of political opposition. No rebel of the Umayyad period mentioned the treatment of non-Arab Muslims in his proclamations, and the belief that the 'Abbāsīds (q.v.) regarded assimilation as their prime objective is gratuitous. Obviously, assimilation accelerated on the fall of the conquest society, but scarcely as a result of official encouragement. The legitimacy of favouring non-Arab Muslims in matters of appointment, vengeance and marriage clearly did become an object of debate in the Umayyad period, as did the refusal to accept runaway converts as Muslims, and in principle the question could have been taken up by politicians. In practice, however, the debate remained divorced from politics, and it continued long after the Umayyads had fallen.

(e) Mawālī grievances. As the prominence of non-Arab Muslims in Muslim society increased, so did their contribution to revolts. It is customary to interpret their participation in rebellious and/or heterodox movements as an expression of protest against a social inequality which ultimately led to the fall of the Umayyad dynasty. But for one thing, it is by no means clear that mawāli were disproportionately represented in movements of protest. For another, they scarcely clamoured for social equality. Not one revolt of the Umayyad period was conducted exclusively by mawālī in the name of concerns
exclusive to them; and the only two revolts in which such concerns came to the forefront, revealed some-thing which they were later to opt out of this society as followers of the Abbasid revolution deprived the Arabs of such social and political privileges as they retained. Access to political office, influence and wealth now rested overwhelmingly on membership of an army recruited mainly in 'Irak, as well as of the ruler's household. Non-Arab Muslims reached top positions through all three institutions (Crone, Slaves, appendix 5; cf. Barakma), while at the same time the majority of Arabs and mawdli found equality as ordinary subjects. Since Muslim society was no longer constituted by Arab privilege, non-Arab Muslims ceased to require a patron for membership of it. Freedmen continued to become clients of their manumitters, but most of the classical schools rejected the patronate over converts as offensive (below, section V), and the careers of free converts and the descendants of freedmen ceased to be shaped by wala'. Yet Arab superiority on the one hand and the institution of wala' on the other were still to be of major importance in other ways.

(a) The Shu'ubiyya. In cultural and religious terms, the Arabs continued to be regarded as a superior people, a fact which underlay the so-called Shu'ubism, the 'movement of the gentiles'. Shu'ubism essentially had an apologetic justification which already in the Umayyad period, but it was only in the early 'Abbasid period that they came into the open, clearly because the mawdli were now in a position to get a hearing for their case: the exponents of Shu'ubism were drawn primarily from among members of the caliphal bureaucracy and court. Purely literary in manifestation (cf. Goldziher, Muk. Stud., i, chs. 4-5), the movement campaigned for cultural rather than social or political objectives, its ultimate aim being to break the nexus between Islam and Arabism, partly because this nexus stood in the way of non-Arab self-esteem and more particularly because it obstructed the reception of non-Arab culture. Ultimately, the issue behind the controversy was the cultural orientation of Islam (cf. H. A. R. Gibb, Studies on the civilization of Islam, Princeton 1962, ch. 4). The controversy only petered out in the 6th/12th century (cf. R. P. Mottahedeh, The Shu'ubiyah controversy and the social history of early Islamic Iran, in IJMES, vii [1976]), and the issue was never properly resolved, though in practice the Shu'ubiyah was lost (cf. P. Crone and M. Cook, Hagarism, Cambridge 1977, 102 f.). For further details, see Shu`ubiyah.

(b) Wala`. Having lost its social importance, the institution of wala` acquired a new political significance. Unlike the Umayyads, the 'Abbasids trusted their freedmen and other private servants better than the public servants of the state. Thus al-Mansur [q.v.] is said to have esteemed mawdli (in the sense of clients, not non-Arab Muslims) for their loyalty and to have accumulated more of them than any caliph before him, recommending them to his son (al-Tabari, iii, 414, 444, 446). Clients of the caliphal household appear as a separate group at court soon after the revolution, and both al-Mansur and al-Mahdi [q.v.] selected a fair number of governors from their ranks (al-Tabari, iii, 429, 545, 1027; Crone, Slaves, appendix Vb). Al-Mahdi, who similarly expressed a preference for mawdli (al-Tabari, iii, 331), turned them into an army of their own (ibid., 459).

Mawdli of domestic origin continued to form troops of their own side by side with Turks and others far into the 'Abbasid period, as well as in Tulaid Egypt
The relationship between Arab and non-Arab Muslims in Spain differed from that of the east in three major respects. First, wallâ played virtually no role in it. On the one hand, many of the conquerors were Berbers, and such ties of wallâ as they had with Arab patrons lost all significance when they acquired the status of conquerors themselves. On the other hand, the conquerors settled all over the land, not merely in garrison cities. Muslim Spain thus lacked not only the purely Arab conquest elite characteristic of the east, but also the privileged amîdar which elsewhere attracted dhimmî immigrants and caused the Muslims to exclude from their ranks all converts without a patron. Conversion in Spain did not normally involve either hujjâ or wallâ, the converts adopting Islam wherever they happened to be. Indeed, they were not normally known as muwallad at all, but rather, in the first generation, as muslîma (originally meaning home-born slaves; Lévi-Provençal, Hist. Esp. mus., i, 75). Having adopted Islam in their own homes, the non-Arab Muslims of Spain failed to penetrate Arab society. Naturally Spain had its freedmen who, here as elsewhere, entered Arab society as clients. But whereas freedmen of the most diverse origin were exceedingly numerous in the cosmopolitan East, they were relatively few in Spain. Spanish society thus came to be characterised by the coexistence of three quite distinct ethnic groups, Arabs, Berbers and muwallads, rather than by relationship of dependence between Arabs and ethnically heterogeneous clients. Furthermore, since Spain escaped Khurasanî conquest, these groups were able to retain political importance right down to ʿAbd al-Rahmân III [q.v.].

Secondly, Spain saw armed conflicts between Arabs and indigenous Muslims. Throughout most of the Umayyad period, the muwallads of the East were ethnically too diverse and socially too dispersed in Arab society to rebel as muwallad against Arabs, while at the same time non-Arabs who had stayed together had also failed to adopt Islam. Only shortly before and after the Abbasid conquest, when on the one hand whole localities adopted Islam together, while on the other hand government was still identified as Arab, did non-Arab Muslims rebel against Arab rule. They did not, however, rebel as muwallad, but rather as heretics (as in North Africa) or even non-Muslims, rejecting the Arab state and all that it meant. In both cases, the only congregations of large numbers of non-Arab Muslims were Berbers. In Spain, where Arabs and muwallads coexisted as distinct groups, such revolts could in principle have erupted any time. In practice, they only came in the 3rd/9th century, perhaps provoked by the growth of the Umayyad state (Arab and Berber leaders also rebelled, and the upshot was the centralised state of ʿAbd al-Rahmân III); and here once the rebels took action as muwallad, explicitly invoking the cause of the non-Arab Muslims (dawlat al-muwalladât wa l-ʿajamîn, Ibn Hâyyân, al-Muktabis, ed. M. M. Antuña, Paris 1937, 24) under the leadership of men such as ʿUmar b. Hafsûn [q.v.]. Being short of traditions of their own, partly because they were natives of provincial Spain and partly because they were Muslims of long standing, they had no alternative to Cordovan Islam. Accordingly, they did not deny the legitimacy of the Cordovan state as heretics; and though Ibn Hafsûn did in the end reject Islam for Christianity, few muwallads followed suit (cf. Lévi-Provençal, Hist. Esp. mus., i, 295 ff.).

Thirdly, there were practically no Shûʿûbîs in Spain. The fact that the muwallads did not have much of a cultural legacy to vindicate would hardly in itself have prevented them from adopting Shûʿûbî arguments in response to Arab prejudice: the one Shûʿûbî author attested for Spain, a Slav secretary equally lacking in cultural traditions of his own, simply adopted the arguments of eastern writers (cf. J. T. Monroe, The Shûʿûbija in al-Andalus, Berkeley and Los Angeles 1970). But having avoided enslavement and migration, the muwallads also had to acquire culture and positions of influence in the society of their conquerors. Where eastern muwallad had spokesmen among bureaucrats and courtiers, the leaders of the muwallads were country squares more noted for their virtù than for their polish; indeed, the smarts and insults suffered by such rural lords at the court of Cordova played a role in the outbreak of several muwallad revolts. The muwallads thus lacked both the education and the influence required for a literary onslaught on Arab superiority. Instead, however, they were in a position to take up arms in their castles, as they did until ʿAbd al-Rahmân III reduced both them and their opponents to docile subjects.

In political terms, however, the institution of wallâ played much the same role in Spain as it did in the ʿAbbasid East. Thus ʿAbd al-Rahmân I [q.v.], who relied considerably on freedmen and clients of the Umayyads for the conquest of Spain, is said by some to have recruited an army among non-Arab Muslims; al-Hakam I [q.v.] expanded this army and created the palatial guard of ḥârû ("mute ones"), i.e. foreign slaves and freedmen as well as local Christians (Lévi-Provençal, Hist. Esp. mus., i, 129 f., iii, 71 ff.). The qabd [q.v.], however, survived much longer in Spain than it did elsewhere, being abolished only by Ibn Abî ʿAmîr [see al-Maszûmî]; and thanks to the geopolitical position of Spain, it was Berber mercenaries rather than Turkish slaves and freedmen who replaced it.
The manumitter acquires responsibility for the payment of *diya* on behalf of the freedman and qualifies for the role of marriage guardian to his freedwoman or freedman's daughter. In return, he is granted a title to the freedman's estate in all schools except that of the Ibâdis (not that of the Zâhirîs, as stated in *Abbâsî*). In Sunnî and Kâsimî Zaydi law, he inherits as the remotest agnate of the freedman; he is thus excluded by the freedman's own agnates (e.g. a son), but inherits together with Kur'ânîc heirs (e.g. a daughter) and himself excludes remoter relatives (*ghawwâr* a-*lirâhâm*, e.g. a sister's son). In 'Imâmî, 'Isââmîli and Nasîrî Zaydi law he is excluded by any blood relation of the freedman, though he inherits together with the spouse.

The freedman does not, on the whole, acquire any corresponding rights and duties. Only the 'Isââmîs call him to succession, and only in default of all other heirs. The Mâlikis do hold him responsible for the payment of *diya* on behalf of the manumitter if the latter has no agnates, *ahl al-dîwân* or patrons of his own; but a similar opinion transmitted from al-Shâfi‘î failed to become school doctrine, and all other schools exempt him. The possibility that he might act as marriage guardian is not excluded.

The relationship survives the death of both parties, passing to their heirs in perpetuity, though it loses practical importance as the client acquires agnates of his own. It also extends to the freedmen of the freedman and their freedmen in perpetuity, again with decreasing practical significance.

(c) *Wâlî*  a-*maulâlât*. The prospective patron must be a free, male and adult Muslim. The prospective client, according to the Hanafîs and 'Îmâmîs, must be a free and adult non-Muslim of either sex who has no agnates or patrons in Islam, that is a *dhîmmî*, convert, foundling or (in 'îmâmî law) a freedman without *wâlî*; the 'Îmâmîs, however, require him to be a *harîb* convert; conversion of a *dhîmmî* does not give rise to *wâlî*. The patron agrees to pay blood-money on behalf of the client in return for a title to the latter's estate; the parties may stipulate mutual succession. Either the heir by contractual *wâlî* is excluded by any blood-relation of the deceased. Whether the contractual patron may act as marriage guardian is disputed. Unlike *wâlî* a-*lîthik*, the contractual relationship may be terminated as long as the patron has not had occasion to pay, but it becomes permanent thereafter.

(d) The nature of *wâlî*. Practically every lawbook states that *wâlî* should be regarded as a fictitious kinship tie (*al-wâlî* 'u'mmah a-*lîbâs al-nasâb, as a famous maxim has it), and this view underlies a number of subsidiary rules generally accepted by Sunnîs and non-Sunnîs alike. Thus *wâlî* cannot be alienated by sale, gift or bequest in classical law, though such transfers were permitted in pre-classical law; one cannot sell or give away *nasâb*, as various authorities point out in *hâdîth*. Equally, *wâlî* cannot be inherited in the strict sense of the word; the devolution of the rights and duties vested in the tie follows special rules ensuring that the relationship functions like an agnatic tie (cf. R. Brunschvig, *Un système peu connu de succession agnatique dans le droit islamique anti-romain en Arabie*, Paris [1976]). Pace Brunschvig, however, this view of *wâlî* is not an archaic survival, but on the contrary a juristic interpretation of the late Umayyad and early 'Abbâsîd periods. It was adopted with particular forcefulness and consistency by the Sunnîs, to whom the essence of *wâlî* lies in *tâ'îth*, "agnatisation".

In fact, however, the legal nature of *wâlî* is quite different from that of an agnatic tie even in classical law. For one thing, it is only in Sunnî law that the patron inherits as an agnate, and then only if he is a manumitter, not a contractual patron. For another thing, the relationship lacks reciprocity. The client is a purely passive member of the patron's agnatic kin. Indeed, for some purposes he is not a member of it at all. Thus Sunnî lawyers do not usually consider clients of *wâlî* ([*khuddâwand*] *tâ'îth* al-*mawld*) eligible for the caliphate; and the question whether clients of the Hâghîmites were excluded from receipt of *sâkîth* ([*wâlî*] on a par with their patrons remained controversial; as Ibn al-Athîr pointed out, the maxim *maulâl  awâl-kaum minhum* (which originated in this very context) could be interpreted in a purely metaphorical vein (al-Nihâya, Cairo 1963, v, 228). In legal terms, *wâlî* is a tie of dependence which derives its efficacy from the fact that the client is detached from his natal group without acquiring full membership of another. The tie undoubtedly owes its existence primarily to administrative convenience, though the administrators may well have been influenced by the legal institutions of the pre-conquest Near East (see further Crane, *Roman provincial and Islamic law*, with full references).

(e) *Mawlâ*  a-*kafîtha* ([*wâlî*] law). Classical law does not in general attach any legal significance to servile unions, nonetheless allow an Arab woman to have her marriage dissolved if she marries a freedman in the belief that he is an Arab (as opposed to merely freeborn (Khall b. 'Isâh, *Mukhtasar*, tr. I. Guidi and D. Santillana, Milan 1919, ii, 37). Only the 'Ibâdis, the 'Îmâmîs and, following them, the 'Isââmîs, consistently refuse to distinguish between Arab and non-Arab, freeborn and freed for purposes of marriage ([*nikâh*]. The complete assimilation of Arab and non-Arab Muslims allegedly brought about by the 'Abbâsîds cannot be said ever to have been achieved.

Bibliography: Given in the article.

(P. Crane) **MAWLÂNA KHUNKÂR**, a title of the head of the Mawlâwî order of dervishes [see Mawlâwîyya]. The second word is the Turkish form of the Persian *Mâdîsândîgâr*, the equivalent of *maulâ*, which according to 'Abbâsî (Saints des derviches tourneurs, Paris 1928, i, 59) was bestowed on Djalâl al-Dîn by his father (the
derivation from Khán-kár, Persian "blood-shedder", must depend on popular etymology). Sámi in his Kömüs al-‘alâm states that the word, besides used for "Sultan", "Leader", is applied to certain persons, in such combinations as pîr khánkár or mulá khánkár. The underlying idea of such a title is probably that the saint has had committed to him the government of the world, if he choose to undertake it, an idea elaborated by Ibn ‘Arabi (Fusâhat Maktiyya, i, 202, ii, 407), who regards such a saint as the true khálíqa. The title lebel is more generally recognised as that belonging to the head of the Mawlawi order (Sámi, op. cit., 510a).

**Bibliography:** Given in the article.

(D. S. Margolliouth*)

MAWLAVI, MULLÁ ‘ABD AL-RÁHIM TAVJIAWZI, a Kurdish poet who composed an Al-Kidá-náma and a celebrated dîwan in the Hawramí dialect of Gurání. He was born ca. 1222/1807 at Tawagoz in Djawanrud and died at Sargjáto, on the river Sirwan near Halabjá, ca. 1300/1883.

MAWLAWIYYA, a Súfí order or tarīqa, in Turkish Mewlewiyye, modern Mevlevi, which takes its name from the Mawlana ("Our Master"), the saint having stated that he is acting on behalf of the Mawlana, he kisses the sîkke from the right, left and having stated that he is acting on behalf of the Mawlana, he kisses the sîkke from the right, left and center. It is more generally recognised as that belonging to the head of the Mawlawi order (Sámi, op. cit., 510a).

There is a great probability that the chief principles of the Mawlawiya, such as samá', were already established in the Mawlawiyya's era, and that after some further development they took the form they bear today.

After Sultan Walad's succession, a new centre for the tarîqa was formed with the building of the türbe, which survives today, by 'Alam al-Din Kayser. At this centre—as in a tekke—the Kurân and Madjnâniyya of the Mawlawiyya were read. The reader was seated and the tarîqa was conducted. At this period, as in the Mawlawiyya's time, samá' was performed individually and collectively (Afláki, i, 356, 104, ii, 759 ff.). Such gestures as that of salutation, which occur in today's samá' ceremony, were also encountered in the Mawlawiyya's samá' (ibid., i, 412). This type of element continued under Sultan Walad and Ulu 'Arif Čelebi (ibid., ii, 613, 795, 892, 966). However, none of the Mawlawi sources prior to 754/1353 refers to the na'ti, dawr-i walad', pust dâ'âsi and the organised salutation which feature in the samá' ceremonies of later eras. In sum, at that period there was no samá' taught in advance. Rather, music or some event bringing a person to ecstasy was the occasion for samá'. As is apparent from its name, the dawr-i walad' was linked to Sultan Walad. However, it appears that the reading of the Kurân and of the madrasa took its final form, known as makâbala, in the time of Pir 'Adil Čelebi (d. 1864/1460).

In the hope of showing all the characteristics of the Mawlawiya, an account will be given of its customs and rules, beginning with entry or initiation to the tarîqa.

**Entry to the Mawlawiya.** Initial entry is as a musâhib, and for this, application is made to a Mawlawi shaykh. Having indicated to the candidate that he will be admitted to the tarîqa, the shaykh instructs him to bathe and appear on an appointed day. The musâhib, that is, the candidate marid, appears on the appointed day with a sikke (a type of conical cap). He kisses the shaykh's hand and then sits on his left. With the faces of both turned towards the kiba, the shaykh informs them that they will read together a prayer of repentance (see A. Gölpmãrlik, Mevlâvi adâb ve erkân, 133). After the prayer is read, the shaykh takes in both hands the sikke brought by the candidate marid, and three times—to the right, left and front of the sikke—reads the sûra Ih+sá (CXXII) and blows upon the sikke. Then he settles the candidate marid, with his face towards the kiba, down upon his left knee and holds the sikke towards the kiba, and having stated that he is acting on behalf of the Mawlânâ, he kisses the sikke from the right, left, and center.
and front and places it upon the candidate. With his hands upon the sikke he pronounces the takbir, and the sikke is thus said to be takbirinini. The shaykh then covers the back of the candidate, whose head is resting upon his knee, raises him to his feet, and with their right hands held together they kiss. Thus the person whose sikke has received the takbir acquires the name of muhibb. The shaykh takes the muhibb to the mabâkû in the kitchen. That night a sakkû pustu is performed, the candidate having removed his night clothes and put on a white skin called Sulân Walad pusû is spread. The mabâkû is thus said to be takbirinini. The candidate's head is removed and he is dressed in the muhibb. The mabâkû undertakes to devote himself completely to this path, and is then set for three days in the mabâkû upon a skin known as the sakkû pustu which is believed to remove the thirst of those who thirst for the tarîka. The muhibb, seated upon this skin upon his knees with his head bent, observes the services performed by other murids who are named djin (literally ‘soul’), does not speak without need and when required to urinate, he takes over his shoulders the kûsa or gown with sleeves of one of the âçins and goes to the latrine. When the three days are up, he is taken to the kazandji dede (the person responsible for the murids' discipline) and if he declares himself resolved to remain in the tarîka, he runs errands for eighteen days in the clothes in which he has come, that is to say, he carries and fetches at the double for the persons of the tekke. When this period ends, the position is explained to the muhibb. Upon his request, the clothes of the muhibb are removed and he is dressed in the matma' tennerîsi, and over this tennerî (or long, sleeveless gown) there is bound a belt called the elf-i nemed. Thus the muhibb intending to enter the Mawlawiya order (sawanan, 'changing his garments for work') is delivered to the kazandî, who explains to him the services which he will perform (errands, floor-sweeping etc.). While these services continue, the muhibb is also taught to perform the samûd. The muhibb may not wear the sikke until successful in samûd. Once his success in this matter has been demonstrated, he is given a temporary sikke and only after participating in the mabâkû, maskâbîsî (a samûd ceremony for beginners) does he acquire the real name of djin. While the real ceremony, he removes the tennerî worn for service (hizmet tenneresi) and wears instead the samûd tenneresi, with a narrow shirt (deste-gul) over it and a kûsa upon his back.

Upon completing the service of errand-runner, the muhibb leaves his service and undertakes the functions of kazandî, that is to say, he does the tekke's daily shopping. While performing this service he wears a towel on his back, a chain upon his waist and tongs upon his belt (elf-i nemed). At prayer times, he goes to the masjidî of the dargâh or sâwiyâ, and in the mornings joins the circle where the ism-i dâjalî ('glorious name [of God]') is repeated. He carries out the shopping, sets and clears the table, does internal housework and other services. Thus the muhibb completes 1,001 days of service. The mâyândî dede informs him when he has completed his trial (îliâ), and explains that one week later a cîle will be performed for this occasion, that sharbat will be drunk at this ceremony and gives the name of the murid (djin) who will distribute the sharbat.

One week later, having completed his trial (îliâ), the dervish goes to the hamâm and bâthms, and coming to the kitchen, he removes his tennerî and puts on the cîle costume of mîntan and kûsa and again sits upon the sakkû pustu in the kitchen. That might a candlestick of 35 or 70 branches is lit. After all but the dervish performing the trial (îliâ) have eaten, the sharbatî serves the prepared sharbat to those present. The cîlesî (a prepared prayer) for cîle consists in the head of the muhibb drinking the ascîh dede or the dedes, and proceeds to the middle and performs a salutation (niyâz). The tarîkatî or the ascîh dede recites the gûlban (a prepared prayer) for him (for the text of the gûlban, see Gûlpanah, Mevlâna'dâ's sona mevdlevî, Istanbul 1953, 393). After all have departed from this ceremony, the mâyândî takes him first to the türbâdîr and then to the kitchen and gives him sharbat to drink and food to eat. Then he puts on a white skin called Sulân Walad pusû is spread. The mâyândî seats the ascîh dede upon the skin, and brings the dervish who has completed his trial to him. After praying that he may continue upon the path (reading the gûlban), the ascîh dede goes to his cell. The new dervish too is taken to the cell set aside for him. The dedes come there to congratulate him, each bringing with him a different present. He does not leave his cell for three days, and his meals are brought to his cell. After this period he is taken by the mâyândî dede to the shaykh of the tekke and the ceremony of bay'aî is performed (for details, see ibid., 394). The shaykh cuts some hairs from the middle of the eyebrow and from the moustache of the dervish and pronouncing the takbir, he dresses him in the kûsa of the dervish. He then tells him to perform the trial of the cell (bâdîr cîle). This trial consists of not leaving the cell for 18 days. When this period, too, has ended he is dressed by the shaykh in the sakkû. With this, he acquires the title of dervish or simply of dede (Gûlpanah, Melevî zedî ve erkânî, 135). Thereafter, he begins to teach the knowledge and arts (music, etc.) which he has acquired to date to the muhibb who come after him. A dervish, depending upon his ability, may become a shaykh and kâlîfî [see kuîma]. 3. In Islamic mysticism. The shaykh represent the Mawlawiya order. If shaykhs are not sayyids, they wear white turbans; if they are sayyids, they wear turbans of a smoky colour close to purple.
opposite the mihrāb [q.v.]; it is assumed that a line stretches from the edge of this skin to the middle of the khatt-i tstita?2. This line must in no way be stepped upon. The sama? ceremony—also known as mukābele (see Ankarawī, Minbādār al-fukard?3, 68)—is performed after prayers. Beforehand, the meydāndiḏ who supervises the affairs of the dargāh or meydān goes to the sama?khāna on the day or night when sama? will be performed, and takes the shaykh's skin which is there to his apartment. With the approval of the shaykh, the meydāndiḏ does not stand facing the kibla opposite the location of the cell, and summons the derviš to perform their actions and don the tennār. Afterwards he goes to the sama?khāna and spreads the skin of the shaykh. He emerges to tell the mu?ṣafat to call the adīn. After this person has called the adīn, the dedes and the muḥkbs perform their ablutions, don their tennār and with their khirka on their backs proceed to the sama?khāna. After the performance of prayer, the shaykh sits upon his skin, and those who are to perform the sama? also sit together with him. After all have taken their places, the band of musicians takes its position. The Mathnawīḏ?ḏ?n reads an extract from the Mathnawī, while the shaykh reads his punt du?āsāt. They then listen to the na? dam performed by the musicians, and afterwards the shaykh and the sama?zans or participants all rise, striking their hands to the ground. The shaykh, in harmony with the music of the musicians, walks very slowly to the right, and once he has taken three steps from the skin, the person behind him takes up a position near the skin and, bowing his head in salutation, passes in front of the skin to the other side without stepping upon the khatt-i tstita? and stands with his face towards the skin. The one who follows him also passes before the skin. These two participants, standing opposite one another, look at one another face to face. They then salute one another, drawing the right hand from above the left from within the khirka to the heart, and the left hand to the right side. Next, one turns and follows the other who goes in front. All the ḍams act in this way before the skin. Then they walk in harmony with the tempo. When the shaykh comes before the skin, he stops and finds the most senior naw-nijāz before him. They exchange mutual salutations. Thus the first ḍams of all sequence is completed. Second and third ḍams follow in the same fashion. When the third ḍams is finished, the shaykh goes towards his skin and at this moment a nay or flute improvisation begins and continues until the shaykh sits upon his skin: once he has done, so the ceremony begins. The shaykh and the sama?zans salute. The sama?zans remove their khirkas and place them on the ground. Then, passing over the arm of the skin that they link arms in a diagonal fashion, with the left hand holding the left shoulder and the right hand the right shoulder. The shaykh walks in front of the skin, salutes, and the others perform the same movement. Next the sama?zans, setting off on the right foot, approach the shaykh one by one, salute him and kiss his hand. They then open their arms, the left hand being a little higher, take three short steps and begin to turn. The same?zans bashi or leader of the participants has charge of the sama?. The first to turn is followed in identical fashion by the others. When the galam is to be given, the shaykh, who is beside the skin, advances and makes salutation. The sama?zans come together in two and threes, touching each other's shoulders diagonally, and form groups. The second ḍams is then begun: this resembles the first. This time the same?zans perform a salutation before the shaykh and kiss his hand. The third and fourth ḍams follow in the same fashion.

According to a tradition among the Mawlawiyya, until the reign of Selim I (1789-1807 [q.v.]) the custom of the Mawlawīs' era was maintained and sama? was performed only at memorial occasions; nonetheless, it was performed on specific days. D'Ohsson (Tableau général de l'empire Ottoman, Paris 1789, ii, 304) records that Tuesdays and Fridays were chosen for sama? ceremonies. There is a strong probability that Selim III's frequent visits to mawlāvī-khānas and the need to perform sama? in his honour led to the ending of this custom, and sama? began to be performed every day. However, the difficulty of performing sama? when any single sama?khāna was recognised, and it became the practice to perform it in a different mawlāvī-khāna on each day of the week. Yet in cities outside Istanbul, the sama? ceremony was performed only on Fridays, after Friday prayers. Nowadays, for reasons which are touristic rather than religious, the sama? ceremony is performed for one week annually in Konya between 11 and 17 December (see H. Ritter, Die Mevlanafeier in Konya vom 11-17 Dezember 1960, in Oriens, xx, 249-70; cf. Gülpinarlı, Mevlâna dan sonra mevlletik, 371-80, and Mevlevî âade ve erkân, 77-89).

The Mawlawiya have a further sama? ceremony, called 'ayn-i ġams ('ayn al-ğams). It is used in the sense of uniting or gathering. This was often performed at night, when the Mawlawi brothers gathered in ecstasy and love in the consciousness of unity with God. This ceremony was performed either to fulfil a condition set by a donator of a waqf [q.v.] to the tekke, or for the sake of someone who had made a vow, or upon the personal request of an 'aṣḥāf or devotee of the Mawlānā. This sama? was not performed in the sama?khāna but in a rectangular room. If the sama? took place at night, it was performed after the eating of a meal and the performance of the evening prayer (details in Gülpinarlı, op. cit., 101). This ceremony was also performed on the anniversary of the Mawlawī's death (6 Dümādā 2172/17 December 1273). For according to the Mawlawiya, this day marks the Mawlānā's birth into eternity. As this date changes annually in accordance with the hijrd? calendars, when the anniversary occurred in summer or spring, rush mats and rugs would be spread on the tarbe-facing side of the room, which lies outside the meydān odāsāl of the dargāh in Konya, and the 'ayn-i ġams would be performed in the open air.

The Mawlawiya have striven to give meanings to the sama?khāna and to the gestures made by the sama?zans during sama?. Thus the right-hand arc of the circular sama?khāna represents the apparent world, while the left-hand arc represents the unseen world of meaning within the apparent world. Similarly, the right-hand arc represents the descent from absolute being to humanity, the left, spiritual ascent, maturity and the path to God (salâh). The starting-point of the khatt-i tstita? (i.e. the place of the shaykh) is a sign of the world of absolute being, while the point directly opposite is a sign of the rank of humanity.

The derviš who performs the sama? is called sama?z. During the sama?, the sama?z's hand raised to heaven is a sign of taking from God, while his downward-pointing left hand is a sign that what is taken from God with the right hand is given to the people. The sama?z believes that what has thus been taken from God is given to the people, that he himself exists only in appearance and in reality does not exist, and that he is nothing but an intermediary between God and the people. In this position, his arms resemble a ġam alif (y?), while the body between the two arms is like an alif, thus giving the form of La tilâh tilâh.
The first dawra of the samad ceremony shows the manifestation of God, in whom all names and qualities reach the degree of vision (ayn al-yakim). Thus the siddik's knowledge of God's unity reaches the degree of vision. In the second dawra, this knowledge reaches the degree of unity (tevai al-yakim). The third dawra is what he sees, i.e., his knowledge becomes hukk al-yakim. The fourth dawra shows the manifestation of God, in whom all names and qualities reach the degree of vision. Thus the siddik's knowledge of God's unity reaches the degree of vision.

In conclusion, this order took its basic principles from the Mawlawan. These principles, which rest upon a limitless love of humanity and a moderate pertinacity, secured the popularity of these orders within a short period. To these principles should be added the importance given to music and dance, which were not well-viewed in religious circles, but which human beings cannot do without. The considerable interest which was shown by outsiders (borne) for these reasons further developed the order. Just as the customs and rules of the tariqa were from time to time re-ordered on this pretext, so also new ones were added to them. Further, the Mawlawi literature has been formed. This has not been confined simply to the members of this order, but has also left its imprint upon a number of famous poets of the Ottoman Diwan literature. Amongst the poets of this literature, Nefti, Nabif and Shaykh Çahâb (see) were Mawlawis.

From the Mawlawan's era to most recent times, music has always occupied an important place among the members of this tariqa. To the musical instruments which were naturally consigned solely to the men and the rabâh, there were subsequently added the sûd, kaman, kânân, sanûr, jâmb, kemence and girif, and most recently the piano and the violincello. The first piano brought to Istanbul was played in the mawlâwiyya at Kumkapî. However, the piano and violincello have not won much favour. It is most probable that the musical compositions recited in the Mawlawan's time were anonymous; but later, especially during samâ, the recitations were selected from the poems of the Mawlawân, Sultan Walad and Ulu 'Arif Çelebi. The Mawlawis produced a number of composers (see Gölpınarlı, Mêlevân'dan sonra mêuvelitik, 456 ff.).
MAWLAWIYYA

2. Relations with other orders.

Although the earlier mystics, such as al-Djunayd, Bistâmî and al-Hallâdî, are mentioned in Aflaki's Manâsîhî with profound reverence, the treatment of the founders of orders who came near Djalal al-Dîn's time is very different. 4 Abd al-Kadir al-Dîlânî is ignored, Ibn 'Arabi mentioned with contempt, and al-Rifâîî with severe condemnation. Hâdîdji Bektâşî is represented as having sent a messenger to inquire into the proceedings of Djalal al-Dîn and to have acknowledged the supremacy of the latter. At a later period, the rivalry of the Mawlawî with the Bektâshî order became acute.

It has been shown by F. W. Hasluck (Christianity and Islam under the Sultan, Oxford 1929, ii, 370 ff.) that the environment wherein the Mawlawî order originated was favourable to Christians, and that throughout its history it showed itself tolerant and inclined to regard all religions as reconcilable on a philosophic basis. He suggests that the veneration of the Muslims of Konya for the supposed burial-place of Plato (in a mosque which was once the church of St. Amphelochius) may have been intentionally favoured by the Mawlawî dervishes, or possibly their founder, in order to provide an object of veneration to the adherents of both systems. Plato (in a mosque which was once the church of St. Amphelochius) may have been intentionally favoured by the Mawlawî order, or possibly its founder, in order to provide an object of veneration to the adherents of both systems.

3. Spread of the order.

Alâ'î had its propagation outside Konya to Djâlal al-Dîn's son and second successor, Sultan Bahâ'î al-Dîn Walad who "filled Asia Minor with his lieutenants" (tr. Huard, ii, 262). It would appear, however, from Ibn Baṭûtâ's narrative (Râbi'a, ii, 282-4, Eng. tr. Gibb, ii, 430-1) that the order's following was not as at that time extensive outside Konya and was largely confined to Anatolia, although it does seem that in the time of Ulu 'Arîd Celebi (d. 790/1386), the Mawlawî darâghî existed in the Il-Khânî centre of Sultâniyya in Adharbaydâjîn (see Aflaki, ii, 896). At this period, zâwiyas or tekkes were set up in such Anatolian towns as Tokat, Lâranda and Kîtahîyâ, and thanks to the efforts of Djâwânä Mûhâmîd Celebi (d. in the first half of the 10th/16th century), others were founded in Istanbul, Rumelia and other Anatolian towns, and in the Arab lands, at Lâhghâktîya and Aleppo and in Egypt and Algiers.

The story told after Sa'd al-Dîn by Von Hammer (GOR, i, 147) and others, that as early as 759/1357, Sulaymân son of Orkhan received a cap from a Mawlawî dervish at Bula'yâr, has been shown by Hasluck (ii, 613) to be a fiction. The historians make no allusion to any importance attaching to the Mawlawî doctrine in towns alone (details in A. Golpinarh, Les saints des dervîches tourneurs, Paris 1897, 788/1386; but when the area was taken by Murâd II in 838/1435, peace was negotiated, according to Sa'd al-Dîn (i, 358) by Mawlânä Hamza, but according to Neghri (quoted in ibid.) by the descendant of Mawlânä Djâlal al-Dîn al-Rûmî, 'Arîf Celebi, "who united all the glories of worth and pedigree, and possessed mystic attainments"; the rebellious vassal supposed that a holy man of the family of the Mawlânä would inspire more confidence. The same person performed a similar service in 846/1442 (Sa'd al-Dîn, i, 371). According to V. Cuinet (La Turquie d'Asie, i, 829) Selîm I when passing through Konya in 922/1516 in pursuit of the Persians (?), ordered the destruction of the Mawlawî zâwiyâ, at the instance of the Shâykh al-Islâm; and though this command was repealed, the moral and religious authority of the head of the order was gravely compromised. That the saints of Konya were highly revered in the Ottoman Empire later in the 10th/16th century appears from the list of graves visited by Sayyîd 'Alî Kapûdân in 961/1554, which commences with those of Djâlal al-Dîn, his father and his son (Pecewî, Tavâfât, Istanbul 1283/1866-7, i, 371). In 1043/1634 Murâd IV assigned the zâwiyâ of Konya to the Celebî. Yet the first reference to "dancing dervishes" in Istanbul which Hasluck produces is from the time of Sultan İbrahim (1049-58/1640-8).

Mawlawî tekkes were divided into two classes, the âstana and the zâwiyâ, the former being considered as more prestigious, with the âle (see section 1. above) being performed there. During the high Ottoman period, there were âstanas, apart from the âstana-yî zâwiyâ called Huşarlî-î Pir at Konya itself, at Bursa, Kîtahîyâ, Karâhisar, Manîsa, Esikêhîr, Kastamonu and Gelibolu in Anatolia, at Yeşîbeychîr in Rumelia, and at Aleppo and in Egypt, plus the âstana which served as the fourth of the Mawlawî tekkes in Istanbul. During this period, there were 76 Mawlawî zâwiyas in towns alone (details in A. Gölpınarlı, Mawlânâ'dan sonra mevlevî, 335). Of European authors writing towards the end or just after the Ottoman era, Cuinet mentions three Mawlawî zâwiyas of the first rank and one tekke of the second in Istanbul and the neighbourhood; he gives the names of the
saints whose tombs they contain, without dates. He
mentions seven other Mawlawi-khdnas of the first ...
their title was therefore Sayyidi/Sidl (but the form Mahammad
freely altered does not exclude the usage of Mawlay in
Jerusalem. To these, Hasluck adds 
tekkes to have obtained recognition in the 19th century. It
mentions in February-April 1925, which had been led by
Anatolia against the new Republican Turkish govern-
ment as a privileged community against the Bektashis, who
supported the treatment of the Muslim
Arab world and the Balkans.
In later Ottoman times, Sultans
would seem that reforming sultans used the Mawlawi
cannot be traced earlier than 1058/1648, and appears
the supposed "traditional right" of the Mawlawi
shaykh to gird the new sultan with a sword. This right
cannot be traced earlier than 1058/1648, and appears to have obtained recognition in the 19th century. It
would seem that reforming sultans used the Mawlawi order as a makeweight against the Bektashi, who
supported the Janissaries, and then against the
'sultan?', who supported the treatment of the Muslim community as a privileged community against the
dhimmit. In later Ottoman times, Sultans 'Abd al-
Aziz and Mehemmed Resshâd were members of the order.
(D. S. MARGOLIOUHT*)
5. The last vestiges of the order in the Arab world and the Balkans.
Five members of the Sufi orders in Turkey, the last Celbe (Muhammad Bâkîr) took up
residence in the āšînân of the Mawlawiyya in Aleppo (L. Massignon, Annuarie du monde musulman 1954, Paris 1955, 201). Ritual gatherings were held regularly till the early 1950s, when the last active
shaykh of this āšînân (Muhammad Shahu) died. In the
takiyya of the Mawlawiyya in Hîms (last shaykh, Nûr
Urğmân), ritual gatherings were held into the 1940s, and in the
takiyya in Latakia (last shaykh, Bâkîr Efendi) gatherings continued into the 1950s.
The small but active Mawlawiyya community in Damascus, where the āšînân dates back to the late 10th/16th century (Muhammad Kurd 'Ali, Khîbat al-
Şâm, Beirut 1972, vi, 139), disappeared in the 1960s.
His son, Muhammad Djâlâl, published a new edition of the awrâd (Awrâd al-śâda al-Mawlawiyya, Damascus 1935/1975) and tried to revive the order without much success. In Damascus, the Mawlawiya played a prominent role in the religious celebrations in which the Sûf orders used to participate (cf. Muhammad Djâwâd Mâshkîr and Hasan Qhurawi
Ibsânî, Sûfîyan-i Mawlawî dar Dimashq, in Honor sa Mardom, Tehran [April 1975], 2-6, and Munir
In Lebanon, the Mawlawiya had takiyyas in Tripoli and in Beirut. The takiyya in Tripoli still func-
tioned in the 1960s. It fell into a state of dilapidation after the death of its last shaykh, Anwar al-Şârâbulust. In the early 1970s, the takiyya was restored ('Abd al-
Şâlim al-Šârâbulust Shîrûkî, takiyya wa-lâjdîn masâdir wa-mudâdâr min-Târîhul Bursa, and as the more
Uthman), ritual gatherings were held into the 1940s, 
and dispersed. Thereafter, the takiyya was used as a primary school.
In the Balkans, the Mawlawiya survived into the post-Ottoman era in Greece and in Yugoslavia only.
In Greece, the tekke in Thessaloniki seems to have functioned till the exchange of the Orthodox and Muslim populations between Greece and Turkey in 1923-4 (Cf. B. Dz. Cehajic, "Mojhodani pravoslavni i moheandani sectanti iz Makedonije, in Makedonski pregled, 1/4 [sofia 1925], 63, and Na. Hafiz, Yugoslavysa da Mesevi tekkeleri, in Fevzi Halici (ed.), Medevna ve şapma review, Ankara 1978, 175 ff. (also published in Çeşen, vi [Prîştine 1978], no. 20, 37-43). The tekke in Peć ceased to function in 1941, and the tekke in Skopje in 1945 (Hafiz, 40).

Bibliography: Given in the article.

(F. DE JONG)
Wallil, no longer known as Volubilis, continued throughout this long lapse of time to lead an independent existence. This period, corresponding in the general history of Morocco to the ascendency of the Vandals and Byzantium, is one of almost total obscurity with regard to Morocco. All that can be stated with certainty is that this land had facing it, in the Iberian peninsula, the kingdom of the Visigoths, and was inhabited by Christians, Jews (N. Slousch, *Histoire des Phéniciens et Judeo-Berberes*, in *AM*, xiv [1908], 1-473), and no doubt also by animists and idolators.

This strange gap in our knowledge is one of the most perplexing features of the history of Morocco, in view of the fact that we are relatively well informed as to the history of other North African countries and, in particular, of Tunisia and eastern Numidia.

With the arrival of Islam, according to the Arabic texts, ‘Ukbah b. Nafi’ presented himself before Walli and there routed a Berber army (cf. Ibn *‘Idhari*, tr. *Lévi-Provencal*, in *Arabia*, i/1 [1934], 38), but he does not seem to have entered the town, which from this time onward began to serve as a magnet for numerous Muslim arrivals.

It seems that the two Idris [q.v.] were not the first Muslims to establish themselves on the site of the former Roman settlement, since Muslim coinage of a time prior to the arrival of the former has been discovered. The tribe of the Awarba, also fugitives from the East, apparently preceded him there. In his work *Essai sur l'histoire du massif de Mawlay Idris* (tr. Beaumier, 24, 29), Ibn Abi Zar‘ indicates also that a mosque, of which no trace has been discovered, existed at Walli, and it was there, he says, that Râghid presented Idris, son of Idris, to the people in order to have him recognised as sovereign of the Maghrib.

Evidence that all these events did indeed take place on the former site of the Roman town exists in the form of the many coins of the Muslim period which have been discovered there; these discoveries in fact include not only Muslim coins originating in the East, sometimes in the form of treasure, but also products of other Moroccan mints such as Tugdha as well as Walli itself, which possessed a mint of its own (see P. Berthier, *Essai*, 59, G. S. Colin, *Monnaies de la période idrisside trouvées à Volubilis*, in *Hespéris*, 1936/2, 113-25; D. Eustache, *Monnaies de la periode idrisside trouvées à Volubilis*, in *Hespéris*, 1956/1-2, 133-97; idem, *Monnaies musulmanes trouvées dans la maison au compas*, in *Bulletin de l’Archéologie marocaine*, vi [1966], 349-64; on the entire question of coinages, idem, * Corpus des dirhams idrissites et contemporains*, Rabat 1970-1, is extremely informative, in particular with regard to Walli, 162-9).

Volubilis was still in existence at the time of the foundation of Fas by the two Idris since it is known, thanks to the famous article of Lévi-Provencal quoted above, that the two Idris participated in the foundation of this capital. To find the demise of the old Roman town, it is apparently necessary to look to the Almohads who, throughout North Africa, brought extinction to towns which had, hitherto, sheltered Christians. According to some historians, this behaviour of the Almohads was a consequence of the tension between Islam and Christianity caused by the Crusades (on the massacres perpetrated by the Almohads, see D. Jacques-Meunié, *Le Maroc saharien des origines à 1670*, Paris 1982, i, 260-1).

There is thus no doubt that the Roman town of Volubilis was the scene upon which the first stage of the Idrisid drama was performed. It is now necessary to attempt to discover how the events of history have been transferred, no doubt gradually, towards the site of the mountain known today by the name of Mawlay
Idris. First, it should be noted that all the Arabic texts prior to the 9th/15th century declare that both Idris died at Walil and were buried there, not however within the town but "extra muros": Ibn Abi Zar' in the Rawd al-kr'tan, says simply "near Walil"; al-Djalnaz' specifies "outside the gate of Walil"; Ibn al-Kadiri, "in a guard-tower opposite Walil"; and al-Halabi, "in the courtyard of the guard-tower situated at the gate of Walil" (see M. Ben Talha, Mawlay-Idris du Zarhun, passim).

It would be inappropriate to give an exhaustive account of the detailed information provided by these and other texts. The general fact which needs to be stressed is that the burial of the two Idris did not take place at Walil but in the immediate proximity. It is therefore logical to suppose that it took place, specifically, on the site where the Zarhun is currently located, i.e. in that fold of land (al-hufra) between the two heights of Khaybar and Tazgha, upon which the two main quarters of the new town were to be erected. All those who have visited Volubilis know, in fact, that Mawlay Idris is very clearly visible beyond the ruins of the Roman town. This is, furthermore, the conclusion offered by D. Eustache in his Corpus (165 n. 5). The names of Khaybar and Tazgha appear for the first time in the writings of Ibn Ghazi, author in the 9th-10th/15th-16th century of al-Rawd al-hatun, though it is impossible to tell whether these are simple place names or the quarters of a town in the process of construction.

The 16th century texts of Leo Africanus and of Marmol are confusing. These two authors describe, in fact, two different sites: Gualili and the Palace of Pharaoh in one case, Tuilit and Ca'car Faraon in the other. But none of these descriptions corresponds exactly either to Volubilis or to Mawlay Idris. It is hard to understand, in fact, how these authors were able to speak of towns situated on the "summit of the mountain", a description applying neither to Volubilis nor Mawlay Idris. A further complication is introduced by the existence of the Kasbat al-Nasrani which seems to have been known to these authors and which is also situated "on the summit of the mountain." Possibly the Kasbat al-Nasrani should be located across the Pietra Rossa or Dar al-Hamra by Leo Africanus and Marmol.

Amid all this confusion, which seems to prove that these authors had a very poor knowledge of the region or described it on the basis of hearsay, there nevertheless emerges from a comparison of the two texts a glimmer of light which could provide the key to the mystery that surrounds the origin of the new city. It may be observed that the former, the work of Leo Africanus, mentions only two or three houses around the tomb of the two Idris, while the latter, the work of Marmol, who wrote a half-century after him, mentions fifteen to twenty. Circumstantial evidence points to this as the origin of Mawlay Idris, a town which must have begun to develop around a venerable tomb during the 10th/16th century and the period of the great maraboutic movement in Morocco.

This, then, is the time at which the town under discussion began to develop. Obviously, there is a long gap between the 10th/16th century and the end of the 2nd/8th or the beginning of the 3rd/9th. The factor which enables us to fill the space framed between these two dates would be the cult of Idris, since Leo Africanus tells us that his grave, at that time separate from any urban settlement, "is venerated and visited by almost all the tribes of Mauritania" (tr. Épaulard, 245).

It is thus from the 10th/16th century onward that the Zarhun attained its full dimensions and made, so to speak, its début in history. The best evidence attesting to this relatively recent appearance of the urban settlement which bears this name today, consists in the complete silence of Arab or European historians and geographers prior to the 17th century. Here may be added the text of Mouët'te (beginning of the 17th century) declaring that at this time there were, in the Zarhun, only small villages forming a dispersed habitat "here and there", but "no town" (Mouët'te, Histoire des conquêtes de Moulay Archy, in Sources inédites de l'histoire du Maroc, 2nd series, France, ii, 1924, 182-3). On the other hand, with the start of the 'Alawi dynasty, the town entered a phase of lively prosperity. A curious text contained in the Kitab al-Istikyafa places it, at this early stage, alongside the most eminent Muslim sanctuaries: the Ka'ba, Jerusalem, the Mausoleum of Siddi Ali Sharif at Tafilalt and that of Mawlay Idris II at Fas. Its sanctified nature led to the following consequences: (1) all non-Muslims, whether Jews or Christians, were excluded from its territory; (2) this territory, and especially the Zarhun, became an inviolable place of sanctuary for any political criminal or fugitive from common law; and (3) its prestige, or what might be termed its baraka, extended over the entire range of the Zarhun. Current evidence of the Lauricb of Jews and Christians is still sanctioned by the law which prohibits them from acquiring property there. The protection of criminals has never been other than relative, even in the most prestigious times of the sanctuary. Some have found there an effective refuge, for others it has proved less advantageous. As for access to the locality for Europeans, although it was rigorously controlled before the Protectorate, as certain travellers discovered to their advantage, as for access to the locality for Europeans, although it was rigorously controlled before the Protectorate, as certain travellers discovered to their advantage, most restrictions have now ceased to exist, and a visit to Mawlay Idris is recommended to tourists visiting Morocco.

In history, the piety of the sultans is attested not only through pious visits but also through the care shown for the maintenance and embellishment of the sanctuary and the mosques (details may be found in Berthier's Essai). These visits sometimes take on a political nature, as to a place of symbolic meetings, where alliances are sealed and treaties or truces concluded. A visit to Mawlay Idris is obligatory for every newly-installed sovereign. In the course of his campaign against Muhammad V, in 1953, EI-Glawi did not fail to comply with this tradition, and Muhammad V did likewise on his return from Madagascar. Such evidence shows that the cult of Mawlay Idris has today lost none of its prestige, and it may legitimately be supposed that it could play a similar role in the future.
In the cultural sphere, it is known that distinguished scholars have taught at the Zawiya. A madrasa of some repute exists in the locality, and this has been endowed, quite recently, with a cylindrical minaret, a form most unusual in the Muslim architecture of Morocco. Its decorative frieze, made of green pottery, is inscribed with verses from the Koran in a very stylised Kufic script (cf. Guide bleu, Marrak, 1975, 206; A. Paccard, Le Maroc et l'artisanat traditionnel, i, 315).

Although Idris al-Akbar has numerous saintly rivals in the massif of the Zarhun, such as Sidi 'Ali Ibn Hamdush, Sidi Ahmad Dghaïhi and Sidi 'Abd Allah al-Nakib, the latter corps, the cadre of which was formed by several hundred carefully selected cAb!d Allah al-Khayyat of Talaghza, in the urban settlement itself his cult is challenged only by that of his barber, Sidi 'Abd Allah al-Hadjidja, to whom a mosque is dedicated.

The population of the small town consists of a teeming mass of Idrisid Shurfa and 'Alawids subdivided into a multitude of branches which the author of this article will not attempt to enumerate.

It is necessary, however, to indicate the importance not of the moussem (maâwiya) of Mawlay Idris but of the moussems which are conducted there almost daily at certain times of the year. The present writer was able, in 1934, to witness a moussem of the Sûs people, a crowd of two or three thousand, climbing towards the sanctuary and chanting a curious recitative which has been described by A. Chottin (see his Tableau de la musique marrakchis, Paris 1938).

Naturally enough, there is a vast number of brotherhoods, ranging from the most aristocratic to the most coarse and primitive. The disciples of Sidi 'Ali Ibn Hamdush and of Sidi Ahmad Dghaïhi honour their founders not only on the southern slope of the mountain where their sanctuaries are located, but also in the town of Mawlay Idris itself, and this seven days after the mouloud (maâwiya). In his Essai (134-5), the present writer has hesitated to assess the influence from the Roman period which could have stimulated the appearance in Morocco of extravagant rites on the part of certain religious brotherhoods. In his recent article Le Temple B. de Volubilis, H. Morestin has prompted the present writer to revive this hypothesis. At the conclusion of his excellent archaeological study, Morestin indicates, in fact, that the sanctity and the mysticisms of the Zarhun could be no less than that of the temple of Saturn or was it not? Prudently, Morestin refrains from making this identification, which does not prevent him from declaring, in the last sentence of his book, that "indirectly the spiritual heritage of Temple B. could have played a role, at the dawn of the history of Muslim Morocco".

**Bibliography:** All questions concerning the Zarhun, the Muslim phase of the history of Volubilis, the mystery surrounding the name of Walli (from a Berber word signifying rose-laurel), the history of the Zawiya, etc., have been examined by the author of this article in his Essai sur l'histoire du massif de Mawlay Idris, Rabat 1938; the remarkable preface contributed by H. Terrasse would be sufficient, in its own right, to convey an impression of all these issues. It concentrates, however, on the Zarhun as a whole rather than on the town of Mawlay Idris in particular. For Terrasse, the Zarhun represents irrefutable evidence of pre-Hilalian Morocco; in this, he is in agreement with X. de Planhol in his Fondements géographiques de l'histoire de l'Islam, 146. More recently, a work by N. Ben Talha, former director of the Museum of Dîr Djâma' at Meknès, Mawlay Idris du Zarhun, 1965, has provided a very thorough study of daily life in the Holy City; it is to be noted that the closed and unique nature of the milieu examined contributes considerably to the interest of this work.

Some useful material is to be found in the works of L. Chatelain and R. Trouvenon on Le Maroc des Romains, Volubilis and Banasa, also in the publications of the Service des Antiquités Marocaines (P.S.A.M.) in the time of the Protectorate, superseded since independence by the Bulletin d'Archéologie Marocaine. On the Zarhun in general, recourse may be had to the doctoral thesis of M. Belarbi, Etude de géographie rurale, Bordeaux 1980, which is as delicate as it is well the tale which the author has given to it. (P. Berthier)

**Mawlay Ismaïl**

**B. al-'Ashrif, Abu 'l-Nasr**, the second ruler of the Moroccan dynasty of the 'Alawids [see 'ala'wîs and hâsâni].

On the death of sultan Mawlay al-Rashîd, the empire of Morocco was divided. Mawlay Ismaïl, governor of Meknès [see mknas] and brother of the deceased sultan, was proclaimed sultan in this town. He advanced once more on the capital Fas, which had declared against him and seized it. He was proclaimed there on 11 Dhî 'l-Hijja 1082/14 April 1672, being then 26 years of age.

But three rivals, his brother Mawlay al-Harrâni in Taffilalt, his nephew Ahmad b. Muhriz, proclaimed in Marrakesh and in Sûs, and thirdly the guerilla chief al-Khidr Ghaylân in the north-west, took the field against him. They were supported by the Turks of the Regency of Algiers, who feared the establishment of a solid power in the west of the Maghrib and endeavoured to make trouble there. Muhriz Ismaïl at first drove his nephew Ahmad b. Muhriz out of the town of Marrakesh, defeated Ghaylân to the north of Fas and had him put to death. But Ahmad b. Muhriz once more raised the lands of the south and the Atlas. To obtain peace, Ismaïl had to recognise his nephew as amîr of the lands south of the Atlas and his brother al-Harrâni as amîr of Taffilalt.

These civil wars, which had lasted five years, had hardly terminated when a descendant of the Marabouts of Dîlîz [q.v. in Suppl.], Ahmad b. 'Abd Allâh (d. 1091/1680), also supported by the Turks of Algiers, fomented a terrible rebellion in the country of Tâdla and the provinces of western Morocco. But his Berber troops could not withstand Mawlay Ismaïl's disciplined troops, especially his artillery. Marrakesh fell in Rabî' II 1088/June 1677. The victorious Ismaïl terrorised the people to keep them quiet; more than 10,000 were beheaded; thousands of prisoners of war along with Christian slaves had to help to build the palace of Meknès, which the sultan made his military capital. At the same time, the plague carried off thousands of victims (1090/1679) in the regions of the Gharb and the Rif.

The vigorous repression of the Berber revolts and the epidemic afforded Mawlay Ismaïl a certain respite. He took advantage of it to raise a professional army. He enlisted former negro slaves, gave them wives, allotted estates to them, trained them in the use of arms, and made of them the famous Black Guard of the 'Abîd al-Buhârî (so-called because they took their oath on a copy of the Koran) which was to assure him supremacy over all Morocco.

At the same time, allegedly to favour the intran- 
significant religious party, but in reality to watch the dealings of the Turks and Europeans in the seaports, 
and to counteract the influence of the corsairs, he organised the corps of the Mugiabîhidin or "volunteers of the faith". The latter corps, the cadre of which was formed by several hundred carefully selected 'Abîd,
waged an unceasing irregular warfare against the European possessions. They took La Mamora (al-Ma‘mūra), the modern al-Mahdiyya, by surprise from the Spaniards, and Mawlay Isma‘īl collected over 100 pieces of artillery there (15 Rab‘ II 1092/26 May 1681). They harassed the English at Tangiers and the latter evacuated the town after blowing up the mole and the fortifications (1 Dżumādā I 1095/15 April 1684) (cf. Davis, The history of the Second Queen’s Royal Regiment, i, London 1883, 118 ff.). Larche (al-‘Arāgh) also was forced to succumb to the blow of the “volunteers of the faith” in 1689, and Asilà in 1691 which were driven against Mollila and Ceuta.

It was in vain that Mawlay Isma‘īl endeavoured to get Louis XIV to aid him against Spain. French commerce had to suffer for some time as a result.

But the Peace of Ryswick in 1697 raised Louis XIV’s prestige considerably above his enemies. Mawlay Isma‘īl then sought his alliance against the Turks of Algiers, who were mixed up in all the plots hatched in the Atlas against the shari‘ā of Fās. An entente between France, the Bey of Tunis and the sultan of Fās was then concluded. The latter even tried to cement it by a matrimonial alliance and demanded the hand of the Princess de Conti (cf. Plantet, Mouley Ismail et la Princesse de Conti, Paris 1893). In spite of the failure of the latter plan, the entente secured to France great commercial benefits as Safe, Tétouan and Safi. Frenchmen superintended the building of the palaces, roads, and forts of the sultan and sometimes (like Pillet) accompanied his artillery. On his part, Mawlay Isma‘īl organised several expeditions against the Turks with the help of France, whose merchants supplied him with arms and munitions. But the slowness of the Moroccan armies did not enable Isma‘īl to reap the advantages expected. He even allowed his ally, the Bey of Tunisia, to be defeated near Constantine, which enabled the Turks of Algiers to come to fight the Moroccans in the west in full strength in 1701 and to drive them back.

The expeditions of Mawlay Isma‘īl against the Turks, in spite of their relative lack of success, enabled him to pacify his frontiers where he built or renovated the fortifications. He built the fort of Reggida in the mountain of the Banū Yā‘la, commanding the high valley of the Wād Šāhre and the lands of the Arab tribes of the High Plateaux. He built the fort of ‘Uyun Sīdī Māllūk in the plain of Anqād and that of Salwān in the land of the Trīfa. He thus closed the exits on his north-east frontier. Forts built in the lands of each tribe kept the country quiet, especially the marabouts, the natural allies of the Turks, whose privileges were tending to pass into the hands of the sāhibs. The latter gradually took over the direction of the religious elements, which were organised into brotherhoods. Isma‘īl completed his system of domination by the creation of military zones. Tāzā, notably, had its walls rebuilt. This town became the headquarters of the eastern march. A garrison of 2,500 ‘Abīd secured the passage from western to eastern Morocco by the pass of Tāzā. It also had to keep in control the Berbers of the Rif in the north of this region and the Berbers of the middle Atlas in the south.

Apart from his constructions of a military nature, Mawlay Isma‘īl was very active as a builder in the various towns of Morocco, and especially at Meknès, where thousands or European slaves worked on the erection of palaces, mosques and madrasas. In order to raise the resources for all the expenses of the army’s upkeep and its building enterprises, he derived money from taxes raised brutally and regardlessly by his agents, from continual raids on the tribes, from custom duties, from the sixth levied on the spoils of the corsairs, from the ransoms of captives and from the presents which are given by the chroniclers and writers of memoirs. The monopoly of trade, by supplying the treasury, prevented moreover the illicit sale of horses and arms.

Mawlay Isma‘īl was a man of vigorous character, of adroitness and of an uncommon agility and bravery, but these positive qualities were accompanied by an unparalleled cruelty and sadism, many examples of which are given by the chroniclers and writers of memoirs. On the other hand, he gave the appearance of being interested in the intellectual activities of his subjects and showed himself respectful of the external aspects of the Islamic cult; he even went as far as engaging in proselytisation and tried to convert Louis XIV.

In regard to foreign policy, he enjoyed fairly good relations with Britain and France, shown by the despatch of embassies which were more or less successful. The French were thus left with a free hand in the Mediterranean, but he did not utilise profitably this diversion of their energies in order to combat victoriously the Turks of Algiers, the aim of his North African policy. Nevertheless, he was able to reduce considerably the foreign occupation of Moroccan ports. In regard to internal policy, much of his reign was filled with the suppression of tribal revolts, which the army was not always able to contain within bounds, whilst his main effort was involved in consolidating the makhzan [q.v.], upholding it against the turbulent Berbers through the use of Arab and Negro troops.

He had thus succeeded, as much by the reign of terror which he evoked as by his own skillfulness, in imposing peace on the internal regions of his possessions, when he died, after a reign of 55 years, on 27 Radjab 1139/20 March 1727 at the age of 80. Amongst the several hundred children which his innumerable wives had given him, it was Mawlay Abūmād al-Dhāhabī who succeeded him.

MAWLAY MAHAMMAD AL-SHAYKH, name of three Moroccan sultans belonging to the dynasty of the Sa'dids [q.v.].

I. The first, Abu ʿAbd Allah, who also bore the title of al-Mahdi and is sometimes known as al-Imam, is generally counted second or third in the list of members of the dynasty, but he may to a certain extent be considered its true founder, since it was he who put an end to that of the Marinids [q.v.]. Born probably at Tagmaddart (a district of the Dar a) in 896/1490-1, he was the younger son of Muhammad b. ʿAbd al-Rahman al-Ka'im bi-amr Allah, who was proclaimed sultan in 916/1510 and died in 923/1517. According to legend, the great destiny to which he was called was predicted to him in his infancy when, at the Kur'ânic school which he attended, a cock came and perched on his head, as well as on that of his elder brother, Ahmad al-Arraj. The two young boys received a quite extensive religious and literary education and were sent on the Pilgrimage to Mecca in ca. 911/1506. The lack of precision and the contradictions in the chronology of events found in the sources make any attempt at biography particularly difficult, but it seems clear that al-Arraj was appointed by his father governor of the Sus, where he too received the bay'a [q.v.] in the same year (916/1510). With his younger brother as his subordinate, he waged without much success a holy war against the Christians established in the region, especially at Santa Cruz, the coastal outlet of the Sus which was to become Agadir [q.v.]. The two ʿgarifs also profited at this time from the aid of the Waṭṭasid ruler [q.v.] of Marrakesh, who supplied them with arms. Muhammad al-Shaykh was not slow, however, to free himself from the tutelary power of this elder brother and to take into his own hands the administration of the plain and of the southern flank of the High Atlas, over which his authority extended at the time that Leo Africanus [q.v.] visited the region (919/1513). Moreover, the entire province came under his control on the death of al-Ka'im. Ahmad was then in power to the north of the Atlas.

Making his capital at Taradant [q.v.] which he fortified and renamed Mahmamdiyya and where he built the citadel, the great mosque, the madrasa and sugar refineries, he was obliged to solve problems of an economic and political, even religious nature, since he needed to trade with the Christians in order to obtain arms and munitions, but he availed of the fact that Santa Cruz was occupied by the Portuguese, who in addition exercised a monopoly over the export of sugar. As a result of treaties concluded with the Portuguese rulers of Safi and Azemmour in 930/1524, and then renewed in the two following years, and after ill-fated expeditions against Santa Cruz, relative peace reigned in the south of Morocco. On the one hand, Mawlāy Maḥammad remained on good terms with the influential marabout of the locality where his family had resided, Tālīs, and even married his daughter; on the other, he attracted Christian merchants to the Sus in order to develop trade in the leather, wax and sugar produced in the region.

In Dhu 'l-Hijjād 930/October 1524, Ahmad al-Arraj had taken Marrakesh from the Waṭṭasids, and the two brothers had further attacks on the last sovereigns of this dynasty who ruled at Fās; they had also taken a large quantity of artillery with which they were able once more to undertake an expedition against the port of Funti [see AGADIR], which was besieged and captured on 13 Dhu 'l-Ka'da 947/1541. The Christian captives were taken to Taradant, while the arms and munitions seized from the encampment of Mahammad al-Shaykh went to Fās. But the Berbers of the region, always an unruly element. Until this point the two brothers had, apparently, made common cause, but a quarrel broke out between them, the specific grounds of the rift being a dispute over the sharing of the booty. A few months after the capture of Funti, al-Arraj attacked and defeated Maḥammad, who was determined to avenge himself and succeeded, in 951/1544, in taking possession of Marrakesh, capturing his elder brother and exiling him to Tafilaлит with all his followers. Although theoretically a vassal of his brother for a few months more, Mawlay Maḥammad al-Shaykh, henceforward sole master of the territory controlled by the Sa'dids, was able to contemplate putting an end to the power of the Waṭṭasids and unifying Morocco to his own advantage. The outcome of the first encounter, which took place on the Unum al-Rābī', was favourable to him. The treaty concluded on that occasion was, however, soon to be broken, and the Sa'dīd called upon his adversary to submit; when the latter refused, Fās was attacked in 952/1545, and the ruler of the town, Ahmad al-Waṭṭasī, captured and then released. While his son took possession of numerous towns of the Atlantic coast, Mawlay Maḥammad, who had lost Fās in the meantime, was obliged to put the place under a prolonged siege, capturing it on 2 Muharram 956/31 January 1549. It may be reckoned that this considerable event marks the beginning of the dynasty.

The following year, around the month of Dju'mādā' I 957/June 1550, al-Shaykh sent two of his sons, al-Harrān, governor of the Sus, and ʿAbd al-Kādir, to conquer Tetouan; but this enterprise was unsuccessful and a Berber tribe called the Tamrīn seized Mawlay Maḥammad al-Shaykh and to defeat him on a tributary of the Sebou, the Innawen, in Safar 961/January 1554. Forced to leave Fās and to abandon all his property, al-Shaykh rapidly returned to the fray, recaptured the capital which had been pillaged by the Turks and on 24 Shawal 961/22 September 1554, executed Abu Hassān, whose head was sent to Marrakesh. He then stayed until the end of Ramadan 962/beginning of August 1555 at Fās, where he left his heir presumptive, ʿAbd Allah al-Ghālib bi 'llah [q.v.], and entrusted the administration of Meknēs to another of his numerous sons, ʿAbd al-Muʿāmin, before setting out once more for the Sus.

In 959/1552, the Ottoman sultan Sulaymān Kanūnī [q.v. (926-74/1520-66)] had written to Mawlay Maḥammad al-Shaykh on the subject of the eastern frontiers of Morocco, but the messenger had been very badly received by the new sultan, who thus
condemned himself to death. Resolved to settle definitively at Marrakesh, he left Fas, but a dozen hired assassins, sent from Algiers to execute him, mangled easily with his entourage which consisted almost wholly of Turks; they performed the deed on 29 Dhu 'l-Hijjah 964/25 October 1557 and bore his head, so it is said, to Istanbul. His body lies in Marrakesh, among the members of his dynasty, in the hall known as Lalla Mas'ūda which contains the famous "Sa'dian tombs", where his epitaph may be seen as well as a long commemorative plaque dedicated to him (see G. Deverdun, Inscriptions, nos. 123 and 85, pp. 125, and 82-6); another marble slab bearing a fairly long inscription (ibid., nos. 127-8, pp. 131-4) extols the merits of the sultan's Berber wife, Mas'ūda, who gave birth to Ahmad al-Mansūr [q.v.] and her name to the hall.

Diego de Torres has left a portrait of Mawlay Muhammad al-Shaykh from which it emerges that he had a round and pale face, large and vivid eyes, a long grey beard, curly hair and two teeth of great size; of modest stature, but robust, he was unscrupulous by nature, but a bold and valiant fighter (Histoire des Chefs, apud Marmol, iii, 212). He was also, according to the least sympathetic Arab sources, a man of piety. He was furthermore a scholar, knowing by heart the Dinān of al-Mutanabbi, and it was he who founded the library of the great mosque of Tarudant (teaching the Risdāla of al-Bukharī, the Mukhtāsar of Khalil b. Ishak).

When he was in Fas, he attended certain courses himself, but he did not refrain from inflicting cruel punishment on those fikāhī whose only crime was to have served the preceding dynasty, such as al-Wanāshārī [q.v.], put to death in Dhu 'l-Hijjah 960/January 1549, al-Askārī, and Sidi 'Alī Harrān. From his life in the south, he had retained simple manners, and many sources recall, not without irony, that a former vizier of the Marinids, Kāsim al-Zarhūni, and the matron of the harem (arfā'ī of Fas), were engaged in educating the numerous members of the court in refinement and instructing them on such topics as etiquette, dress, cuisine and even administration.

In an economic and financial point of view, Mawlay Muhammad al-Shaykh caused some problems as a result of the weight of taxation that he imposed but, he was at pains to increase the wealth of the country and to develop both the cultivation of cane and a negro who gave birth to Ahmad al-Mansūr [q.v.] and her name to the hall.

II. The second, who bore the regal title of al-Ma'mūn, was the grandson of the preceding and the son of Ahmad al-Mansūr [q.v.] and a negro woman named Khayyūrān. After the battle of Wādi 'l-Mākhāzin (or Battle of the Three Kings) which took place on 30 Dūrādārādārā 1586/4 August 1578, and the proclamation of Ahmad al-Mansūr as sultan, Muhammad al-Shaykh II was declared heir presumptive by his father who appointed him governor of Fas. But he abandoned himself to debauchery, neglected his religious duties and antagonised the population, to such an extent that the sultan sent him to Sidjilmasa, whence he was impatient to return. After the death of his father (1012/1603), he was obliged to compete with his brothers, who disputed his claim to the throne, raised an army which, under the command of his son 'Abd Allāh, marched on Marrakesh and captured the town, and he was finally proclaimed sultan at Fas in 1015/1606. The concession of Larache (al-'Arāqīsh [q.v.]) to the Spanish on 4 Ramadān 1019/20 November 1610 incited the rebel Abu Māḥallā [q.v. in Suppl.] to launch an appeal to holy war, and three years later (1022/1615), Mawlay al-Shaykh II was assassinated near Tetouan.

Bibliography: To the Arab historians of the 11th/17th century and to the comprehensive works cited in the preceding article, the following should be added: R. Le Tourneur, La décadence sa’dienne et l'anarchie marocaine au XVIIIe siècle, in Annales de la Faculté des Lettres d'Aix, xxxii (1960), 173-223; J. M. Gandin, in Hommes et destin (Publ. of Acad. des Sciences d'Outre-Mer), Paris-Aix-en-Provence, vii (1986), 369-71, with Bibl. See also the Bibl. of the article A hu maḥālī.
which had not recognised the sultan of Marrakesh, had become a temporal power to be reckoned with, at a time when, in addition, the emergence of the Sharif of Tafilaît began to be a troublesome influence. An important event in the reign of this sultan was the defeat inflicted on him by the army of al-Dîlā between the Wâdi 1 Abîd, on 17 Dîjâmâdâ II 1048/26 October 1638. In spite of this reverse, he succeeded in reigning for some twenty years and died on 22 Râbî' I 1065/30 January 1655 (date indicated, according to an official document, by the Tarîkh al-Sudân, which contains effusive eulogies on the conduct of this sultan).

1. Typology of the mawlid and its diffusion through the Islamic world. See that of the preceding article. (Ch. Pellat)

MAWILD (A.), or MAWLUD (pl. mawlid), is the term for (1) the time, place or celebration of the birth of a person, especially that of the Prophet Muhammad or of a saint (see waiz, and (2) a panegyric poem in honour of the Prophet.

From the moment when Islam began to bring the personality of Muhammad within the sphere of the supernatural, the scenes among which his earthly life had been passed naturally began to assume a higher sanctity in the eyes of his followers. Among these, the house in which he was born, the Mawlid al-Nabî, in the modern Sûk al-Layî in Mecca, the history of which is preserved principally in the chronicles of the town (Chroniken der Stadt Mecka, ed. Wustenfeld, i, 422), does not seem at first to have played a part of any note. It was al-Khayzûrî (d. 173/789 [q.v.]), the mother of Hârûn al-Rashîd, who first transformed it from a humble dwelling-house to a place of prayer. Just as the pious made pilgrimages to the tomb of the Prophet in Medina, so they now visited the site of his birth to show their reverence for it and to receive a share of its blessings (Ib. l-tabarruk). In time, the reverence in which the house was held also found expression in its development in a fitting architectural fashion (Ibn Djabayr, Ritha, 114, 163; and see for a description of the house in the late 19th century, Snouck Hurgronje, Mecca, 1, 106, ii, 27).

Records of the observation of the birthday of the Prophet as a holy day only begin at a late date; according to the generally accepted view, the day was celebrated at his court (cf. M. D’Ohsson, Tableau général, Paris 1787, i, 255 ff.; Von Hammer,GOR, viii, 441). From 1910, it was celebrated as a national festival in the Ottoman Empire. Today, the festival comprises one or more official holidays in the Arab states and in most of the countries where Islam predominates. In many of these countries, an official celebration attended by the head of government or his representatives is held in one of the main mosques in their capitals.

In West Africa, the anniversary of the Prophet’s birthday is sometimes associated with pre- or non-Islamic festivals, e.g. among the Nupe in Nigeria, where it is identified with the gani age-grade ceremonies (F. Nadel, Nupe religion, London 1954, 217), and among the Kotoculi in Northern Togo, where it is associated with the traditional knife festival of the knives (R. Delval,Les musulmans au Togo, Paris 1980, 151-3). For some Sûfi orders in this area, notably for the Tijâniyya branches in Senegal (in Tivaouane, Dakar and Kaolack), the occasion has become the principal yearly gathering for the members of these orders. Poems exist in Hausa, classed technically as mâtû and siru, which are used as mawâlid (see M. Hiskett, A history of Hausa Islamic verse, London 1975, ch. 5), and in Fulani (Fulufule), are to be found several panegyrics of the Prophet with phraseology very similar to that of the mawâlid (see J. Haakens, Chants musulmans en Peul, Leiden 1983, 173-216). In Chad, the Sudan, North-East and East Africa (see below), the feast is regularly celebrated, and indications exist that the occasion is becoming more widely observed throughout West Africa. The celebrations staged on this occasion are more or less identical to the ones known in the Arab lands.

Central to these celebrations is the recitation of a mawâlid, i.e. of a panegyric poem of a legendary character. These poems normally follow a standard sequence of introductory praises to God, an invocation, a description of the creation of al-nur al-mâkummad (q.v.), then proceed through various stages and digressions (e.g. on the Prophet’s ancestry) to the actual physical birth, which is preceded by an account
Maulid

of a miraculous announcement to his mother Amina [q.v.] that she is bearing the Prophet. In the Arab world, mawlid recitation became a common feature of the Mawlid, Islam's celebration of the birth of the Prophet, and had become universal at the end of the 13th/19th century.

The origins of these recitals may be found in the religious ceremonies in Fattimid Cairo and in Irbil. The K. al-Tawârîkh fi mawlid al-sirâjî, which Ibn Dhiya composed during his stay in Irbil at the suggestion of Gökburî, was already famous as a mawlid at this period (Brockelmann, GAL ii, 310). It need not be till later times, however, that mawlids became a predominant phenomenon in the celebration, along with torchlight processions, feasting and the fairs in the street, ever increasing in size. The number of the poems used at mawlids is quite considerable. Beside the famous Bânât Su'âd of Ka'b b. Zuhayr of the older period, the Burda and the Hamziiyya of al-Bûsrî and their numerous imitations, there is a whole series of poems regularly employed here, some of which are intended to instruct employe that of Ibn Hâdjâr al-Haytâmî, while others are merely eulogistic.

One of the most widely recited mawlids in Arabic at present is one composed by Dâjî'far b. Hasan al-Barzangi (d. 1179/1765). It is also known under the title 'Idâl ad-dawârîh and has been published many times (cf. GAL ii, 384 and see J. Knappert, Swâhili Islamic poetry, Leiden 1971, 48-60, for a slightly abridged English tr.). The most popular of the mawlid songs in Turkish was composed by Süleyman Çelebi (d. 825/1421). It is still recited in mosques throughout Turkey and in mosques of the Turkish-speaking Sunni community in West and South-Eastern Europe as part of the celebrations for the birthday of the Prophet. This mawlid was recited during the official Ottoman court celebrations (for a full translation, see F. Lyman MacCallum, The Mawlid Sherif, London 1943; and E. J. W. Gibb, A history of Ottoman poetry, London 1900, i, 232-48, for a translation of extracts and data on the author).

Apart from the occasion of the Prophet's birthday, a mawlid recital is sometimes held as part of the ceremonial of the rites of passage. Occasionally, the recitation of a mawlid takes place in fulfilment of a religious vow (T. Canaan, in Jnl. Pal. Or. Soc. 7, 1926, 55). When a mawlid is recited on any of these occasions, it is normally followed by a dhikr [q.v.] session. In some Sûfi orders (e.g. in the Mirghaniyya and some branches of the Khawâliyya) a mawlid is recited as part of the standard liturgical ritual (see HADRA).

The mawlid celebration as an expression of reverence for Muhammad has found almost general recognition in Islam, partly in consequence of the strength of the Sûfi movement. At all times, however, there has also been vigorous opposition to it by those who considered it to be a bid'a [q.v.]

It is significant of the character of the opposition that its opponents object to those very forms which show the influence of Islamic mysticism (dancing, sama', ecstatic phenomena, etc.) or of Christianity (processions with lamps, etc.). An interesting document concerning this feud is a kind of fatâwa by al-Suyûtî (d. 911/1505, Brockelmann, ii, 157, HUEN an- makîd fi 'amal al-mawlid) which gives a brief survey of the history of the festival, then discusses the pros and cons very fully and concludes that the festival deserves approval as bid'a 'asana, provided that all abuses are avoided. Ibn Hâdjâr al-Haytâmî in his Mawlid, and Kuûb al-Dîn (Chroniken der Stadt Mekka, iii, 439 ff.), take the same view, while Ibn al-Hâdjâr (d. 737/1336-7), as a more strict Mâlikî, condemns it most vehemently (K. al-Mâlîkîyâ, i, 155 ff.).

Although the height of this struggle was apparently reached in the 8th-9th/14th-15th centuries, it did not really die down in later years. Indeed, it received new life with the coming of Wahhâbîsm [see WAHHABYYA]. This movement, while deriving its arguments for its opposition to the mawlid celebrations mainly from Ibn Taymiyya, inspired the growth of non- or anti-mystical Islam throughout the Islamic world and of the opposition to reference to the Prophet, including the celebration of his birthday, in consequence. Wahhâbî teaching is equally directed against the veneration of saints (auliyâ' [see WALI]) and against the mawlids held in many parts of the Islamic world in their honour. These mawlids normally follow the Islamic calendar, but there are exceptions. Accounts of such mawlid celebrations exist from many parts of the Islamic world.

The term mawlid (colloquial, mûlid) to denote a feast held in honour of a saint is used in Egypt and the Sudan in particular. Elsewhere, different terms are used, e.g. mawsum [q.v.] (coll. mas'um) in the Maghrib and parts of the Middle East, hawliyya (coll. hâliyya) in the Sudan and the horn of Africa, 'urs in the Indo-Pakistan sub-continent and hûlî in Malaysia. Everywhere, the characteristics of such celebrations are more or less the same: crowds gather for one or more days, a fair of varying size and importance accompanies the religious celebrations, dhîkr and/or Kur'ân reading sessions take place inside and/or outside the sanctuary of the saint concerned, one or more processions are held in which the keeper of the sanctuary (often the saint's descendant) and (frequently) Sûfi orders participate, and the cloth (kiswa) covering the saint's shrine is replaced by a new one in the course of the celebrations. Frequently, communal meals are staged and a centrally organised distribution of alms takes place.

In some parts of the Sunni world, like Afghanistan, no mawlids are celebrated, notwithstanding the widespread cult of saints in these areas; in the Shi'i world no mawlids of the type described here seem to be known.

In Egypt, the celebration of the numerous mawlids (about 300 mawlids of varying size were celebrated yearly with official permission in the 1970s) is centrally co-ordinated and supervised (by the madhâykhat al-turûq al-i'tifâ'iyû, in consultation with the Ministry of Awkâlâ'), so as to prevent these celebrations from overlapping and to guarantee public order. Some of these mawlids were or still are known for special rituals or customs observed as part of the celebrations [see DAWSÂ]. During most of the mawlids, special sugar dolls ('arâsû, sing. 'arâs) are sold (cf. 'Abd al-Qânhî al-Nabawî al-Shâlî, 'Arâsî al-mawlid, Cairo 1977). In Egypt, the celebration of mawlids is not limited to Islamic saints but extends to Coptic Christian ones as well.

The predominance of mawlid celebrations in Egypt...
would seem to explain why it is in this country above all that the most abundant polemical literature concerning the religious status of mawlid celebrations was produced. Those critical of such celebrations range in their demands from minor reforms of ritual, such as the prohibition of musical instruments in processions and the staging of profane forms of amusement in the mawlid grounds, to total abolition. Most of those who have declared against the celebration of mawlid in their traditional form seem to have been of Wahhabi inspiration. Some of the most vocal and well-known 20th century critics who deserve mention were Muhammad Rashid Ridây, Mahmud Khattab al-Sukhi and Muhammad Hamid al-Fikhi. Elsewhere in the Islamic world, similarly inspired groups and individuals have opposed or are still actively opposing veneration of saints.

**Bibliography:** In addition to the works mentioned in the article, see: Hasan al-Sanoudi, Ta'rih al-Thalif bi l-mawlid al-nabawi, Cairo 1948 (mostly on the history of the mawlid in Cairo, with short excursions on the celebrations in Istanbul, Morocco and Tunisia in different eras; based upon published sources). For descriptions of mawlid al-nabi celebrations in different parts of the Islamic world and in various periods, see e.g. Wüstenfeld (ed.), **Chroniken**, iii, 438 ff.; Ibn Hadjar al-Hayyami, *Mawlid* (see Brockelman, *GA*; II, 389); Snouck Hurgronje, *Makka*, ii, 57 ff., 147 (for Mecca); idem, *The Achemen*, i, 210, 212; idem, *Verspreide Geschriften*, iii, 8 ff., 83-5; and R. A. Kern, *De Islam in Indoensia*, The Hague 1947 (for Indonesia); J. S. Trimmingham, *Islam in the Sudan*, Oxford 1949, 146 f. (for Omdurman), and also von Grunebaum, *Musnad*, (*Mawlid* festivals, a general discussion mainly derived from the article *Mawlid in Ef*).

2. In East Africa.

In a region of the Islamic periphery, such as East Africa, the desire to preserve the communal rituals and devotional ceremonies—of which the mawlid is the most popular celebration—is often stronger than in the heartlands of Islam (see Annemarie Schimmel, *Mystical dimensions of Islam*, Chapel Hill, N. C. 1975, 216-17; J. Knappert, *Traditional Suhrawi poetry*, Leiden 1967, ch. 5). For the masses of people in the fringes, Muhammad is the personage behind whose banner the faithful will enter Paradise. Numerous popular tales and poems about him raise him almost to a superhuman level of deification, and these form the basis for much mawlid material; also, the Prophet's life forms the closing section of the voluminous popular cycle on the lives of the 24 prophets who preceded him (see idem, *Suhrawi Islamic poetry*, Leiden 1971, i, ch. 3; idem, *Islamic legends*, Leiden 1985, i, 56-184; and cf. Th. G. Pigou, *The literature of Java*, The Hague 1967, 132). In East Africa, proper *mawlid* poems contain at least some of the successive episodes of Muhammad's life, culminating in his death—the date of this being popularly regarded as the same date as his birth—and the *wafat al-nabi* may comprise an entire book, in prose or verse (see Hemedi bin Abdallah bin Saaid el Buhriy, *Utenzi wa kutawafu nabi*, tr. R. Allen, ed. J. W. T. Allen, Kampaia 1956; similar examples can be quoted in Malaysia and Indonesia). Of these *mawlid* texts proper, by far the most popular in Kenya, Tanzania and Somalia (as also in Malaysia and Indonesia) is al-Barzanjji's one (see section 1. above), contained in a book—first printed ca. 1885 and noted as a red-bound book by Snouck Hurgronje in Atjéh (q.v.) and by Becker in Dar es Salaam—called the Maajma wa l-mawlid sharaf al-andm, the best-known single prayer book in the Islamic world. It comprises prose and poetic verses (nafr and nazm) of al-Barzanjji's mawlid (both also translated into Swahili), the Bunda of al-Bāṣīrī and several other prayers. In Somalia, al-Barzanjji's *mawlidiyya* composition is widely recited during the mawlid celebrations in Arabic form, although a Somali poetic version exists. In *The library of Muhammad b. 'Ali b. 'Abd al-Shaḥkār, Sulūm of Harar*, 1272-921836-75, in *Arabian and Islamic studies ... presented to R. B. Serjeant*, ed. R. L. Bidwell and G. R. Smith, London 1983, 68-79, A. J. Drewes has mentioned three mawlid texts, including apparently Abu '1-Hasan Nūr al-Dīn's *Unṣawāl al-gharif*. After al-Barzanjji's, the most popular mawlid in Kenya and Somalia is the *mawlid* of Shaykh 'Abd al-Rahmān b. 'Ali al-Dībāt al-Zabīdī; the printed editions of this, from Cairo and Aden-Singapore respectively, contain at the end a dated by the mufti of Mecca permitting the use of drums at the mawlid festival. But the mawlid is often performed at other times too, e.g. 14 days after the birth of a child in Tanzania (see C. Velten, *Sitten und Gebräuche der Swaheli*, Göttingen 1903, ch. 2).

**Bibliography:** Given in the article.

(J. Knappert)

*MAWLIDIYYA* (a.) (or *mildiyda*; dial. *mildiyda*), pl. *al*; a poem composed in honour of the Prophet on the occasion of the anniversary of his birth (see *mawlid*) and recited as a rule before the sovereign
and court after ceremonies marking the Laylat al-
mawlid.

A relatively large number of mawlidiyya are extant, drawing their inspiration from the famous Baniat Sa'id of Ka'b b. Zuhayr [q.v.] so often imitated by versifiers, of whom the best known is certainly al-Buṣrī (608-94/1212-97) [q.v. in Suppl.], whose poems enjoy a renown which has never diminished, especially the Burda [q.v.] and, to a lesser extent, the Hamzīyya, which is recited in mosques and zawiyyas during the month of Rabī' I, between the maghrib and 'ishā prayers. Among the mediaeval authors who have left poems classifiable within the category of mawlidiyya may be cited al-Barī (9th/11th century), al-Sansari (d. 556/1160), Ibn al-Djawāzi (510-97/1116-1200 [q.v.]), Ibn Hadjār al-Haytami (909-74/1504-67 [q.v.]) and al-Barzandžī (1040-1103/1630-90). Furthermore, it is possible to gain an overall idea of this production thanks to the four-volume collection made at the beginning of the century by Yūsuf b. Ismā'īl al-Nablānī and published in Beirut in 1920/1922.

In the Islamic West, mawlidiyya were mainly the work of court poets, but also of administrative officials and viziers for whom the composition of poems of this type constituted a part of their professional education; some well-known personalities figure among them, such as Ibn Marzūk (710-81/1310-79 [q.v.]), Ibn al-Khaṭīb (715-76/1313-75 [q.v.]), and above all, Ibn Zamrāk (733-95/1333-93 [q.v.]). Due to the occasional nature of these poems, it is understandable that a large number of poems have not been preserved; the majority of those that survive, thanks, in particular, to the four-volume collection made at the end of the century by Yūsuf b. Ismā'īl al-Nablānī and published in Beirut in 1920/1922.

Generally, the framework of the kātida is respected, but adapted to suit the fundamental purpose of the poet in the sense that, while the apology of the Prophet is preceded by a nasib and a rabīl, it is followed instead by the story of the sovereign which is explicable by the circumstances in which these poems were recited. The nasib contains the traditional recollection of the remains of an encampment, but the author must avoid any allusion to a woman and show the decency appropriate to the situation. He expresses on the contrary the violent passion which he feels for the Prophet, leaving some doubt as to this love, whose true mystical nature is not at all clear. The abandoned encampment is situated on the route that the poet must follow to visit the Holy Places, but, as he is very far distant from them, he calls upon a caravan guide or some pilgrims in order to ask them to bear his greetings to the Prophet and describe to him the ardour of his passion.

This sentimental and moving prologue is followed by a lyrical expansion on the theme, or, more frequently, a narrative full of details borrowed from the traditional rabīl, of an imaginary journey across deserts as far as Medina. It goes without saying that this general theme undergoes numerous variants ranging from an account of the pilgrimage to Mecca to the insertion of panegyric verses or commonplaces on the flight of time, white hair, etc. The Spanish mawlidiyya are always distinguished by a large number of descriptions.

The recollection of the Holy Places introduces the cULogy of the Prophet, which must theoretically be based on reality and never drift into hyperbole. The principal themes concern the birth, foretold by earlier prophets, the signs of prophecy visible from infancy, his miraculous education, etc.; next, the epithets of Muhammad are enumerated; then come his physical and moral portraits; and finally, the description of the miracles that he performed. In this central part of the mawlidiyya, the elements of the panegyric, expressed by means of a profusion of superlatives, are drawn from the Kūfan and kātīlī as well as popular beliefs which have embellished the life of the Prophet with legendary details. It may be remarked further that the poets, idealising his image, adopt some characteristics taken from the Gospels so as to invest the founder of Islam with an aura of sanctity which makes him vie with Jesus.

After the account of the miracles, the versifiers generally express a wish to be able to visit the Holy Places, offer supplications to their "saviour" and invoke God's blessing on him and his Companions.

This invocation, followed by a similar invocation on behalf of the sovereign and mention of the Laylat al-
mawlid, marks the transition to the third part of the mawlidiyya which is often as developed as the second and consists of the panegyric of the reigning prince. This part offers nothing really new corresponding to the classical nasib [q.v.]. The author attributes all the virtues to the mandīsh, who is the restorer of the kingdom and whose arms are always victorious; but his cardinal virtue is naturally generosity, which is appealed to more or less discreetly. After the sovereign come the turns of the heir presumptive and the royal family. To conclude, the poet wishes that the prince's prosperity may endure.

One can hardly expect to find much originality in these compositions crammed with rhetorical flourishes and adorned with clichés which savour of affectation and artificiality. However, the choice of images, the variety of stylistic devices, the subtle play on vocabulary and the constant appeal to the religious or literary culture of the listener, retain a certain attraction.

As well as some poems in classical Arabic, there are many mawlidiyya in dialect which generally contain only the elements of the Prophet: among those which have been preserved—or those which are still composed today—some follow the classical tradition and contain moreover the nasib and the rabīl, but the eulogy of the sovereign does not figure at all in them [see MAMLŪN].

(A. Salmi)

MAWRUR, name given to the kūra of Mornón, currently Mornón de la Frontera, in the province of Seville, to the south-east of the latter and of Carmona and to the south-west of Cordova. The Arabo-Islamic conquest of the territory occupied today by Mornón and its dependencies must have taken place in 927/1427 shortly after that of Shaṭūnā [q.v.] by Tārik b. Ziyād [q.v.].

Mawrūr is also the name of a kūra of the province of Málaga (see J. Valvé, De nuevo sobre Bobastro, in And., xxx [1965], 142, no. 11) and of one (known by the name of el-Mauror) of the hills at the foot of which Granada is situated [see DHRNĀTĀ].

The population of the kūra was constituted of Butr Berbers, or Arabs of the tribe of Djuğāhīm, of neo-Muslims and, to a lesser degree, of Mozarabbs. The region combined all the advantages of plain and
mountain. Cereals, olives and fruit-trees were cultivated there, according to al-Razi and other writers, who add that the area possessed good wells and substantial fortresses, in particular that of Carpio, which is not located today but which some have identified with the Kalb which, according to Ibn Ghālib, al-Himyari and perhaps other writers, was the regional capital (kāʾidāt) of the kāris and the seat of the waṭīl and which possessed a Great Mosque and a very busy market.

Under the amirate, Mawrūr seems to have been nothing more than an agricultural region of which the neighbouring territories were subjected to a raids on the part of the Madāṣis [q.v.], if reliance is to be placed on the Aḥkār madāṣisūt (text, 64; tr. 51). Mawrūr is also mentioned in connection with events occurring at Seville in the period of Ibrāhīm b. al-Hādjī ṣādiqī (al-Udhrī, 103), and with an invasion mounted by Muṣṭarīf, son of the amīr ʿAbd Allāh (ibid., 104). In the time of the amīr al-Hakam [q.v.], the total sum of taxation contributed by the kāri of Mawrūr rose to 21,000 dīnār (al-Himyari, Raʾuf, text, 186, tr. 227) and the number of horses that it supplied for the summer campaigns against the Christians commanded by ʿAbd al-Rahmān b. Muhāmmad, stood at 1403 (Ibn Hayyān, Muktabāt, ed. Makki, text 272). The fortress of Mawrūr was also affected by the consequences of the rebellion of ʿUmar b. Ḥafsūn [q.v.], to such an extent that it became necessary to send several expeditions against these territories, which were ultimately subjected to the authority of Cordova in 31/923-4 (Ibn Hayyān, op. cit., text 115, 167; tr. 139, 192). During the fitna, Mawrūr became the seat of the Berber idšīya of the Banū Dammār or Banū Nūḥ, until the time when, under the third king of the dynasty, Manād b. Muḥāmmad b. Nūḥ (449/1057-66), it was incorporated into the Aḥbāṣīd kingdom of Seville [see ʿAmrānīs and ʿĪsābīlīyah] and experienced the same fate as the latter when it was conquered by the Almoravids.

Judging by the silence of the sources, it may be stated with confidence that no event of note took place at Mawrūr and on its territory under the Almoravids and the Almohads. Cordova fell in 1236, and in 1240 Mawrūr rose to 311/923-4 (Ibn Hayyān, op. cit., 167; tr. 139, 192). Lastly, Bar Ḥaldūs says that an old Persian king gave it the name Bir Hormiz-Kawadh (G. Hoffmann, Auszüge aus syr. Akten pers. Märtynen, 178).

As the metropolis of the diocese of Abdūr, al-Mawṣil took the place of Nineveh, whither Christianity had penetrated by the beginning of the 2nd century A.D. Rabban Ishāʿyahbū, called Bar Kusrā, about 570 A.D. founded on the west bank of the Tigris opposite Nineveh a monastery (still called Mawṣil); its earlier name was Khawālan. The Persian satrap of al-Mawṣil bore the title Būḥā-Adaṣhīrānshāh, so that the official name of the town was Būḥā-Adaṣhīr (Le Strange, Lands, 87; Herzfeld, op. cit., 208). Lastly, Bar Ḥaldūs knew that an old Persian king gave it the name Bir Hormiz-Kawadh (G. Hoffmann, Auszüge aus syr. Akten pers. Märtynen, 178).

As the metropolis of the diocese of Abdūr, al-Mawṣil took the place of Nineveh, whither Christianity had penetrated by the beginning of the 2nd century A.D. city to whom the Hamdânids belonged. Abu 'l-
Haydâ
came to al-Mawsil in the beginning of
Muharram 293/October 906 and in the following
year subdued the Kurds, whose leader Muhammed b.
Bâllû submitted and came to live in the city.
From this time, the Hamdânîs [q. v.] ruled there,
first as governors for the caliph, then from 317/929
(Nâşir al-Dawla Hasan) as sovereign rulers.
The Uâyûlîs who followed them (386-498/996-
1096) belonged to the tribe of the Banû Ka'b. Their
kingdom, founded by Husâm al-Dawla al-Mukallad,
whose independence was recognised by the Bûyûds,
extended as far as Tâ'ûk (Dâkûkû), the Madâ'in and
Kûlûth. In 489/1095-6, al-Mawsil passed to the
Sâlûjûks.
The town developed considerably under the Atâbêg
Ibrâhîm al-Dîn Zangî, who put an end to Sâlûjî rule in
521/1127-8. The city which was for the most part in
ruins, was given splendid buildings by him; the for-
tifications were restored and flourishing gardens sur-
rounded the town. Under one of his successors, "Izz
al-Dîn Muhammed i, it was twice unsuccessfully besieged
by the Ayyûbîd al-Sâlîh al-Dîn (1182 and 1185 A.D.);
after the conclusion of peace, "Izz al-Dîn, however,
found himself forced to recognise al-Sâlîh al-Dîn as his
suzerain.
The town was at this time defended by a strong citadel
and a double wall, the towers of which were washed on
the east side by the Tigris. To the south lay a great suburb, laid out by the vizier Muhammed al-Dîn
Kâ'tîmâz (d. 595/1199). From 607/1210-11 his son
Badr al-Dîn Lu'lu' [q. v.] ruled over al-Mawsil first as
vizier of the last Zangîds and from 631/1234 as an
independent ruler. In 642/1244-5 he submitted to
Hûlâgû and accompanied him on his campaigns, so
that al-Mawsil was spared the usual sacking. When
however his son al-Malik al-Sâlîh Ismâ'il joined
Baybars against the Mongols, the town was plundered
in 660/1261-2; the ruler himself fell in battle (van Ber-
chem, in Festschrift für Th. Noldeke, Giessen 1906,
197 ff.).
The Arab geographers compare its plan to a
headcloth (lajâsân), i. e. to an elongated rectangle. Ibn
Hawqâl, who visited al-Mawsil in 338/946-7, describes it as a beautiful town with fertile surround-
ings. The population in his time consisted mainly of
Kurds. According to al-Mukaddasî (ca. 375/985-6, the
town was very beautifully built. Its plan was in the
form of a semi-circle. The citadel was called al-
Murâbahâb'a and stood where the Nahr Zubayda canal
joined the Tigris (now I-Kaf'a or Bâsh Tâbiya?; cf.
Hersfeld, op. cit., 209). Within its walls were a
Wednesday market (Sâk al-Arba'â), after which it was
sometimes called. The Friday Mosque built by Mar-
wân stood on an eminence not far from the Tigris to
which steps led up. The streets in the market were for
the most part roofed over. The same geographer (136)
gives the eight main streets of the town (discussed in
Hersfeld, op. cit., 209). The castle of the caliph (Râr
al-Khalîfâ) stood on the east bank, half a mile from the
town, and commanded Nineveh; in the time of al-
Mukaddasî it was already in ruins, through which the
Nahr al-Khawsar flowed.
Ibn Dujayr visited al-Mawsil on 22-6 Safar 580/
4-8 June 1184. Shortly before, Nûr al-Dîn had built
a new Friday Mosque on the market place. At the
highest point in the town was the citadel (now Bâsh Tâbiya); it was known as al-Hadba' "the hunch-
backed", and perhaps as the synonymous al-Dafâ'a
(G. Hoffmann, Auszüge aus syr. Akten pers. Martyren,
178-9; Hersfeld, op. cit., 210), and according to al-
Kâzîmî was surrounded by a deep ditch and high
walls. The city walls, which had strong towers, ran down to the river and along its bank. A broad highway (Şanlı) connected the upper and lower towns (the north-south road called Darb Dayr al-'Aṣā'). In front of the walls suburbs stretched into the distance with many smaller mosques, inns and baths. The hospital (märzān) and the great covered market (şayvariya) were celebrated.

Most houses in al-Mawsil were built of tufa or marble (from the Dja'bal Ḍuklûb east of the town) and had domed roofs (Yâkût, op. cit.). Later, it was given a third Friday Mosque which commanded the Tigris and was perhaps the building admired by Hamd Allâh al-Mustawfi (ca. 740/1339-40).

The site of the ancient Nineveh (Arabic Ninaway) was in al-Muḳādasi's time called Tall al-Tawba and was said to be the place where the prophet Ūnûs stayed when he wished to convert the people of Nineveh. There was a mosque there around which the Ḥamāndân Nâṣîr al-Dawla built hostels for pilgrims. Half a mile away was the healing spring of 'Ayn Ūnûs with a mosque beside it, perhaps also the Şâdjarat al-Yâkîn, said to have been planted by the Prophet himself. The tomb of Nabi Djîrîs (q.v.), who according to Muslim legend had suffered martyrdom in al-Mawsil, was in the east town, as was also that of Nabi Shîth (Seth; cf. Herzfeld, op. cit., 206-7).

The textiles of al-Mawsil were especially famed, and from the city's name came Eng. muslin and Fr. mousseline, although it appears from Marco Polo's mention of muslin cloth as made with gold and silver threads that these luxury cloths differed from the present-day thin and delicate cottons (see Sir Henry Yule, The book of Sir Marco Polo the Venetian, London 1871, i, 57-9; R. B. Serjeant, Islamic textiles, material for a history up to the Mongol conquest, Beirut 1972, 38-9).

The Mongol dynasty of the DjalâliTs succeeded the İlkâns in Baghdâd, and Sultan Şâhâykh Uways in 766/1364-5 incorporated al-Mawsil in his kingdom. The world-querenour Timûr not only spared the city but gave rich endowments to the tombs of Nabi Ūnûs and Nabi Djîrîs, to which he made a pilgrimage, and restored the bridge of boats between al-Mawsil and these holy places.

The Turkoman dynasty of the Ak Köyunlû, whose founder Bahâ? al-Dîn Karâ Uthmân had been appointed governor of Diyârbakr by Timûr, was followed by the Safawids, who took over al-Mawsil after their conquest of Baghdâd in 914/late 1508, but lost it again to Sulaymân the Magnificent in 941/1535, who appointed Sâyîdî Ahmad of Dja'zîrât Ibn 'Umar as its governor. From the year 1000/1592 onwards, we have lists of the Ottoman pağas of the şanîq of al-Mawsil (for long attached to the eyâlet of Diyârbakr), whose tenure of power was usually short-lived; thus from 1048/1638 to 1111/1699-700 there were 40 pağas. Nâdir Şîhâ besieged it in 1156/1743, but the governor Husayn Djalîlî reformed the city and heroically defended it. It was at this time and thereafter that the paşâlîk of al-Mawsil was fairly continuously in the hands of the local family, originally Christians, of ʿAbî Djalîl; Husayn b. İsmâil held this office on eight separate occasions, and the hold of the Djalîlîs was only broken in 1834, when Sultan Mahmûd II extended his centralising power over the derebeyûs and other previously largely autonomous local potentates and removed Yabûb b. Nu mân al-Djalîlî.

European travellers frequently passed through al-Mawsil and mention it in their travel narratives; they often comment unfavourably on the unclean streets and on the sectarian strife there amongst both Muslims and the rival Christian churches. After 1879, the şanîq of al-Mawsil, after being attached to Vân, Hakkârî and then Baghdâd, became a separate vilayet. There was a long tradition of French missionary and educational work in the city, by Carmelites and Dominicans, largely amongst the indigenous Eastern Christian churches. In the later 19th century, travellers describe al-Mawsil's mud brick walls, with their seven gates, as largely ruinous, and record the dominant form of domestic architecture as stone-built houses with sardâb; the population then was around 40,000, including 7,000 Christians and 1,300 Jews.

2. Since 1900.

By the beginning of the 20th century, the prosperity and political importance of al-Mawsil were evidently waning, largely because of the opening of the Suez Canal in 1869 had occasioned an immediate reduction in the overland trade between the city and its traditional commercial partners, Aleppo and Damascus. Furthermore, the development of the port of Baṣra and of steam navigation on the Tigris gradually had the effect of substituting the economy of al-Mawsil to that of Baghdâd, which became the entrepot for all the former city's imports and exports.

The effects of the Tanzimât were even more lightly felt in the province of al-Mawsil than in the rest of ʿIrâk, and there is no sign that the various administrative changes had any particular effect in curbing the powers of the local notables and tribal leaders. As noted above, in 1879 the city itself became the headquarters of a vilayet of the same name, comprising the kadi's of al-Mawsil, Kirkûk, Arbil and Sulaymânîyâ, but for the rest of the period of Ottoman rule, the state's control over most of what is now ʿIrâk Kurdîstân was purely nominal, and between 1895 and 1911, one man, Muṣṭâfâ Ẓaḥîbî Şâbindî, was virtual dictator of al-Mawsil town. Far more powerful than any of the numerous ulema sent from Istanbul (see Hanna Batatu, The old social classes and the revolutionary movements of Iraq: a study of Iraq's old landed and commercial classes, and of its Communists, Ba'ithists and Free Officers, Princeton 1978, 289-92). Using Ottoman sources, J. McCarthy (The population of Ottoman Syria and Iraq, 1678-1914, in AAS, xv [1981], 3-44) has calculated that the population of al-Mawsil was 13,500 in 1750, and 6,500 in 1775, and 3,000 in 1834; it was therefore considerably higher than earlier estimates (e.g., see S. H. Longrigg, Iraq 1900 to 1950, 1970, London)
1953, 7). It is even more difficult to establish an accurate figure for al-Mawsil town itself, as it contained several smaller villages, each with its own distinct characteristics. Given in al-`Iraq Yearbook for 1922 (Batau, op. cit., 35).

For most of the First World War, the fighting on the `Iraqi front took place in the Başra and Bağdâd wilâyêts, with the result that al-Mawsil town itself was relatively little affected, and was in fact only occupied by British troops some days after the Armistice of Mudros (30 October 1918; see A. T. Wilson, Mesopotamia 1917-1920: a clash of loyalties, London 1931, 11). The area had been assigned to France in the Sykes-Picot Agreement of 1916, but Clemenceau immediately acquiesced in Lloyd George's request in December 1918 that it should be attached to `Iraq, and thus to the British sphere of influence, provided that France would be assured of equality in the exploitation of Mesopotamian oil (see J. Nevakivi, Britain, France and the Arab Middle East 1914-1920, London 1969, 91-2). Although the mandate for `Iraq was assigned to Britain under the Treaty of San Remo (April 1920 [see mandates]), the Turkish Republican government continued to contest the new `Iraqi state's right to al-Mawsil and the wilâyet was only finally awarded to `Iraq in 1925 after an enquiry carried out by the League of Nations (for details, see C. J. Edmonds, Kurds, Turks and Arabs: politics, travel and research in North-eastern Iraq 1919-1925, London 1957). Oil was struck in commercial quantities near Kirkûk in 1927, and these northern oilfields, exploited until nationalisation in 1973 by the Iraq Petroleum Company, an Anglo-French-Dutch-American consortium, form one of the country's most valuable economic assets.

Under the mandate and monarchy (1920-32; 1932-58) the status of al-Mawsil continued to decline, partly because the inauguration of the new state and the establishment of Bağdâd as its capital inevitably deprived it of its importance as an independent provincial centre, and partly because al-Mawsil wilâyet itself was further sub-divided into four provinces (al-Mawsil, Sulaymaniyya, Kirkûk and Arbût). The city maintained its somewhat conservative reputation throughout the period, and in comparison with Bağdâd and Başra seems to have been relatively little affected by the independence struggles of the 1940s and 1950s. During this period, members of the city's prominent families, notably the Shammar family and members of the Kâshmûla, Khudayr and Shâllâl families, gradually came to acquire legal ownership of much of the land in the surrounding countryside. Such individuals naturally felt threatened by the avowedly revolutionary aims of the government of `Abd al-Karîm Kâsim [q. e.], which came to power on 14 July 1958, and in particular by its immediate introduction of an agrarian reform law.

In March 1959, some of the landowners and their followers joined together with local Arab nationalists and a number of Kâsim's former supporters in the armed forces in an attempt to overthrow his régime, with assistance promised (but not ultimately forthcoming) from Cairo and Damascus. Four days of fighting broke out in the city between the supporters and opponents of Kâsim, in which some 200 people were killed. The attempted coup was unsuccessful, but the incident was to be used many times in the future as a rallying cry for revenge on the part of Ba`thists and nationalists against Kâsim and his leftist allies (ibid. as a visual threat, esp. 58-61, 866-89).

Al-Mawsil was finally connected with the rest of the `Iraqi railway system in 1939, and served by Iraqi Airways after 1946; the existing tertiary colleges in the city were amalgamated into a university in 1967, which has since been expanded considerably. In the course of a provincial reorganisation in 1969, al-Mawsil province was divided into two new units, Nineveh (Ninawâ) and Duhûk. In the 1977 census, al-Mawsil emerged as the third largest city in `Iraq with a population of 430,000, preceded by Başra (450,000) and Bağdâd (2.86 million). In spite of attempts on the part of the central government to promote regional economic development, al-Mawsil is inevitably at a disadvantage through being some distance from the country's main industrial concentrations, 75% of which are located around Bağdâd and Başra. Its principal industries are agriculturally-based, including food-processing, and leather working, but textiles and cement are also produced, and an oil refinery was opened in 1976. The city retains much of its traditional ethnic and religious heterogeneity, and its mediaeval core still remains clearly distinct, despite the intrusion of various unattractive manifestations of modern town planning.

AL-MAWSIL [see IBRİMÎ and İSMÂÎL B. IBRİMÎ].

AL-MAWSİLİ, BAĞ B. AL-KÂSIM B. ABÎ THAWIR, philosopher, writer, is known only as the author of an epitaphological philosophical work entitled Fi l-nafs ("Concerning the soul"). It was written between 278/900 and 328/950 and sent to the distinguished translator and doctor Abî Ubûmûn Saâ'id b. Ya`kûb al-Dimashkî. The author seems to have lived in the Mawsil region, and is not to be confused with another philosopher from that area, Ibn Abî Saâ'id al-Mawsilî. The text deals not with the soul as such, but only with a part of it, the rational soul (nafs nûdha) or intellect (sàfîh). His technique is explicitly that of Thâbit b. Qurra and Plato in analysing the characteristics of the definition of the intellect in order to draw out its essence. The intellect impresses a form upon our sense-data, and what we know can either be acquired (mustafad) from outside of ourselves or not. As Aristotle put it, it is a question of whether the intellect which forms all things is part of the soul or rather something outside the soul—the latter being the normal religious interpretation. Al-Mawsilî argues that the intellect does not acquire knowledge of its own nature, but knowing of itself is being, but rather by reflection of the intellect upon itself. We can indeed make mistakes (e.g. be misled
by imagination), but not if we reflect rationally upon
the first principles (al-awd^it) of logical thought, since
(al-awd^it) are true, real in themselves and their own
emerge, which con-
ments, an encyclopaedic aspect and was given
the indices of the works concerned, but further,

panies in order to locate the details relating to the various animals presented in the body of the text. It is quite different in the ʿAddār ibn al-madhīkābah of al-Kazwīnī (608-82/1210-93 [q.v.]), which contains an alphabetical series of notes concerning animals in its section on the description of the universe dealing with terrestrial matters. But the efforts deployed in this field reach their culmination in the Ḥayūl al-bayāzin al-kubrā of al-Damārī (742-808/1341-1405 [q.v.]), a true zoological encyclopedia whose great merit is the alphabetical classification adopted by the author and the division of the entries into philological remarks, description of the animal concerned, mentions which are made of it in the Qurʾān and Sunna, whether the consumption of its flesh is allowed or forbidden, proverbs concerning it, medicinal qualities and interpretation of dreams in which it appears. The above details show the spirit in which this compilation was conceived: a useful one, but deprived of originality due to a writer of traditional training who had been unable to draw on works already founded on the mass of texts written initially in Arabic or translated into that language that the public did not always have the leisure or the taste to procure. In any case, al-Damārī lived in an age when intellectual curiosity had waned considerably and had largely lost the openness which had marked the century of al-Djahiz and the Muʿtazila. All the same, shortly after the death of this latter scholar, the religious policy of the caliphate brought to the forefront Muslims disturbed by the turn taken by the rather anarchic quest for knowledge and by the danger to the integrity of Islam that they perceived to be posed by a curiosity which appeared reprehensible. This resulted in according primacy to the Islamic and Arab sciences, to the detriment of foreign ideas already partly acclimatized. Among those who were noted for their conservative attitude, the most characteristic is certainly Ibn Kutayba (d. 276/889 [q.v.]), who opposed the liberalism and eclecticism of al-Djahiz with a programme limited to the needs of various social categories. To the secretaries of the administration, who began to be the real preservers of culture, he proposed a vade-mecum, the Adab al-kāth, in which he adopts the following classification of non-religious knowledge: philosophical disciplines, applied sciences, techniques of public works, principles of jurisprudence, history and ethics. When he is concerned with the training of religious scholars, he adds to philology and ethics the Kurʾān and Sunna, plus some rudiments of falsa [q.v.]. The programme recommended by Ibn Kutayba appeared not to allow any improvement or amplification.

On this point, some progress was nevertheless achieved by his successor, the Cordovan Ibn ʿAbd Rabbih (246-328/850-940 [q.v.]), who remarks that each generation leaves its gift of new knowledge and that consequently, one should summarise and complete periodically the elements of the common patrimony that have been accumulated. In his practical encyclopedia, the Ṣīd, which is richer and more subtle than the Uṣūn al-ḥabbār, the subject matter is divided into 25 chapters, each bearing the name of one of the precious stones of which the "necklace" (ṣīd) is made up. The list is as follows: the ruler, war, generosity, delegations (to the Prophet), addressing kings, "ilm and adab, proverbs, moral exhortations, elegies, virtues of the Arabs, language of the Arabs, retorts, speeches, epistles, the caliphs, Ziyād b. Abīhi, the pre-Islamic battles, poetry, metrics, song, false prophets, madmen, misers, human temperaments, food and drink and pleasures. The coverage of this encyclopedia, whose popular character is evident, hardly allows to glimpse the bounds where it was compiled. Spain, for everything, or almost everything, is borrowed from the Eastern tradition.

After the Ṣīd, the encyclopaedic tendency appears in a more diffuse manner, in the sense that the same writer, when he possesses wide erudition, multiplies the specialised treatises and abstains from proceeding to a synthesis. It is only in the 9th/10th century that the series represented by the Uṣūn al-ḥabbār and the Ṣīd is resumed by a new popular encyclopedia, the Muṣarrat of the Egyptian Ibn ʿĪbghīlī (d. after 850/1446 [q.v.]), who, claiming to be inspired by Ibn ʿAbd Rabbih, nevertheless shows a concern for edification and manages to combine, in a manual written on a relatively limited scale, all that a good Muslim ought to know. It is of some value to enumerate the 84 chapters of this work: the justice of Islam; reason; the Kurʾān; religious and secular knowledge; good manners; proverbs; rhetoric; retorts; oratorical art and poetry; trust in God; advice; moral exhortations; modesty, the sovereign; courtiers; ministers; escaping observation; magistrature; justice; injustice; the way of treating the people; the happiness of the people; qualities and faults; social life; concord; simplicity; pride; boarfulness; nobility; saints; miracles; rogues; generosity; avarice; table manners; magnanimity; promises kept; discretion; perfidy; courage; heroes; praises and gratitude; satires; sincerity and falsehood; filial piety; physical beauty; ornaments and care for the body; youth and health; names; journeys; wealth; kinship, the manner of begging; presents; work; acceptance of one's lot; changes of fortune; slavery; early Arab poetry; oratory; magic; animals; wonders of creation; the djinn; wonders of the waters; wonders of the earth; mines and precious stones; music and song; singers and musicians; singing girls; love; specimens of songs; women; wine; pleasures; anecdotes; invocations; fate; return to God; illnesses; death; patience; the lower world; prayers upon Muḥammad. It would not be impossible to discover in this sequence of chapters an ordering concept, an effort to logical classification which the apparent disorder of the arrangement betrays. Besides, the adab which underpins Ibn ʿĪbghīlī's work is less secular and more ethical. For this author, the best answer for those minds who are profoundly disturbed by the situation of the Arabo-Islamic world is a return to the sources, a recollection of the records of the classical period, which represents a perfect ideal for the average Muslim.

The authors that we are about to cite are not at all concerned with what is happening beyond the frontiers of dār al-Īlam, and the Kitāb al-Maʿṣūrī of Ibn Kutayba is, in this respect, characteristic, for it limits the historical ideas that a good Sunni ought to have: a sacred history from Adam to Jesus followed up by means of traditions relating to the personalities of the "Interval" [see FATRA], genealogies of the Arabs, a somewhat anecdotal history of the caliphs and some celebrities, the religion of the ancient Arabs, sects of
Islam, and finally the kings of Yemen, Syria, al-Hira and Persia. To put it another way, this historian is too mutilated to be assessed, the first author whose Kitāb al-Mahāsin, (225-310/839-934 [q.v.]), Ta'rikh (d. 1056/1645) of al-Tabarî (225-310/839-934 [q.v.]), which has some of the same character as a universal history, much more developed, but the real successor of al-Ya'kūbî is the polygraph al-Mas'ūdi (d. 345/956 [q.v.]) who was led by an extraordinary intellectual curiosity to acquire a truly encyclopaedic knowledge which was able to nourish a series of general works in a historico-geographical framework, of which only some resumés have survived, such as the Ta'rikh and especially the Murūdī. Here, before embarking on his discussion of the history of Muslim rulers also in an anecdotal fashion (this being one of the features of adāb), al-Mas'ūdi presents essential information on the outstanding characters of the world and reproduces lists of kings of peoples foreign to Islam, and notably those of France since Clovis. The encyclopaedic nature of the Murūdī is evident from the index in two volumes which the present author has added to his edition of the Arabic text; it is also illustrated by the citations to be found mainly in later encyclopaedists.

The summaries which we have reproduced above reveal a concern for exhaustiveness which is not, however, accompanied by a logical classification, and it is only among the fulfilta [q.v.], heirs of Greek thought, that one can discover the first attempts if not to establish a hierarchy of the sciences, at least to classify them. Among them, al-Farabī (d. 339/950 [q.v.]) covers human knowledge in a rich and diverse work which lies outside Islam and suggests a classification of the sciences well-known in the Western Middle Ages, thanks to the translation made by Gerard of Cremona (d. 1187) [De scientiis] (i) Linguistic sciences (morphology, lexicalography; syntax; art of writing; art of reading well; poetry and metre). (ii) Logic. (iii) Mathematics (arithmetic; geometry; optics; astronomy; music; metrology; mechanics). (iv) Physics and metaphysics. (v) Political science, jurisprudence and theology.

Whereas the concessions of al-Farabī to Arabism and Islam consist merely of expressing in Arabic terms the linguistic sciences and in Islamic terms jurisprudence (fikāh) and theology (kālim), al-Khāražmī (wrote ca. 366/976 [q.v.]) divides the branches of knowledge into two main categories in his Mafāthīl al-ilmām: sciences of the Islamic law (sharī'ah) and subjects connected with it (fikāh; kālim; grammar; artistic composition; poetry and prosody; history), and foreign sciences (philosophy; logic; medicine; arithmetic; geometry; astronomy. If one excepts: astrology; music; mechanics; alchemy).

Later, the respective parts of the "Arab" sciences and the "foreign" sciences were to distinguish various classifications, which could be illustrated by more developed encyclopaedias than that of al-Farabī (on the classifications of the sciences, see L. Gardet and M.-M. Anawati, Introduction à la théologie musulmane, Paris 1944; 101 ff.; and Ahi Haya' al-Tawbî, Risāla fi l-ilm al-dīn, by M. Bergé, in BEO Damas, xvii [1963-4], 240-98; Ibn Hazm, Marātib al-ilmām. For his part, Ibn Khaldūn (732-808/1332-1406 [q.v.]) distinguishes two main categories of sciences, the religious and the philosophical, but confines himself to a theoretical discussion without encyclopaedic elaboration. It is only right that we should regard as an encyclopaedia the collective work of the Ikhwan al-Safā`ī [q.v.] who discuss in 52 treatises or epistles (risāla) the all the accessible knowledge of their time (second half of the 4th/10th century). Rationalists and heirs of the Greek philosophers, the Mu’tazilis and al-Ḍīhabī, they accept all that can contribute to enrich the cultural patrimony. Their treatises (arranged as follows: 1 to 14: mathematics, logic and ethics; 15 to 30: natural sciences (including philosophy), 31 to 42: metaphysics; and 43 to 52: religion, mysticism, astrology, magic, do not correspond to their own classification which figures in the seventh risāla: I. Sciences of adāb (writing and reading; lexicography and grammar, arithmetic and commercial transactions; poetry and prosody; division, magic; alchemy and mechanics; arts and crafts; commerce, agriculture; animal husbandry; biography and history). II. Positive sciences of the Ṣarī‘a (revelation; interpretation of scriptures; Tradition of the Prophet; jurisprudence; judgments; moral exhortations; preaching; asceticism; Sufism; interpretation of dreams). III. Truly philosophical sciences: mathematics (arithmetic; geometry; astronomy; music); logical sciences (poetics; rhetoric; topoi; apodeictic demonstration; sophistry); natural sciences (basic principles, heaven and earth; generation and decay; meteorology; mineralogy; botany; zoology; medicine; veterinary skill; dressage; agriculture; animal husbandry; crafts); divine sciences (knowledge of the Creator; angelology; psychology; politics; eschatology).

This encyclopaedia, written by Ibn Ṣīnā, is far from having a disinterested goal, for its authors uphold some kind of a thesis; they advocate indeed a radical reform of Islam in order to establish an extremist Ṣīnāism combining the Ṣarī‘a and Greek philosophy as well as the wisdom of the Indians and Persians and ancient paganisms. It corresponds to the modern definition of the encyclopaedia in the breadth of its coverage and the collaboration of a number of authors, mainly anonymous. All the same, it was only favourably received in limited circles of philosophers and Ṣīnāis, and provoked in the following century a remarkable reaction from al-Ghazālī (450-505/1058-1111 [q.v.]) who, in his Ḥaṣā al-dīn al-dīn al-dīn seeks to defend orthodoxy. For him, there are two kinds of sciences: religious, which are obligatory, and non-religious, which are optional, when they are not harmful. The first comprise the usul al-dīn (Kurān; Tradition; consensus omnium; traditions of the Companions) and the fuṣūl (jurisprudence; sciences of the soul), the prophetic sciences (language; grammar; writing) and advanced ones (on the Kurān, Tradition, etc.); theology and philosophy (geometry and arithmetic; logic; natural theology; sciences of nature) are set in order. The second are sometimes commendable (medicine and calculation for example), sometimes blamed (notably magic and talismans; conjuring; spells), sometimes simply allowed (poetry and history for example). This classification appears in the first quarter of the Ḥaṣā on practices of the Islamic cult; it is followed by social customs, causes of perdition and how to ensure one’s salvation. It is in respecting an Islamic ethic developed in this large work that the Muslim
can prepare his salvation in the Hereafter. The collections that we have cited are distinguished by a subjective which is opposed to the relative objectivity of the bibliographical catalogues, which are the most perfect encyclopedia of guidance. The best, the Fihrist, was composed in 377/987-8, hence in the period of the Ikhwan al-Safa', by the Baghdadi librarian Ibn al-Nadim [q.v.], according to a logical plan corresponding to a personal classification of knowledge; generalities on known languages and scripts, materials for writing; revealed books; the Kur'an and Kur'anic sciences; grammar; lexicography; history; poetry and poets; theology according to the various schools and sects; Sufism; Isma'ilism; juriconsults of different schools; ancient and modern philosophers; mathematicians; music; medicine; folklore; various anecdotes; conjuring; magic; equitation; engines of war; games; moral exhortations, maxims; interpretation of dreams; cookery; enchantments; religions other than Islam (notably Manichaeism, in which the Fihrist is one of the principal sources, and the religions of India and China); and alchemy. After Ibn al-Nadim, a number of specialised bibliographies were produced, notably the Fihrist of Muhammad b. al-Hasan al-Tusi (385-460/995-1067 [q.v.]) who reviewed the works written by Shihab, up to the compiling of the famous Kulliyat al-umni of Hadji Khalifa (1017-67/1608-57 [q.v.]), which marks the last stage before the modern catalogues of libraries.

Previously, the biographical genre had undergone considerable development, at first in order to meet the need for knowing the life of the transmitters of traditions in order to know whether the chains of guarantors had any gaps in continuity. The logical division of biographies by tradition had finally given way to an alphabetical classification and resulted in dictionaries such as the Mu'sjam al-adab (to which the Mu'jam al-baladun was added) of Yaqut (d. 568/1270/1271), the three-volume work by Shihab, and the Kufr of Muhammad b. al-Hasan al-Tusi (385-460/995-1067 [q.v.]), the works of Ibn Khallikan (608-660/1211-1268 [q.v.]), and many histories of towns and countries presented in the form of biographies of personalities who were famous in them.

All these works and many others besides, even if it is difficult to regard them as encyclopaedias since they only contain one specific section of information, were to become the instruments of a new form of encyclopaedia born of the vicissitudes of history, particularly of the fear of seeing the disappearance of the vast mass of knowledge accumulated over the centuries and of the concern to salvage at least a part from the irreparable catastrophe represented by the Mongol invasions and the fall of Baghdad in 656/1258. The latter events certainly provoked serious disquiet which was translated into the composition of enormous encyclopaedias intended to some extent to preserve the acquisitions of preceding generations at the moment when the Arabo-Islamic world could be seen as despairing of achieving new progress and felt itself threatened by the worst calamities. In the following centuries, the Black Death (749/1348) was further to aggravate this feeling of insecurity.

Ibn Manzur (630-711/1232-1311 [q.v.]), who left the most highly-developed dictionary of the Arabic language, already clearly expresses this disquiet and the wish to salvage whatever could be rescued from total destruction, when he writes in the preface of the Lisân al-'Arab: "My sole purpose is to preserve the elements of this language of the Prophet... I assert indeed that, in our days, the use of the Arabic language is regarded as a vice. The letter writers are better in foreign languages and rival one another in the eloquence in idioms other than Arabic. I have composed the present work in an age in which men boast of [using] a language different from that which I have recorded and I have built it like Noah built the ark, enduring the sarcasm of his own people."

What applies to the language also applies to the other cultural elements and, setting aside the stylistic clause about sarcasm, Ibn Manzur's enterprise has parallels in other fields. During the "Alexandrine" period (F. Gabrieli, Storia della letteratura araba, Milan 1951, 259), the decline of Arabic culture, under the influence of the events which seriously affected the Islamic world, who benefitted from the translation of the caliphate to Cairo, to launch a new encyclopaedic movement whose principal actors were the high-ranking kuttab.

The earliest is al-Nuwayri (677-732/1279-1332 [q.v.]), whose Nihayat al-arab fi funun al-adab contains all the knowledge that would be necessary for a kuttab assuming important responsibilities: cosmography, zoology, botany, ethics, history. The materials gathered were summarised and methodically arranged according to an Islamic conception of the world, but in a form that was both literary and practical. Then comes Ibn Fadl Allah al-Umari (700-749/1301-49 [q.v.], author of the Masalik al-adab, which seems to be intended on the whole for men of culture and constitutes a geographical-historical encyclopaedia containing a cosmography and information of a religious, juridical, political and administrative character. In spite of evident differences, it is tempting to liken the Masalik to the Adab al-makhlabik of al-Kazwini (see above), who describes the celestial and earthly worlds by borrowing extensively, like al-Umari, from his predecessors. The last encyclopaedia to be mentioned is al-Kalkashandi (d. 721/1418 [q.v.]), whose huge Suhbat al-adab really places at the disposal of its users all that a good secretary could need to know in order to be able to acquire himself perfectly in his profession as writer in the chancellery (sim'at al-inshâ'). In his highly suggestive article on Les classiques du scribe égyptien (in SI, 1963) and 41-80, G. Wiet reproduces the classification of the sciences adopted by al-Kalkashandi: I. BeHs (lettres, lexicography; morphology, grammar; style; rhetoric; the science of tropes; metrics; rhyme; calligraphy; Kur'ân reading). II. Sciences of the law (Kur'an; Sunna; law, etc.). III. Physical sciences (medicine; veterinary skill; falconry; physiognomy; oneiromancy; astrology; magic; talismans; conjuring; alchemy; agriculture; geomancy). IV. Geometry (construction methods; optics; mirrors; centre of gravity; surveying; water-catchment; mechanisms for hoisting objects; water-clocks; engines of war; pneumatic machines). V. Astronomy (astronomical tables; projection of the sphere on a flat surface; sundials). IV. Arithmetic (arithmetically proper so-called; algebra, abacuses, etc.). VII. Practical sciences (politics; ethics; domestic economy). Although these notions did not all undergo considerable development, al-Kalkashandi's encyclopaedia proves that in spite of the reversals experienced by the Islamic world, Arabic culture had lost nothing of its richness in books, but it had exhausted itself since the already distant age of its great prosperity and it was scarcely able to make any more obvious progress. The information gathered scarcely bears, in relation to the preceding centuries, any new features, owing much more to the march of history than to a calculated concern for enrichment.

Thus we have to pass over those authors whose total
work has an encyclopaedic aspect, as for example, al-Suyūtī (849-911/1445-1505 [q.v.]), in order to arrive at the Turk Tashkhoprūzdā (901-68/1495-1561 [q.v.]) who, through his encyclopaedia of arts and letters written in Arabic and then translated into Turkish, aimed to put at the disposal of his compatriots a summary of the knowledge possessed by the Arabic speakers.

Then we have to wait until the second half of the 19th century in order to encounter the first attempt made in the Near East to offer the educated public a working instrument and reference work meeting modern scientific criteria, the Dārīrat al-maḍārif published in Beirut from 1876 by Buṭrus al-Būstānī and continued by other members of his family [see Būstānī in Suppl.]. This encyclopaedia was resumed on a larger scale, from 1956, by F. E. al-Būstānī, who enlisted the collaboration of specialists from all disciplines; the new Dārīrat al-maḍārif is only distinguishable from Western encyclopaedias by language and the place legitimately occupied by the Arabs.

Finally, we should remark that the word mawsūʿa has been used correctly to describe dictionaries of a technical nature, such as al-Mawsūʿa fi ilām al-tābīʿa of E. Ghaleb (Beirut 1965), and also some collections in which each fascicle is devoted to a particular subject, such as al-Mawsūʿa al-saghira published in Baghdad, which is a “cultural, bi-monthly series dealing with sciences, arts and letters”. For example, it contains some studies on “philosophical thought among the Arabs”, as well as on “the petrochemical industries and the future of Arab oil”.

Blachère, Andalucia, Damascus 1973, 321-40. For a comparison with the composition of encyclopaedias in Anti-

2. In Persian.

Persian writings of an encyclopaedic character begin to appear about a century after the constituting of Persian as a language of culture. From then onwards they were to enjoy an important florescence until a late date, as much in India as in Persia. According to their contents, they can be divided into different groups. Here, only the major works will be mentioned; for an exhaustive examination of this genre, including the old translations into Persian, see the Persian manuscript catalogues (A. Munzawi, Fihrist-i nushka-hā-yi khafi-yi fāst, i, Tehran 1348-1969, ch. 9; idem, Fihrist-i nushka-hā-yi khafi-yi kitābkhāna-yi Gandbhākhsh, i, Islāmābād 1979, ch. 10; Storey, ii, section F, etc.). One should also consult Z. Vesel, Les encyclopédies persanes. Essai de typologie et de classification des sciences, Paris 1986.

The first Persian encyclopaedia of philosophy is Ibn Sinā’s Dānīgh-nāma-yi ālāt, composed between 414-28/1023-37 for the Kākūyid ruler of Isfahān ālāt al-Dawla Muhammad b. Daḡmānīzāy. This is a compilation of the Aristotelian speculative sciences laid out here in an order different from that of the Shīʿa and the Naḍīq: logic, metaphysics, physics and mathematics. The final section, which includes geometry, astronomy, arithmetic and music, was put together on the basis of the Arabic works of Ibn Sinā and after the death, by his disciple and biographer H. M. Dūr zdānī, the Dānīgh-nāma, in which Ibn Sinā sets forth the hierarchy of the Aristotelian sciences and for the first time elaborates in Persian a vocabulary of philosophical concepts, exercised a great influence on Persian authors (partial edn., Ābū Ḫalīfa Sārū, Dānīgh-nāma-yi ālāt, 2 vols., Tehran 1335-1917; 3 vols., Tehran 1355-1977; a tr. of the whole text by M. Aḥreṣa and H. M. Dūr zdānī, L’encyclopédie de science, Paris 1986, 2nd. edn. revised and corrected by M. Aḥreṣa). Another encyclopaedia of philosophy of great importance is the Durrat al-tādīl li-ghurarat al-Dībhādī of Ḫūṭ al-Dīn Shīrāzī [q.v.], written between 693-705/1294-1306 for the prince of Ghilān Dībādī b. Fīlshāḥ (ed. Mīkhāṭ, 2 vols., Tehran 1317-1990/1938-41). In this, the author deals successively with logic, with the first philosophy (al-falsafa al-ilā), with physics, with mathematics (the quadrivium) and with metaphysics. In an epilogue, he starts on Islamic theology, practical philosophy (hikmat-i tāmāl) and Sūfism. The author was a philos-
subordinate sciences of physics and mathematics is richer than that of the *Djamali* al-ṣawā'id. These encyclopaedias enjoyed wide popularity, and two Persian encyclopaedists tried later to imitate them: Muzann 'Aqīl Rustamashdī in his *Riyāḍ al-dawla*, written in 979/1571 (cf. Munzawi, op. cit., 669; Storey, ii, 359), and Muhammad Fāṭīm Ġaɔrn aikn dusterkî in his *Qāwšār al-ṣawā'id-i hamşāyari* written in ca. 962/1555 (cf. Storey, ii, 358-9). An interesting example is the evolution of the Persian encyclopaedia is provided by Wajīd ʿAli Khān’s *Matlaʿ al-ṣawā'id wa-madārnâ* al-funūn, written in 1261-2/1845-6 (cf. Storey, ii, 366-7).

For other types of encyclopaedic writing in Persian, whether of a specialised nature or from the sphere of *adab* works, see the catalogues of Munzawi, Storey, etc. But regarding the question of the originality of this literature in relation to the Arabic models by which it was largely inspired, this work of evaluation still remains to be done for the majority of the texts.

*Bibliography*: Given in the text.

(Ž. Vesel)

3. In Turkish. (see Supplement).

The Encyclopaedia of Islam owes its existence to the renewed interest in Islam and the Islamic peoples which manifested itself in Europe at the turn of the twentieth century. The idea of such an enterprise, however, dates from a much earlier period. Already in 1697 the French Orientalist Barthélemi d’Herbelot had published in Paris the *Bibliothèque Orientale* or *dictionnaire universel contenant généralement tout ce qui regarde la connaissance des Peuples de l’Orient* (see H. Laurens, *Aux sources de l’Orientalisme*, la Bibliothèque Orientale de Barthélemi d’Herbelot. Publications du Département de l’Islamologie de l’Université de Paris-Sorbonne (Paris IV), vi, Paris 1978). It was to be followed by other classics like the *Déktrat al-ma`ārif* (1876-98) of the Bustānī family (q.v. in Suppl.), T. P. Hughes, *Dictionary of Islam* (London 1885, 2nd ed. 1896), and W. Beale, *An oriental biographical dictionary* (Calcutta 1881, 2nd ed. by H. G. Keene, 1894). But these publications, notwithstanding their merits, could no longer satisfy the increasing general public interested in things Islamic, let alone the European scholars.

Around 1890, Messrs. Trübner in Strassburg envisaged a series of monographs on Semitic philology, in the same way as they had done for Iranian and Indian philology. However, the plan could not be carried out because of the untimely death in 1892 of A. Müller, to whom the work had been confided (see ZDMG, xlii [1892], 776).

In the same year 1892, at the International Congress of Orientalists in London (see *Transactions of the IXth International Congress of Orientalists*, i, pp. xxxviii), W. Robertson Smith proposed the idea of an *Encyclopaedia of Islam*. The initiative of the man who may be considered as the *auctor intellectualis* of the enterprise was accepted by the members attending the Congress, and an international committee of twelve members was established.

At the International Congress of Orientalists held in Geneva in 1894, it was clear that no progress had been made, the more so because Robertson Smith had meanwhile died. I. Goldziher then proposed to put together the direction of the enterprise in the hands of M. J. de Goeje. When the latter declined, the Hungarian orientalist found himself charged with the organisation of the *Encyclopaedia of Islam* (see *Transactions of the IXth International Congress of Orientalists*, i, p. 195, 1305). However, to the dismay of all those who con-
sidered him as the man able to realise the idea, Goldziher handed in his resignation at the Interna
tional Congress of Orientalists held in Paris in 1897 (see Transactions, 1897, Bulletin no. 11; ZDMG, li [1897], 766).

One of the reasons brought forward by Goldziher for his resignation was the decision, taken meanwhile, to have the work printed in Leiden. Consequently, he opined, the editor should reside in Holland. The scientific advisor of Messrs. Brill, Dr. P. Herzsohn, had already started assembling a certain number of entries. A specimen was published in 1897 under the title Erste Sammlung von Stichwörtern für eine Encyclopädie des Islam. Mit erörternden Bemerkungen. Gedruckt als Manuskript, mit Verbehalt einer hier und da noch auszuführenden genaueren Verification, pp. 63, 8°.

At De Goeje's request, Professor Houtsma, not
withstanding a certain scepticism, accepted to replace Goldziher "because I knew to what trouble De Goeje was going to realise the Encyclopædia of Islam".

In 1897 a new international committee had been appointed in Paris, consisting of A. G. Barbier de Meynard (Paris), E. G. Browne (Cambridge), I. Goldziher (Budapest), M. J. de Goeje (Leiden), I. Guidi (Rome), J. Karabacek (Vienna), C. Landberg (Tübingen), V. von Rosen (St. Petersburg), A. Socin (Leipzig) and F. de Stoppelaar (Leiden).

In order to get some idea of the readiness of his col-
leagues to collaborate, Houtsma asked several of them what kind of articles they were ready to write, and invited them to send one or more articles in order to have them printed at Brill's and to submit them to the opinion of the experts. The answers were positive, and in 1899 Houtsma was able to publish a Specimen of a Muslim Encyclopædia by a number of Orientalists. It consisted of several monographs, arranged alphabetically and written in English, French and German by sixteen future collaborators. In the Preface, Houtsma remarks that no agreement had as yet been reached about the language in which the Encyclopædia was to be published. In the same year 1899, Goldziher presented this Specimen to the members of the Com-
mittee present at the xiii International Congress of Orientalists in Rome (see Acta, i, pp. clxxix ff.), who accepted it favourably. While waiting for the resolu-
tion of the financial problems, Houtsma and Herz-
sohn were correcting and completing the list of entries.

At the first session of the recently-founded Interna-
tional Association of Academies (Paris 1901), a proposi-
tion of the Academies of Leipzig, Munich and Vienna for the publication of an Encyclopædia of Islam was admitted into the working plan, after approval by the literary section. Under the presidency of De Goeje, a Committee was appointed in order to study the project of the enterprise, and Houtsma was charged with the editorship. The Committee consisted of Goldziher, Browne, Barbier de Meynard, Von Rosen, Guidi, Karabacek (all already appointed at the Paris Congress of 1897), and Chauvin (Brussels Academy), Buhl (Copenhagen Academy) and Fischer (Leipzig Academy, Socin having died in 1899).

A smaller Committee, consisting of De Goeje, Goldziher and Karabacek, was charged with drafting by-laws, which were completed in 1902. The costs were calculated at 140,000-150,000 marks for ten years. Financial support was promised by the Academies of Amsterdam, Budapest, Christiania, Copenhagen, Lisbon, Madrid, Munich, St. Petersburg, Vienna, the Academy of Saxon, the Academy for Inscriptions et Belles Lettres, the Reale Accademia dei Lincei, the Gouvernement Général de l'Algérie, the British Academy, the Dutch Colonial Government, the Italian Government, the Dutch Company of Commerce in Amsterdam, the Deutsche Morgenländische Gesellschaft, the Deutsche Kolonialgesellschaft, the Senate and municipal council of Hamburg, the Egyptian Government, the Johns Hopkins University of Baltimore, the Theological Seminary of Hartmann, who resigned in the same year, was replaced by H. Bauer. As president of the Executive Committee, De Goeje had been succeeded by Chr. Snouck Hurgronje, who had been able to redress the financial position.

As for the editorial work, Houtsma may be quoted. "Apart from a few exceptions, my collaborators are all Christians, and belong to quite different peoples. It is the Editor's task to maintain the scientific and neutral character of the work on a high and impartial level, and to be very careful not to entrust articles to incompetent hands. On the other hand, scholars whose scientific qualities are above all suspicion, can-
man un, radd, haldk, such as and its variant mânun, radd, haldk, himdm, hayn and bilâ convey particular connotations and are less frequently used and regarded as more literary. The term for death waâfât, more exactly "accomplishment, fulfilment", i.e. of a man's term of life, is in origin Kurânîc, and stems from the use in the early Medinan period of the verb tawwûf fâ'în to describe how God brings to its close a man's foreordained period of life and gathers the man to Himself; hence the use of the passive form of this verb tawwûffya "his term was brought to an end [by God]" = "he died". The idea behind the use of this verb is closely connected with the use in the Kurân of other verbs like kadârân and kadâ which carry the sense of God's predetermining a man's lifespan or executing His decree concerning a man's term of life (see T. O'Shaughnessy, Muhammad's thoughts on death, Leiden 1969, 37 ff.). In modern Arabic, waâfât has a more delicate and euphemistic sense than the stark word maut, something like Eng. "demise, decease" and Fr. "décès", with al-mutawaffd meaning therefore "the deceased". The same distinction is made in Turkish between the bald âlam "death" and waâfât, modern Turkish ooffat, and in Persian between morg and waâfât and such terms as faaze (A., literally "passing away, disappearing").

The conception of death held by the Arabs prior to the advent of Islam was deeply rooted in the animist beliefs inherited from their distant past. Taken to be a manifestation of disruptive action on the part of dahr [g.v.] "time-destiny", death was considered the specific delimitation of the animate world, a concept uniting humans and animals as opposed to the physical world, inanimate and therefore imperishable. It was defined, in these terms, as the extinction of the vital spirit which animates beings endowed with life, as the separation of the body and the organic soul. As it is known that the residences most frequently attributed to a man's "double" are the blood and the breath, it may be understood how the Arabs could believe that in the case of violent death, the double (karâma) is released through the flowing of the blood and that, in the case of "natural" death, it escapes through the nose; hence the expression mâta hafta anfhi.

Furthermore, while it is accepted, as stressed by the Kurân, that the ancient Arabs had no conception either of the resurrection of the dead or of life in the Beyond, they seem nevertheless to have believed in the survival of the dead. Two terms which evoke wandering and thirst, hâmâ and sadâ, denote these spirits of the dead. But, unlike other Semitic peoples, such as the Hebrews for example (cf. A. Lods, La croyance à la vie future et le culte des morts dans l'antiquité israélite, Paris 1906), the ancient Arabs did not entertain the idea of a special world of the dead, a world of shadows and of gloom. In addition, for them it was inconceivable that their dead might be disgraced.
Only the spirits of the dead deprived of burial and those whose blood had not been avenged were left to wander, thirsting, in desert lands. To abandon its fate, to re-affirm with respect to their dead the validity and permanence of tribal solidarity. But, while doing this, they did not also seek to assure themselves of the protection of these dead? The existence of a cult of the dead among the ancient Arabs is a much debated question (see in particular: I. Goldziher, Le culte des ancêtres et le culte des morts chez les Arabes, Fr. tr., Paris 1885; Lods, op. cit.; H. Lammens, L’Arabie occidentale avant l’hégire, Beirut 1928, 151 f.). In spite of differing opinions and the scarcity of reference documents, it seems probable that the Arabs did, at one point in their history, practice the cult of the dead. But this cult, which belongs, as Lods emphasises, to “an inferior stage of religion”, seems, in the period immediately before Islam, to have completely disappeared under the combined impact of the sedentarisation of the tribes and the emergence of polytheism. Only the rites rendered to the deceased immediately after death (washing of corpses, mourning and interment) were perpetuated. The other rites, such as sacrifice or offering, were reserved for the gods. (On the funeral rites and their significance, see M. Abdesselem, Le thème de la mort dans la poésie arabe, des origines à la fin du III/IX siècle, Tunis 1977, ch. ii).

But this ancient cult of the dead has, by extending beyond death the fulfilment of the duty of tribal solidarity, contributed to the sanctification of blood lineage, thus giving solid foundations to the social system of the Arabs and perpetuating, over the generations, the same moral ideal (cf. B. Farès, L’honneur chez les Arabes avant l’Islam, Paris, and id.). This ideal enables the Arab to contemplate death without fear and to place the preservation of his honour and the honour of his group above the preservation of his life. This is clearly shown in the themes developed in pre-Islamic poetry and especially in the eulogistic nature of the dirges [see MAHTABA].

Islam is to appeal to the Arabs to adopt a radically different conception of death. This conception results from a new definition of the soul and of life. According to the Qurʾān, man is moved by two distinct principles, one thinking and the other vital: nafs and ruḥ, as the washing of the dead, the shroud and interment; ruḥ is the principle of life which proceeds from God and is enlivened and given substance by Him. Birth and death are divine decrees. Parents do not give life. Events are not the cause of death. These are only the intermediaries through which the will of God is realised.

This new definition of life revolutionised the metaphysical and moral conceptions of the Arabs. Life being no longer immanent, the opposition between the animate and inanimate world loses all foundation and gives way to a new conception whereby God, the creator, source of life, is opposed to everything that is not Him and which, therefore, is the creation, including the physical world whose permanence is only an illusory appearance.

The existence of, and by affirming that life proceeds from God and not from the group and that “the loins

of fathers and the womb of mothers are [only] receptacles” (Qurʾān, VI, 98), Islam confers on the life of the individual a new significance and on his action a new perspective. First, the life of the individual becomes sacred. “Except with justice, do not kill your fellow-man whom God has declared sacred” (Qurʾān XVII, 33). This is a new precept for the Arabs. Hitherto, only the blood of the group could not be spilled. Henceforward, only those who refuse to recognise the authority of God or seriously contravene His commandments may legitimately be killed. By substituting the notion of the community of faith for that of the community of blood, Islam led the Arabs to liberate themselves from the ascendancy of the clan and to take cognisance of their existence as free and responsible persons. Even though the believers are declared brothers, they are individually responsible for their actions before their judges in this world as well as before God on the final day of judgment.

The echoes of the debates which have brought into prominence these notions and the place occupied by the evocation of the afterlife and the final day of judgement in the Qurʾān, show to what an extent such a message would overturn the beliefs of the Arabs. Death is no longer the end of life. It is only the appointed time (aggal), decreed by God to conclude the period of man’s testing in this world. The post-mortem fate of man is no longer dependent on the solidarity of the group, but on the action of the individual and the mercy of God. External happiness or damnation is now the question that each person is required to ask himself and to which none can reply with certainty. This lack of certainty led the Arabs to experience a sentiment which had until then been unknown to them, anguish. This was quite clearly reflected in a new poetic genre, the zubhitayn [q.f.].

Thus it was not only the beliefs of the Arabs which were revolutionised by the Qurʾānic message, but also their attitudes and their behaviour. It may be noted, in this context, that the funeral ceremony, the djennaz [q.f.], also underwent profound modifications. Certainly, Islam has retained some ancient practices such as the washing of the dead, the shroud and interment; but is has forbidden certain pagan rites such as lamentations or offerings and, above all, it has introduced a new obligation, the prayer for the dead which confers upon the entire funeral ceremony a radically different significance. This is no longer a glorification of the dead but an appeal for divine mercy. For an ethic of exaltation Islam has substituted a morality of humility.

Bibliography: Given in the article.

MAWWAL [see MAWWALAY]  
AL-MAWZÃ”, SHAAMS AL-DIN ABD AL-SAMAD B. ISMAIL B. ABU AL-SAMAD (d. after 1031/1621), the author of an important independent chronicle of early Ottoman Yemen to 1031/1621-2, particularly of the south and of the city of Taʾizz. As his nisba, al-Mawzaʾi (mistakenly given as al-Manzil in Brockelmann, S II., 550), indicates, the family originated in the Tihama town of Mawzâ, south of Zabid; but his residence was at Taʾizz, where, like his father before him, he served as a ʿAbbiʿ magistrate and teacher. Being a prominent member of the town’s Sunnites jallâd, and closely connected with the region’s Ottoman officials, it is not surprising that his chronicle, al-Thanū fī dhikrī himl al-Yaman taht sīl addâl al-Uthmân, which for the later period is rich in precise details, is sympathetic in tone to the Turks and hostile to the Zaydi imams. It is difficult to determine how much, if any, of the work’s
content was contributed by the author's father who, it is disclosed, planned a similar chronicle before his death.

Bibliography: As al-Mawzá’i’s name appears in none of the known biographical and other source books for the area and era, we have to rely on what he reveals about himself in his chronicle, and this has been summarised by Mustafá Sálim, Al-Mu‘arrífiyy al-Yamaniyyin, Cairo 1971, 55-63. For the mss. of al-Ilhán (in particular Paris 5973), consult A. F. Sayyid, Ma‘ādir ta‘rikh al-Yaman, Cairo 1974, 225-6. See also F. Babinger, GOW, 150-1. (J. R. Blackburn)

Mawzúna [see sikra].

Maybudi, a small town in the shahrastán of Ardakan [q.v.] in the modern Persian šūtr or province of Yazd, situated 32 miles/48 km. to the northwest of Yazd. The mediaeval geographers (e.g. Ibn Hawkâf, 263, 287, tr. Kramers and Wiet, 260, 281; Hudud al-šām, tr. Minorsky, § 29.45; 6. Strange, Lands, 265) describe it as being on the Farsá-Yazd road, 10 farágás from Yazd. Lying as it does on the southern fringe of the Great Desert, its irrigation comes from kandts [q.v.].

West of Yazd. The mediaeval geographers (e.g. Ibn Hudsúd al-^dlam, [q.v.]) describes it in the form there to the limits of their strength. Of these three propositions, it seems the attribution of maydân to the m-y-d is the most plausible.

According to the sporting activities which took place there, the maydân represented the hippodrome or race course (balâhe) when used for horse races (šîbk), the ring or display ground for equestrian manoeuvres and exercises which grew out of the arena or has for mock-battles, jousts and symbolic armed tournaments between the mounted groups, and the pitch for the ancient and traditional games of polo and “lacrósse”, saulagádân, avčgán [q.v.] and gdér [q.v.] or burgági/birgági. In his Khātā, al-Ma‘ǎrzî relates, with regard to the ancient site of Sanarita in the Oasis district of Egypt, that its founder, the Coptic king Mināktuš, also founder of the town of Aḥmâm [q.v.], was the first to construct maydâns for the equestrian training of his courtiers; in its use as a drill-ground, the maydân soon became indispensable for the training of cavalry, a military element which grew considerably in importance with the rise of Islam.

When not engaged in military campaigns, the Muslim trooper (quandî) spent much of his time on the maydân, perfecting his skills in mounted archery, shooting either at a target (burgági) placed at the top of a lance or at “gourd-shooting” (kaｂâk) suspended from the end of a long sparrow; this latter exercise, introduced by the Turks, became the object of keen competitions. Shooting of the style known as uktî (Turkish ủkî) at a large target (hadaf tamâm) placed at long distance (500 yards), and with a wheel, was a kind of pattern called maydân, required archers capable of a range of 200 metres and more. Short-range precision shooting (uktî kâşî) was aimed at a small target at a distance of no more than 70 metres. Pure long-distance shooting without a target (nifâfî) was practised only at a fairly late stage by the sultans. To the north of Istanbul there still exists the Ok Meydân “field of the arrow” founded by sultan Mehmed II (855-86/1451-58), at the end of which stand some twenty commemorative plaques marking the record distances achieved since this period; thus it is known that in 1213/1798 sultan Selim III shot an arrow to a distance of almost 900 metres. It was also at a late stage that there was practised, on the maydân, shooting with the crossbow, at a target, with bolts and quarrels.

All these sporting activities had, in fact, no object other than military training, and every town with a Muslim garrison of any importance had one or more maydâns; al-Fūrūzābâdi mentions in this context (al-Kâmûs al-muḫti, s.v.) those of Nîshâpûr, Iṣfâhân, Khârâzam and Baghdâd. In the last-named, the first maydân, according to al-Yâ’kûbî, Baldûn, tr. Wiet, 37, 41), extended along the left bank of the Tigirs, near the palace of the vizier al-Fâdî b. al-Râbî’i [q.v.].

Under the Mamlûk sultans, the construction of a maydân constituted a large-scale project and mobilised
a considerable labour-force; it was necessary, in
effect, to level a surface of sufficient size ... (terrestrial things).
They are divided up into numerous chapters, and
these, in their turn, into further not expressly

By metonymy, the term maydàn (sometimes with the plural maydān) was applied to the exercises of mounted formations, and works devoted to furūsiyya present diagrams of these exercises which were per-formed by numerous groups of horsemen according to a well-established pattern (tariib al-mayddn). The major western riding schools, even today, give an accurate impression in public performances of the likely nature of these complex and interwoven movements of squads of troopers with their colourful banners.

In figurative usage, maydan evokes the confronta-tion of two parties, in the expressions maydan al-barb ("field of battle"), talaba li-’l-maydân ("challenge to combat"), nābâr al-maydân (the day of battle). Among the Marazig of southern Tunisia, muddîn (pl. maddîn; "turf") denotes "fray" (see G. Bosis, Lexique..., Paris 1956, i: 92).

Alongside this limited sense, maydân is, like the French "champ", the English "field" and the German "Feld", extended to the broad sense of "domain of activity", physical, intellectual or spiritual.

characterised sub-chapters, arranged, as a rule, according to the subjects that are treated, and not alphabetically; said to have been lithographed at Tehran 1265/1849, 1267/1851, 1272/1856, 1273 and 1274/1857, 1275/1859, 1294/1877, and 1298/1880. India 1284/1867; numerous ms. (e.g. Bursa, Haraç-çadde/olug, lugat, no. 15 [556/1169; cf. H. Ritter, in Orients, ii (1949), 239; Berlin [Ahwardi], no. 7040 [ca. 600/1203]; Chester Beatty [Arberry], no. 3028 [631/1233]; Topkapi Sarayi [Karayat], no. 7556 [1237–635]; Cetin, in IA, vii, 178 f.; Şehen, op. cit., ii, 458, Tehran. Dünneğah [Dünsen Paghüh], no. 1373/ [629/1283]. Storey, iii, 81f; d. Täbris n.d. [q.v.]. The obliquity of the ecliptic is the basic parameter of spherical astronomy. Since it varies with time (Hudud al-Salam, tr. Minorsky, 103, § 23.12; Mustawfi, Nazha, 157–8, tr. 155; Le Strange, Lands, 394).

In mediaeval times, it was the chief settlement of the district of Khawaran or Khâvaran which lay between Ahwardi and Sarakhs [q.v.]; by Yakût’s time, Mayhana itself had largely decayed, though Mustawfi describes Khâvaran as a whole as flourishing, with good crops and cereals and fruit (Hudud al-Salam, tr. Minorsky, 103, § 23.12; Mustawfi, Nazha, 157–8, tr. 155; Le Strange, Lands, 394). Its main historical fame is as the birthplace in 357/967 of the Sufi saint and thaumaturge Abu Sa’d Fadl Allah b. Abi l-Khayr, who alternated between residence there and in Nishâpur for most of his life till his death at Mayhana in 440/1049 (see Abu Sa’d b. Abi l-Khayr to the references there add F. Meier, Abi Sa’d-i Abu l-Hayr (357–440/967–1049), Wirklieheit und Legende, Tehran–Lège 1976). Mustawfi quotes verses praising the Mayhânî and other great men from Khâvaran, including the minister of the Saljûq Topkâr Beg, Abî Sâlî Shâhdân, and the poet Anwâr [q.v.].

Mayhana is now a town situated some 14 miles/20 km. within the Turkmenistan SSR and appears on modern maps as Meana. Bibliography (in addition to references given in the article): H. Halm, Die Ausbreitung der städtischen Rechtsschule von den Anfängen bis zum 8. Jahrhundert, Wiesbaden 1974, 83; Meier, op. cit., 39 ff. (C. E. Bosworth)

**AL-MAYL (a.), declination, an important notion in spherical astronomy. Declination is a measure of the distance of a celestial body from the celestial equator. Muslim astronomers tabulated either the declination and right ascensions of stars or their ecliptic coordinates [see **MAŠTAM**]. Also of concern to them was the solar declination, mayl al-šams. They distinguished two kinds of solar declination, mayl al-aqwa’il, the distance δ₁ of the sun from the ecliptic measured perpendicular to the celestial equator, and mayl al-šâhî, the distance δ₂ of the sun from the ecliptic measured perpendicular to the ecliptic; see Fig. 1.

\[ \delta_1 = \sin \lambda \sin \varepsilon \] 
\[ \delta_2 = \arctan \left( \frac{\sin \lambda \sin \varepsilon}{\cos \lambda} \right) \]

Both functions were tabulated in zijîs [see zijî], usually for each degree of ecliptic longitude \( \lambda \). The underlying formulae in modern notation are

\[ \delta_1(\lambda) = \sin(\sin \lambda \sin \varepsilon) \]
\[ \delta_2(\lambda) = \arccos \left( \frac{\sin \lambda}{\cos \lambda} \right) \]

\( \varepsilon \) is the obliquity of the ecliptic, called in Arabic al-mayl al-a’lam or al-mayl al-kulî.

The obliquity of the ecliptic is the basic parameter of spherical astronomy. Since it varies with time,
Muslim astronomers over the centuries conducted observations to derive the current value. Most of them did this by means of meridian observations of the sun at the solstices. If $h_{\text{min}}$ and $h_{\text{max}}$ are the solar meridian altitudes at the winter and summer solstices at a locality with latitude $\phi$, then

$$h_{\text{min}} = 90^\circ - \phi - \text{e} \quad \text{and} \quad h_{\text{max}} = 90^\circ - \phi + \text{e}$$

see Fig. 2. Clearly, from such observations $\text{e}$ may be found using

$$\text{e} = \frac{1}{2} (h_{\text{max}} - h_{\text{min}}).$$

Fig. 2.

Likewise, the local latitude $\phi$ can be determined from the same observational data. The most complete discussions of the subject were by Ibn Yunus and, more especially, al-Biruni [q.v.].

**MAYMANA,** a town of northwestern Afghanistan (lat. 35° 55' N., long. 64° 67' E.), lying at an altitude of 2,854 feet/870 m. on the upper reaches of the Ab-i Maymana which pours out in the desert beyond Andkhûy [q.v.] and the sands of the Kâš Kum [q.v.].

The site of the settlement seems to be ancient. The *Vendidad* speaks of Nisâya, and the 8th century Armenian geography of Iran records Naisian = MP * Nisâk-i Miâyânâk “the Middle Nîsâ”, possibly identical with Proboly’s Nusâd in Margiana (Marquart, Kamârâb, 78-9). This seems to have been where lay the town known in early Islamic times as al-Yahûdîya (Horâdî al-sââm, tr. Minorsky, 107, § 23.53, cf. comm. 335: Dâhîdâlân), indicating a sizeable community of Jews there. Al-Yâkûbî, *Buldân*, 287, tr. Wiet, 99, al-Istakhri, 270, Ibn Hawkal, ed. Kramers, 442-3, tr. idem and Wiet, 427-9, al-Mukaddasi, 427-9, describe the town as a flourishing one, with a Friday mosque, and as the seat of the ruler of Faryabd of the principality of Güzûn, which remained independent till incorporated into the Ghaznavid empire by Sultan Mahmûd [see *mpûzân* and *fârîquûns*]. Yâkût, *Buldân*, ed. Beirut, ii, 194, calls it Dâhîdâlân al-Kubrâ, presumably to distinguish it from the Yahûdîya of Isfâhân.

The actual name Maymana “the auspicious, fortunate town” does not occur in the 3rd-4th/29th-10th century texts. It is possible that a form Maymand existed by the 7th/13th century, since it apparently occurs in some manuscripts of Dâhîdâlân’s *Tabâkât-i Nâşiri* (though the latest editor, *Abd al-Ha[y] Habibi, adopts the reading Maymana for his text, 2nd ed. Kâbul 1342-3/1963-4, i, 358, 374, whereas the manuscript(s) which Raverty used for his translation, London 1881-99, ostensibly had Maymand, cf. i, 378, 391, 399); but the Maymand which was the family origin of the great Ghaznavid vizier Ahmad b. Hasan Maymandi [q.v.] was almost certainly one in Zâbulistân, the region around Ghazna. It is certainly the form Maymana which is henceforth used for the town in Afghan Türkistân.

Towards the close of the 17th century, Maymana was under Uzbek control, being one of the petty, semi-independent kâhânates (together with Sâr-i Pul, Shîbârgâhân and Andkhûy) known as the Çahâr Wilâyât, and oriented essentially towards the Bukhârâ Kâhanât. The Hungarian traveller Vâmbéry visited it in 1863 and describes the town as possessing 1,500 mud-brick houses and a dilapidated bazaar. The Afghân amîr of Kâbul Dûst Muhammad [q.v.] disputed possession of Maymana with Bukhârâ in 1855, and only with the Anglo-Russian agreement of 1873 did the four kâhânates come definitely within the orbit of Kâbul; not till 1844 did the amîr *Abd al-Rahmân Kâhân [q.v.] secure the submission of the *awliyâ* of Maymana.

At present, Maymana, lying as it does within a fertile agricultural area, and being on the Harat to Mazar-ı Sharif road, is a flourishing town, the administrative centre of a wilâyât or province (since 1964, called that of Faryâb), and with a population (mainly Uzbek, but with some Tadjiks and Pushtuns) estimated by Humlum at 30,000. It has an airfield and is important for the weaving of fine carpets and for wool and camels’-hair textiles.

**MAYMANDI,** Abu ’l-Kâsîm Ahmad b. Hasan, called Shams al-Kûfî “sun of the capable ones”, vizier of sultans Mahmûd and Mahmûd b. Ghazna [q.v.]. He was a foster-brother of Mahmûd, and had been brought up and educated with him. His father had been *gambari* of Bust under Sebûtîgin, and apparently stemmed from Maymand in Zâbulistân; but on a charge of misappropriation of the revenue, he was put to death. In 384/994, when the Amir Nûb b. Mansûr the Sâmânî conferred on Mahmûd the command of the troops of Khurâsan, Mahmûd put Ahmad at the head of his correspondence department. After this, Ahmad rapidly rose in the service of his master, and occupied in succession, the posts of *mufti*-i Mamlakât (Accountant General), *Sibîh-i Divân-i ‘Arâf (Head of the War Department), and *gambari* of the provinces of Bust and Ruhkhalâhid. In 404/1013, Sultan Mahmûd appointed him wa‘iz in place of Abu ‘l-‘Abâs b. ‘Abâs b. Daiqân. Ahmad Isfârî’î, for twelve years, Ahmad managed the military and financial affairs of the growing empire of Sultan Mahmûd with great tact and diplomacy. Ahmad was very strict and exacting, and did not tolerate any evasion of duty or departure from the usual official procedure, with the
result that many of the dignitaries of the Empire became his enemies and worked to bring about his ruin. He was disgraced and dismissed in 415/1024, and sent as a prisoner to the fort of Qal'ān, in the southern Kāshmar hills.

After his accession to the throne in 421/1030, the new sultan Mas'ūd b. Māhmūd, whose cause Ahmad had always favoured, wished to re-appoint him vizier in 422/1031 in place of the disgraced Ḥasanak [q.v.]; ostensibly on account of his age, Ahmad was reluctant to accept, and before doing so, insisted on a mawdu'a [q.v.] or contract defining his own duties and rights wāsii-vāsii the sultan and other ministers. He died in Muharram 424/December 1032, much mourned, according to Bayḫākī, by other members of the bureaucracy.

From both his competence and learning, Ahmad subsequently enjoyed a great reputation as a vizier and stylist; Ṭabī'ī expressly prai sm him for his restoration of Arabic as the official language of the āwāli, whereas Ḥisārānī had—no doubt—more realistically—introduced the use of Persian, so that “the bazaar of eloquence had suffered loss, the traffic in fine expressions and beautiful language had perished, whereas Isfahān—no doubt, more realistically—introduced the use of Persian, so that “the

Maymanī contributed actively to the MMIA, and it is typical of him that in his capacity as a corresponding member (being of Pakistani nationality) of the recently-created Indian Academy of the Arabic Language, he contributed the first article to the first issue of the Majallat al-Mādīnā [q.v., Simt al-laṭīfī fi Ṭabārā Amālī ‘l-Kāli, Cairo 1354/1936, 3 vols.]

A member of the Arabic Academy of Damascus, al-Maymanī contributed actively to the MMIA, and it is typical of him that in his capacity as a corresponding member (being of Pakistani nationality) of the recently-created Indian Academy of the Arabic Language, he contributed the first article to the first issue of the Majallat al-Mādīnā [q.v., Simt al-laṭīfī fi Ṭabārā Amālī ‘l-Kāli, Cairo 1354/1936, 3 vols.]

After winning his freedom, he remained in Kūfa until the turbulence of the Dayr al-Dajmāʾīm [q.v.], which pitted the Shāfs to the Umayyads and the Shīʿīs against the Umayyad authorities; presumably because of his neutral or pro-Umayyad sympathies, Maymūn moved at this time to the Djiṭāra, where he became the leading figure among the local men of religion at Ṭakka. A few accounts describe him as having made the pilgrimage to Mecca and as having visited Baṣra, where he had an interview with the famous saint al-Ḥasan al-Baṣri; but travelling does not seem to have been his main activity, and most sources describe him simply as the sage of Ṭakka.

Maymūn is remembered in numerous accounts for his religious and ethical maxims. Most of these emphasise such themes as the dangers of wealth and gluttony or the importance of God-fearing piety and of good works, but they also include some which can be considered as at least mildly anti-Shīʿī, while others suggest an effort to strike a politically non-committal pose: “Do not speak about four things: ‘Ali, ʿUthmān, kudur, and the stars”. Although he served as a source of religious and ethical guidance, however, he does not seem to have been much concerned with the transmission of hadiths, which were just beginning to be circulated widely in his day. As a transmitter of hadiths he is generally adjudged reliable (ṣīḥa); but among his maxims is one that stresses the primacy of the Kurān over the “hadiths of men” as a source of guidance, and only about two dozen hadiths on his authority (mostly via Ibn ʿAbbās or ʿAbd Allāh b. ʿUmar); others are extant. A good number of these hadiths deal with ritual law; a few deal with sectarian or political issues, which of clearly major ʿAlī (e.g. Abū Nuʿaym, Ḫalīfa, iv, 49 on the Rāḍḥaf), and which generally are slightly anti-ʿAlīd in tone. Some of these “hadiths” are doubtful sayings of Maymūn himself or of his informants, which his pupils “raised” to the status of prophetic utterances. Accounts going back to Maymūn also convey considerable information about several central figures among the Companions of the Prophet and their successors, e.g. ʿUthmān, ʿĀlī, Muʿāwiya, Ibn ʿAbbās, ʿAbd Allāh b. ʿUmar, Ibn Sirīn, al-Ḥasan al-Baṣri and Saīd b. al-Muṣayyab—including several significant awālī (e.g. Muʿāwiya who is the first who sat between the two khaṭhas; ʿĪd al-ḥarām, v, 105).
Maymún's close ties to the Umayyads are reflected both by the fact that he held office for some of them and by his many accounts of the activities of 'Umar b. 'Abd al-'Azîz (ruled 99/1017-20) and some other members of the dynasty. He is first said to have administered the treasury in Harrân for 'Abd al-Malik's brother, Muhammad b. Marwân, who served that caliph and his successor al-Walîd as governor of the Dîzâria. Maymûn was then appointed by 'Umar b. 'Abd al-'Azîz over the kadi' and hâragî (judgeship and tax-collection) of the Dîzâria—offices he apparently held only with some mental reservations—while his son 'Amr ran 'Umar's dîwan (Ibn Sa'd, vii/1, 178). After 'Umar's death he was retained in his post for a time by Yazîd b. 'Abd al-Malik. He was still evidently part of the official establishment in Harrân under Highâm (al-Baladhuri, Anšâb, Beirut iii, 100), and is also said to have commanded the army of Syria that went to Cyprus in 106/724-5 for Highâm (al-Tabârî, ii, 1487). Maymûn appears to have been one of 'Umar b. 'Abd al-'Azîz's close confidants, and the two were evidently bound by mutual admiration, to judge from the many extant accounts in which one relates anecdotes emphasising the piety and wisdom of the other.

Maymûn died, according to most authorities, in the Dîzâria in 1177/35-6. He does not seem to have left behind any written works—further evidence, perhaps, that he was primarily a šîkhî known for his piety and good judgement in religious matters rather than a muhaddîth—but he did bring to Rakka a tradition of religious piety that lived on in his pupils bearing the nisba "al-Maymûnî", among them Dîsîfîr b. Burkân, Abu 'l-Malîh, and his own son 'Amr b. Maymûn. The esteem in which he was held by later authorities is aptly summed up in a statement ascribed to Umar b. al-Fadl while his son (Ibn Sa'd, i, 509), "Maymûn b. Mihrân, we accepted it" (Abû Zur'a, Ta'ârikh, 315 [no. 508]).

F. M. DONNER

Maymûn b. al-Aswad al-Kaddàh, obscure Meccan transmitter from the Imâmîs Muhamm-ad al-Bâkîr and Dîsîfîr al-Sâdîk who, two centuries after his death, gained such notoriety as the father of the alleged founder of Imâmîs 'Abî al-Aswad al-Kaddàh and the father of the Fâtimid caliphs, 'Abî Allah b. Maymûn [q.v.]. According to the Imâmî sources, he was a client of Makhzûm and a shaper of arrow shafts (gabîrî al-kîdâh). He became a personal servant of al-Bâkîr and al-Sâdîk in Mecca. A few traditions of the two Imâmîs related on his authority are contained in the canonical collections of Imâmîs al-Ṭûsî, but they do not count him among the companions of Imâm 'Ali Zayn al-Âbidîn (d. 9/1513-14) (Ridjâl al-Tâ'îsî, ed. Muhammad Sâdîk Al Bâbîr al-Âlûm, Najfâb 1318/1961, 101, 315, 337). He died probably during the imâmât of al-Sâdîk (d. 148/765). W. Ivanov's suggestion that he had, besides 'Abî Allah, another son called Abân (The alleged founder of Imâmîs, 68) rests on a faulty tanâdîm in some copies of al-Kulayî's K. al-Kafî (see Muhammad b. 'Ali al-Ashbâhî al-Hârîrî, Dâmah' al-ru'ddît, Kûmûn 1405, ii, 287).

Neither Imâmî nor Sunni biographical dictionaries and heresiographies of the 3rd/9th century suggest that Maymûn al-Kaddàh or his son inclined to Shi'i extremism or was involved in the sect backing Ismâ'îl b. Dîsîfîr. The earliest mention of him as a heresiarch is by the Shi'i polemicist Ibn Râzîm (writing ca. 340/951) who describes him as a Daylamī duṣûdî and founder of a sect called the Mâyminyâîa which backed the heretic Abu 'l-Khâṭîb [q.v.], teaching the divinity of 'Ali. Later anti-Ismâ'îlî authors greatly elaborated Ibn Râzîm's story and added to the catalogue of his heresies. Akgûzâ Muhsîn (writing ca. 573/983) calls him Maymûn b. Dâyân, making him a son of Barâzâsh, another son called Abân al-Shâhdî (d. ca. 509/1115) gives him the kunya Abû Shâdî, evidently identifying him with a Dâyânî of the time of al-Sâdîk notorious in Imâmî tradition. Muhammad b. al-Hâsân al-Dâyâmî (writing in 707/1307) calls him Maymûn b. Dâyân al-Kaddàh al-Ahwâzî al-Fârsî and asserts that he appeared in Kufa in 176/792 after having been nominally converted to Islam by al-Sâdîk. All these accounts are caricatures of pure fiction.

Ibn Râzîm's story is based, however, on information from Kannât Ismâ'îlîs' sources. There is clear evidence of a wide-spread belief among Ismâ'îlîs in the pre-Fâtimid and early Fâtimid age that the leadership after the disappearance of Muhammad b. Ismâ'îl b. Dîsîfîr had been transferred to one 'Abî Allah b. Maymûn al-Kaddàh, who was not of 'Abîl ascendant. He and his successors were not Imâmîs, but lieutenants (khâlîfîs) of the absent 'Imâm pending his return as the Mahdî. Against this, Fâtimid Ismâ'îlî tradition maintained that the name Maymûn had been used in the missionary activity for the Imâm to conceal his identity and that the ancestors of the Fâtûmids, though claiming merely the rank of hâdîthîs, were in fact the Imâmîs.

F. al-Hamdani, On the genealogy of the Fatimid Caliphs, Cairo 1958; W. Madelung, Das Imamiat in der frühen islamischen Literatur, in ILS, xxxii (1961), esp. 73-80; A. Hamdani and F. de Blois, A re-examination of al-Mahdi's letter to the Yemenites on the genealogy of the Fatimid Caliphs, in JRAf (1983), 173-207.

MAYMûN-DIZ, a castle of the Ismâ'îlîs [see ISMâ'îLÎYYA] in the Alburz Mountains in northwestern Iran, the mediaval city of Daylam [q.v.].
Rahjîd al-Dîn states that it was built in 490/1097 by the Grand Master of the Assassins Hasan-i Sâbbâb or by his successor Kîyâ Buzurg-Ummîd in the early 6th/12th century. Dhûwaynî, tr. Boyle, II, 621-36, cf. M. G. S. Hodgson, The order of the Assassins, The Hague 1955, 255 ff., has a detailed account of the fortress's reduction by the Ikhwân al-Hülegî in Shawkîâ 654/November 1256. The Mongols besieged it briefly till it was surrendered by the last Grand Master Rûkîn al-Dîn Khârî-Shâh, who had latterly resided there with his treasury instead of at Alamût [q. v.]: they then went on to capture the latter fortress.

In 1539-41, Willey identified the site as an easily-defensible plateau some 1,500 ft. 457.2 m., with extensive caverns and standing buildings, just north of the village of Shams-Kîlîyâ in the valley of a right-bank affluent of the Alamût-Rûd, itself running into the Shâh-Rûd-Sâfîd-Rûd river system (contra Ivanow's tentative identification of Maymûn-Dîz with the modern place Nawizar-Shâh).

MAXMUNA BINT AL-KHALIL, the last wife that Muhammad married. She stemmed from the Hâwâzîn tribe of ʿAbî Ṣâma and was a sister-in-law of al-ʿAbbâs. After she had divorced her first husband, a Thâkâfi, and the second, the Kurâshî Abî Rukm, had died, she lived as a widow in Mecca till it was surrendered by the last Grand Master Rûkîn al-Dîn Khârî-Shâh, who had latterly resided there with his treasury instead of at Alamût [q. v.]: they then went on to capture the latter fortress. In 1539-41, Willey identified the site as an easily-defensible plateau some 1,500 ft. 457.2 m., with extensive caverns and standing buildings, just north of the village of Shams-Kîlîyâ in the valley of a right-bank affluent of the Alamût-Rûd, itself running into the Shâh-Rûd-Sâfîd-Rûd river system (contra Ivanow's tentative identification of Maymûn-Dîz with the modern place Nawizar-Shâh).

MAYSALUN, the kingdom of the branch of the Tigris along the lower Tigris River in southeastern al-ʿIrâk. This region is called Mâṣûn by Strabo, Mâṣûn in the Babylonian Talmud, Maysan in Syriac, Mâṣûn in Middle Persian, Mâṣûn in Armenian, Maysân in Arabic, and Mâςûn in the Han sources. The earliest references from the first century A.D. indicate that Mâṣûn was an ethnic toponym, the land of the Mâṣûni people. These people lived along the Arabian side of the coast at the head of the Persian Gulf (Maṣûnîs kôlûs in Ptolemy). Whether or not these people were Arabian themselves, some of them lived at Ghrâa, and their land was regarded as lying along the ethnic border with Arabs. Arabic has the nîbas Mâṣûn, and Maysân, the latter from the Persian plural for people.

Ancient Mesene lay between two branches of the lower Tigris, but its exact extent was subject to change and is therefore difficult to determine. Pliny explicitly states that Mesene extended 125 miles up the Tigris to where overflow water from the Euphrates reached the Tigris. Whether or not these people were Arabian themselves, some of them lived at Ghrâa, and their land was regarded as lying along the ethnic border with Arabs. Arabic has the nîbas Mâṣûn, and Maysân, the latter from the Persian plural for people.

of a more extensive Maysan survive in the Arabic-writing geographers. Ibn Rustah calls Djabal, at the Tigris end of two large canals coming from Sûrû, one of the cities of Maysan. Yâkût describes the district of Kaskar [q.v.] as overlapping Maysan and extending from the lower end of the Nahrawân canal to the sea. To the extent that ancient Mesene was identified with Chaldea, it bordered on Babylonia in the west and the Chaldaean Lakes in the southwest. To the north it overlapped Djukhu [q.v.], which normally lay along the left bank of the Tigris, probably as a result of changes in the course of the river. It extended to Elymaïa [Khzoektûzîn] [q.v.] in the east, but this border was also subject to change. The town of Huwayza (modern Hawîza [q.v.]) was once part of Maysan, but by the 8th/14th century belonged to Khuzistan.

Politically, ancient Mesene was identical with the Hellenistic kingdom of Characene (ca. 129 B.C.—ca. 224 A.D.). The region between Babylonia and the Gulf coast had formed an administrative division (but not an eparchy) of the Seleucid state in the 3rd century B.C. called the territory of the Erythraean Sea. Alexander the Great had settled Macedonian veterans at a city called Alexandria which he founded above the confluence of a former course of the lower Karkeh River with the Tigris, 1¼ miles from the coast. After this city was destroyed by fires, Antiochus IV (175-164 B.C.) restored it by 166-165 B.C., called it Antiochia, and put Hyspaodanucus, son of Sagadonanus, king of the neighbouring Arabs, in charge of it and its territory. The latter became independent between 141 and 139 B.C., and in 129 B.C. built new embankments to protect the flood-damaged city, renaming it Charax Spasionoû (“the palmisde of Hyspaosines”) as the capital of Characene. In 127 B.C. he defeated the Arsacid governor of Babylon and occupied Babylon and Seleucia briefly, but was defeated by Mithradates II in 121 B.C., after which he and his successors continued as rulers of Characene subject to the Parthians.

Charax is transcribed as Karak Aspasinâh (KRR 3SPSN) and identified as Kârkâ dê Mêşêhan (KRRK DY MYSN) in Palmyrene inscriptions of the 1st and 2nd centuries. It was called Karak âhê Mayshân in Syrian and Karsh Maysan in Arabic. Its site, formerly sought in the vicinity of Muhammara, has been convincingly identified by Hansman with modern Djabal Khayâbij near the left bank of the Shâtât al-Ârab. By Pliny’s time, Charax was 193 km. from the coast although the tide went upstream far beyond it. The left bank of the lower Tigris was inhabited by Chaldeans, the right bank by Arabian brigands called Attali beyond whom were nomadic Scenitae. T’iao-Tche is described in Han sources as a hot, low, densely populated, rice-growing region with lions, rhinocerous, zebu, peacocks, ostriches, and clever jugglers. Strabo adds the production of barley, sesame oil, and dates. By the 1st century B.C., Charax was a major commercial centre where Indian ships met caravans from Petra and Palmyra. In the 1st century A.D., caravans from Petra arrived at the town of Forat 11 or 12 miles downstream from Charax. Its site was either near the modern town of al-Tamûma on the left bank of the Shâtât al-Ârab, or, according to Hansman, at Maghlûb, 17.4 km. (10.8 miles) southeast of Djabal Khayâbij. Apologists (al-Ubulla) also appears as an emporium on the right bank of the Shâtât al-Ârab opposite Forat at âÂshâr, the modern port of al-Basra, in the 1st century. Copper, sandalwood, teak, ebony, spices and gems were imported from Barygaza in Gudjarat through Apologists, while Characene merchants exported pearls, clothing, wine, purple, dates, gold and slaves. In the winter of 115-16, Trajan occupied Characene briefly, collecting tribute from Antemboolus V, after which he returned to Arachosia and Maysan.

In ca. 224 Charax fell to Ardashir I (ca. 226-41), the founder of the Sasanid dynasty, who killed the king of Characene and made his own son, Mihrâhsh, ruler of Maysan. Although it is claimed in Arabic literature that Ardashir refounded Karêh Maysan as Astarâbâdhar Ardashîr, this name has not been found in Sasanid inscriptions. Under Shapur I (ca. 241-73), his eldest son, Shapur, and the latter’s wife, Dahrâdsh, were king and queen of Mihrâhsh. A certain Atrofar-nabag is called Mîshân Shâh in Narseh’s inscription at Paikuli, and the Babylonian Talmud mentions a governor (qandârîn) of Mihrâhsh. However, Shapur I is said to have formed a separate district called Shâdsh Sâbûr in northwestern Maysân around the city of Kaskar which had its own qandârîn.

By the 3rd century, the formerly pagan population of Maysan was mixed with Jews, Magians, gnostics and possibly Christians. The priest Khosrâv claimed to have established Magians and sacred fires there, and the title of magopat of Mîshân inscribed on a gem indicates the establishment of the priestly hierarchy. Jews of mixed descent were scattered throughout Maysân, and the gnostic, baptist sect called al-Mughithasîla located there was joined by Marie’s father, Marie [see Marie b. Khosrâv] grew up in this sect, and Mihrâhsh, the governor, was one of his earliest converts and supporters. Whether or not Christianity was carried to Maysân in the 1st century by the apostle Marie, as legend claims, by the year 310 Prâgh di Mayshân (al-Parât) was the sec of the metropolitan bishop of Mayshan. By 410 there were suffragan bishops at Karakh dîh Mayshân, Rimâ and Nahârgir.

Ammonius Marcellinus describes huge groves of date palms extending from Babylon to Mesene and in the sea in the 4th century, and reports that Mesene was included in the province of “Assyria” that embraced all of lower Mesopotamia in the middle Sasanid period. In the 3rd and 4th centuries, Mêsân remained a centre for the import of spices, drugs and textiles. In this sector, in addition to silk and cotton cloth and steel, Kushân coins found in Mîshân also testify to trade with northern India.

Conditions in Maysan were transformed when the lower Tigris began to shift from its former course below Fam al-Âsilh, which had gone via Bâdhshin and Abdasî to al-Madhar. During floods in the reigns of Bahram V Gür (420-30), Kubâsh b. Fîrûz (480-96, 498-9/531), and under Khosraw II in 7/628, the lower Tigris burst its banks and changed its main course to the Dudjâval/Shatât al-Akkhâdh sh (aka the Nahr Gharra/Shatât al-Hayy as formerly thought) which went via Kaskar into the swamps (al-Âlqadh [q.v.]). Western Maysan was turned into swamps, northern Maysân and south-eastern Dzhukhâ into desert, and Maysan was reduced to the territory along the former course of the Tigris below al-Madhar called the Blind or One-Eyed Tigris (Djilât al-Àwrâ). What remained of Maysân formed the district of Shêtsh Bahamsh and was put in the Quarter of the South when the Sassanid empire was reorganised in the 6th century. Al-Parât, said to have been refounded as Babylon Ardashîr I, may have become the capital. By extension, Yûkût identifies Babylon Ardashîr, Arabised as Bahmânghir, also called Furât al-Parât, as the entire region ( racist). The Tigris estuary from al-Maifa and al-Ubulla to Abkhâdsh was also called Bahmânghir by the Persians, accord-
ing to al-Maysan, similar to Bamishir for a branch of the lower Karun [q.v.]. Vahman Ardashir is first attested in 544 as the successor of the Nestorian patriarch of Maysan. The biographies of Abul-Rasul of Rmā and Karkhādīh in Maysan are last attested in 605. N'hargūr (as N'hargūr) in ca. 23/644-6, although Fiey has argued for the survival of the latter two names. None of the late Sassanid mint-marks ascribed to al-Furat, Karkhādīh or Maysan is conclusive. The subdivisions of this district at the time of the Muslim conquest were Bahman Ardashir around al-Furat, Maysan, Dasṭ-i Maysan and Abarkubābūd. In Saʿfar 12/653, Khālid b. al-Walid took al-Ubulla, invaded Maysan and defeated Persian forces at al-Mādhār. After his victory at Buwayb about two years later, al-Muḥarramā b. Ḥāritā also sent forces to Maysan and Dasṭ-i Maysan. The actual conquest was undertaken by Uṭba b. Ghazwān in 14/635 and the spring of 15/636. Uṭba defeated and captured the ruler (shāh) of al-Furat, took al-Ubulla and al-Furat, conquered Maysan, defeating and killing the marzubān [q.v.] at al-Mādhār; Abarkubābūd; and Dasṭ-i Maysan, defeating its marzubān. After Uṭba withdrew to al-.Busra, the Mughābīr b. Shūbā [q.v.] pacified Maysan and Abarkubābūd again, killing the marzubān or dhīhān. The captives taken in Maysan included Ḣāsār, the father of al-Hāsan al-ʿUṯba b. Ghazwān, who was taken to the high place, and Artabān, the grandfather of Abd Allāh b. Awān b. Ḥāṭabān, who lived at al-Busra. Some captives from Maysan were released at Ṣumār's order. In 18/639 the Ḥurrūzān raided Dasṭ-i Maysan and Maysan from Khūzistān, taking captive Abraham, Nestorian bishop of Purāḏ, but was driven out by Abū Mūsā al-Aḫsāʿī, the governor of al-Busra. Abū Mūsā is also credited with establishing the Tigris districts (Kuwar or Kāna Dīlijī) along the Dījīlat, which may stand for Dasht-i Maysan. Post-reform dirhams were struck at al-Furat from 81/700-1 to 97/715-6, in Maysan from 79/698-9 to 97/715-6, Abarkubābūd in 93/702 and 96/714-5 and in Dasṭ-i Maysan in 80/699-700, followed by Manādhir from 81/700 until 96/714-5. By the 3rd/9th century, al-Ubulla was the administrative centre for the Kūra Dīlij, which may be why Ibn Khūzistānī al-Mubāyṣirī and Yūsuf Ibn Maysan with al-Ubulla. The Nestorian metropolitanate of Purāḏ & Maysan survived well into the Islamic period, and is first identified as the metropolitanate of al-Busra in 17/749/70. The bishopric of Abdāsī, attested in 17/749 and ca. 215/830, however, was in the patriarchal see of Baḥgādī. Some natives of Maysan, such as Anbasa b. Maʿḏūr, who settled at al-Busra shortly after its foundation. They were generally called Banū ʿĀmm and settled with the Banū Tamīm. Maysān origin (accurate only in the broadest sense) was attributed to the family of Ziyād b. Abīhi [q.v.] in a derogatory way by the poets al-Farazādāk and Ibn Mufarrigh. Al-Akhtar used attribution to Azkubābūd as an insult. However, Sahil b. Hārūn [q.v.], a native of Maysan who settled at al-Busra and was appointed governor of Maʿmūn (197-218/813-33), praised the people of Maysan in a kind of feeling of regional shuʿayba [q.v.]. The Muslim belief that God exiled Iblīs to Maysan after the temptation of Adam and Hawwāʾ (Eve) may have been related to these attitudes. Early Islamic land reclamation and development around al-Busra extended into Maysan. Ziyād granted an estate on the Gulf coast north of the estuary to Humrān b. Abān, who subsequently gave the western part of it to Abībād b. Husayn al-Habībī, after whom the entire estate and the town that grew there came to be called Abābdān, considered as the southernmost limit of Maysan. Under Sulaymān (98- 8/715-17), Yāzīd b. al-Muhallāb reclaimed land from the Bāṭāʿī in Kaskar and the Kūra Dīlij with imported Indian labour (Zutt [q.v.]) and at least 4,000 water buffaloes (qūššāmī). Under al-Raṣīd (176- 93/786-908), the villagers of al-Shuʿaybiyā in the subdistrict of al-Furat turned their property, which then became the property of the caliph’s son ‘Alī, and became sharecroppers paying a lower rent than before. A slave of al-Raṣīd called Ghālsīb is also said to have built a fort (bīn) just west of Abābdān at Bīrīm (modern Bīrīm Abābdān or Abābdān al-Ḥaḍījī). East African slaves (Zanj [q.v.]) were also imported by the Forūd b. Ḥarkīr. In 70/689-90 and 75/695 they gathered at al-Furat, and, joined by people from the river harbour, devastated
the countryside. During the great Zandj revolt in the 3rd/9th century, they were again supported or joined by the people of al-Perfūt and the villages of Djbba and Dja'fariyya. In 254/668 the Zandj invaded Maysan, then al-Khūzistān, took Dja'fariyya and Karyat al-Yahūd, and attacked al-Madhār unsuccessfully before turning south-east to ʿAḥbābān. In 267/880-1 al-Muwaṭṭak, the brother of the caliph al-Muẓaffar, took Dja'fariyya and was supported or joined by the people of al-Madhār, was again ravaged the subdistricts of Maysan.

In spite of such conflicts, in the 4th/10th century ʿAbdābān and al-Madhār were small cities and palm groves extended continuously for over 20 farāshu (241 km.) from ʿAbdābān to ʿAbadasi. A low-grade silk trade was produced in Maysan; dyed cloth and cushions were exported, and Maysanī clothing was produced at Djaḥbul. After flowing into the Baṭtah, Tigris water emptied into the Didjlat al-Awrāʾ via branching channels such as the Nahr Abī ʿl-ʿAsad, the Nahr al-Maʿā (possibly the Baṭtih Šīrīn) in the vicinity of al-Madhār, and the Nahr al-Yahūd. The tide came upstream as far as al-Madhār. Nahī Ḏīr lay on the old course of the Tigris between ʿAbadasi and Darmākān and may have extended eastwards towards Khūzistān. The Muḥtasila (now called Šabāt al-Baṭṭābī) were still numerous in the swamps and may have been the same as the Ṣāḥibān sect [q. v.] called al-Kimārīyyūn that al-Muḥaffal says lived in or near the swamps between Wāṣīt and al-Ḍaḥra. The Maḥrānī sect, reputedly formed in Maysan in late Sāsānian or early Islamic times, grew out of this milieu.

Al-Madhār remained locally important. In 329/941 the ʿamīr Baḍīqam [q. v.] sent Tūzān there with an army, where he defeated the forces of Abū ʿAbd Allāh al-Barīd, while Baḍīqam himself drove the Kūds (Armenian christians) [q. v.] and seized Khadhkhādī against the Barīdiyya there. In 409/1018 the Būdīn Sūlān al-Dawla set out from there in pursuit of al-Ḥasan b. Dhiby al-Asādī, and when Djaḥl at-Dawla’s army defeated his rival, Abū Kāḥdīr [q. v.], there in 421/1030, his partisans took over the town. In about 443/1051, Nāṣir-i Khusraw states that at-Muḥaffal says lived in or near the swamps between Wāṣīt and al-Ḍaḥra. The Maḥrānī sect, reputedly formed in Maysan in late Sāsānian or early Islamic times, grew out of this milieu.

Al-Madhār remained locally important. In 329/941 the ʿamīr Baḍīqam [q. v.] sent Tūzān there with an army, where he defeated the forces of Abū ʿAbd Allāh al-Barīd, while Baḍīqam himself drove the Kūds (Armenian christians) [q. v.] and seized Khadhkhādī against the Barīdiyya there. Dhiby al-Asādī, and when Djaḥl at-Dawla’s army defeated his rival, Abū Kāḥdīr [q. v.], there in 421/1030, his partisans took over the town. In about 443/1051, Nāṣir-i Khusraw [q. v.] noted that ʿAṭr Maysān (possibly Karīẖ Maysān) and Maḥgān were subdistricts of al-Ḍaḥra. Maḥgān was just above al-Bāzra and was also known as the birthplace, in 446/1054, of the author of the ʿAṣār in al-Ḍaḥra. The Maḥrānī sect, reputedly formed in Maysan in late Sāsānian or early Islamic times, grew out of this milieu.

According to Yākūṭ, in the 7th/13th century, the Tigris divided into five main channels below Wāṣīt: the Nahī Śāsī (possibly an orthogonal error for Basāmī), Nahr Ghārāf, Nahr Djaʿfar, Nahr Dakaī and Nahr Maysān (possibly the Nahī Tūlīyāthā according to ElʿAṭī). They reunited near the village of Matūra, one day’s journey from al-Baṣrā, where the Euphrates joined them. Yākūṭ defined the Didjlat al-Awrāʾ as the combined stream from Matūra to the Gulf. He describes Maysān as “an extensive district with numerous villages and palm groves between al-Ḍaḥra and Wāṣīt.” Its main town (madīna) was Maysān, and its capital (baṭla) was al-Madhār, four days’ journey from al-Ḍaḥra. Al-Ḥarrāt, across the river from al-Madhār, was a well-watered village on solid ground with many date palms, fruit trees, and chickens. Below al-Madhār, on the Nahr Maysān, was the small town (bulāyda) of al-Bazzāz; al-Ḍaḥra lay in ruins. The people of al-Madhār were all Shīʿīs, and a splendid shrine (maqdaḥa) there, where Abū Allāh b. Abī b. Abī Tallīb was buried, was the object of endowments (mukāfāt) and votive gifts (nughūr). This shrine is located on a slight rise east of the Tigris, within a river bend, just below modern Kaʿf al-Ṣāliḥ near the ruins of al-Madhār about 48 km. directly north of modern Kurna. In March 1927 Streek found a domed tomb there, visible at a great distance, standing in the eastern end of an oblong courtyard that was entered through a door in the north wall. A descendant of the Imam Mūsā al-Kāẓīm [q. v.] is also said to be buried at Abī al-Qāhirī, on the west bank of the Tigris 100 km. above al-ʿAmāra, and a descendant of the Huṣayn b. Abī at-ʿAlī al-Shārīk, about 38 km. away on the east bank. At an undetermined time, most of the people of ʿAḥbābān, having been ʿShīʿī, became ʿShīʿīs. According to al-Kazwīnī, the people of Maysān district were fanatical (ṭabāqah ʿShīʿī). Yākūṭ also describes the tomb of Ezzah (al-ʿUzayr) which he visited at the village of Nahī Šāmura (popularly called Simmara) in ard Maysān as tended by Jews and as the object of endowments and votive gifts. Modern al-ʿUzayr is a large village on the west bank of the Tigris about 33 km. south of Kaʿf al-Ṣāliḥ.

Abū ʿl-Fidāʾ calls Maysān a small town (bulāyda) in the lower part of ard al-Ḍaḥra, but after the 8th/14th century this name passed out of use. Al-ʿAmāra [q. v.] was founded in 1277/1860 at a place called al-Awrādī from the 10th/16th century onwards. Kanūn no. 48, in 1969, changed the name of the ʿAmāra Liwaʾ to Maysān.

Seven winning arrows

(1) One winning arrow (fard), each bearing a name and with notches (fard or badd), by which they were identified; and

(2) Three or four white arrows (ghub, aghfd), neither winning nor losing.

The winning arrows were named:

(1) al-Fadlul, "the single (arrow)", bearing one notch and winning or losing a single piece ( = 1/28), or losing ( = 1/28).

(2) al-Taw'am, "the twin (arrow)", bearing two notches and winning or losing two parts ( = 2/28).
(3) al-Rakib, also called al-Darīh, “the (arrow of the) supervisor” of the game or of the “thrower” of the lots, bearing three notches and winning or losing three parts (= 3/28).

(4) al-Hlis or al-Halīs, “the dressed” or “equipped” or even “strong (arrow)” (cf. Hebrew b-t-s and hemes), bearing four notches and winning or losing four parts (= 4/28).

(5) al-Nafs, “the precious” or “coveted (arrow)” (name sometimes given to the fourth arrow), bearing five notches and winning or losing five parts (= 5/28).

(6) al-Muṣābah, “the long and flat (arrow)”, also called al-Mudīrī, “the elongated (arrow)”, bearing six notches and winning or losing six parts (= 6/28).

(7) al-Muṣāllāh, “the superior (arrow)”, also called al-Mīghlīkh, “the (arrow that) closes”, a name also given to every winning arrow, bearing seven notches and winning or losing seven parts.

The white arrows bore no notches and their purpose consisted in slowing (nakhkhil) the game and making it more difficult. They are, in fact, “rivets”; every time that one of them was drawn, it was immediately replaced in the quiver; thus chances for the successive drawing of notched arrows steadily diminished. These were three in number, called:

(1) al-Saffi, “the profitless (arrow)” (name given to the fourth by al-Lībīyānī, who puts al-Muḥaddar in the first place). Considering the root, it seems that the shooter would receive the blood of the victim.

(2) al-Manbīz, “the generous (arrow)”, considered to be of good omen; its repeated return to the quiver was a portent of success. The shooter could receive the hide of the victim (cf. TA, ii, 234, 11. 21 f.).

(3) al-Waqīdh, “the sounder” or “(arrow of) the miser”, particularly he who does not take part in the game, afraid of losing; it has the synonym al-Baram.

(4) Some place a fourth arrow after the first (TA) or alter the second (al-Lībīyānī, al-Nuwayrī), called al-Mudīṣaf of “the double (arrow).”

The players could not be more than seven in number; when they were fewer than seven, they needed to buy the remaining parts in order for the game to take place. The player who bought these parts was called al-Tamīmī “he who completes”. When he won twice in succession he was called mutammīm, generously donating his winnings to his entourage, whence the laudatory title of muḥannā ‘l-ayyidī applied to him, as well as to the one who purchased the parts which had not been won to give them to the poor. It is to this charitable act that certain commentators attribute the term manāfī “advantages”, which the Kurān uses in speaking of mayṣir and of wine (II, 219).

The players of mayṣir were called al-ayyār (sing. yasar), and those who presided over the division of the parts al-yāṣrān. The archer, called al-hūdā, had his right hand wrapped in a piece of leather or fabric in order to prevent him identifying the arrows by touch. A piece of white fabric, called al-muḍjāwāl, was held above his hands and a rakīb or “supervisor” stood close beside him, passing him the quiver containing the arrows when the face of the hūdā was averted. Having taken it, the latter inserted his left hand (al-yāsri) under the muḍjāwāl, shook (yukkārīt) the arrows, revealed them to view (nahadha) one after the other and handed them to the rakīb (for references, see Būtī).

This is the essence of what is known concerning the practice of mayṣir, the details of which had been forgotten by the Bedouins questioned in the first half of the 3rd/9th century by Abū 'Ubayd al-Kāsim b. Sallām al-Ḥarawī (d. 223/837) (cf. T. Fahd, Deinaten, 208, n. 2). The reason for this forgetting lies in the prohibi-

tion by the Kurān, which, in two instances (II, 219 and V, 90) forbids it together with wine, while acknowledging in both certain “advantages” (manāfī). They are seen, primarily, as a diversion from prayer and, subsequently, a factor of divisiveness and animosity among the faithful (v. 91). But, being condemned along with anṣāb (idoles) and azāmā (divining arrows), they are considered “impure” practices (riḍsī) belonging to pagan cults (v, 90), and thus it may be supposed that the victims divided up for drawing by lot were originally blood-sacrifices offered to deities.

Bibliography: The present article is an abbreviated form of the analysis of mayṣir presented in T. Fahd, La divination arabe. Études religieuses, sociologiques et folkloriques sur le milieu natif de l'islam, Leiden 1966, 204-13, where the reader will find complete references to the numerous sources and studies used, among which the following are especially worthy of mention: Ibn Kutayba, K. al-mayṣir wa l-kiddād, ed. Muṣlib al-Dīn al-Khātībī, Cairo 1342/1923; Nuwayrī, Nihāyāt al-arak, iii, 114-15 (German tr. and comm. by A. Huber, Über das „Mayṣir“ genannte Spiel der heidnischen Araber, Arab. text with Latin translation by Rasmussen, Additamentum, 67/61). FAHD)

MAYSŪN, daughter of the Kalb chief Babdāl b. Unayf q. āj., mother of the caliph Yazīd I. We do not know if after her marriage with Muṣwā’īya she retained the Christian religion which had been that of her family and of her tribe. A few verses are attributed to her in which she sighs for the desert and shows very slight attachment for her husband (see Noldeke, Delectus, 25). But the attribution to Maysūn of this fragment of poetry, which is in any case old, has been rightly disputed. She took a great interest in the education of her son Yazīd and accompanied him to the desert of the Kalb where the prince passed a part of his youth; this temporary separation from his wife gave rise to the legend of her repudiation by Muṣwā’īya. She must have died before Yazīd became caliph.

Bibliography: Given in Lammens. Études sur le règne du calife omeyyade Mustawwīa I, in MFPOR, iii (1906-8), 286-7, 305, 312-14. (H. Lammens)

MAYSÌR [see MAHÆSÛR]

MAYTA (λ.), feminine of mayt, dead (used of irra-

tional beings); as a substantive it means an animal that has died in any way other than by slaughter. In later terminology, the word means firstly an animal that has not been slain in the ritualistically prescribed fashion, the flesh of which therefore cannot be eaten, and secondly all parts of animals whose flesh cannot be eaten, whether because not properly slaughtered or as a result of a general prohibition against eating them.

In addition to sūra XXXVI, 33, where mayta appears as an adjective, the word occurs in the following passages in the Kurān in the first of these meanings: XXI, 116: “He has forbidden you mayt, blood, pork and that over which another than Allāh has been invoked; if however anyone is forced [to eat these] without wishing to transgress or sin, Allāh is merciful and indulgent” (from the third Meccan period, since VI, 119 may refer to this context and the appearance of the same exception for cases of coercion in VI, 146
MAYTA 925
(cf. below) is then only easily explained in view of the whole trend of the passage, if there were an earlier passage, namely XVI, 116, in which it was given full justification; cf. Nöldeke-Schwally, Geschichte des Qorāns, i, 146-7; Grimm, Muḥammad, ii, 26, transfers the whole sūra to the later Mekkan period; VI, 140: 146: "They have said: 'What is in the womb of this cattle belongs to the males, and is forbidden to our females'; but if it is mayta (stillborn), all have a share in it ...

Say: I find in what is revealed to me nothing forbidden, which must not be eaten, except it be mayta or congealed blood or pork—for this is filth—or a slaughter at which another than Allah is invoked, and that which has been strangled, killed by a blow or a fall, or by the horns [of another beast], that which has been eaten by wild beasts—with the exception of what is made pure—and that which has been sacrificed to idols ...

But if anyone is forced to eat it without wishing to commit a transgression or sin, thy heart is merciful and indulgent" (of the third Meccan period; cf. Nöldeke-Schwally, i, 161; Grimm, ii, 26); II, 168: "He has forbidden you mayta, blood, pork and that over which another than Allāh is invoked but if anyone is forced to eat it without wishing to commit a sin or transgression, it is not reckoned as a sin against him; Allāh is merciful and indulgent." (from the year 2 of the hijra, before the battle of Badr; cf. Nöldeke-Schwally, i, 178; Grimm, ii, 27): vv. 4-5: "Forbidden to you is mayta, blood, pork, that over which another than Allāh is invoked, and that which has been strangled, killed by a blow or a fall, or by the horns [of another beast], that which has been eaten by wild beasts—with the exception of what is made pure—and that which has been sacrificed to idols ...

... But if anyone in [his] hunger is forced to eat of them without wishing to commit a sin, Allāh is merciful and indulgent" (in all probability revealed after the valedictory pilgrimage of the year 10; cf. Nöldeke-Schwally, i, 227-8; Grimm, ii, 28, dates the sūra to the year 7).

It is quite evident from sūra, XI, 140, that the mayta was of some significance for the Mekcans in the many laws about food with which Arab paganism was acquainted (cf. Wellhausen, Reste arabischen Heidentums, 168 ff.). Although it is no longer possible to define exactly the part it played (even the statements recorded by al-Tabarī from the earliest interpreters of this passage, which moreover only refers to a detail, reveal the complete disappearance of any significance it may have had), it is not misgiving that the Kurʾānic prohibition contained a corresponding pre-Islamic prohibition, although it perhaps modified it. Both go back to the religious reluctance to consume the blood of animals, and indeed in all the Kurʾān passages quoted, blood is mentioned alongside of mayta. It is unnecessary to assume that Muhammad was influenced by Judaism on this point, and the suggestion may be rejected especially as the prohibition in its stereotyped form occurs again in sūra II, 168, just at the time of vigorous reaction against Judaism, and in sūra VI, 147 (Medinan, a late insertion) which contrasts the prohibition of mayta, etc., with the Jewish laws relating to food. The meaning of mayta is explained in the latest passage dealing with it, v. 4: in the second half of the verse the principal kinds of mayta are given (with the exception of the animal that dies of disease), which had already been mentioned in general terms; the commentators were thus able to interpret the single cases given as examples wrongly as being different from the mayta proper. The purification (in the Kurʾān only mentioned in this passage) must mean ritual slaughter, by which, even if done at the last moment, the animal does not become mayta but can be eaten.

These prescriptions of the Kurʾān are further developed in the traditions. According to the latter, it is forbidden to trade in mayta or, more accurately, its edible parts; some traditions (mainly on the authority of Ahmad b. Hanbal) even forbid any use being made of all that comes from mayta; others again expressly permit the use of hides of mayta. An exception from the prohibition of mayta is made in the cases of fish and locusts; these are in general considered as the two kinds of mayta that are permitted, i.e. no ritual slaughter is demanded in their case (because they have no "blood", cf. above). While some traditions, extending this permission by the earliest kūfiyy, say that all creatures of the sea, not only fishes, can be eaten without ritual slaughter, including even seafood (in this case it is said that "the sea has performed the ritual slaughter"); others limit the permission to those animals and fishes which the sea casts up on the land or the tide leaves behind, in contrast to those which swim about on the water. But there is also quoted a saying of Abū Bakr expressly declaring what swims on the surface to be permitted. In this connection, we have the story of a monster cast up by the sea (sometimes described as a fish) which fed a Muslim army under the leadership of Abū ʿUbayda when they were in dire straits; but in this tradition and in the interpretation that has been given it (that they only ate of it out of hunger i.e. took advantage of the Kurʾānic permission for cases of need) is clearly reflected the uncertainty that prevailed about such questions which were on the border line. In the traditions, we find it first laid down that portions cut out of living animals are also considered mayta. The way is at least paved for the declaration that all forbidden animal-dishes are mayta. The regulations found in the Kurʾān appear again here, e.g. the permission to eat mayta in case of need and to slay properly dying animals at the moment to prevent them becoming mayta.

Some traditions handed down through Ḥammād from Ibrāhīm al-Nakhrāʾi bring us to a somewhat later period (in the Kitāb al-ʾAlḥāʾ: one says that of the creatures of the sea, only fishes can be eaten; another, which is found in two versions, limits the permission to what is thrown up by the sea or left behind by the tide; ritual slaughter is not demanded in this case. The question whether the embryo of a slaughtered dam remains a "sacred purification", i.e. is ritually polluted, is raised in one tradition and decided in the affirmative. The most important regulations of Muslim law about mayta, which express the last stage of development, are as follows. It is unanimously agreed that mayta in the legal sense is impure and "forbidden" (ḥaram), i.e. cannot be eaten, and also that fish are exceptions to this; the Mālikis and Ḥanbalis also except the majority of creatures of the sea, and according to the more correct Shāfiʿi view, this applies to all marine creatures (the Ḥanbalis here hold the opinion of Ibrāhīm al-Nakhrāʾi, except that the two ideas of "thrown up" and "swimming on the surface" are later overlaid and destroyed by the to some extent synonymous phrase "slain by another cause", "died of itself"). The edible parts of mayta are also mayta, as are the bones, hair etc. among the Shāfiʿis, but not the Ḥanafis, and among the Mālikis only the bones; the hide, when tanned, is considered pure and may be used. Emergency slaughter (dhikātāt or taḍkīyāt; ritual slaughter in general is ḍhāibh or nahr) is, according to the Ḥanafis and the better-known view of the Shāfiʿis (also according to al-Zuhri), permitted, even if the animal will certainly die, provided it still shows signs of life at the moment of slaughter. According to the view predominant among the Mālikis, such slaughter is not valid and the animal becomes mayta (in contrast to Mālik's own view). The question of the
embryo (cf. above) is answered in the affirmative by
the Hanafis, following Ibrahim al-Nakhaci and... from
the 5th to the 7th/11th-13th centuries, an intensive
cultural activity (D. Urvoy, La vie intellectuelle et
aux écoles de droit de l’occident musulman de l’0/1 e à
16/25e siècles, 1991) until the end of the 7th/13th century,
made it a condition that the embryo should be fully
developed (Mālik himself also demanded its slaughter
"to draw the blood from it") in the case where the
embryo had been dropped). That anyone who is
forced to eat mayta may do so, is the unanimous opin-
ion; but on the questions whether one is bound to eat
mayta to save his life, whether he should satisfy his
hunger completely, or only eat the minimum to keep
life alive, etc., is there a difference of opinion. The
Shafi’is and Hanbalis further demand that one should
destroy these straits through illegal
action (a different interpretation of the Qur’anic
regulations).

MAYURA, MAJORCA OR MALLORCA, name of the
largest (umma) of the Balearic Islands (or
eastern islands of Mallorca: al-diqar’al-sharkiya),
the others being Minúrica (Minorca or Menorca)
and Yabisa (Ibiza). Its name figures as early as the Crónica
del Maro Rasis, ed. D. Catalán, 13. At approximately
the same distance from Ibiza to the west and from
Minorca to the east, it is situated four days’
sailing time from Sardina (Saragossa) according to al-
Himyarî (Maghrībi, text 214, tr. 266) and lasts until Bougie
(al-Himyarî, al-Raouf al-miṣr, text 188-91, tr. 228-
31). Al-Himyarî, Ibn Sa’id (Maghrībi, ii, 466) and al-
Zuhri (K. al-Dja’farîya, 177-9) differ as to the terrain of
the island. According to the testimony of this last-
named author in particular, and according to the data
supplied by Christian sources following the Catalan-
Aragonese conquest of the 13th century, the island,
which enjoyed a fine climate, was fertile and possessed
abundant resources, especially cereals, fruits, trees,
pack-animals, sheep and cattle, horses and mules, a
few goats, and also, for hunting, hares, rabbits and
foxes. Cotton and flax were cultivated there, but silk
was an imported commodity (Ibn Sa’id, in E. Fagnan,
ExtraitS inédits, 23, 24). Curiously there is no
mention of the olive and the raisin, but their existence
cannot be denied, nor that of the fig; cultivation of
these products, of little significance during the Islamic
occupation, was developed subsequently. A Flemish
document of the 13th century mentions rice as one of
the principal commodities exported from Majorca to
Flanders, but there is no evidence for the cultivation
of this product in the Islamic period. From the work
of al-Zuhri (178) and from other sources, it appears
that the town and the island were endowed with
a good defensive system and substantial buildings.

Nothing is known of the situation of Majorca and
its dependencies at the time of the first Arab incursions
into the western Mediterranean. It may reasonably be
assumed that it comprised a population which
was at first Romanised, later Christianised, of
Hispanic-Roman descent, and possibly some Jews.
In the K al-imāma wa-l-siyāsa (ed. T. M. al-Zāratī, n. p.,
n.d., i, 73), in the Annales of Ibn al-Aṣḥīr (33), the
Mughrīb of Ibn Sa’id (ii, 466) and the Anaelotes of
al-Makkāri (i, 177), there is mention of a first incursion
conducted in 89/707-8, from the direction of Hīrīya,
by the son of Mūsā b. Nuṣayr, 'Abd Allāh, who—
according to one of these sources—was the fā’īl
Majorçâ, who took possession of a rich store of booty.

Other sources, including Ibn 'Idhārī (Bagan, ii, text 89, tr. 145),
who speaks of a state of revolt and of a refusal to pay the
levies due for the years 234 and 235/846-50, give
the impression that, subjected to a treaty and required to
pay the dhizya and possibly other contributions, the
Majorcan refused on more than one occasion to live
for a considerable period of time in a state of
permanent or less nominal independence until the conquest
of the island in the time of the amir Muḥammad I (al-
Zuhri, 178) or until the arrival, in 290/902-3, of ʿljām
al-Khāwālīnī who contributed to the Islamisation of
the island by constructing hostleries, baths and mos-
ques (Ibn Khalīdūn, ʿIbr, iv, 164), all this after the
island had suffered, in 255/869, the devastating effects
of a Norman invasion. Majorca was a constant source of
difficulties for the Cordovan administration, to
such an extent that in 336/947-8 al-Nāṣir was obliged
to send his kātb ʿalīyar b. ʿUthmān al-Muḥṣafī
to restore order there (Bayān, ii, text 215, tr. 356). In
the 5th/11th century, there begins a new period in the
history of Majorca. Annexed to the kingdom of
Muḥjāhid (s.v.) of Denia (see Clelia Sarnelli Cerqua,
Muḥjāhid al-Ma’rīn kātib al-ʿarabī, 1977), the island was
inhabited by the Banū Ṣalāh (s.v.) and possibly other
contributions, the Almohads (see Clelia Sarnelli Cerqua,
Muḥjāhid al-Ma’rīn kātib al-ʿarabī, 1977) which was at first Romanised, later Christianised, of
the island by constructing hostelries, baths and mos-
ques (Ibn Khalīdūn, ʿIbr, iv, 164), all this after the
island had suffered, in 255/869, the devastating effects
of a Norman invasion. Majorca was a constant source of
difficulties for the Cordovan administration, to
such an extent that in 336/947-8 al-Nāṣir was obliged
to send his kātb ʿalīyar b. ʿUthmān al-Muḥṣafī
to restore order there (Bayān, ii, text 215, tr. 356). In
the 5th/11th century, there begins a new period in the
history of Majorca. Annexed to the kingdom of
Muḥjāhid (s.v.) of Denia (see Clelia Sarnelli Cerqua,
Muḥjāhid al-Ma’rīn kātib al-ʿarabī, 1977), the island became the cen-
tre of intense piratical activity. After the disappear-
ance of Ali b. Muḥjāhid and the incorporation of
Denia, in 468/1076, into the kingdom of the Banū
Ḥūd (s.v.) of Saragossa (Aflī Turk, El reino de Zaragoza
en el siglo XI de Cristo (V de la Hegír), Madrid 1978,
109-14), there followed, from 480 to 508/1087-1115,
some obscure years of independence during which the
islands, having undergone a devastating attack on the
part of the Pisans and the Catalans, were occupied by
the Almohavids. The rule of the latter, continued,
after their collapse and their disappearance from the
Iberian peninsula and North Africa, with the dynasty of
the Banū Qānīnaya (s.v.) until the occupation of the island by the Almohads in 599/1202-3 (see especially
al-Himyarî, al-Raouf al-miṣr, text 189-91, tr. 228-
31). The reign of the Almohads represents a period of
obscurity which lasted until the year 627/1229 when
James I of Aragon put an end to Islamic domination;
the last centre of resistance were crushed in Rabī’
I 628/January-February 1231.

Majorca was Islamised and Arabised from the 4th
to the 6th century/10th to the 12th, and under the
Almoravids and the Almohads its ethnic composition
became increasingly Berberised, a factor which has
left visible traces in the toponymy of the Balearic
M. Barcelo, De toponimia tribal i clàctica berber a les illes orien-
tals d’al-Andalus, Societat Onomàstica, Buttleti
interior, vii Colloqui Mallorca, April 1982, 426; A.
Poveda Sánchez, Introducción al estudio de la toponimia
árabe-musulmana de Mallorca, según la documentación de los
archivos de la ciudad de Mallorca (1232-1276), in Aesropa,
tii (1980), 76-100. Majorca displayed, especially in
the 7th to the 11th/13th centuries, an intense
cultural activity (D. Urvoy, La vie intellectuelle et
spirituelle dans les Baléares musulmanes, in And., xxxvii (1972), 87-132). The other islands were also conquered by the Catalan-Aragonese: Ibiza in 632/1235 and Minorca in 686/1287. 

Bibliography: Besides the works mentioned, see Guillaume Roselli Bordoy, L'Islanda e le Isole Baleari, Palma, Majorca 1968, which contains full references to the Arabic sources and puts into context the information supplied by the classic work of Alvaro Campaner y Fuertes, Bosquejo historico de la dominación islámica en las Islas Baléares, Palma 1888. (J. Bosch Vila) AL-MAYURKI, the nisba of several persons originally from Majorca (Mayurka [q.v.]) or residents of the island. In his Mudad al-baladání, iv, 720-3, s.v. Mayurka, Yákút mentions a certain number. 

In addition to al-Íhumaydi [q.v.], the best-known person with this last nisba, one should mention the name of Abu 1-Hasan‘Ali b. Ahmad b. ‘Abd al-Áziz b. Tunayz, who seems to have led quite a lively existence. According to Yákút, iv, 722-3, he was a good grammarian (cf. al-Suyútí, Bugháni, 327) who was also concerned with the Kur‘án readings; he naturally collected hadiths at Damascus, Basra and elsewhere. He is said to have gone to ‘Umán and the land of the Zanj, where he stayed for some time before returning to die at ‘Askímayn, near Baghdád (rather than at Basra, in Yákút’s second version) in ca. 475/1082. Two verses by him are cited by Yákút and al-Suyútí, but others are preserved in the Escorial ms. 467/2 (Derenbourg). See Brockelmann, S I, 479. Another Mayurkí worthy of notice is a Christian convert to Islam, Fray Anselm Turmeda, better known under the name of ‘Abd Alláh al-Tárdjumán [see al-Tárdjumáni].

(MAYY ZIYÁDA, pen name of MÁRÌ İLYÁS ZIYÁDA, pioneer writer of poetry in prose, essayist, orator and journalist in Arabic, French and English; translator from several European languages; and a zealous feminist who defended the case of Arab women’s education and freedom. 

Born in Nazareth on 11 February 1886 to a Lebanese Christian father who worked as a teacher and journalist, and a Galilee mother from a village near Nazareth, Mayy received a French education at St. Joseph’s School in Nazareth (1892-9), in ‘Ayníyurá in Lebanon (1900-4), and at the Lazarist Nuns in Beirut (1904-8). In 1908 her parents emigrated to Cairo, where her father was appointed as the editor of the journal al-Mahrusa. Her first literary work was a booklet of a collection of romantic poems and poems in prose in French, influenced by Lamartine and dedicated to him, entitled Fleurs de rône (Cairo 1911). It was published under the pseudonym of Isis Coppia. Djammal Djibr transformed it into Arabic as Azákhir h'lum (Beirut 1952).

In Egypt she studied various European languages and European romantic poets and writers, and became interested in European feminist activities. She also came under the influence of Arabic Islamic culture, especially through Lutfí al-Sayyid [q.v.]. She published four volumes of Mahrus novels by European writers which she translated into Arabic, and later these were published in book form. Some of these were from the French: Brada’s novel Le retour du flot, which she entitled Raudúf al-masayla (1925); a novel by Sir Arthur Conan Doyle, The Refugees, which she entitled al-Hubb fi l-‘íghab (1925) and from German the novel Deutsche Liebe by F. Max Müller under the title Dhísanát u-wa‘ílima (Cairo 1911).

In 1916 she joined the Egyptian University (al-Ídámía al-Misriyya), where she studied literature and philosophy. She also collected her social essays which were published in al-Mahrúsí and other Arabic journals under the title Sawánín fatát (Cairo 1922). She took an active part in the social and cultural life in Lebanon and Egypt by lecturing at mixed meetings of men and women in various clubs and societies such as Fatáí Misr, where she lectured on Gháyát al-hayát (Cairo 1921). She published articles in various journals—in Arabic, al-Mahrúsí, al-Muktafar, al-Hlíl, al-Ahrám, and al-Súyúsa al-‘úshá’íyya; in French, Sphynx, Le Progrès Égyptien; and in English, The Egyptian Mail—on various cultural subjects such as Arabic language and literature, Arab and Eastern women and the awakening of the Eastern nations such as the Turkish and the Japanese. She defended the “spiritualism of the East” as opposed to the materialism of the West, but condemned the poverty, illiteracy and illness which prevailed in the East. Her lectures were collected in her book Kalímát wa-ishdrat, (Cairo 1922). Her articles on French and Arab personalities she collected in her book al-Sáhadí (Cairo 1924), and on Arabic language and literature in Bayn al-dajzar wa ‘l-nadid (Cairo 1924). Her collection of romantic and lyrical poetry-in-prose (ghbír mánthár) influenced by Khalíl Djibrán [q.v.] she published in her book Zútumát wa-ashá‘íyya (Cairo 1923) in which she expressed her pantheism.

In her essays she called for brotherhood, justice, mercy and secular humanism. Yet Mayy did not believe in equality in society. She expressed her ideas on aristocracy, slavery, passive and revolutionary socialism, democracy, anarchism and nihilism in her book al-Musawáti (Cairo 1922), where she ended her discussion with a play emphasising that equality in society is impossible.

In various works, Mayy extolled the literary achievements of her contemporary Arab pioneer poetsesses and writers such as in Bdhíẖát al-Bádiyya (pseudonym of Malak Híni Násif [q.v.]) (Cairo 1920), Warda al-Ázídí (Cairo 1924), and Ídásíh el-Taymíríyya, published in serial form in al-Muktafar (1923-5) and in book form in 1956.

French literary and cultural life made a great impression on Mayy. She styled her weekly salon according to Mme de Rambouillet. Her circle, which exercised deep influence on Egyptian literary and cultural life, included eminent Egyptian and Syrian-Lebanese men and women of the pen such as Malak Híni Násif and Húdí Sha’rá’íi, the poets Ismá’il Sabrí, Ahmad Shawkí, Hájí Ibrahim, Mustafá Sádík al-Ráfíí, Walí al-Dín Yágan and Khalíl Mútárán, and writers such as Lutfí al-Sayyid, Shi'bíl Shumayyil, Mustafá ‘Abd al-Rázík, Salím Sarkí, Saláma Músá, Ya’kúb Sárruf, Táhá Húsayn and ‘Abábás Míjímíd al-‘Ákkád. In her salon, literary and cultural questions, and philosophical and scientific trends, were
MAYY ZIYADA — MAYYAFARIKIN

discussed and poems were read. Many writers said that some of these personalities were in love with Mayy; yet it is agreed that her great love was Djabran, whom, though she corresponded with him, she never met in person.

Mme de Sévigné was her example for literary correspondence. Beside Djabran and the attendants of her salon, she corresponded also with Salma Sâviyh and Amin al-Rîhâni. Some of these letters were collected and published by the Lebanese Djamil Djabr in his book Mayy wa-Djabr (Beirut 1950), Rasâ’il Mayy (2nd ed. Beirut 1954) and by T’hir al-Tunnâhî in Abî man haydt Mayy (Cairo 1974). A common fault among Arab writers is that they have looked at Rasâ’il Mayy (1948) by Madeleine Arkash as a collection of Mayy Ziyâda’s genuine letters while, in fact, these are imaginary letters giving advice to women on problems of life.

Mayy’s style is influenced by Christian Arabic liturgical literature and the French Romantics. She treats her subjects emotionally and metaphorically, loading them with allusions to French and Arabic history and culture.

The deaths of her father in 1930, of Djabrân in 1931 and of her mother in 1932 made her feel lonely and deserted. Her journeys to France and England in 1932 and then to Rome did not release her from her melancholy. In 1935 her relatives suspected her of neurasthenia and hysteria; they lured her back to Lebanon and she was put into a mental hospital for nine months. The Lebanese journal al-Makhibhî defended her case with the help of her friends Amin al-Rîhâni, Charles Malik and Kushtânîn Zaraq and Prince ‘Abd al-Kâdir al-Djazâîn, and she was released from hospital. Two years later she returned to Cairo, where she died on 19 October 1941. In 1975 Muqassat Nawfal in Beirut published all Mayy’s works and translations, twelve in number.

(S. Moreh)

MAYYAFARIKIN, a town in the northeast of Diyar Bakr [q.v.]. The other Islamic forms of the name are Mafarkîn, Mafarîk, Farkîn (whence the name of origin al-Fariki), etc. The town is called in Greek Martyropolis, in Syriac Maphêrê, in Armenian Nphêrê (later Mucharîn, Muchparîn). According to Yakûtî, iv, 702, the old name of the town was Madhir-sâîla (read kâla < *matur-khalakh in Armenian, “town of the martyrs”). On the identification of Tigranocerta with Mayyafarîkin, see below.

1. Topography and early history.

Geography. The town lies to the south of the little range of the Harzî which rises like the first tier of the amphitheatre of the mountains, the higher parts of which consist of the summits (Darîqî, Antok) rising to the south of Mûsh and separating the course of the eastern Euphrates (Murûd çay) from those of the Tigris and its left-bank tributaries.

Muyyafarîkin lies 25 miles north of the Tigris and 12 west of the Batmân-Sû. It is watered by a little river (now called the Fârîn-Sû) which flows into the Batmân-Sû 12 miles to the southeast, an important left-bank tributary of the Tigris which drains the wild and mountainous country south of Mûsh (the cantons of Kulp and Şasîn). The old names of the Batmân-Sû are Nicephorius (Roman period), Nymphios (Byzantine period), which go to form the Batman-Su: 1. Cabakhdjur (on the Murûd çay) — Dhu ’l-Karnayn — Lîdir — Bokhâr — Mayyafarîkin; 2. Mûsh — Kulp — Pûsûr — Mayyafarîkin; 3. Mûsh — Khoyt — Tingirt (Şasîn) — Mayyafarîkin. Routes 3 and 4 passing Şasîn are still little known. The distance between Diyarbakr and Mayyafarîkin is about 45 miles. The old road Diyarbakr — Bitlis, which used to pass through Mayyafarîkin, now runs farther south and crosses the Batmân-Sû south of Almadîn (Diyarbakr — Sinân — Zok — Weisikarîn — Bitlis).

Mayyafarîkin has thus lost the advantage of being a stage on the road between Armenia and upper Mesopotamia. Since 1260 it has no longer been a political centre around which gravitated the interests of the surrounding country. It retains only its importance as a market for the produce of the mountainous and pastoral country drained by the Batmân-Sû.

Ancient history. The mountains to the north of Mayyafarîkin have long sheltered the remains of ancient aboriginal peoples. About 600 A.D., Georgius Cyprius (ed. Gdtzer, 48), mentions the Xbûsâc and Sasûnawtau there who gave their names to the districts of Khût and Sasun. Marquart (1916) supposes there are elements of the aboriginal language in names like *M-îpher-kêl and *Ma-mushêl(i) which are, he says, formed with Caucasian (“sîdka-kassîch”) prefixes. According to tradition (Yâkûtî, iv, 703), the founder of Martyropolis, Marúthâ b. Layûa, was the son of a woman on the mountains, and Marquart sees in Layûa a mutilated form of the name of the people Urta(n) < Urtûa (Handes Amuruya [1915], 96; [1916], 126). The Marwanîd Abû Nasr (see section 2. below) was married to the daughter of Šankarbîr, lord of the Sanasûna; cf. Amedroz, in FNAS (1903).

Lehmann-Haupt thought that he could recognise at Mayyafarîkin traces of an ancient Assyrian settlement, "eine von Haus aus assyrische Anlage" (Armenia, i, 396, 396). Tigranocerta = Mayyafarîkin (?). As early as 1838, von Moltke had suggested that Mayyafarîkin was the ancient Tigranocerta, i.e. the new capital founded by Tigranes II about 80 B.C. which was taken by Lucullus after the victory won on the banks of the Nicopolis (6 Oct. 69 B.C.) and again in the reign of Nero by the legate Corbulo (ca. 63 A.D.); it is regularly mentioned down to the middle of the 4th century. Other scholars had sought Tigranocerta at Sirîn (d’Anville), Arzan (H. Kr., 61), and Kef-Djioz (Kiepert 1875), at Tell-Arman west of
MAYYĀFĀRĪKĪN

Nišibin (E. Sachau; cf. dunavšēr), etc. Late Armenian tradition gives the name Tigranocerta to Diyarbakr. Moltke’s idea was taken up vigorously by Lehmann-Haupt and W. Belck after their expedition to Armenia in 1899-90.

On the north wall of Mayyāfārīkīn is a mutilated Greek inscription. It was deciphered and published by Lehmann-Haupt, who attributes it to the Armenian King Pap (369-74), which is quite in keeping with the known facts of the reign of this monarch. In spite of his criticism of the details of Lehmann-Haupt’s hypothesis, Marquart (1916) has rather corroborated him by bringing forward new considerations.

In view of the many contradictions found in the classical sources regarding Tigranocerta, the question comes to be, if Mayyāfārīkīn is not Tigranocerta, what other unknown town existed here in the time of Pap, unless the stones on which the inscription is engraved and which are now hopelessly disarranged (“in heilloser Verwürrung”) were brought from another place when Martyropolis was being built?

The main objection to the identification of Tigranocerta with Mayyāfārīkīn is that, according to Eutropius, vi, 9, 1 and Faustus, v, 24, Tigranocerta was in Arzanēnē (Aldznikh); on the other hand, the river Mamushel seems to have formed in the 4th century the western frontier of this latter province. From this fact (Hübschmann, Die alarmen. Ortsnamen, Indogerm. Forsch., Leipzig 1904, 473-5), it seems that Tigranocerta ought to be placed east of the Baştān-Şū if this river is identical with the Mamushel. This last name was connected by Marquart with the name al-Musuliyyāt, which al-Muḳaddasaš, 144, gives to one of the tributaries of the Tigris (on the left bank) and apparently corresponding to the Baştān-Şū. (A district of Musuliyya (?) still exists farther east on the upper course of the Biḏlūs ʿayān, in the area of the ancient possessions of the Baştāk Mushālī.)

To reconcile the statements of Faustus, iv, 24, 27, with the position of Mayyāfārīkīn (12 miles west of the Baştān-Şū), Marquart proposes to identify the Mamushel = Nicephorius with the Farkīn-Şū, while the Musuliyyāt would be applied to the whole system of the tributaries of the Tigris (Neyzyūz, Sāvādāmā, etc.). The insignificance of the Farkīn-Şū, which rises in the hills about 3 miles north of Mayyāfārīkīn (Ibn al-Azraq calls its source Raʾs al-ʿAyn; the Diḥīḥan-numā, 437, ʿAyn al-Hawd) and does not suit the description of the hermitage of Mambēr, which, according to Faustus, must have been on the right bank, makes Marquart’s hypothesis less attractive. If finally we consider the position of Mayyāfārīkīn from the point of view of the interests of Tigranocērta, one is forced to admit that against an enemy coming from the west (Lucullus!) Tigranocerta ≠ Mayyāfārīkīn was devoid of natural defences, while in the event of an enemy coming from the east it ran the risk of being easily cut off from Armenia on the main road from Biḏlīs (the ancient Kāstōra ʿAqalaṭūn, cf. Tomaschek, Susan in SBAW Hēr [Vienna 1895], 6). On the other hand, Mayyāfārīkīn from its position later played an important part in the defensive system of the Byzantine empire.

In these circumstances and before a more detailed study has been made on the spot, it is a mistake to think that all the difficulties in the identification of Tigranocerta have been cleared up.

Mayyāfārīkīn = Martyropolis. The identity of these two towns is quite certain. The Christian sources (Syriac, Armenian and Greek) referring to the foundation of Martyropolis are numerous. A Syriac "history" (taḥīṭa) kept in the Jacobite church of Mayyāfārīkīn was translated for the historian of the town Ibn al-Azraq and is given in a synopsis in Yākūt, iv, 703-7 and al-Kazwīnī, ii, 379-90 (tr. with notes by Marquart, in Handels Amoury [1916], 123-35).

The town is said to have been founded on the site of a "little village" (karya ʿażima) by the bishop Marūḥā (Mār Marūḥā) who had obtained the authority of Yazdigird I of Persia to do so. This ecclesiastical flourished between ca. 383 and 420 (on the sources for his biography, cf. Marquart, op. cit., 91-2, 125). The town of Martyropolis to which Marūḥā brought the remains of the Christian martyrs of Persia is mentioned for the first time in 410. The etymology of the Syriac name Mīphērkēt is uncertain (cf. above).

In Armenian, the town is mentioned for the first time in the Geography of the 7th century as Nphhrēt (once Nphret).

By the peace of 297 with Diocletian, the province of Sophanēnē, within which Martyropolis lay, had become part of the Roman empire. Even after the disastrous peace made by Jovian in 363, Sophanēnē remained to the Emperor. Under Theodosius II (401-50), the new town, situated quite near the frontier, acquired considerable importance and became the capital of Sophanēnē (= Great Tsoḵāk). The town was still insufficiently fortified, and in 502 the Sāsānian Kawaḵṯ b. Pērōz seized it and carried the inhabitants off to Khusraw, where he founded for them the town of Abaḵ-Ḵubāḏ (Yākūt, iv, 707) Weh-Amīḏ-Kawāḏ = Arradjan; cf. Marquart, Erānīshār, 41, 307). Anastasius began the fortification of Martyropolis but Justinian, after his accession in 527, was the first to completely reorganise the eastern frontier between Dārā and Trebizond. Martyropolis, the headquarters of a commander under the strategy of Theodosiopolis (Erzerūm), became one of the most important military centres. Procopius, De aedificiis, iii, gives a complete description of the walls of the town, the height and thickness of which were doubled and a full account of the system of defences (outer walls, advanced forts etc.); cf. Adontz, op. cit., 10-12, 140-2. In 589 the town fell into the hands of the Sāsānids, but in 591 came back to the Byzantines in return for the support given by the Emperor Maurice to Khusraw II. Heraclius held it still the year 18/639 (Yākūt, loc. cit.). (The date is not given in Muralt, Chronogr. byz. , i.).

The vicissitudes of Martyropolis probably explain the fact that in the Armenian Geography of the 7th century (ed. Pātkanov, tr. 45; Marquart, Erānīshār, 18, 161) the Persian province of Aldznikh (Arzanēnē) is separated from Tsoḵāk (Sophanēnē) by the line of the Khālīr (= Baştān-Şū) while in the description of parts of Armenia Nphret (= Nphṛjet) figures as one of the 10 cantons of Arzanēnē.

Christian legend as preserved by Ibn al-Azraq and Yākūt gives very full details of the building of the town in the time of Mār Mārūḥā: the arches (tīḵān) of the walls in which the remains of the martyrs were placed, the eight gates of the town, the names of which are carefully recorded, the convent of SS. Peter and Paul, the buildings erected by the three ministers of the Byzantine emperor, each of whom built a tower and a church. There is still to be seen in Mayyāfārīkīn the ruins of a magnificent basilica and of the Church of the Virgin (al-ʿAḏhrā). Gertrude Bell dated the basilica “not much later than the beginning of the fifth century”, and suggested that the Church of the Virgin was one of the two built by Khuṣrāw II in recognition of the assistance lent by Maurice; cf. Abu ʿI-Farajī, Mukhtasār, ed. Pococke, 98.

(V. Minorsky)
2. The Islamic period.

The conquest and caliphal rule. In the wake of the conquest of the Djazira by 'Umar b. al-Khaṭṭāb had made him governor of the Djazira in 18/639 (al-Baladhuri, Fatīḥa, 170). From that time until the early 'Abbāsid period, the city was ruled as part of the Djazira, sometimes jointly with al-Šāhm and on other occasions with Armenia and Adharbāyjān. The names of individual governors of Mayyāfārīkīn for this period are listed by the town chronicler Ibn al-Azraq al-Fārīkī and copied by 'Īzz al-Dīn Ibn Shaddādīd, the 7th/13th century geographer of the city. During the reign of the 'Abbāsid caliph al-Muḥtaḍī (255/669-70), Mayyāfārīkīn and Amīdīd were seized by the Ṣayḥānīdīs 'Īsā b. al-Šaykhīdī (Ibn Shaddādīd, ms. Oxford, Marsh 333, fol. 10a). The Ṣayḥānīdīs continued to govern the area until its reconquest by the caliph al-Muḥtaḍī in 286/899. The grandson of 'Īsā b. al-Šaykhīdī, Muḥammad, built the minaret of the Friday mosque in Mayyāfārīkīn in 270/883-4 or 273/886-7. His name was inscribed on it (ibid., fol. 69a).

Hamdānīd and Buyid involvement in Mayyāfārīkīn. Mayyāfārīkīn fell under the sway of the Taghlībī Arab family, the Hamdānīsld, after the appointment of Nāṣīr al-Dawla al-Ḥasan as governor of Mawsīl in 324/935. His brother, Sayf al-Dawla al-Salīlīd (d. 356/967), ruled Aleppo and Diyar Bākr and showed a particular liking for Mayyāfārīkīn. Sayf al-Dawla repaired its walls and rebuilt the old citadel, where he stayed when visiting the city. He also provided Mayyāfārīkīn with a proper water supply. The entourage of Sayf al-Dawla at Mayyāfārīkīn included the famous preacher Ibn Nubatā (Ibn Shaddādīd, fol. 77a-78a).

During the rule of Sayf al-Dawla, the Djazira was under frequent attack from the Byzantines, whose territorial possessions extended at times almost as far as Amīdīd. The future Byzantine emperor John Tzimīscēs witnessed another cultural flowering in Islamic Mayyāfārīkīn. The second Marwānid sultan, Mumāhidīd al-Dawlaī, repaired the city walls and inscribed his name on them in many places (ibid., 86, 163; Ibn Shaddādīd, fol. 70a). An inscription of his is illustrated by Lehmann-Haupt (Armenien, 424).

The greatest of the Marwānid rulers, Nāṣīr al-Dawlaī, ruled 401/1011-61, was responsible for much building activity in the city, including a new citadel with gilded walls and ceilings which was completed in Ḏub 'l-Hijdādīd 403/June-July 1013 and which stood on a hill, the site of the Church of the Virgin. The Christian relics were transferred to the Melkite church (Ibn al-Azraqīd, ed. ʿAwād, 107-8).

Nāṣīr al-Dawlaī also restored the old observatory (manṣūra), put a clock (bānām) in the Friday mosque, constructed and endowed a hospital (bimarstān), planted the citadel garden and built bridges, public baths and a mosque in the suburb of al-Muḥaddathīd (ibid., 123, 138, 141, 143, 145, 163-4, 168). The Marwānid capital attracted prominent religious and literary figures (ibid., 82, 144, 166); from it, for example, ʿAbd Allāh al-Kāzārīdīd put the Shāfiʿī madhhabī in Diyar Bākr (Ibn al-Athīrīd, ix, 52). ʿAbbās Abū Nāṣīr al-Malānī, a high official at the time of Nāṣīr al-Dawlaī, collected books and established waqfs for libraries in the mosques of Mayyāfārīkīn and Amīdīd (Ibn al-Azraqīd, ed. ʿAwād, 131). Nāṣīr al-Dawlaī died in 453/1061 and was buried in the turba of the Banū Marwān at Mayyāfārīkīn (ibid., 177).

After this, the Marwānid sultans held on to Mayyāfārīkīn until the town and the rest of Diyar Bākr were taken by the Seljūqs in 478/1085 during the campaign conducted by Ibn Djāhirī (Ibn Shaddādīd, fols. 77a-78a), the erstwhile vizier of the Marwānīdīs. Ibn Djāhirī had persuaded the Seljūq sultan Malik-Shāhīd (Ibn Shaddādīd, fol. 78b) to authorize him to besiege Mayyāfārīkīn, and the vizier was able to carry off vast treasures belonging to the Marwānīdīs (Ibn al-Athīrīd, x, 86-8, 93-4; Ibn al-Azraqīd, ed. ʿAwād, 208-12).

In the brief quarter-century following the death of Nasr al-Dawla, Malik-Shahīd and his sons fought many battles, and the city was ruled by Seljūq princes and other local rulers, including Tutūsh, Dukakī, Kūllīdī Arslān and Sukmān al-Kutbī al-Khūṭātīd. The Artūkīds. After the death of the Seljūq sultan Muḥammadīd b. Malik-Shāhīd (Ibn Shaddādīd, fols. 81b-82a) in 512/1118-19, Mayyāfārīkīn fell under the sway of the Turcoman Artūkīdsīd. According to its chronicler Ibn al-Azraqīd, the town was seized in 512/1118-19 by the Artūkīd Nadīm al-Dīn Il-Ghāzīī, who had already taken Mārīn around 502/1018-9 (ms. B.L., Or. 5803, fol. 161a). Ibn al-Athīrīd puts the Artūkīd capture of Mayyāfārīkīn three years later, in 515/1121-2 (x, 418), but this is one instance where the dating of the local historian is more likely to be accurate. After Il-Ghāzīīs death in 516/1122, his son Temūr-taḡī was able to hold on to Mārīn and Mayyāfārīkīn for thirty years and to withstand Zangūs attempts to extend his sphere of influence in Diyar Bākr (Ibn al-Azraqīd, Or. 5803, fol. 160a, 171a; Ibn al-ʿAdīmīd, 271; Ibn al-Athīrīd, Atabegīd, 79). Temūrtaḡīs most ambitious project was the building of the Kāramān bridge over the Satīdāmī river (the Batmānī-Sū) five miles east of Mayyāfārīkīn. The work was begun in 541/1146-7 and was completed by his son Nadīm al-Dīn Alīīd in 548/1153-4. The stone arch of the bridge.
measured more than sixty spans and was "one of the marvels of the age" (Ibn al-Azrak, Or. 5803, fols. 171b, 179b). The bridge is described fully by Gabriel (Voyages, 236), who notes that Sauvaget read the name Temurtasha and the year 542/1147-8 on the bridge (ibid., 345). A copper mine was discovered in the time of Temurtasha in the area north of Mayyafarikin (Ibn al-Athir, x, 215) and it is noteworthy that Temurtasha is known to have minted copper coins (Ibn al-Azrak, ibid.).

Temurtasha and the year 542/1147-8 on the bridge (Voyages, 236), who notes that Sauvaget read the name Temurtasha and the year 542/1147-8 on the bridge (Voyages, 236). There is an inscription in the name of Nadjm al-Din Alpi at the base of the dome (Gabriel, Voyages, 227). The description of Mayyafarikin after the conquest by Salâh al-Din. After its conquest by Salâh al-Din in 581/1185, the city walls were decorated with a fine commemorative inscription. This was discovered by Gertrude Bell and analysed by Van Berchem (in Diez, Baudenknäpler, 108) and by Flury (Schriftbänder, 44-8). It is apparently the only Kufic inscription in the name of Salâh al-Din. Minorosky (EI1, art. Mayyafarîkîn) stated on the authority of Gertrude Bell that this ruler built a mosque at Mayyafarîkîn for which the columns of the Byzantine basilica were used. There would appear to be no evidence in the sources for this. Possibly the mosque in question was the one outside the walls, of which only the Ayyubid minaret remains (Gabriel, Voyages, 210, 228).

Salâh al-Din entrusted Mayyafarikîn to his brother Sayyid Ahmad Beg Ruzak, who by the city wall of the Ayyubid branch of the Ayyubid family until the Mongols conquered the city in 658/1260. In addition to the literary record, there is architectural, epigraphic and numismatic evidence of this short-lived Ayyubid dynasty at Mayyafarîkîn. Awdad Najm al-Din Ayyûb (596-607/1200-10) left an inscription dated Ramadan 599/May-June 1203 on a tower of the eastern inner wall (illustrated and described by Lehmann-Haupt, Armenien, 425-6) and the name of his successor, Ağraf Mûsâ (607-12/1210-20), is inscribed on a tower to the north (ibid.). Mûsâ's brother, Mu'azzar Shihâb al-Din Ghazi (617-42/1220-44) built a fine mosque of red baked brick with an inscription dated 624/1227 which was seen and analysed by Taylor (ibid., 428). The inscription on the mihrab is given by Gabriel (Voyages, inscription no. 124). The coins struck by the Ayyubids of Mayyafarîkîn have aroused a certain interest amongst scholars (Grabar, 167-78; Lane-Poole, iv, 122-30; Lowick, 164-5). A series of them minted between 582/1186-7 and 612/1215-6 represent crowned human figures. Some have long locks of hair; others are wearing caps with tassels; sometimes these figures are enthroned (ibid.).

The Mongols devastated the area around Mayyafarîkîn as early as 628-9/1231. In 638/1240-1 a Mongol embassy reached the town and demanded that it should surrender and that its fortifications be destroyed. On this occasion, Mu'azzar Shihâb al-Din Ghazi succeeded in deflecting the attentions of the embassy elsewhere. His son, Kâmil Muhammad (642-58/1240-64) defended the Mongols in a brave stand at Mayyafarîkîn, but the city fell in 658/1260 to the Mongol army of Hûlegü under the command of Yağmûr and it was then that this last Ayyubid ruler was killed (Rashid al-Din, 77-81; Ibn Shaddad, fol. 120a).

Descriptions of Mayyafarîkîn in the Muslim geographers. There is some disagreement in the classical Muslim geographical works on the placing of Mayyafarîkîn. Al-Mukaddasî (137) puts it in Diyar Bakr, al-Îstakhri (188) considers it to be part of Armaniyâ, whilst Ibn al-Fâkhi (133) places it in Diyar Râba'a. Ibn Shaddad lists Mayyafarîkîn as one of the four aamiar of Diyar Bakr, the other three being Amid, Arzan and Mârdin (fol. 63a).

Al-Îstakhri (76, n. k) describes Mayyafarîkîn as having an encircling wall and an abundant water supply, but he comments on the town's unhealthy climate. Al-Mukaddasî (140) mentions the fortifications, including battlements, an encircling wall and ditch; he also notes that the water there is muddy in winter. According to Kudâma (246), the combined revenue of Arzan and Mayyafarîkîn in 4Âbâdîs times was 4,100,000 dirhams. Nâsirî Khûrâvî visited the town in the 6th/12th century. He was aware of the excellent condition of its walls, which seemed as if they had only just been completed (tr. Schefer, 24-5).

Yâkût (d. 626/1229) praised the city, especially its surrounding wall of white stone and its prosperous suburb (rabad) (Mu'âjam, iv, 703-7). When Ibn Shaddad visited Mayyafarîkîn in the 7th/13th century, he found thriving bâns and markets, as well as two madrasas, one Hanbali, the other Shâfi'i (fol. 71a). Both Ibn Shaddad and Yâkût mention eight city gates at Mayyafarîkîn, seven of which probably corresponded to those of Byzantine Martyropolis (Gabriel, Voyages, 218).

The 8th-9th/14th-15th centuries. In the Ilkhanid period (654-754/1256-1353), Mayyafarîkîn shared the fate of the rest of Diyar Bakr and was ruled by Mongol emirs. After the collapse of the Ilkhanid state, after 736/1336, Diyar Bakr fell into disarray and became the arena for power struggles between rival Turcoman (the Ak Koyunlu and Kara Koyunlu confederations), Kurdish and Arab groups, before falling victim to the depredations of Timûr who attacked the area (but not, apparently, Mayyafarîkîn) in 796/1394 and 803/1400-1 (Ibn 'Arabişhâh, 65-6, 164-5). Thereafter, Mayyafarîkîn was in the hands of one branch of the mostly nomadic Sulaymanî Kurds [see KURDS] until it was taken in 827/1427 by the Ak Koyunlu leader Kara U'tmânî (d. 839/1435), who appointed his son Bàyazid governor of the town and other citadels in the area (Tîrânî, 95).

The Şafawîd and Ottoman periods. The Şafawîd Şâh Ismâîl I occupied the whole of Diyar Bakr in his campaign against the last Ak Koyunlu ruler Murâd in 913/1507-8. He then allotted Diyar Bakr to Şânî Muhammad Ustaşîlî (Iskandar Ben Munshi, Âlâm-arâ, i, 32-3). After Ismâîl's defeat at Caldirân [q.v.] in 920/1514, Mayyafarîkîn was seized by the Kurdish chief Sayîd Ahmad Beg Rûzâkî. The city fell under Ottoman control in 921/1515 after the battle of Khoş Hisâr, when the Şafawîs were forced to cede Diyar Bakr to the Ottomans. In his history of the Kurds, the 10th/16th century writer Şaraf al-Dîn Khîn Bûtûlî gives the genealogies of Mayyafarîkîn in his own time (Şaraf-nâmâ, 270-2).

Information on Mayyafarîkîn in the Ottoman...
period is scanty. The Portuguese traveller Tenreyro went there in 936-7/1529 and found it “almost deserted” (Itinerario, 406). Ewliya Celebi (d. ca. 1095/1684) visited the town (Seyihat-nama, iv, 76-b) and gave a long laudatory description of the Saray bridge. Von Molke, who passed through the city in the 19th century, while noting the well-preserved state of its walls and towers, commented on the ruined condition of the rest of the city which he said had been caused by Ottoman-Kurdish struggles in the area (Lehmann-Haupt, 394, 419). Indeed, the city was to remain de facto in Kurdish hands until the beginning of this century.

Christianity in Mayyafarikin during the Islamic period. The Arabic sources record little of the transition from Christianity to Islam within Mayyafarikin, a major centre of Oriental Christianity. Isolated references indicate, however, that Christianity continued to prosper after the Muslim conquest until recent times. This evidence is of course corroborated and expanded by surviving Christian architecture in the area. Al-Mu’kaddasi (146) records without comment that in the monastery of Thomas (djury Tmud) one farash from Mayyafarikin there was a mummified corpse; it was allegedly that of one of the disciples [of Jesus]. Ibn al-Azrak mentions the existence of a Melkite church in the Marwān period and that Christians held office in the Marwanid government (ed. A’wad, 145, 164). The Jacobites had a bishopric in Mayyafarikin by the 9th/10th century (Vryonis, 53), although this is not mentioned in the detailed chronicle of Ibn al-Azrak. Ibn Shaddad does, however, mention an incident in which a Saljuk governor, Kiwām or Kawām al-Mulk Abu ‘Ali al-Balbāk became exasperated by the nākis from a monastery in Mayyafarikin and, refusing a large sum of money offered him by the Christians if he would leave the building intact, destroyed it (fol. 70b). The same author records that in his own time (the 7th/13th century) there were monasteries on a hill to the north of Mayyafarikin (ibid.). In 936-7/1529 Tenreyro describes “beautiful monasteries and churches without roofs, containing sumptuous monuments with inscriptions in Greek letters. On the walls were pictures of apostles and other saints, painted in very fine colours and gold.” He remarks that there were only a small number of inhabitants who were Jacobite Christians and spoke Arabic (Itinerario, 376).

Mayyafarikin in recent times. In 1891 the population of the town was 7,000, divided about equally between Muslims and Christians (Cuinet, ii, 470-2). During its occupation by the Sulaymanli Turks, the name Mayyafarikin had been eclipsed by that of its minority inhabitants, who were Jacobite Christians and spoke Arabic (Itinerario, 376). The town on 3 Djumada II 1071/24 January 1662. He was the author of several commentaries, other coins of Muzaffar Ghdzi, in CAROLE HILLENBRAND

MAYYA'A
Abū ʿAbd Allāh Muḥammad b. Ahmad, Mooroccan scholar and teacher, born 15 Ramaḍān 999/7 1539 at Fāṣ, where he studied and taught law and ḥadīth until his death in the same town on 3 Dhuʾ al-Ḥijjah 1072/14 January 1662. He was the author of several commentaries,
notably on the *Tuhfa* of Ibn *Asim* [(q.v.)], of which a manuscript exists in the Bibl. Générale, Rabat (D 873), and on the theological poem called al-*Marḥīd al-muʿārin* of his master Ibn *Ašūr* (d. 1040/1631) composed 1043–4 in *masāʿif* al-muʿārin fi ṣharṭ al-Marḥīd al-muʿārin ʿdālā l-*darārīn min ʿalām al-dīn* (lit. Fās, printed Tunis 1293, Cairo 1305, 1306). In 1048, he made an abridgement of it, *Iḥtiyāṣ al-Durr al-ʾal-تَحْمَر للمؤثرَين في الشارْت المُحَرِّم* which was lithographed at Fās in 1299 and printed at Cairo in 1301, 1303, 1305 and 1348; it should be noted that in his commentary, he took account of criticisms raised concerning his lack of objectivity and its lacunae (ii, 339–41; cf. Hājji, *ʿĀṣīṭī ʿumūrīyya*, 203–5). Amongst other works of his extant, as well as the *Naṣīḥ al-talāʾī wa l-durūr* (mss. Rabat 855 and 3702 Z) which contains a *fāhrās* [(q.v.)] and consequently, autobiographical details, one might mention the *Tuhfat al-asbāb wa l-raṣaqa bi-baʾda masāʾil al-safqa* (mss. Rabat 589 D; cf. O. Pesse, *Le contrat de safqa au Maroc*, Rabat 1952, passim), and particularly, the *Naṣīḥat Ṭahā al-mustafāy al-muṣāfirin fi l-*ṭaḥlīl bayn al-Muslimīn* (mss. Bibl. Royale, Rabat 7248), composed in 1051/1641 in defence of those Muslims of Jewish ancestry who were once more, after the death of sultan al-*Maṣrūq* al-Dhahabī (1603) the victims of a certain ostracism by traders and scholars in Fās. After the publication of this book, a cabal was formed against Mayyāra, who was the object of violent attacks, but who nevertheless benefited from the protection of Muhammad al-*Taṣīb* al-Dīlāʾī, who wrote a *Takrīz Naṣīḥat al-muṣāfiʿīn* (mss. Bibl. Gén., Rabat 923 K, 125–8), and from a defence by al-*Awhī, also the author of a *Takrīz* (in the text of the *Naṣīḥa*, 126–7). Like Mayyāra’s other works, the *Naṣīḥa* contains interesting pieces of historical information which would justify its publication. On account of his Jewish ancestry, this scholar, like al-*Maṇḡūr* [(q.v.)], was not allowed to fill any official post of a religious nature, although often described as *imām*, and it is said that he had to make a living by hiring out dresses and ornaments for ladies on the occasion of marriage (see al-Īfrānī, *Ṣafwat man ṭarāṭīr, litt. Fās n.d., 140; Hājji, op. cit., 147).

The epithet of “the Elder” (al-ʾĀkhār) is sometimes appended to his name in order to distinguish him from Muhammad b. Maḥmūd b. Muhammad (or Ahmad) al-*Hāfīd* or al-*Aṣghar*, also considered as *imām* of Fās (d. 15 Maḥarram 1144/20 July 1731; see al-ʾĀḏārī, *Naṣāʾ al-maṭhānī* ii, 235; al-Katṭānī, *Ṣafwat al-anfūs*, i, 167; L. Nāṣīḥī, *Livre littéraire*, index).

MAYYŪN, volcanic island of ca. 1 km² and 400 inhabitants in the Straits of the Bāb al-Mandāb [(q.v.)], off the coast of the People’s Democratic Republic of Yemen (the former Aden Protectorate). Known in classical times as *Δυόνυς* it became known in the West as Perim, probably from the other Arabic term used for the island *baṣīt* “rope”, possibly connected with the usage of the island as a coaling place. In 1854, the British landed there in 1799, but left because of the lack of water. In 1872 the British army of “South Borneo” under Captain Laws built a fort and established a coaling station, called Brown Bay, which was abandoned however in 1936. In 1915, Turkish troops made an unsuccessful attempt to land on the island. Incorporated into the British Crown Colony of Aden in 1957, Mayyun changed from the island of Kamarān and Sooret (Sukūtrā), *MAZ' [see qanasam].

MAZĀGĀN [see al-qa'dīnā].

MAZĀLĪM (A.), a word whose sing. *mazīm* denotes an unjust or oppressive action. Closely related to *zulm*, it is an antonym to *ʿadl* [(q.v.)] and thus signifies basically something “not in its right place” (LA). At an early stage in the development of Islamic institutions of government, *mazālīm* came to denote the structure through which the temporal authorities took direct responsibility for dispensing justice.

Precedents for the institution of *mazālīm* can be found in Byzantium and, more particularly, in the Sassānid bureaucratic office which functioned as a jurisdiction parallel to the ordinary judiciary headed by the *mobadhdh-mobadhīn* [(q.v.)] (A. Chrestensen, *L’Iran sous les Sassanides*, Copenhague 1944, 301 f.). It was suggested that the ideal of open access to tribal leaders in pre-Islamic Arabia was carried over into the early Islamic experience.

The establishment in Medina of the rudiments of an Islamic polity did little to change the situation. Muhammad combined in himself the rôles both of the traditional tribal chief and of the *hakam* [(q.v.)]. The early caliphs and provincial governors inherited this position, where judicial functions were not distinguished from other functions of government. Only in relation to the *dhimmī* [(q.v.)] did caliph or governor function as an alternative judicial authority (E. Tyan, *Histoire, 87–98*).

The growth in size and complexity of the Muslim community soon obliged caliphs and governors to appoint *kāfīs* [(q.v.)] to whom their judicial functions were delegated. The development of the *shariʿa* [(q.v.)] as a distinct system of law during the 2nd/8th and 3rd/9th centuries, its identification with the office of *kāfī*, and its increasing importance as a test of Islamic legitimacy, combined to form a context in which it becomes possible to identify a discrete *mazālīm* system. Al-Mawardi’s suggestion (Abkām, 65) that the Umayyad caliph *Abd al-Malik b. Marwān* [(q.v.)] was the first to arrange for the regular hearing of *mazālīm* petitions seems to be premature.

The 'Abbasid period. More certainty surrounds reports that the caliphs al-Mahdi and al-Hadi ([q. v.] ensured the regular holding of mazālim sessions. The practice for the first several decades was usually for the wazir ([q. v.]) to take charge (Sourdel, Various, 640-8), and there are indications that the mazālim jurisdiction was regarded both by them and by the kādīs and 'ulamā' as a rival to the shari'ā jurisdiction. Although Abū Yusuf ([q. v.] suggested to Hārūn al-Rashīd ([q. v.] that the caliph should personally take charge (K. al-Kānhārī, Cairo 1352, 111 f.), this seldom happened. In the longer term, mazālim remained a disputed institution following the fall of the Fatimids, and kādīs [see BARĀMIK] became more influential in the kādīs, culminating when a series of Mu'tazalī chief kādīs also held responsibility for mazālim.

The end of Mu'tazalī influence under al-Mutawakkil ([q. v.]) returned mazālim to the control of the wazirs, where it remained, until the Buyyid amīr al-unmar ([q. v.]) downgraded the wazir and handed control of mazālim to the ʿAḥwarī Shīrī nāšīb al-ʿadl ([q. v.]) (H. Busse, Chalif und Grofsunik, Wiesbaden 1969, 286-9).

From a comparatively early date, it became usual for the wazir or kādī in charge to appoint a deputy to take responsibility for the routine management of the institution. On occasions, this official, variously known as sāhib or nāzi al-mazālim, might also be appointed directly by the caliph.

The jurisdiction of mazālim tended to be very wide. Receiving and processing petitions against official and unofficial abuse of power was an important part of its activity, but it also on occasion functioned as a court of appeal against the decisions of kādīs. Additionally, it is evident that, for an early stage, mazālim was often the office through which military and civilian officials and dignitaries applied for the allocation of ḥālsa's and through which such grants might also be confiscated and their holders fined.

Theory. Before the work of al-Māwardī ([q. v.]), little theoretical consideration of mazālim is to be found. Statements in general terms of principle were not developed in detail. Al-Fārābī's view that the head of the just city should "favour justice and the just, hate tyranny and injustice, and give them both their just deserts" (al-Mudīna al-fadila, ed. Dieterici, repr. Leiden 1964, 60), is typical.

Working in the service of the caliphs al-Kādīr and al-Kāhīm, al-Māwardī's object was to restore the authority of the caliphate in preparation for the approaching Sālqīds. His work al-ʿAhsāʾ al-sulṭanīyya therefore included an extensive chapter on the structure, procedure and jurisdiction of mazālim, which is paralleled with minor differences in Abū Ya'qūb b. al-Farraj's work of the same title (cf. Bibl.).

Supervision of mazālim is the responsibility of the caliph, his viziers and governors, or their appointed deputies, who must have personal qualities combining honesty, power and judiciousness. The mazālim session is duly constituted when the official in charge is assisted by guards, kādīs, fakhsīs, secretaries and notaries (ghāshīs). Ten classes of cases are detailed in coming within the jurisdiction of mazālim, falling into two main categories, namely abuse of official powers and enforcement of kādīs' decisions.

The major difference from the kādīs, according to al-Māwardī, lies in the area of procedure. The sāhib al-mazālim has a wide scope for active direction and participation in the proceedings, including powers of coercion, admitting evidence below the standards required by kādīs' courts, subpoena of witnesses and postponement of hearings to allow judicial investiga-

Mazarlām presents his discussion in terms of a relaxation of the rules of the sharī'ā, with the purpose of controlling powerful officials who otherwise might subvert the normal judicial process. Later writers link mazālim with the concept of shayṭān sharī'īyya. In fact, the theory of mazālim—as also later Hanbalī theory of sharī'ā sharī'īyya—actually represents an attempt to bring the current practice closer into line with the requirement of the sharī'ā.

Later theory reverts to the common pattern of giving more general statements of principle, in terms of "helping the weak against the strong", a phrase often appearing in the obituaries of sultans and governors. Expositions in detail are rare and, when they do occur, as in al-Māxrīzī (Khitat, Cairo 1270, ii, 207 f.) and al-Nuwwarī (Nihāyat al-arab, Cairo 1923-55, vi, 265-90), are based on al-Māwardī.

The mediaeval period. In the event, the hopes of al-Māwardī and his patrons did not materialise, and mazālim continued to develop with little reference to theory. The main feature during this later period is an increased bureaucratisation, a process which took place simultaneously under the Sālqīds, under the Khārazm-Shāhs in Persia and Central Asia, and under the Fātimids in Egypt. The various parts of this development came together under the Ayyūbids and continued with little change through much of the Mamlūk period.

The first step in opening a case was to present a petition (rukā or kisā) drawn up according to detailed formulae (described in al-Kalkashandi, Subh al-ʿalāqa, Cairo 1913-19, vi, 202 f.). While the ideal remained the personal presentation of the kisā in public session, the vast majority were dealt with administratively. Al-Kalkashandi (vi, 206-10) describes six different channels through which the kisā could be dealt with, and these procedures are confirmed by other sources. Several different officials are to be found taking decisions, including the sultan, his deputies and provincial governors (nuwābā), and high-ranking military officials (most commonly the atābak, dausūrgād and ḥāgūsā). Common to all channels of petition was the central role of the chancery (daw<$a_i>n al-ingha'ī), headed by the wazir or sāhib daw<$a_i>n al-ingha'. From the late 7th/13th century by the kādī al-ṣer. Oversight of the routine clerical work was handled by a secretary explicitly appointed to deal with mazālim work, called sāhib (or muwakkīlī) al-kalām al-dakhī under the Fātimids and kātib (or muwakkīlī) al-dast under the Mamlūks. From the early Fātimid period, elaborate rules also determined the form of the decree (uaqīfī or marṣūm) containing the final decision in a case (Subh, xi, 127-33). Such decrees would normally be signed by the sultan or a high officer of state, regardless of where in the administrative process the decision had been taken.

The site of the public session (mazālis) was normally the place where the presiding official conducted his general duties. A departure from this took place when Nur al-Dīn Zanjī established a house of justice (dār al-ṣalād) in Damascus soon after 549/1154, with the specific purpose of providing a setting for mazālim. Situated outside the citadel by the Bāb al-Nāṣr [see IMĀM], it became more commonly known as dār al-saʿāda when it was turned into the seat of provincial government in 634/1236. By this time, other provincial capitals in the Ayyūbīd state had also acquired a dār al-ṣalād. In Cairo, mazālim sessions were usually held in a Shāhī madrasa. Held twice a week on Mondays and Thursdays, these sessions were associated with an increased amount of official ceremonial, as the sultan and his officials went to the dār al-ṣalād in
public procession (mawkib) [see MAWAKIB]. To the mawkib and madjlis was soon added an... and Siyah-rustak (?); on the other hand, the diydr-i Kumis wa-Tabaristan included Simnan, Damghan, FTruzkuh, a town of

Towards the end of the 8th/14th century, or official posts (al-Sdlihi, likewise clarified, and in the 9th/15th century a khidma. The jurisdiction of... remained synonymous with the adl. However, remained companionship between Mazandaran and Tabaristan. In his time of Mazandaran. (1340), the 7... and moved it to the Royal... of the Saldjuk period. Mazandaran only reappears in the Saldjuk period. (Mazandaran). (Mazan" was a particular place, distinct from the part of the country known as Tapuristan. (A village of Mesedeyan (?) is marked on Shah's map 12 km. south of Firuzkuh!). In any case, the name Mazandaran seems to have no connection with "Mazāvī (or Māzā-i), the region to its west was populated by "Mazāvīan dēwās" (Bartholomaei, Wüsterbuch, col. 1189, under mazāvī dēwā). Darmesteter, Zend-Avesta, ii, 373, n. 32, thought that Mazandaran was a "comparative of direction" ("Mazana-tara", cf. Shūsh and Slüggha) but Noldeke's hypothesis is the more probable (Grundr. d. Iran. Phil., ii, 178), who thought that Mazan-bar = "the gate of Mazān" was a particular place, distinct from the part of the country known as Tapuristan. (A village of Mesedeyan (?) is marked on Shah's map 12 km. south of Firuzkuh!). In any case, the name Mazandaran seems to have no connection with "Mazāvī (or Māzā-i), the region to its west was populated by "Mazāvīan dēwās" (Bartholomaei, Wüsterbuch, col. 1189, under mazāvī dēwā).
2. Geography: The actual extent of Mazandaran is 100 miles from east to west and 46 to 70 miles from north to south. Except for the strip along the coast—broader in the east than the west—Mazandaran is a very mountainous country. The main range of the Elburz forms barriers parallel to the south of the Caspian, while the ridges running down to the sea cut the country up into a multitude of valleys open on the north only. The principal of the latter ridges is the Mazârdûb, which separates Tabaristan from Tunakabûn. The latter is bordered on the south by the chain of the Elburz in the strict sense, which separates it from the valley of the Shahrûd (formed by the waters of the Alamût and Talâkân and flowing westward into the Safîd-rûd).

To the east of Mazârdûb, a number of ranges run out of the central massif of the Elburz: 1. to the east, the chain of Nûr, which cuts through the Harâz-pây; and 2. to the south-east, the southern barrier which forms the watershed between the Caspian and the central plateau. Between the two rises in isolation the great volcanic cone of Damawand [q.v.].

To the east of Damawand, the southern barrier rejoins the continuation of the Nûr and the new line of ranges runs its course to the coast. The rivers of Mazandaran are of two kinds. A hundred short streams run straight down into the sea from the eastern ranges of Barfurush; the Tâlçin (river of Alirâbâd); the Tâlçin-Ashraf; Sârafud (to the north of Shah-kuh); G. C. Napier, Extracts from a diary of a tour in Khorasan, in JRGS, xlvi (1876), 62-171.

4. Language. Cf. Geiger, Die Kaspischen Dialekte, in Grundriss d. iran. Phil., v2, 344-80, where the literature of the subject is given (esp. Dorn's works). 5. Historical geography. This is still full of difficulties, although Vasmor's very full study has considerably reduced their number. The matter is complicated by the fact that certain well-known names are used in different periods for more or less identical districts.

The eastern frontier of Māzāndarān (Tabaristān) in the strict sense, with Astarābād (Dūrgānd) seems to have always run near Kūlbād (on the river Kirrīd; cf. Poteley's Χάνων, where there used to be a wall (dīar-i Kūlbād) which barred the narrow strip of lowland between the Gulf of Astarābād and the moun-tains; cf. Ibn Rustā, 149, who speaks of the brick wall (gān) and of the Gate of Tāmis through which the travellers had to pass (cf. Ibn al-Fakhīr, 303). To the west, the town of Sālūs (Čalūs) was situated on the frontier of Daylām (Ibn Rustā, 150: fi nahu al-ṣudaww) but later the valley of the Sārd-āb-rūd (Kalār-dāsh) seems to have been annexed to Tabaristān. Further west, the coast of Tunakābūn was governed sometimes with Māzāndarān and sometimes with Gīlān.

The Arab geographers distinguished between the plain (al-sakhliya) and the mountains (al-dījabaliyya) of Tabaristān (al-Ī斯塔fri, 211, 271). The important towns of Tabaristān were in the lowlands: Amūl, Nārīl, Shālūs (Čalūs), Kalār (Kalār), Milā, Tarādī (Tūdī, Bargī?); 4. Ayn al-Humā, Māmtime (Bār- furūsh), Sārī, Tambīša (cf. al-Ī斯塔fri, 207, cf. al-Mukaddasī, 353). The principal town (mādīnā) of Tabaristān in the time of al-Yākūbī, 276, was still Sālīya (q.v.), but in the time of al-Mas'uḏī, Tānbī, 179, Al-Ī斯塔fri, 211, and Ibn Hawkal, 271, the prin-cipal town (kasabā) and the most flourishing one in Tabaristān was Amūl (larger than Kūmīn).

The mountain area was quite distinct, and its con-nection with the plain is not very clear in the Arabic texts; cf. the confused testimony in al-Ī斯塔fri, 274, 294, Al-Tabarī, ii, 1295, under the year 224/838, distinguishes three mountains in Tabaristān: 1. the mountain of Wandā-Hūrūmz in the centre (waqūt); 2. that of his brother Wandaspandjān (ib) b. Alandāb b. Kārīn; and 3. that of Shārwin b. Surkhab b. Bāb. Now according to Ibn Rustā, 151, [the Kārinid] Wandā-Hūrūmz lived near Dūnbāwānd. On the other hand, the same writer, 149, says that during the rule of Tabaristān by Dūrī b. Yazīd, Wandā-Hūrūmz had bought 1,000 dīārīb of domain lands (sawāfī) outside the town of Sārī. These dīārīb seem to correspond to the region round the sources of the rivers Tīǧīn and Nīkā, which in Persian is called Hazār-dīārīb. Later, the lands of Wandā-Hūrūmz included the greater part of eastern Māzāndarān. *Wandaspandjān seems to have ruled over the greater part of Māzāndarān, for his capital Mūnuz was the rallying point from which expeditions set out against Daylām. Finally, the mountain of Shārwin comprised the south-eastern part of Māzāndarān, for according to Ibn al-Fakhīr, 305, it was close to Kūmīn.

In the time of al-Ī斯塔fri, the three divisions of the mountains specified are: the mountains of Rūbdjāng, of Fādušbān and of Kārīn. "They are high mountains (dījabāl) and each of them (dījabāl) has a chief". Rūbdjāng, according to Ibn Hawkal, lay between Rayv and Tabaristān. Barthold, Oerlik, 155, emends the name to *Rūyand and identifies it with Rūyān. Ibn Rustā, 149, says that Rūyān, near the lands of Rayv, did not form part of Tabaristān but formed a special kāra with the capital Kudjurī, which was the headquarters of the wāll (cf. Ka‘farvāsūk in the bulāk of Kudjur). According to this, *Rūyand = Rūyān is to be located in the south-western part of Māzāndarān (north of Tehrān). In the Mongol period, Hamd Allāh Kāzawīnī, 160, is the first to mention Rustamdār (on the Shāh-rūd). As Vasmor, op. cit., 122-5, has shown, Rustamdār later included all western Māzāndarān between Sakhāsār (Gīlān) and Āmul. Rustam-dār therefore included Rūyān, without the two terms being completely synonymous.

Dūrbāl Kārīn had only one town, Shāhmār, a day’s journey from Sārīya. The local chiefs of the
dynasty of Karín lived in the stronghold of Firnm [q. v. in Suppl.] which must have stood on the island off the
western coast of Tabaristan; it is possible, perhaps, that the
Karinids included the mountains of Sirdab (in the
Kuh-i Karin) claimed descent from the name of Karín, brother of Zarmihr (cf. above). Their last representative Mázýar [see KARÍNIDS] was put to death in 629/1230. The

coast of Mazandaran that the fugitive Khwarazmian ruler Ali al-Dawla Muhammad died in this same year [see ARIZM-SHAHS]. Mazandaran in the Mongol and Il-Khanid periods was frequently a corridor through which Mongol armies passed, and in the latter part of the 18th/14th and the 9th/15th centuries we hear of local princes seem largely to have been undisturbed. Also in the period of the Mongols and their successors, we know that trade was carried on across the Caspian Sea to South Russia and the lands of the Golden Horde from the port of Nilm Murdan off the Caspian Sea to South Russia and the lands of the Golden Horde from the port of Nilm Murdan off the Caspian Sea.

Mazandaran was conquered by the Mongols, presumably because of their relative inaccessibility and their uncongenial climate. Mazandaran, however, often played a rôle as the winter camping-ground [see KHAM].

Abaka, Ghazan and Öljeytu, in conjunction with Khurásan, which was favoured as a summer pasture ground for the Mongol hordes and their flocks. In the latter part of the 18th/14th and the 9th/15th centuries we hear of governors appointed over Mazandaran by the Sarmadírs and then the Timúrids, but in practice, the local princes seem largely to have been undisturbed. Also in the period of the Mongols and their successors, we know that trade was carried on across the Caspian Sea to South Russia and the lands of the Golden Horde from the port of Nilm Murdan off the coast from Astarábad (Mustawfi, Nuzha, 160, tr. 156).

After the latter's expulsion of the Afghans from Persia, and in 1744 the Kadjars of Mazandaran in fact rebelled against Nádīr Sháh Afshár after the latter's expulsion of the Afghans from Persia, and in 1744 the Kadjars of Mazandaran in fact rebelled against Nádīr Sháh Afshár.

Under the Kadjár Sháhs, Mazandaran and Gurgán continued to be of strategic importance against Turkmen incursions, and were royal governors. The local economy seems to have flourished, with its staples of rice, cotton, sugar, timber and the fisheries of the Caspian, the latter however leased in the latter part of the 19th century to Russia in return for an annual rent. Curzon noted that the revenue of Mazandaran in 1888-9 was 139,350 tuman in cash, with government expenditure on public buildings, expenses of collection, etc., amounting to a mere 4,590 tuman (Persia and the Persian question, 1, 354 ff.).

The ancient town of Sári declined in the 19th century, whilst Ámus and above all Bábfurúsh [q. v.] expanded commercially; much of the trade with Russia went from the port of Bábfurúsh at Maghad-i Sar (later Bábül-i Sar) at the mouth of the Bábül river, and there was a Russian consul for trade in the town. In the middle years of the century, this district was a centre of Bábism, one of whose leaders was Mullá Muhammad 'Alí Bábfurúsh [q. v.]. The convention of Badaqṣht took place in Mazandaran, and a fortified site near Bárifulúsh called Shakyh Tabarásí was the centre of the Bábí rising of 1848-9, barbarously suppressed by government forces [see BÁB].

The father of Mirzá Husayn 'Alí, the later Bahá' Alláh [q. v.], was a native of Núr in Mazandaran. In 1889-90 there was a pioneer attempt at railway-building in Persia when a short line was built by Belgian engineers from Ámus to the Caspian coast; a road over the Elburz Mountains from Ámus to Tehran, 120 miles/190 km. long, had already been constructed by Náṣir al-Din Sháh in 1877-8.

In the present century, with the confusion after the First World War, Mazandaran was, with Gúr-gán, involved in the Bolshevik rising of 1920-1 in the Caspian provinces under Kucák Khán [q. v.] and Amir Mu'ayyad, in the ending of which the command of the Cossack Brigade Rídál Khán, later Sháh, achieved prominence; he was himself a native of Mazandaran, having been born at Elašt in the Elburz mountains (see L. P. Elwell-Sutton, in Iran under the Pahlavis, ed. G. Lenczowski, Stanford 1978, 4-6). After he was made Sháh (December 1925), much of Mazandaran became crown land (kháílsa [q. v.]), actually in the form of personal estates (amád-k-i sháhi) of the Sháh himself; but these were returned to their original owners in 1941 and subsequently distributed to small proprietors under the land reform policy of Rídál Sháh's son Muhammad Rídál Sháh (see A. K. S. Lambton, The Persian land reform 1962-1966, Oxford 1979, 11-12, 120-2, 218-21).

the document translated from Pahlavi into Arabic by Ibn al-Mukaffa' is given in Persian in Ibn Isfan-

**Period:** Baḥaʾī, 940-958; *Gdtd.* 334: 207.

1. The coins of Mazandaran. The question whether the Sānānī coins in Mazandaran are still an open question and can only be settled when the groups of letters that mark the mints on Sasanid coins have been properly explained. According to the so far insufficient attempts to explain them, the letters AM and M are:

1. The coins of Mazandaran. The question whether the Sānānī coins in Mazandaran are still an open question and can only be settled when the groups of letters that mark the mints on Sasanid coins have been properly explained. According to the so far insufficient attempts to explain them, the letters AM and M are:
found from the time of Firuz onwards are an abbreviation for Amul, but this explanation is quite without proof. The Dā'bāyids and the earlier Arab governors of Tabaristān struck in the 2nd/8th century coins of the type of the Sāsānīd dirhams of Khusraw II; on the obverse, with the bust of the ruler, his name is given in Pahlavi characters and on the reverse is the fire-altar with its two guardians and on the right the mint Tpurustan and on the left the year in the Tabaristān era (began on 11 June 652). These silver coins average in weight 1.90 gr. = 29.3 grains and are hemidrachms. Of the Dā'bāyid rulers, Ferkhwān, Dātbardjmatān and Khūrshid are mentioned upon them. The coins of the first bear the years 60-77 (711-28), of the second 86-7 (737-8) and of the third 89-115 (740-66); these dates enable us to correct the chronology given by the historians. On some coins with the name Khūrshid, earlier students read the dates 60-3, but this is to be explained by the similarity of qāṣt and debat in the Pahlavi script and these coins are really of the years 110 and following. The assumption of a Khūrshid I, who reigned in the sixties of the Tabaristān era (Mordtmann), is thus quite unfounded. As Khūrshid died in 144 A.H. = 110 Tabaristān era, and there are coins with the names of Arab governors earlier than the year 116 Tab. era, it must be assumed that the Arab governors continued to strike coins in the name of the earlier ruler of the land for a period after the conquest of Mazandaran, just as they did after the conquest of Persia under the caliph 'Umar.

It was not till after Khūrshid's death in 144/761 that 'Abbāsid control was established over Tabaristān, and after a series of posthumous coins in Khūrshid's name 110-14 Tab. era, 144/8 A.H./761-5 A.D., we get the first coins of the 'Abbāsid governors, Kāhīl b. Barmak (coins from 150/767, Pahlavi script and these coins are really of the years 110 and following. The assumption of a Khurshid I, who reigned in the sixties of the Tabaristān era (Mordtmann), is thus quite unfounded. As Khūrshid died in 144 A.H. = 110 Tabaristān era, and there are coins with the names of Arab governors earlier than the year 116 Tab. era, it must be assumed that the Arab governors continued to strike coins in the name of the earlier ruler of the land for a period after the conquest of Mazandaran, just as they did after the conquest of Persia under the caliph 'Umar.

The assumption of a Khūrshid I, who reigned in the sixties of the Tabaristān era (Mordtmann), is thus quite unfounded. As Khūrshid died in 144 A.H. = 110 Tabaristān era, and there are coins with the names of Arab governors earlier than the year 116 Tab. era, it must be assumed that the Arab governors continued to strike coins in the name of the earlier ruler of the land for a period after the conquest of Mazandaran, just as they did after the conquest of Persia under the caliph 'Umar.

It was not till after Khūrshid's death in 144/761 that 'Abbāsid control was established over Tabaristān, and after a series of posthumous coins in Khūrshid's name 110-14 Tab. era, 144/8 A.H./761-5 A.D., we get the first coins of the 'Abbāsid governors, Kāhīl b. Barmak (coins from 150/767, Pahlavi script and these coins are really of the years 110 and following. may be found in the various mss. of the *Dāmmī masāʾil al-ahkām* by al-Burzulī (d. ca. 841/1438 [q.v.]), as well as in the *Mīyār* of al-Wangārīshī (d. 914/1508 [q.v.]), lith. Fās 1314-15 (e.g. ii, 192-4, 206-7, 321, 323-4, 234-6, 241-2, 244-7, 249-51, 280; vi, 212, 214, 217, 219, 226-7, vii, 154, viii, 114-5, 130-1, 205, 220, 271, 285, ix, 52-3, 417, 421, 434, x, 245, 259, xii, 233, 243-7). His works numbered about a dozen, but only three of them have survived and not one has been published; they consist after all of commentaries which nevertheless may be regarded as holding a certain interest, since they contain a wealth of documentation and tackle various important questions. This is especially so in the case of al-Mɑṣīm bi-faṣaʿlād Kitāb al-Muṣāriʿ, which appears to be the earliest commentary on the *Ṣahih of Mūḥammad* (see the judgment of Ibn Khaldūn in the *Mukaddima*, ii, 403; tr. de Slane, ii, 475-6; tr. Rosenthal, ii, 459; on the mss. and the sequel attributed to the kādī Iyād, the Dinād al-Maṣīm, see Brockelman, S I, 263): the other works preserved are the Kitāb fālāf al-mahālīn min Barḥān al-awzīl, on the Barḥān of the *Ddjawiyyin* (d. 478/1085 [q.v.]) and the *Šahr al-Talīn* Abīd al-Wawḥāh [al Tālībī] (d. 422/1031; see Brockelman, S I, 660).

Two colleagues of this jurist, bearing the same ṭanw and the same nisba are often confused with him, especially since they are practically contemporaries:

The *first, Abū ʾAbd Allāh Muḥammad b. Abī l-Farādy al-Māzāri*, surnamed al-Zakī (d. 512/1118), who was also a native of Mazara and an Ashʿarī, residing at the Kaʿba of the Bānū Ḥamdād [q.v.], was then taught by numerous masters of Kairouan before going to settle in the East. He is the author of a work on *Kurān*ic readings, of a treatise on physical contacts effected through error, the *Kashf al-khātāt* "on lams al-khātāt," and of an appraisal of certain hadīths quoted by al-Ḥazāli (d. 930/1111 [q.v.]). In the *Ihya*, al-Kaḥf wa l-ʿibāh "al-aʾrādīdum bi l-ʾibāh.

The *second, Abū ʾAbd Allāh Muḥammad b. "L-Muṣāriʿ al-Kurāshī al-Iskandarānī* (d. 530/1135), who lived in Alexandria, was also an Ashʿarī, but more of a theologian (maṭāliʿī) than a jurist as such, judging from the *Kitāb al-Muṣāriʿ*, a commentary on the *K al-ʾIrshād ilā tahān qawād il-Nīṣābī* of the *Djauwānī* (d. 478/1085 [q.v.]).

**MAZĀTA**, the name of an ancient and powerful Berber people which belonged to the great tribal family of the Lawātā [q.v.]. According to Ibn Khaldūn, who makes brief mention of the Mazāta in his *Histoire des Berbères*, they constituted an important branch descended from Ṣāyir, son of Lawāt, ancestor of the Lawātā. According to Ibn Ḥawāk (4th/10th century), the Mazāta and the Lawātā belonged to the major Berber tribal group of the Zanāta. Yet another historian of the Berbers, Ibn Ḥāẓim (d. 456/1064), considers the Mazāta and the Lawātā as belonging to the Coptic, i.e. the Egyptian, race. This conception is to be understood as meaning that the ancestors of the Mazāta (who were, in the opinion of the present writer, the people known to the ancient Egyptians as the *Mashawasha*) as well as those of the other Libyan tribes (called Lebū or Lībī in the hieroglyphic sources) became intermingled, in antiquity, with the true Egyptians. This process of fusion probably took place predominantly in the western part of the Delta.

In considering the name of the tribe of the Mashawasha and its identification with that of the Mazāta, it must be stated that this form of nomenclature as found in the ancient hieroglyphic sources is a collective noun composed of the singular noun *Mashua* (a which is the name of the eponymous founder of the tribe—and the suffix -sa, the designation of a collective in Libyan and Old Berber. It appears furthermore that the Libycobarber suffix -sh (or -s) derives from another language which the linguists call Aegean and which was spoken by aboriginal small tribal hven, in the 13th and 12th centuries B.C., to the "Peoples of the Sea". It is read, for example, in the Egyptian inscriptions dating from this period that one of the tribes in question, the Achaeans, bore the name of *Akaywasha* and that the tribe of the Siculi which was later to inhabit Sicily was called *Shakalasha* (or *Sakalasa*). The same ethnic suffix was also used in Old Berber. Thus, e.g. it is discovered from the writings of Ibn Khaldūn that the descendants of a certain Dari formed the tribe which bore the name of *Dariya*, a collective nomenclature with the collective suffix -sa. Returning to the question of the Mashawasha (or Masawasa, i.e. Mazāta), it is to be believed that these two tribes were identical, or rather that the Mazāta were distant descendants of the ancient Mashawasha. In fact, the termination -sa, which concludes certain Berber ethnic names (e.g. that of the Lawātā) is composed of two suffixes, of which the first, -dt, which is Berber, added to the eponymous name, makes it a collective noun, and the second, the final -a (as in the names of the Lawātā and the Mazātā) has been added by mediaeval Arab authors to give this noun an Arabic plural (Lawātā, Mazātā). In this manner, the Berber suffix -sh has the same function as the Libycobarber suffix -s. (For a commentary on the *Kitāb al-Muṣāriʿ* of the Mazātā.)

Initially, the Mashawasha inhabited western Libya, in other words Tripolitania and what is now Tunisia. At about the time of the end of the New
Empire, they took the decision to conquer Cyrenaica and Marmarica, lands which had been occupied by other Libyan tribes. The population of these lands offered fierce resistance, but the Mashawasha managed to subjugate and subdue their forces. Since the conquerors brought with them their families and their livestock, this constituted a veritable Völkerwanderung. After the conquest of Cyrenaica and Mar-
marica, the Mashawasha resolved to attack Egypt. Their first attempts at conquest took place during the reigns of the Pharaohs Sethi I and Rameses II in the 13th century B.C., and ended in failure. It was only during the reign of the Pharaoh Merneptah that the chieftain of the Mashawasha named Meriai, son of Didi, achieved a degree of success. This chieftain was assured of the support of the “Peoples of the Sea”, a federation of tribes originating from southern Europe and western Asia who sowed terror throughout the Near East. With the aid of these peoples the Mashawasha succeeded, in 1227 B.C., in seizing the oasis situated on the Egypt-Libya frontier, as well as part of the western Delta. Later however, the Egyp-
tians struck a terrible blow against the Mashawasha and their allies in a major battle which took place at Per-Ir, to the north-west of Memphis. The soldiers of the Pharaoh, riding in chariots, pursued and massacred the fugitives. Among those slain on the battlefield were thousands of Mashawasha, of eastern Libyans and of Akayawga, and hundreds of Tura (Tursha), of Sandana (Shardana) and of Lycians. In spite of this defeat the Mashawasha, aided by the eastern Libyans, mounted a fresh inva-
sion in 1194 B.C. during the reign of Rameses III. The war was keenly contested, but the Mashawasha
were eventually defeated and forced to evacuate the western Delta. In the year 1188 B.C., during the reign of the same Pharaoh Rameses III, there was yet a third attempt at the conquest of Egypt on the part of the Mashawasha, aided by their Libyan allies, and this too ended with victory going to the Egyptians. But on this occasion the Pharaoh understood that it would be impossible to subdue the Mashawasha and the eastern Libyans, who had been driven to despair by the catastrophic state of their country which was becoming ever more apparent. He therefore permitted the Mashawasha and the eastern Libyans to settle in the Delta, in exchange for an undertaking on their part to supply mercenaries to the Egyptian army. In this manner, the military conflict between the Mashawasha and the eastern Libyans on the one hand and the Egyptians on the other was concluded in a kind of amicable arrangement. There thus began in the Delta a vigorous process of intermingling between the native Egyptians and the Mashawasha and Libyan settlers, facilitated by mixed marriages which became commonplace not only among the lower strata of society, but also among the upper classes, where the Mashawasha achieved posts of seniority in the sacerdotal and military hierarchy. In the 11th cen-
tury B.C. one of these dignitaries, named Sheshonq, married an Egyptian princess of the royal family, and his great-grandson, also named Sheshonq, who was commander of the Egyptian army and bore the title of “Grand Chieftain of the Mashawasha”, took over supreme power in the country in the year 950 B.C. and, after the death of the Pharaoh Psousennes II, founded the XXII Egyptian dynasty. The Mashawasha and the Libyans of the Delta and of Libya recognised the authority of Sheshonq. It should be added that until this moment, these two ethnic groups had lived in complete autonomy.

Towards the end of the XXII dynasty, a prince of this dynasty named PTOLEMY I succeeded the first Egyptian king. From that time the Pharaohs of these two dynasties reigned simultaneously, and also maintained the best of mutual relations. Thus there began the partition of the Delta, where in 747-30 B.C., three princes claimed the title of Pharaoh. Ultimately, a Libyan prince of Sais, probably himself a descendant of Sheshonq I, displaced the last Pharaohs of the two rival dynasties and founded the XXIV dynasty, known as the Saite. The Libyan period lasted two centuries, during which Egypt remained under the domination of the minority composition of Mashawasha and of other Libyan tribes. The Mazata and the Egyptians were still in evidence in the 2nd century A.D. These were without doubt the Libu-Aegypti who, according to Ptolemy, constituted the population of Mareotis, ter-
ritory situated in the western Delta around Lake Mariout.

With regard to the non-Egyptianised Mashawasha, outside Egypt, they may be identified, in all probabil-
ity, with the nomads of Libya known as Mazues and mentioned by Stephanus of Byzantium following Hecateus (6th century B.C.), and are to be distin-
guished from the Maxues who were established, according to Herodotus (5th century B.C.) in the coastal region of the lesser Syrte. It should be added that the Mazues were nomads while the Maxues were cultivators. Hecateus did not specify what part of Libya they inhabited. It is very likely that they are the ancestors of the Mazata of Cyrenaica and eastern Tripolitania. As for the name of this tribe, it is com-
pounded of the root Maz- (singular noun, of which Mazata is the Berber collective form) with the Greek
termination -nes (-yes). It also seems necessary to identify with the ancient Mashawasha (Mashawsha) known from the hieroglyphic inscriptions and the mediaeval Mazata of the Arab authors, the Libyan tribe of the Maxites (Mas-t-itae) located by Ptolemy in the province of Mareotis, in the region of Lake Mariout, on the western frontiers of the Delta. In this ethnonym, the termination -itas may probably be of Greek origin, and the suffix -i (in place of -a) the sign of the collective form of the noun.

The Arab historians and geographers knew of the Mazata at a very early date. In fact, when the renowned general 'Uqba b. Nāfi' set out for the Magrib in 46/666-7, passing through Maghadādh (formerly Macomades Selorum, currently Marsa Zafaran or Medinet es-Soltan), through Waddan (cur-
tently the oasis of Djofra) and through the Fazzan as far as the territory of Kawar, he made his return journey through the town of Zawila, one of the capitals of the Fazzān, whence he made his way towards the territory of the tribe of the Mazata in eastern Tripolitania. This tribe was, in the 7th cen-
tury A.D., quite powerful and it possessed a number of fortresses (Ar. kusur) which 'Uqba b. Nāfi' captured. This account, which is known to us through the intermediary of Ibn 'Abd al-Jākam (d. 257/871), is the earliest information available concerning the Mazata emanating from Arabic sources, being based on the accounts of numerous early informants, the earliest of whom, Ya'zid b. Abī Ḥābib, died in 1287/46, only eighty years after the expedition of 'Uqba b. Nāfi'. The other Arabic references to the Mazata are of much later date and derive from the period of the 3rd-8th/9th-14th centuries.

According to mediaeval Arab authors, the Mazata were a very numerous and prosperous people, simul-
taneously nomadic (or semi-nomadic) stockbreeders.
and cultivators, whose centres of population and pastures were dispersed throughout North Africa, from the province of al-Butayra (between Alexandria and Old Cairo) to the east as far as the neighbourhood of Tāḥār (Tiaret) to the west. They adopted orthodox Islam at a very early stage, but at the time of the Khaḍīrījī revolution which affected all the Berbers of North Africa at about the middle of the 8th century A.D., they went over to Khaḍīrījīsm. It is not impossible that they initially adopted Sufrī doctrines, as did the majority of the Berber tribes. However, some twenty or thirty years later, they were already professing Ibadism, sometimes following the very moderate doctrines of the Waḥbī branch, sometimes the very extremist doctrines of the Nukkārī branch, which became very popular among the Berbers from the period of Abū Yāzīd [q.v.], the ‘Man on the Donkey’, who rebelled in the first half of the 4th/10th century against the Fāṭimid caliphate. It was only at a fairly late date, probably about the 7th/13th century, that the Mazātā began, little by little, to reject Ibadī beliefs, turning to Sunnism. The written sources supply little information on this subject. It may be added, furthermore, that according to Ibn Hawkal (4th/10th century), a section of the Mazātā of Ḫirīkīya professed Muṭāzilī doctrines.

The Mazātā were divided into numerous more or less powerful sub-tribes (Ar. ḫābdītā, ‘tribe’), and many of their names are indicated by Ibn Hawkal, Ibn Khaldūn, an anonymous list from the 7th/13th century of eminent Ibadī personalities classified by tribe, and finally the Kitāb al-Sijar of Abū ʿAbd Allāh ʿAlī al-Shāmākhī, an Ibadī historian of the 10th/16th century. Among these texts, that of Ibn Hawkal gives a list of the sub-tribes of the Mazātā mingled with those of the Lawāta, in such a way that it is impossible to separate these peoples. The list of the Mazātā sub-tribes presented by Ibn Khaldūn is very incomplete (it includes the names of only six of these segments). As for al-Shāmākhī he supplies the names of the sub-tribes of the Mazātā and the nīshā on these names, and they are found dispersed among the biographies of renounced personalities mentioned in his Kitāb al-Sijar. He supposed that most of the Mazātā are also mentioned in other Ibadī works, including the Kitāb al-Sīna of Abū Zakariyyāʾ al-Wardjālānī (6th/12th century) or the Kitāb Tabakkīl al-mashāhīd of Abū ʿAbd Allāh al-Dārdjīnī (7th/13th century).

The names of these Mazātā sub-tribes are as follows:—1. Banū Muṭākūd; 2. Banū Wīṣāl; 3. Banū Maḏūnā; 4. Zawmrat (this name is known only from the nisba al-Zawmraft; the Berber form of it is Izmārīt and the reading given by Ibn Hawkal is to be thus corrected); 5. Banū Zīmmārīn; 6. Banū Aṛḏān; 7. Banū Ḥādīm or Ḥādīmā (read Dāmga, Dāmaga); 8. Banū Maṣāra; 9. Banū Ilayān (in Ibn Khaldūn’s work, the incorrect orthography of this name is found: B. Lāyān); 10. Banū Fānāsā; 11. Banū Kāzīn; 12. Banū Kāna; 13. Banū Māmādīj; 14. Banū ʿAmāma (thus according to Ibn Hawkal; Ibn Khaldūn incorrectly writes it as Ḥamra); 15. Awnmāḏ (also ʿUmnāḏ); this last etymology seems to be composed of the prefix Auw- (ʿUw-) which signifies “son” in Berber, and of the eponymous name -mash-, to which has been added the Berber sign of the collective -t-, it closely resembles one of the ancient names of the Mazātā, this being Mas-t-taḥ, which has been considered above.

1. Egypt. The most easterly settlements of the Mazātā embraced, in the Middle Ages, the Egyptian province called al-Butayra [q.v.] situated on the western borders of the Delta, between Alexandria and Old Cairo, i.e. the same region previously inhabited by the ancestors of the Mazātā, the Masūwāshā of the hieroglyphic sources and the tribal names of the ancient sources. According to Ibn Khaldūn, there were to be found in the Butayra numerous nomadic (or rather semi-nomadic) peoples who belonged to the Berber tribes of the Mazātā, Ḥawwāra and Ẓanāṭa. According to him, these tribes followed in the Butayra to sow their crops but, at the approach of winter, moved to the neighbourhood of al-ʿAkkāba and Barka. He adds that the above-mentioned tribes paid a tax (Ar. khāndī) to the sultan of Egypt. It is not known which al-ʿAkkāba is in question here, since there are two places with this toponym, al-ʿAkkāba al-Saghīra (‘the small slope, pass’), Catabathmus parvus of the ancient sources, forty leagues from Alexandria to the west, and al-ʿAkkāba al-Kabīra (‘the great slope, pass’), Catabathmus magnus of the ancient sources), forty leagues to the west of the former. Al-Bakrī (3rd/11th century) mentions the settlements (or rather the winter habitat) of these Mazātā “at the foot of the slope of al-ʿAkkāba”, without specifying whether this is Catabathmus magnus or parvus. It is on this side of Egypt, to the east of al-ʿAkkāba al-Saghīra, that the place known as Rammāda is to be located, a site which according to al-Yaḥyā b. Abū Zakariyyāʾ al-Wardjālānī (6th/12th century) or the Fī Siyar, he supplies the names of the sub-tribes of the Mazātā, Hawwara and Zanata. The Mazātā are also mentioned in other Ibadī works, in number and relatively late. The earliest reference to the Mazātā of Cyrenaica is owed to Ibn Khaldūn. According to this historian, they participated in the Umayyad revolt which took place in Cyrenaica ca. 395/1004-5. Al-Idrīsī (6th/12th century) claims that in his time the Mazātā of Barka were already Arabised. These courageous horsemen inhabited the regions of Cyrenaica situated between the towns of al-Tumaythā (the ancient Ptolemais) and al-Lakka (Cape Locco or Luca on modern maps, not far from Tobruk). Two centuries later, Muḥammad b. ʿAbūl-Ṣafī al-Kutubī (Watwat, d. 718/1318) locates the settlements of the Mazātā of Barka on a mountain (Djamb al-Ajdādār) situated to the west of the town of Barka. An analogous reference is also found in the Cosmography of al-Dimashqī (d. 727/1327).

2. Tripolitania (Barka). If Ibn Khaldūn is to be believed, the regular haunts of these Mazātā who possessed agricultural land in Egypt, in the province of al-Butayra, on the Western borders of the Delta, were located in part in Cyrenaica (Barka), where this people invariably spent the winter. Arabic sources of information regarding the Mazātā of Cyrenaica are few and in number relatively late. The earliest mention is found in Ibn Khaldūn’s work, the incorrect orthography of this name is found: B. Lāyān); 10. Banū Fānāsā; 11. Banū Kāzīn; 12. Banū Kāna; 13. Banū Māmādīj; 14. Banū ʿAmāma (thus according to Ibn Hawkal; Ibn Khaldūn incorrectly writes it as Ḥamra); 15. Awnmāḏ (also ʿUmnāḏ); this last etymology seems to be composed of the prefix Auw- (ʿUw-) which signifies “son” in Berber, and of the eponymous name -mash-, to which has been added the Berber sign of the collective -t-, it closely resembles one of the ancient names of the Mazātā, this being Mas-t-taḥ, which has been considered above.

1. Egypt. The most easterly settlements of the Mazātā embraced, in the Middle Ages, the Egyptian province called al-Butayra [q.v.] situated on the
days' journey from the first-named place, which may be identified with what is now Tagrift (Tagrefet), was populated in the 4th/10th century by inhabitants of Waddan, in other words by Mazata mingled with Arabs. The oasis of Zahla (Sella or Zelda on modern maps) also formed, in the 4th-5th/10th-11th centuries, part of the territory of the Mazata, as is revealed by a passage from the writings of al-Bakri (Muhammad b. Yusuf, Ibn al-Warrak). Finally, in this period there belonged to the people of Waddan an unnamed manzil ("station") situated midway between Tamassa (Tmessa on modern maps, to the northeast of Mourn- zouk) and Zahla, and apparently to be identified with what is now el-Fugha or Fogha, a pleasant oasis and a village with ruins probably of Garamantian origin.

In the early Middle Ages, the land of the Mazata embraced two different districts, these being Surt and Waddan. The district of Surt corresponded to the coastal zone of what is now eastern Tripolitania, and that of Waddan occupied the whole interior of this land. The former of these districts was known, from the year 46/666-7, by the name of Surt or ard Surt ("land of Surt"). Later, the localities belonging to this territory received the name of Kuşar Surt ("Castles of Surt"). As for Waddan, which appears for the first time in the same year of 46/666-7 as a country having its own king, it was still considered in the 6th/12th century as an administrative district (A. Surt, Arab. ard Surt, "country") apart. It was, furthermore, closely linked to the land of Surt. The district of Waddan embraced, no doubt, all the places in the interior of eastern Tripolitania which were inhabited by Mazata and by people of Waddan, these being Zahla (Sella), Tagrift (Tagrift) and el-Fugha.

The Mazata of eastern Tripolitania who had probably inhabited this land since earliest times (it is likely that this land was the cradle of the ancient Maghawasha, distant ancestors of the Mazata) rallied at an early stage to the cause of Ibadism. The district of Surt constituted a province of the ephemeral Ibadī state of the imām Abu l-Khaṭṭāb (Abd ab Al-Ḥaṣib b. Al-Samḥ al-Maṣfīrī (140-4/757-61). Numerous individual, probably members of the branch of the Mazata which inhabited eastern Tripolitania, played a momentous role in the history of this imam. It was also in the territory of Surt, at Maghmadas (in ancient times Macomades Syrit or Macomades Selorum), that there took place in 141/759 a battle between the army of Abu l-Khaṭṭāb and that of the Ṣaffārid general Abu Al-Ahwās Umar b. Al-Ahwās al-Uḍghī. After the defeat and death of Abu l-Khaṭṭāb in 144/761, the victorious Arab general Ibn Al-Asḥath took control of the district of Surt and sent troops, in 145/762-3, to conquer the land of Waddan. The capital of this region was taken and its Ibadī population put to the sword.

In spite of the defeat of Abu l-Khaṭṭāb, Ibadism survived for a long period of time in eastern Tripolitania. In fact, the land of Surt appears in the time of the Ibadī imām (Abd Al-Wahhab b. Abd Al-Rahmān b. Rustum (168-208/784-823) as a province of the Rustumid state of Tāhār. The Mazata of eastern Tripolitania, throughout the period of the Ibadī doctrines. In fact, at about the end of the 3rd/9th century, the Mazata were still independent and governed by an indigenous chieftain, apparently an Ibadī. At a later date, al-Dardjī (7th/11th century) notes that among this segment of the Mazata that there were the Kastllīya (here = Bilad al-Djarād). In the canton of Kastllīya (Gabes) of the Kastllīya (Tozeur?), of Kaṣfā (Gafsa), of Naṣafīa, of al-Hamāmā, of Sumāmā and of Biṣhir (Bechri on modern maps). It is probably among this segment of the Mazata that there were recruited the Ḥijā ṣīn and theまたはマザータ of Mazata origin who lived, at about the 9th/11th century, if al-Shammāmkhi (10th/16th century) is to believed, in the Kaṣfīya (here = Bilād al-Djarād). In the canton of Naṣafīa (Nefsoua on modern maps) there lived a segment of the Mazātīn sub-tribe of the Baṣn Izmārā (or Izmārt) which professed the Ibadī faith; according to Ibn Khaldūn this group belonged not to the Mazata, as stated by Ibadī sources, but to the great Berber family of the Zanata. The town of Fānasa (Fernassa on modern maps) also owes its name to the homonymous Berber sub-tribe,
a branch of the Mazâta. Between Tayzur (Tozeur) and al-Hamma lived the Mazâta sub-tribe of the Kazîna.

Further to the north-east of the Bilâd al-Djarid and of Kafsa (Gaïfa), there were numerous Ibadî-Wahbî Mazatâ on the plain of Kayrawân (called Fahs or Kayrawân in the Ibadî chronicles). It is curious to note that, in spite of their Khâridjî faith, these Mazatâ were loyal servants of the Zirîd kings of Irikiya. A renowned Zirîd general had his origin in this segment of the Mazatâ which bore, in the chronicles of this period, the name of Mazatât al-Kayrawân.

In all probability, there were also Ibadî Mazatâ of the Djebel Oussellet, the Djebal Wasalât of the Arab geographers, a canton situated to the west of the town of Kayrawân. It is no wonder with this name that there should be associated the ethnic al-Wasalât, applied to numerous Ibadî individuals of the 4th/10th and 5th/11th centuries, members of the tribe of the Mazatâ, including for example of the shaykh ʿAbd al-Qâni, the Al-Wasalât al-Mazâtî, and the shaykh Faṭûb b. Abî Hâdîjî al-Wasalâtî al-Mazâtî. According to the anonymous list of Ibadî shaykhs of the 7th/13th century, ʿAbd al-Qâni belonged to the Mazatâ branch of Amwâhût.

According to the Ibadî historian Abu l-ʿAbbâs al-Djarîjî, the Mazatâ of Irikiya were very rich (in particular, they possessed a large number of horses) and very warlike. Ibn Hawkal mentions a village named Dâkma (Dâma), situated close to al-Masila, which in the time of this geographer was inhabited by the Ibadî group Ismâ'îl b. Zîrî (the ancient Tipasa), most probably that which Ibn Hawkal speaks, locating it between Tifâsh (the ancient Tipasa) and al-Masila, alongside a branch of the tribe of the Kutâmâ. Ibn Hawkal also mentions a village named Dâkma (Dâma), situated close to al-Masila, which in the time of this geographer was inhabited by the Kutâmâ, but the name of which is associated with that of one of the sub-tribes of the Mazatâ, this being Dâqûma (read Dâqûma). The same facts were repeated at a later date by al-Idrisî.

As for the Zâb, the Mazatâ of this land lived, being semi-nomadic, in brushwood shacks in the vicinity of the towns of Tubna (the ancient Tubunae) and of Biskra. In 360/971, they were massacred by Bulûggûn b. Zîrî, but subsequently they regained their strength. Al-Idrisî (10th/16th century) refers to the Mazatâ in question, describing various features of their history during the 5th/11th and 6th/12th centuries. They lived in encampments (Ar. ʿayyâ) and the Ibadî-Wahbî faith, with a certain tendency towards Nukkârî Ibadîm. They were, among others, military supporters of the renowned Nukkârî chief Abû Yazîd, mentioned above.

The names of the Mazatâ sub-tribes which inhabited the Zâb are not known. It is very likely that it is to these groups that the Madunâ belonged, and perhaps also the Amwâhût (Umâhût). In fact, the name of this latter people is found in that of the locality, Oummach on modern maps, which is situated midway between Téhouda (the ancient Thabudeos) and Milîî (the ancient Gemellae).

The Mazatâ of the Zâb and of the Hodna belonged to very rich tribes which did not use their wealth to support the Rustâmî imamate of Tahart. The Ibadî historians state in this context, quoting the words of one of the Rustâmî mîms, that the Ibadî-Wahbî religion “exists through the swords of the Naţûsî and the possessions of the Mazatâ”, also alluding to the religious zeal of the former of these tribes. Ibn Saḥîr, author of a chronicle of Tahart composed at the beginning of the 4th/10th century, says of the Mazatâ, the Sadrât and other tribes inhabiting the Zâb and the Hodna, that they “were in the habit, in the season of spring, of leaving the temporary lands that they occupied in the Maghrib or other regions to come to Tahart or its surrounding areas on account of the pastures that they found there and other advantages which the land offered them... When the nomads arrived to install their encampments, their dignitaries and leaders of groups presented themselves in the town where they were received with kindness and respect (by the mîms). Then they returned to their encampments where they remained until the time of their departure”.

(T. Lewicki)

AL-MAZĀTĪ, ABU ‘L-RABI‘ SULAYMĀN B. YĀḤIYĀ ABU ‘L-RABI‘ SULAYMĀN B. YĀḤIYĀ, famous Ibāḍī historian, theologian and jurisconsult. He was a member, as his nisba indicated, of the Banū Abī Bakr, a desert tribe of Ma‘zātī that probably came originally from the branch who lived in the mountains of south Tunisia near the island Tamulast. He was also, like his uncle, a member of the same region of Tunisia as Abu ‘l-Rabi‘.*

The date of his birth is uncertain. We know, however, that, as a young man, in the first decade of the 5th/11th century, he studied under the famous Ibadī historian Abu Zakariyya Yahyā b. Abī Bakr al-Wardjālānī, one of the cultural centres of the Ibadis of North Africa; this is the Kitāb al-Siyar, a collection of biographies of distinguished Ibāḍīs of the Magribī. We do not know the date of composition of this work, which appears to have been written after the year 450/1060-1.

After having finished his studies in Djārba, Abu ‘l-Rabi‘ returned to Tamulast, where he was soon surrounded by a wide circle of students whom he taught, among other subjects, ar-Rashīd, i.e. the history of the Ibāḍī sect and the biographies of distinguished Ibāḍīs. He was already there at the time of the death of his old master Abū ‘Abd Allāh Muhammad b. Bakīr in 440/1048-9. From Tamulast, Abu ‘l-Rabi‘ set out, before 449/1057-8, for Ka‘fat ‘Allī (also Ka‘fat Bani ‘Allī), a place situated in the Djebel Zanzafa, near Tamulast; he lived there with his students until 462/1069-70. He felt safer in this place than in Tamulast, through which passed the route of some Arab tribes (notably the Banū Hādīl) going from Tripolitania to Ifriqiya and returning to Tripolitania.

In the same year, Abu ‘l-Rabi‘ returned to Tāmulāst, where he stayed for some time, always surrounded by his students. Towards the end of his life, he went to settle in Tūnīs, a desert place situated in the mountains near Tāmulāst, where a halka or circle of students soon gathered around him. His students were recruited from among the peoples of the Sūf (Oued Said), Arīgh (Oued Righ), Wardjālānī (Ouardagh), Zab and Kaṣṭilīya. Among those who were especially interested in Ibāḍī history and sīyar, one should mention principally the famous future historian Abū Zakariyyā Yahyā b. Abī Bakr al-Wardjālānī.*

According to the old Ibāḍī chronicles, Abu ‘l-Rabi‘ died in 471/1070-9 in Tūnīs. However, the Ibāḍī tradition of Ouardagh places the tomb and mosque of Abu ‘l-Rabi‘ Sulaymān al-Ma‘zātī, who is doubtless none other than Abu ‘l-Rabi‘ Sulaymān b. Yakhlaf al-Ma‘zātī, in this latter town. Abu ‘l-Rabi‘ travelled extensively. We have already seen that he had passed his youth in the Oued Righ and on the island of Djārba in order to study there. From the Oued Righ, he went at least twice to Ouardagh, once in the company of his master Abū ‘Abd Allāh Muhammad b. Bakīr. In 450/1060-61 he visited, accompanied by his students, most of the Wābbī Ibāḍī groups of Tunisia and Algeria, passing by Kaṣṭilīya (Kaṣṭilīya), Na‘fzawa (Nefzaoua), Asuf (Oued Souf), Waghālāna (Ourlana), Tamāṣīn (Temacīn) and Ouardagh, from where he returned to the Djībel Zanzafa and Tāmulāst.

Abu ‘l-Rabi‘ Sulaymān b. Yakhlaf al-Ma‘zātī is the author of three works, of which one is of particular interest for the history of the Ibāḍīs of North Africa; this is the Kitāb al-Siyar, a collection of biographies of distinguished Ibāḍīs of the Magribī. We do not know the date of composition of this work, which appears to have been written after the year 450/1069. We know of the existence of two manuscript copies of the Kitāb al-Siyar, of which one, apparently complete, is in the Bāb Mzāb in Beni Isguene, in a library known as al-Maktab al-ghanna, while the other, incomplete, was inserted in the historical work of Abu Zakariyyā Yahyā b. Abī Bakr al-Wardjālānī (6th/12th century) who, as we know, was one, of the students of Abu ‘l-Rabi‘. One also finds several citations of Abu ‘l-Rabi‘ in al-Shaykh Arīshī’s work. It seems that numerous citations of Abu ‘l-Rabi‘ which appear in some later Ibāḍī historical and biographical works in the 9th/11th century come from the Kitāb al-Siyar, while it is not impossible that a part of these citations come directly from the mouth of this historian and were noted by his students. This applies especially to the citations of Abu ‘l-Rabi‘ inserted in the historical work of Abū Zakariyyā Yahyā b. Abī Bakr al-Wardjālānī (6th/12th century) who, as we know, was one, of the students of Abu ‘l-Rabi‘. One also finds several citations of Abu ‘l-Rabi‘ in al-Shaykh Arīshī’s work.

It is curious that the Kitāb al-Siyar of Abu ‘l-Rabi‘ should not have been cited in the catalogue of Ibāḍī books composed in the 8th/14th century by al-Barrādī, an Ibāḍī scholar who was moreover originally from the same region of Tunisia as Abu ‘l-Rabi‘. Abī Barrāḍī knows only two other works of this historian which dealt with theology and law.

MAZDAK (also Mazag, Mazdak), the leader of a revolutionary movement in Sasanian Iran, during the reign of Kabûdân, son of Firûz (Kavâd, son of Peroz) 488-96, 498-9 to 531). Klima regarded the name of Mazdak as a conflation of an Iranian name, Mazag, Mazdak, or Magdad ('the justifier'), with a Semitic name, Mazdek, from the root zdk ('righteous'). Klima also suggested that mazdak may have been what the leaders of this movement were called rather than a proper name, or even what its members were called (al-Mazdakanân, al-Mazâdikân in Arabic sources as well as al-Mazdakiyya).

Almost everything known about this movement comes from hostile sources. The earliest and only contemporary account is in the Syriac *Chronicle of Pseudo-Joshua the Stylite* (ed. and tr. W. Wright, Cambridge 1899, i, pp. 1-xx, xx-xiv). Subsequent, sixth-century, Greek accounts are given by Procopius (*Persian Wars*, i. v-xi, ii. ix), Agathias (*Histories*, tr. J. D. Frendo, Berlin-New York 1975, iv, chaps. 27-30, pp. 130-4), and Malalas of Antioch (*Chronographia*, in J. P. Migne (ed.), *Patrologia Graeca Completa*, Series Graeca, xxviii, Paris 1860, cols. 465, 633, 653). Theophanes (Migne, *op. cit.*, evii, Paris 1865, col. 396) merely repeats Malalas. There are scattered allusions to Mazdak in Mazdean Middle Persian literature. Klima suggested that references to Mazdak were deliberately omitted from the original Middle Persian text of the Sâsnâd royal chronicle, the *Khwarâš-nâmâg*, and credited Ibn al-Mukaffa (*d. 145/760* [q. v.]) with inserting an account about Mazdak into his Arabic translation of the *Khwarâš-nâmâg*. References to the main Arabic and Persian accounts of Mazdak based on this and other translations are given by Yarshater. Ibn al-Mukaffa also translated a Middle Persian work of fiction called the Mazdâkh-nâmâg into Arabic. This work was also translated into Arabic poetry by Abûn b. al-Hamîd al-Lâbi (d. 200/815-16 [q. v.]). According to Yarshater, who identifies the main fictional themes, this work was the basis for the Nîmûl’s account in the *Sîyâsat-nâmâ* and of the poetic version in Dârâb Hormâdzâ’s *Rîcâsit*. It was also used by al-Bûrînî (Alghârî, Ibn al-Balkhî (Fars-nâmâ), the Mazaghul al-tawârîkh, and Ibn al-Aţûrî (Kâmî). The most important source for Mazdakian doctrine is Abî ʿĪsa Muhammad b. Hûrin al-Warrâk (d. 247/861), a Manichaean or Mazdean convert to Islam who seems to have used some authentic Mazdakian work for his religious history (Kûûb al-Makâlût), His account is also the Shahristânî’s (468-548/1076-1153) source for Mazdakian doctrine in his Kûûb al-mâlûm wa l-nâhal. The Mazdakian book called the Dêmâd cited in Mubadh Shah’s 11th/17th-century *Dustânšt-i msgâkhî* [q. v.] is generally considered to be a fabrication because everything cited from it can also be found in al-Shâhrastânî or other works, although it could be argued on the same basis that this might have been the name of the work used by al-Warrâk. Some of the information in the *Fihrist* of Ibn al-Nadîm [q. v.] appears to be independent and rather neutral.

The Mazdakian movement is said to have been founded by a certain Zarâdush (or Zarâdush), son of Khurragân, moqâl or chief moqâl of Fasâ in Fars, after whom its members were called Zarâdushqalân. Christensen identified this Zarâdush with a Manichaean called Bundos who, according to Malalas, appeared at Rome in the time of DIOCLETIAN (245-313), held doctrines opposed to the majority of Manichaeans, and left for Persia where he spread his doctrine. His sect was called ‘those of the right religion’ (الشّامخون) from MP daris-darîn, and Malalas says that Daraish himself was a Daris-dar (Darîş-darîn). Christensen took Bundos to be an honorific title of Zarâdush, from MP bynrdk (‘the venerable’), and regarded Mazdakism as a re-forming Manichaean sect. However, Klima regarded Zarâdush and Bundos as separate persons, and Yarshater puts Zarâdush in the 5th century A.D. According to Arrigoni, Bundos is a mistake for Buddha, therefore a fictive re-personalisation of Bud- dha. Yarshater suggests that the founding of Zarâdush’s movement may have coincided with the end of the millennium of Zoroaster, which some calculations would put at the end of the 4th or the beginning of the 5th century A.D. It might also have been the doctrine combated by Adurâd Mârâspanân, who underwent an ordeal by fire to refute it in the time of Shâpur II. The movement seems to have been Zoroaster’s rather than the Manichaean in origin, although it acquired gnostic features that gave it an affinity to Manichaeism. It may have begun as an attempt to popularise Mazdâism and to spread it in a non-elitist form that would transcend class barriers and appeal to the general population. Textual support for the egalitarian sharing of wealth, women, and wisdom exists in the extant Avesta, such as Vendidad iv. 44: ‘If fellow-believers (kâmadâna), brothers or friends, come to ask for money, wife, or wisdom, he who asks for money should be given money; he who asks for a wife should be given a wife to marry; he who asks for wisdom should be taught the holy word.’ Ibn al-Nadîm describes the early Khurramiya (Maz- dakis) as a Zoroastrian sect founded by a certain Mazdak the Older (al-Kadim), who enjoined his followers to enjoy life’s pleasures, to satisfy their desire to eat and drink in a spirit of equality, to avoid dominating each other, to share women and family, to try to do good deeds, to avoid shedding blood and harming others and to be hospitable. In the time of Kûûbâd, the movement of Zarâdush was revived under Mazdak, son of Bâmdâb (‘the Sunrise’), called Mazdak the Younger by Ibn al-Nadîm. According to al-Tabâri, he was a native of ʿâlîf, which tends to be identified with al- Maĥârayya, near modern Kût al-ʿAmâra [q. v.], although von Wesendonk located it in Khuzistan. Istâkhâr and Tabriz are also given as Mazdak’s birthplace. He is said to have been a moqâl and is identified by Christensen with the Manichaean bishop Indarazâr, whom Malalas says was killed by the Per- sian king ca. 527. Indarazâr (Indazazor in Theophanes) is explained as andarazer (‘teacher’) by Noldeke; Klima suggested that the proper name Vin- dârâzâr lies behind it and speculated that if mazdak were an epithet, then that might have been his real name.

A series of disasters in the late 5th century increased distress and raised apocalyptic expectations. Iran suffered a seven-year-long drought and famine during the reign of Firûz. Defeat by the Hephthalites in 484 put the Sânsâdûn under the burden of paying tribute to them. The Hephthalite and dynastic civil wars also
decimated the military nobility, undermining their ability to preserve their privileged position. The common interest of the monarch and the people in curbing the power of the great nobles may have led Kubād to identify himself with the Zarādushṭakān. He may have seen this movement as a potential base of mass support against the nobles, and its programme as a means of restoring by transforming his kingdom. Nōdeke represented Kubād as a forceful, capable ruler, who, for purely secular motives, favoured Mazdakism as an expedient to reduce the power of the nobles and priests. Christensen argued that Kubād was a sincere convert and humanitarian ruler motivated by religious belief and a desire for the welfare of his subjects. Pigeuveskaya saw Kubād as a sincere Mazdakī rather than a shrewd and subtle politician. Klima rejected Christensen’s “humanitarian” characterisation of Kubād based on his behaviour in wars, although an Arabic source with a hostile bias says that, as a zandāk, Kubād feared to shed blood. Although there is no way to be certain, Kubād is most likely to have been motivated by a combination of political interests and religious belief.

To the extent that doctrines ascribed to Mazdak himself can be reconstructed from later sources, he seems to have advocated the enjoyment of material things in moderation and a peaceful, egalitarian and non-competitive social and economic order. Mīkawī believes that the early Mazdakīyya were called “the adherents of justice” (al-Adhīyeh) and they are sometimes compared to the egalitarian, gnostic sect of Carpocratians that also stood for social justice. According to al-Tha’alībī, Mazdak taught that God had put provisions for livelihood (arzāk) on earth for people to divide equally among themselves, with no one having more than his share. But people had wronged each other and sought to dominate; the strong had defeated the weak and monopolised the means of livelihood and property. It was necessary to take from the rich and give to the poor for everyone to become equal in wealth. Whoever had a surplus of property, women, or goods had no more right to it than anyone else. In Firdawsī, Mazdak is said to have taught that wealth and women must be shared in order to overcome the four demons of envy, wrath, vengeance, and greed that turn men from righteousness. This appears to be reflected in the refutation of a sectarian who represents sharing women and property as a remedy for passions in Dīnḵart, iii. 5.

If authentic, such a positive, anti-élite attitude toward material possessions could hardly have been Manichaein in origin. Christensen accepted the Manichean origin of the Mazdakīyya because they are called Manichaeans in the Greek sources. They may have been accused of Manichaeism by their enemies in Iran, and Malalas may simply have repeated the slander or have used the only name for an Iranian sect that he knew. Klima’s argument that Mazdak had to use Mazdaean terminology as a vehicle for the mass communication of his propaganda because he was in Iran is based on the assumption that Mazdaism was spread uniformly, socially and geographically, in 5th-century Iran. But it is questionable that the lower classes were already Mazdaean in the 5th century; Mazdaism seems rather to have been a vehicle to spread Mazdaean doctrine among them.

Puech regards Mazdaism as an optimistic reform of Manichaicism, but, as Yarshater points out, most scholars describe Mazdaism as a reform of Zoroastrianism. What is known about Mazdak’s doctrine is dualist and generally gnostic in character rather than specifically Manichaean. The gnostic elements that are claimed as the basis for affinity between Mazdaism and Manichaism include pacifism, asceticism, fatalism, esoteric interpretation and the dualist rejection of ritual. The prohibition of bloodshed appears in the context of social concord and is not necessarily either pacifist or vegetarian. The only other basis for claiming an ascetic element in Mazdaism is a hostile gloss to Vendidad, iv. 49 saying that Mazdak, son of Bāmdād, ate fully himself but subjected others to hunger and death. This is just as likely to refer to the consequence of Mazdak’s regulations for his own followers without additional corroboration. The alleged contrast between ascetic and hedonistic tendencies in Mazdaism is explained by Yarshater, by comparison with gnostic movements, in terms of a self-denying elite and wordly lay members. But this is the reverse of what the gloss suggests, and there is no other evidence for such elitism among the Mazdakīyya. According to al-Shahrastānī, Mazdak’s doctrine resembled Mani’s except that Darkness did not act of its own will and out of choice (bi ‘l-khayl wa ‘l-ittifāk), but blindly and by chance (bi ‘l-khabt wa ‘l-ittifāk), and that the mixture of Light with Darkness was produced in order to separate the others. According to al-Mutahhar b. Tāhir al-Makdīsī, the Sābiyān [q. v.] also believed in mixture bi ‘l-khabt wa ‘l-ittifāk. Although Sābiyān are sometimes mistaken for Manichaeans, belief in a blind fate is central to Zoroanism and thus available in a Zoroastrian context. Regarding esoteric interpretation, al-Mas’ūdī says that Mazdak was the first to interpret the Avesta according to its hidden meanings (hāṣṭa). Although this may have been a matter of adjusting Mazdaean doctrine for the masses, it made the Mazdakīyya into Zindiks [q. v.] along with the Manichaeans. According to the 3rd/9th century al-Mutawakkilī, Mazdak is also said to have persuaded Kubād to have all but the three original fires extinguished. Rather than being an attack on cult observance, a ghurab, Yarshater interprets this to mean that Mazdak sought to reduce the power of the Mazdaean priesthood and deprive them of property held by fire-temples. There may have been an attempt to found alternative institutions, since the Nestorian Chronicle of Sir’ī reports that Kubād ordered temples (hayaḵt) and hospices (fandīk) to be built throughout his kingdom where men and women would congregate for adoruty.

Beginning with the earliest sources, the Mazdakī ideal of sharing women has been represented in terms of sexual promiscuity with the resulting confusion of paternity. According to Pseudo-Joshua, the Zarādushṭakān believed that women should be shared and that every man should have intercourse with whom he pleased. This text also reports that Kubād allowed the wives of the nobles to commit adultery, while Procopius relates that Kubād issued a law that Persians should have intercourse with women in common nōmōn ἡγεμόν ἐπὶ νομῆς γυναῖκες μὲνα ἡγεμονίαν Ἐρέσ. Although such reports received lurid embellishments in later literature, it is more likely, according to Klima and Yarshater, that the Mazdakīyya advocated the right of each man to have a wife and the abolition of social barriers to marriage between nobles and commoners. They may also have encouraged the marriage of women outside of their immediate families. Klima suggests that famine and
the decimation of the nobility in recent warfare had caused a demographic crisis in Iran, and that the
The situation seems to have been stabilised with the Mazdakiyya in control after Kubābdh's return. The Mazdakiyya period is generally understood in terms of class conflict and the overturning of the social order. Soviet scholars see the movement as one of peasant protest and identify Mazdak's followers as poor farmers, although Piguilevskaya notes that the sources are not specific in this respect. Al-Tabari calls his followers commoners (damma, while al-Tha'ālabī simply calls them the poor (fakhrān, masākim) or the rabble (al-ghawghā). However, some nobles were Mazdakiyya, such as Sīyavūs, who commanded Kubābdh's army after his restoration, and Kubābdh's eldest son, Kāwūs, who governed Tabaristan as the Pudshahār ash-Shāh. Kubābdh seems to have favoured the conversion of non-Zoroastrians in order to increase religious conformity. He tried to force the Armenians to convert before he was deposed, and after he was restored, he required the Arab ruler of al-Hira, al-Mundhir III (ca. 502-54 [see LAKHMIDS]) to adopt Mazdaki doctrines. When al-Mundhir refused, Kubābdh got the ruler of the Kinda, al-Hārith b. ʿAmr, to agree to impose Mazdakism on the Arabs of the Najd and the Ḥiḍāj. Some Arabs in Mecca are said to have adopted Mazdakism (tazandaka) at that time, and some sarīdā are said to have still been there in the time of Muḥammad. Efforts to spread some form of Zoroastrianism lie behind the forced conversion of Jewish children that began under Fīrūz in 474, according to Shīrīr, or in 477 according to Ibn Dāwūd. Graetz and others have seen the revolt of the exilarch, Mar Zutrah, who is said to have made himself briefly independent at Mahoza near Ctesiphon in the early 6th century, as a reaction to the Mazdakiyya, although Neusner considers the entire episode implausible.
Since the Mazdakiyya supported the succession of Kāwūs, his younger brother, Khusrav, allied himself with the Mazdaean priests, challenged Mazdak's influence over Kubābdh, arranged for the Mazdakiyya to assemble at the capital for a religious disputa or for the proclamation of Kāwūs as successor, convinced his father that Mazdak's doctrines were false, and had him executed with thousands of his followers in 528 or early 529. When Khusrav succeeded his father in 531, there may have been a second persecution of Mazdakites; the sect was suppressed and its books destroyed. In reaction to thirty years of Mazdaki ascendency, the distinction between nobles and commoners was restored. Some indication of what had happened can be seen in the reforms of Khusrav I, who confiscated the property of Mazdaki leaders and gave it to the poor. He executed those who had taken property by force and returned it to its former owners. Those who had damaged property were ordered to pay for it. A child of disputed descent was to belong to the family with which it lived. A man who had seized a woman was to give her a marriage portion that satisfied her family; she could then decide to stay with him or marry someone else, but should return to her former husband if she had one. Khusrav took personal charge of children from noble families without anyone to care for them; he gave the girls dowries and found noble husbands for them, and found noble wives for the youths.
Any Mazdakiyya who survived did so in secret or escaped beyond the Sāsānids borders to Central Asia. There may have been an early centre near Ravy. By the early Islamic period, Neo-Mazdakian groups were scattered throughout Iran; they were called Mazdakiyya around Ravy and Hamadan, "wearers of red" (Maḥammad in Dūrjan), and "wearers of white" (Sūnī or Maḥammad or Muḥammad) in Central Asia. During the 2nd/8th and 3rd/9th centuries, they broke up into numerous sub-sect named after some leader. According to al-Warrāk, as cited by al-Shahrastānī, in the 3rd/9th century, Mazdakian doctrine was based on a dualism of Light and Darkness; Light, having knowledge and sensation, acted intentionally, while Darkness, being ignorant and blind, acted randomly. Both their mixtures and separation were accidental. The mingling of the three elements of Water, Fire, and Earth produced two demiurge-like Managers of Good and of Evil. Their object of worship (naḥbadahu) was enthroned in the upper world as the supreme monarch (khusrav) was in the lower world. Four spiritual powers (kuwā) called Discernment (tamziyya), Understanding (jalma), Preservation (hīfī), and Joy (turī) stand before His throne corresponding to the chief judge (nāḥfūn nāḥfāh), religious teacher (bīhīshāh ūrūbaḥī), army commander (spāhbed), and entertain-ment master (nāšīqān) who stood before the earthly king. The world was directed by the four powers with the aid of seven waṣīr and twelve spiritual forces. Anyone in whom the four, the seven, and the twelve were combined became godly (rabbanī) and freed from religious duties. Those who knew the sum of the let-ters that amounted to the most supreme Name (al-imāl) also knew the greatest secret (al-tur al-alāh). Those who did not know it remained blind and ignorant. The doctrine of correspondence seems to reflect late Sāsānids conditions, but it is difficult to tell whether the rest went back to Mazdak himself or whether it was the result of continuing doctrinal development. The Mazdakiyya tend to be credited with introducing number and letter mysticism, and may have contributed it to the Kaysaniyya (q. v.) Shīʿī groups with which they associated in the 2nd/8th century. The Neo-Mazdakian groups that emerged from this association such as the Abū Muslimiyā, Sunbād-iyya, Mukannā-iyya and, above all, the Khurramiyya (q. v.) or Khurramdiniyya and its subset of Kudhakiyya, seem to have acquired additional gnostic content from ghulū Shīʿī groups as a semi-Islamic disguise. However, both al-Shīʿī and al-Makdisī regarded the Khurramiyya as a category of Madjūs (q. v.). Mazdakiyya survived in Central Asia as late as the early 6th/12th century living at Kīgh.
Nakhashab and villages near Bukhara according to NarshakhT. According to Yakut, they inhabited the village of Dargazin between Hamadān and Zandān. The last references to Mazdakiyya occur in the Ilkhanid period, although the Mazdakiyya are listed as the fourteenth Zoroastrian sect in the Dabistān, as the fourteenth Zoroastrian sect in the Ihkāk Ma‘ārim, which the divinity or its attributes are made visible in a visible appearance or expression of an invisible reality, reflecting the popular contrast between the state and period of his concealment and the state and period of his revelation. This revelation takes place in the mazhar, a creating being in whom the Divinity manifests himself to its attributes, and to himself out of nothing, attributes. It is not, strictly speaking, the divine essence but is a Will that was created through recognition of him has only been attained through what they are. In this sense, the Perfect Man is the Isthmus of an external attribute manifesting a divine name. In his theory of the Perfect Man who acts as a mirror in which the Absolute may see itself manifested, Ibn al-‘Arabi parallels the Šīrī notion of the imām: man that is the place of manifestation of the divinity, ḫuwār mazdī Jāh hāk. In this sense, the Perfect Man is the Lūtus and karazākh joining the worlds of the Absolute and Creation (See Ibn al-‘Arabi, Fūsūs al-fikm.)

The Bāb [q.v.] developed a complex theory of theophany, distinguished between the imams and the mazdhār, where the number is incalculable. They are the mazhar of the “tree of reality” (mirāj), or “mirror” (haykal), “seat” (zuhūr, idem, (referred to variously as a “throne” (ardāh), “seat” (kursī), “temple” (haykal), or “mirror” (mirāj), or as the “tree of reality” (ṣafirat al-ḥakīka) and “primal point” (nuktat-yi ulla) is an ambivalent creature. He is outwardly mortal (“what your eyes beheld of the outward form of the thrones is but a handful of clay”, 242), but inwardly divine: “Look within them, for God has manifested Himself (tadjalld) to them and through them” (ibid.). The historical mazḍāh or ontologically a single being, the historical mazḍāh or “mirror” (tadjalld), is a synonym for mazdīh, which the divinity or its attributes are made visible in a visible appearance or expression of an invisible reality, reflecting the popular contrast between the state and period of his concealment and the state and period of his revelation. This revelation takes place in the mazhar, a creating being in whom the Divinity manifests himself to its attributes, and to himself out of nothing, attributes. It is not, strictly speaking, the divine essence but is a Will that was created through recognition of him has only been attained through what they are.
tions of the divinity (see MacEoin, Hierarchy, 109 ff.). His chief follower, Mirzâ Muhammad ʿAlî Kuddûs, is referred to in one source quite simply as mazhar-i ḥudâ (ibid., 110). In theological terms, this is explained by the concept of an infinite progression of mirrors reflecting the Divine Will and forming a complex descending hierarchy of mazhûr. These secondary, tertiary, and subsequent mirrors appear, not only during the lifetime of the primary mirror, but throughout the period of bahûn, when he is in a state of concealment (ibid., 117-19).

Bahâʾî doctrine follows that of Bûbism very closely, but tends to be more restrictive in its attribution of the status of mazharîyya, which is generally limited to the founders of the major religions. The full technical term for such figures is mazharî šâhî (in English Bahâʾî usage, “Manifestation of God”). At the same time, a broader definition of religious truth allows Bahâʾîs to include among the mazharî figures such as Buddha and Krishna (whom they regard as the “founder” of Hinduism). Bahâʾî Allâh [q.v.] is the latest mazharî and will not be followed by another for at least one thousand years. Not only is he accorded a high status with regard to previous and future mazhûr (who have either prepared the way for him or will function under his shadow), but he himself often speaks in terms that are close to those of bahûn. This is “the forefather of all things”, in whom “the essence of the pre-existent has appeared”; in one place, he claims that “he has been born who begets not nor is begetten” (see MacEoin, Charismatic authority, 168). Modern Bahâʾî doctrine, however, explicitly5 rejects an incarnationist interpretation of the status of the mazharî.

(For D. MacEoin)

MAZHAR, MIRZĀ ĐEÑĐEÑAN (1111-95/1700-81), an Urdu poet and eminent Sûfî, was born in Tâlâbâq, Mâlâwâ. He was received into the Nakshbandi order by Sayyid Mîr Muhammad Badâ'înâ, and into the Kâdîrî order by Muhammad ʿAbîd Sumâmî. He was shot in Delhi by a Shiʿî fanatic in revenge for his critical remarks about the Muslim celebrations, but though he survived three days, he refused to identify his assailant, this is Emperor. He was—and remains—a famous religious leader. He had many disciples and was even credited with miracles. As a writer, however, his position is not so clear-cut. His letters, in Persian, have been published along with miracles. As a writer, however, his position is not so clear-cut. His letters, in Persian, have been published with some so clear-cut. MAZHAR — MAZIN 953

MAZHAR — MAZIN 953
Mazin originally meant "the emigrants" and was used in a general way of any ethnic group which became separated from its own tribe and was incorporated in a strange tribe. This etymology, like almost all those of the names of Arab tribes, is of course only a hypothesis.

The sources give a certain number of geographical and historical references to different tribes called Mazin; but they are generally very scanty, none of these tribes having attained sufficient importance to make it independent of the larger body to which it was attached. We have a few details about the Mazin tribe of Hamdil (not cited by Ibn Al-Kalbi) and the Mazin dialect of other RabT tribes, we have a few details about the Mazin tribe of Hamdil (not cited by Ibn Al-Kalbi) and the Mazin dialect of other RabT tribes, which the Tamlm belonged to the Mazin. We may note however Hilal b. As'l of the Umayyad period (Aghdni, ii, 186); Malik b. Al-Rayb, poet and brigand, contemporary of Al-Hadath (Aghdni, xix, 162-9; Ibn Kutayba, Al-Shurr wa'l-Shar'a, ed. de Goeje, 205-7, etc.); Zuhayr b. Urwa Al-Sakb (Aghdni, xix, 156; the few verses that we have by him, often quoted, are also attributed to his father, Urwa b. Dja'lan, and even to Abd Al-Rahman b. Hassân b. Thabit: cf. Mufaddal (Aghdni, ed. Lyall, 249, n. 5). Lastly, it may be mentioned that the Mazin have given to Arab philology two of its most illustrious masters: Abû 'Amr b. al-'Ala\(\text{a}\) [q.v.], d. 154/771; and Al-Nadr b. Shumayl, whose genealogies are given in Wüstenfeld, Tabellen (I.).

Very few of the remarkable number of poets produced by the Tamlm belonged to the Mazin. We may note however Hilal b. As'l of the Umayyad period (Aghdni, ii, 186); Malik b. Al-Rayb, poet and brigand, contemporary of Al-Hadath (Aghdni, xix, 162-9; Ibn Kutayba, Al-Shurr wa'l-Shar'a, ed. de Goeje, 205-7, etc.); Zuhayr b. Urwa Al-Sakb (Aghdni, xix, 156; the few verses that we have by him, often quoted, are also attributed to his father, Urwa b. Dja'lan, and even to Abd Al-Rahman b. Hassân b. Thabit: cf. Mufaddal (Aghdni, ed. Lyall, 249, n. 5). Lastly, it may be mentioned that the Mazin have given to Arab philology two of its most illustrious masters: Abû 'Amr b. al-'Ala\(\text{a}\) [q.v.], d. 154/771; and Al-Nadr b. Shumayl, whose genealogies are given in Wüstenfeld, Tabellen (I.).

Information about his life and works is scarce and partly contradictory. Already discutable is the name of his grandfather and his supposed lineal descent from the Banu Mazin [q.v.]; the tradition that he was only a member of the Banu Mazin is more likely to be correct. Al-Mazini uses materials taken from Abû Zayd Al-Ansari, Abû 'l-Hasan Al-Abdah, Al-Aṣma\(\text{a}\) and Abû 'l-Boyada [q.v.]. Among his disciples, Al-Mubarrad (d. 286/900) is to be mentioned in the first place. The stories—some of which refer to his arrival in Baghdad during the caliphate of Al-Mu'tasim (218-27/835-42) and connect him with the court of his successors Al-Walid and Al-Mutawakkil in Sāmarrā—and are not to be distinguished by their anecdotal character and pointed narration from the numerous comparable aṣhab adab and tabaqāt literature. Within these traditions, judgements and opinions about Al-Mazini's learning and madhhab are interspersed. Al-Mubarrad considered him next, after Sibawayh, as one of the most learned of grammarians; others suggested that he was an adherent of the Imāmiyya or Mudjdi\(\text{a}\), or else of the Kādiyya or Mu'tazila. Even the information about the date of his death in his home town is varying. The dates differ by up to 19 years. Preference is to be given to the note that he died in the same year as the caliph Al-Mutawakkil (232-47/847-61) or—as often quoted—little later in the year 249/863.

Nothing is preserved of Al-Mazini's supposed works on grammar, lexicography and metrics, of his explanations concerning Sibawayh's Kitab and the Kur\(\text{\text{'}}\)an books which have been enumerated, e.g. by Yākūt, Umdat\(\text{\text{'}}\), ii, 388. Only one text, the Kitab—

**Bibliography:**

**AL-MAZINI, Abû 'Uṣma'ān Bakr b. Muḥammad, Arab philologist and Kur\(\text{\text{'}}\)ān reader from al-Basra.
Tarif, a very significant treatise on morphology, has been transmitted in a ruwdta, that is to say, lecture notes. The teacher is addressing the student directly; else he refers to the authority of al-Khalll. This Kitab al-Tasrif li-Abi 'Uthmdn al-Mdzini, a book written in language, not infrequently embedded in aphorisms, including verses of reference to the guidance of his teacher al-Farisi (d. 377/987) or al-Munsif and enlarged it with two appendices (see his preface, i, 1; ii, 208, 261). The first appendix comprises additional lexicographical explanations, including verses of reference to the previous chapters. It is entitled Tafsir al-lugha min kitab Abi 'Uthmdn bi-shawdhidihi wa-huajadihi wa-innamadih. The second appendix, is called Musal'd min 'ausi al-Tasrif, deals with 15 specific questions. Ibn Djinnl derives his entire material from the madjlis, traditions, referring mainly to his teacher al-Farisi. Besides speculative topics, he inserts numerous observations concerning the use of language, the basic radicals of the learned. These works have been edited under the title al-Mansf, ghrakh Abi 'Uthmdn b. Djinnl li-Kita'at al-Tasrif li-Abi 'Uthmdn al-Mazini, by Ibrahim Mustafa and Abd Allah Amln, 3 vols., Cairo 1373-955-60.

(R. Sellheim)
Teachers' Training College, al-Mazim had benefited from his readings in English which enabled him to discover Byron, Shelley, the "Lake Poets" Wordsworth and Coleridge, and Browning. Since that time al-Mazim, captivated by romantic sensibility, felt the need to express melancholy, sadness and the pain of living, the result of which was his Diwan (first section 1913; second 1917; third, posthumously, 1960; published in entirety in 1961).

However, this convinced modernist hardly sanctified a revolution in poetic forms; his greatest audacity consisted in abandoning the single rhyme in favour of the alternate rhyme. This is no doubt explained by the fact that his discovery of foreign poetry was accompanied by a deepening of his Arabic culture. At this time, the publication of the Arabic classics was in progress, and al-Mazim thus read the poets of the 'Arabi, Ibn al-Rūmī and al-Ma'arrī, being also drawn to the prose-writer al-Dhābi, whose spirit and style left their mark on him. Not all of these published editions were perfect, and it is said that he often went to Dār al-Kutub to consult the manuscript of al-Aghāni; it also seems that Shukrī and he spent hours there recopying the manuscript of the Diwan of Ibn al-Rūmī. He was 55 years old when, in an article appearing in al-Maqrīzī of December 1944, he announced that he had undertaken and consented to a systematic study of Arab literature, applying the method which he had acquired from the school of the English writers. But he quite soon gave up composing poetry. In explaining this decision, he said that he had never been entirely satisfied with his production in this field, even regretting that he had not had the courage to destroy his compositions. On the other hand, his role as a literary critic continued to command respect.

Crucial. In an article appearing in al-Mustamī al-'Arabi of 1949, Tāhā Husayn expressed the opinion that for some twenty years, the Egyptian writer had ceased to limit his horizon to his own country and had begun to take an interest in the outside World. There were in fact two schools of modernists: a French school where, following Ahmad Luṭfī al-Sayyid, the most distinguished figures were Tāhā Husayn and Muhammad Husayn Haykal; and an English school where, following ʿAbd al-Rahmān Shukrī, the two leaders were al-Akkaḍ and al-Mazim. This "school" published its manifesto, al-Diwan, in 1921. To be more exact, this was the beginning of an unfinished critical work. The two writers al-Akkaḍ and al-Mazim declared their intention to write ten fascicles in which they would show, successively, in what ways the literary celebrations of the time were overrated and what should be the new characteristics of Arabic poetry. Only the first two fascicles appeared, and what is known as the Diwan is thus limited to violent criticism of the contemporary idols, the poet Ahmad Shawki and the prose-writer al-Manfalūtī. To these two targets, the two iconoclasts added a completely unexpected third, ʿAbd al-Rahmān Shukrī! It is even in reference to him that al-Mazīnī—to whom it fell to analyse him—uses the term "idol". It is impossible not to be astonished at this sudden reversal when it is known what close friends the two men were, a friendship which lasted in particular on perfect similarity of views in questions of poetry.

Some years before the publication of the Diwan, al-Mazim had, for the first time, propounded entirely new principles for the criticism of Arabic poetry, principles which he had drawn from his reading of Hazlitt, Arnold and Macaulay. In a small monograph which appeared in 1915 (al-Shīr, ghashiyatu wu-wassāʿih), he demands of the poet that he should be sincere and that he should not produce work in a mechanical fashion but compose a personal poetry. The same year, under the title Ṣūḥ Hāfīẓ, he reprinted articles which he had devoted to the eminent Egyptian poet and had published in the review ʿUkāk in 1913. According to him, Hāfīẓ is a charlatan who is capable of composing poetry on subjects which do not genuinely affect him, which are supplied to him by the circumstances of actuality; he is a criminal who perverts the taste of readers, accuses them to lie and damn them! In order the better to pursue this vulgar versifier (nāzīm bi ʾiṣ-ṣarāʿ) he compares him with a true poet, a poet of innate talent (maḥbūb) ... Shukrī in fact. His method consists in comparing, theme by theme, the verses of each of the two men in order to demonstrate the accuracy of his judgment. But since certain partisans of Hāfīẓ reproach him for concentrating on only the worst verses of the poet, he addsuce proof to show that his best compositions, for their part, are only plagiarism of the ancients. It may be noted in passing that the modernist al-Mazīnī falls into step with the most traditional of Arabic criticism, since he practises parallelism (muwawwana) and is concerned to uncover plagiarisms (sārikāt). However, the harmonious relationship between al-Mazīnī and Shukrī did not survive the latter's death and the publication of al-Shīr, in which he revealed that his colleague had borrowed many of the themes of his Diwan—if not entire verses—from Palgrave's Golden treasury, an anthology of English lyric poetry after Shakespeare. Nothing more is needed to explain the sudden antipathy of al-Mazīnī with regard to Shukrī in his two fascicles of the Diwan, even though, subsequently, he felt obliged to retract his strictures and to acknowledge, in an article in al-Sayḥa of 5 April 1950, that it was to him that he owed his discovery of the essence of poetry.

With regard to ancient Arabic poetry, he is interested particularly in al-Mutanabbī and Ibn al-Rūmī, whom he studies as a priority, as does his companion and model al-Akkaḍ. He seeks to reconsider the question of the scale of traditionally fixed values. Ibn al-Rūmī seems to him to have been unfairly treated, no doubt because he was of Byzantine ancestry (rūmī). He considers that this should be in itself a sufficient reason for placing him above other poets. He states: "We do not try to mock the Arabs or to discredit their poetry. We mean only to say that the Arabs are not the most poetic people". According to him, all the human qualities are to be found in Western poetry, and he concludes by declaring himself a fanatical partisan of the West, eulogising the "Aryan peoples". Western theoreticians assist him to make progress in the evaluation of the resources of poetry: the German Lessing enables him to verify, in the work of Ibn al-Rūmī, again, that descriptive poetry, unlike painting on canvas, creates the illusion of movement; the Englishman Locke uncovers for him the latter's misunderstanding of magic and symbol (tanz). Through contact with European works, he poses in new terms the problem of the imagination. He tends to see here only the faculty of establishing a new combination of given elements from which innovation emerges. If he seems to ignore creative imagination, this is because of his rejection of the implausibilities which sometimes mar classical Arabic poetry. Like al-Akkaḍ, he does not accept gratuitous extravagance, the senseless hyperbole which Arabic poetry shamelessly displays, under the guise of poetic genius.

Al-Mazīnī is renowned as being a man of hard judgment, but while he has a grasp of concise for-
umae, he also possesses an immoderate taste for digression, and it is the middle course, which dates from 1914—few works of note appeared in the succeeding years: Thaqafya (1922) by ʿIṣâʿi ʿUbayd is rather a long short story, and Ibnat al-mamluk (1926) by Ibn ʿAbi Ḥadid is a historical novel. This being so, chronologically al-Mazini produced the second novel which had ever appeared in Egypt when he published Ibrahim al-kāṭib (1931), the second edition of Zaynah, in 1922. The critical work which already had the memory of the first. It is also appropriate to mention that al-Mazini had published a version of the first five chapters from the end of 1925 in several issues of the review Rās al-Yaḥṣūb. The author was already known, was even eminent, as an innovating poet counted among the proponents of the modern school of literary criticism, and the role that he played in crossing swords with ʿAbd, Shawkī and others was not to be forgotten on account of the fact that he renewed his attacks in the columns of the press, also making a name for himself in the discussion of social and political questions in al-Akbār, al-ʿIttibāʿ and al-Siyāsā, in which his vivid style and caustic tone were widely recognised. On account of all these factors, his novel was eagerly awaited, and it did indeed, in a general sense, achieve success, for three essential reasons:

The leading character who bears the same name as the author is, in fact, his double, and nobody can doubt that they both think, act and feel in the same way; he is charming and impulsive, a sceptic if not a pessimist, considering others and himself with humour. The story related, on the other hand, does not fail to engage curiosity, since the three women with whom Ibrahim is romantically involved pose such fundamental questions as the importance of tradition, the role of women and the meaning of marriage. Finally, as to the tone of the novel, its unity is maintained on account of the fact that the narration is in the first person, facilitating the transfer from abstract meditation to lively and satirical description or to vivid dialogue. Al-Mazini's first contribution to fiction would thus appear to be entirely creditable, leading one to suppose that he would not be slow to repeat this success. However, it was not until 1943 that he added to his corpus, publishing four novels in the same year: Ibrahim al-thānī, Thalāthā rājīḍ wa-maʿa, ʿAwd ʿalā ḥadd, Miṣūr wa-sharākhū. Some have tended to attribute special significance to the first two, linking them with the novel already discussed to constitute a "trilogy" (cf. ʿAbd Wādī ʿAṣūr, al-Marʿār fi ʿArbaʿa al-muʿāṣirūn, Cairo, 1953). This cannot be substantiated, not even in reference to Ibrahim al-thānī, which could indeed be taken to represent that which befalls the hero of the earlier novel some years after his marriage, when conjugal monotony begins to weigh upon him and he finds himself dangerously tempted by the young women who surround him. It is true, however, that a certain evolution is perceptible running through the three books in question as regards the role of the wife. Time has passed since Ibrahim al-kāṭib, but some ten years more and the equality in principle of the two spouses are not sufficient to make the life of the couple in Ibrahim al-thānī euphoric. On the other hand, the acquisition by the wife of responsibility in Thalāthā rājīḍ makes of her a character quite unique, capable of initiative, and the form accords with the content—it is no longer an account written in the first person. During the five remaining years of his life, al-Mazini was not to publish a new novel. It may be mentioned here that he published a single theatrical piece, Ghazirat al-marʿār wa ḥukm al-tāʿa (1930), not only to indicate that, on the stage also, the question of feminine rights seems to him to require treatment—like many other intellectuals, he supported the movement for the reform of ideas initiated by Kasim Amin at the beginning of the century—but also to tackle a question which has taken on a particular importance in the eyes of Egyptian critics studying the works of al-Mazini. The point at issue is the "borrowings" of this writer. In itself, the subject seems predominantly to concern the critics, for in the first place the problem of "compilation to remain at home" (ḥukm al-tāʿa) which every Egyptian husband has the right to impose on his reputedly disobedient wife is a scandalous sexual privilege, a denial of justice which should not long be tolerated by the legislators. The literary critic of al-Baladī ʿAshūr revealed that, in essence, the plot and some of the scenes of the play had been taken from a novel by Galsworthy. It was in 1932 that there took place the polemic between al-Mazini and his accuser, this being the year that Galsworthy, the famous author of The Forsyte Saga, received the Nobel Prize. Although he did not admit his plagiarism, our writer's protestations were far from convincing. The opinion of scholars has been quite united in this regard, just as nobody doubts that al-Mazini padded out his novel Ibrahim al-kāṭib (1931) by incorporating in it five pages from a Russian novel (Sanine by Artzybashčev) which he himself had translated in 1920 for the Musāmarāt al-šaḥāb. When challenged on this point, the author did not deny it, contenting himself with a declaration of his good faith (he read a great deal, retained material easily and was ultimately unable to tell what genuinely was his own creation!). Such disarming naivety is perplexing, all the more so since it is hard to understand what real benefit he could have gained from the practice. One may also ask why—in his first novel—he is observed to repeat several pages already published some years before in a collection of his articles, Kābd al-rīḥ (1927). In this instance he is plagiarising himself. The answer to this question supplied by an enquirer very favourably disposed towards him is that he is consistent in his ideas which he puts into the mouth of his fictional hero (on this question, cf. Mme Niʿmat ʿAḥmad Fuṣād, Adab al-Mazīnī, Cairo 1961). If his theatre is almost non-existent and his work as a novelist less significant than might have been hoped, al-Mazini remains a remarkable storyteller. He is seen fulminating in the Dīdān against the morbid, grandiloquent and ultimately dishonest literature of al-Mansūṭī. The first fruits of Arabic narrative writing more credible because more in tune with society and people as they are, appear in the short stories of the Taymūr brothers, but also to be
found among the many texts published by al-Mazini himself. In fact, alongside his analysis and assessment which may be found today in eight collections, of which the most notable are Sanduk al-dunyâ (1929) and Khuyûû al-`ankabût (1935). The bibliography of the work by Sakkut and Jones mentioned above refers to a further 114 "narrative works" which appeared in periodicals, of which 76 have never been reprinted. All these narratives, of variable length, approximate more or less to the living tableau or short story, such, tending rather to resemble what Anglo-Saxons call the "essay" or "sketch". Most often, the fiction is minimal, the author embroidering with humour and fancy upon a reflection, a memory or an observation. He also enjoys making himself a central figure in the scene that is sketched out or making himself a target for his own jesting, since his small stature and the limp from which he suffered are easily evoked in a few words. Some suppose that this constant jesting is a means of exercising a sense of shame which could have become a complex. In any event, this quasi-systematic procedure facilitates the establishment of a complicity with his reader which al-Mazini manifestly seeks. He does not take himself seriously, and treats other writers, whoever they may be, with equal levity. Mentioned in the book by the Bibliothèque de l'Exilé, the Book of Job, he has a tendency to agree with the famous line "Vanity of vanities, all is vanity". It is noticeable that each chapter of his Ihrahim al-kâtib bears as a heading a phrase drawn from a verse of the Old Testament and the titles of almost all his collections indicate the illusory nature of human existence and of its works; already there has been observed the illusion of writing symbolised by "the kaleidoscope" (Sunduk al-dunya) and the incongruity of the "threads of the spider" (Khuyûû al-`ankabût), but to these may be added the mirage of "a harvest of grass" (Hasad al-haqlîm, 1924) and the nothingness of a "handful of wind" (Kabîl al-rîh, 1927). Our writer expresses himself on a very flexible canvas, since all that he hears is his fantasy. Malicious sketches, incidental reminiscences and anecdotes form his technique by which he finds a reason for the enjoyment of the reader. To be sure, not everything is said in a jocular tone, for he has written moving pages describing his mother, whom he adored, or his daughter, who died at an early age. Nor is everything bizarre, and there are times when reality prevails over the "nonsense", in particular when he evokes his childhood, giving the reader the opportunity to imagine a Cairo home at the end of the last century and the life that was lived there. But this is a retrospective view conducted with a sense of the humorous and the unusual. Humour is always in evidence with him, even when he travels to Mecca; his Rehîba hîdâysiya (1930) contains some excellent jokes. In the attempt to decide with whom to compare this virtuoso of comic prose, this independent spirit hostile to protocol and to the conventional, the names of al-Dîhghih and Mark Twain spring to mind. But al-Mazini was most certainly both typically Egyptian and tremendously modern. Towards the end of his life, he became a member the Cairo Academy and the speech that he gave on this occasion was striking for its anti-conformism—as might indeed be expected from the man who nicknamed this venerable institution "the cemetery of the immortals." 

**Biography**: Besides the references cited in the article, see Hâmîd ʿAbdul al-Hawwâl, al-Sukhriyya fi adab al-Mâzînî, Cairo 1972; Muḥammad Mandûr, al-Shârî fi Misr baʿd Shamsî, Cairo 1944; P. Counillon, A propos d'une nouvelle d'al-Mâzînî in Bull. Et. arabes, v (January-February 1942), 5-6.

MAZLUM (a), a technical term of Shi’i, especially Twelve, Islam, which nevertheless retains its current term maḍīl from the root sala:ma: someone or something “treated or used wrongfully, unjustly, injuriously, or tyrannically” (Lane, 1923). In Persian, a language in which a large part of the literature referred to here mentions it, the word means also sitam rasîda (Farhang-i ʿAnvaraddî, vi, 404v) or "injured, oppressed, seized forcibly ... and, consequently, "mild, gentle, modest" (Stein-gass, 1263).

Mazlum is one of the attributes which characterise the Imâms, and it is coupled with shahid and sometimes substituted for it. This fits in with the theological and hagiographical vision in the time of the Imâms, a vision which claims them as martyrs, pure (maṣûm) victims because they are pure by definition, their role being to bear a witness which is expressed by means of the conscious sacrifice of their life. Thus they are mazlûm because they have for their opponents those who are zâlim: ... man aṣlâm mînaman katama shâhadatun ʿindahu min Allâh ... (Kurʾān, II, 140/134, "Who then is more unjust than he who conceals testimony which he possesses from God"). The testimony in the case of the abû al-dâ’ir, the reference to his martyrdom. The full meaning of this testimony depends, moreover, on the fact that they are, vis-à-vis humanity, the hadjûdâl Allâh, the proof of God par excellence, i.e. the proof that man should recognise in order to obtain his eternal salvation.

Until now the discussion has been general, and may perhaps be further generalised, in the sense that all the abîl al-bayt are defined as mazlûm according to a famous hadîth, for which we give here a typical reference, KâshîfI, 170: naḥnu kawm mazlûmûn, naḥnu kawm mafûldûn, naḥnu kawm mahdûrûn, which indicates in the genealogy of Abû Tâlib, the "we" in question.

To belong to the "family" means to be ready for martyrdom, to undergo the violence of the zâlim and be destined for exile, as the word maṣûm explains; but the root mazlûm itself indicates another, more personal, "to put something in a place which is not its own" (LA, s.v.) and Shi’î Persian literature appears moreover to refer to it when it adds to the attributes mazlûm and shahid that of gharîb.

Mazlum has a particular significance in the case of two Imâms who are the symbol of the perfect martyr, being maṣûm and mazlûm, sc. al-Husayn b. ’Ali and ’Ali al-Riḍâ. The former is often substituted for it. This is more unjust than he who conceals testimony which he possesses from God?

The full meaning of this testimony depends, moreover, on the fact that they are, vis-à-vis humanity, the hadjûdâl Allâh, the proof of God par excellence, i.e. the proof that man should recognise in order to obtain his eternal salvation.

The full meaning of this testimony depends, moreover, on the fact that they are, vis-à-vis humanity, the hadjûdâl Allâh, the proof of God par excellence, i.e. the proof that man should recognise in order to obtain his eternal salvation.
order to be liberated in this world and to find salvation in the next, the matter is clear enough. The history of mankind finds in the life of the Al-Husayn and in Karba'ī its paradigm and a daily proof (khidja yaumiyiyya). And, in this sense, mazlum is a word which also defines, in opposition to all that is ma^zul, oppressed (Shams al-Dīn, 11 ff.), who alone can become what al-Imam al-Husayn b. Zain al-Abidin (d. 60/680) is defending. And, in this sense, (Shams al-Dīn, 11 ff.), who alone can become what al-Imam al-Husayn b. Zain al-Abidin (d. 60/680) is defending.

(B. SCARICA AMORETTI)

MAZRA'A (s.), mazra'a, mezra in Turkish, means in general arable land, a field; as used in the Ottoman survey registers, it designates a periodic settlement or a deserted village and its fields. According to a regulation, to register a piece of land as mazra'a it was required that it be checked whether the place had a village site in ruins, its own water supply and a cemetery (Barkan, 53, 133, 190). Such a piece of land is occasionally called mazirak yer, abandoned land. In the faḍarīs [q.v.] we often find the following note on mazra'a:s; "previously it was a village, now its population is scattered and the fields abandoned (khilīt)." Usually a mazra'a has fixed boundaries. A mazra'a might have gained over time a few families of settlers, but would still be registered as a mazra'a.

Every mazra'a is referred to by a specific name which often reveals its origin or first possessor. In the province of Karāmān, for example, many mazra'a names are coupled with kılıç, referring probably to abandoned Byzantine castles, or with qazil "sheepfold", or having reference to a nomadic group which used the site as pastureland. A great number of village names in Anatolia bearing the name qıvası or qıvası must originally have been mazra'a:s which over the course of time were transformed into full villages. But when we speak of mazra'a as an abandoned village we mean basically not just the site of the village itself, but rather its fields.

In western Anatolia and the Balkans, the Ottomans inherited the Byzantine rural landscape with its sub-villages and periodic settlements. The earliest reference to a mazra'a appears in Sultan Orkhan's waqf for the bridge he built at Alma-Pınarı. Under the Byzantines, the mazra'a-type lands as dependencies of a village were known as agria and prosostia, the former designating partly settled and the latter unsettled satellite land (Ostrogorsky, 1962, 149). As was the case under the Ottomans, when the village rented such land collectively it paid the rent collectively (ibid., 114), but this special case cannot be used as an argument for the theory that in general village land was subject to collective ownership under the Byzantines.

In the survey registers, abandoned villages or čiftlik are shown also as khāli, uninhabited, or qazil, in ruins, or kılıç (in Syria). In these registers, the former are deserted periodically and used lands with different sizes and were shown under different names. Theoretically, the largest one was a mazra'a, sometimes with water and a cemetery, and was always considered capable of being converted into a village, so that all mazra'a:s were carefully recorded. Other such lands of smaller size are, in order, čiftlik [q.v.], zamin (in Turkish zemine), kılıç and qıvası "individual field". In practice, the word mazra'a was occasionally used for a čiftlik or a zamin of a few donün (1 donün equals about 920 m²) or any piece of land not possessed under the tapa system.

The abandoned land might be turned into a pasture or a vineyard and still retain the name mazra'a. From the standpoint of land use, a mazra'a is a field for grain production as opposed to pasture, vineyard, orchard, etc.

The hypothesis that in Anatolia the settled population chose to have their settlement sites on the hillsides in order to escape malaria and all kinds of marauders, soldiers, brigands, and passers-by, and maintained as a satellite exploitation a mazra'a down on the flat land (dılık, ova) (Tanoğlu, 1954, 27-8), holds true for many areas. Hüteroth (1968, 36-53) demonstrated it for central Anatolia, and Tanoğlu gives some examples for eastern Anatolia. While on the hillsides viticulture, horticulture, olive growing, and livestock breeding were preponderant, fields for grain production were located in the mazra'a down on the flat land. The Syrian and Palestinian villages with vineyards, orchards and olive groves on the hillsides and mazra'a down on the lowland or in the valleys also provide instances of this pattern (Hüteroth and Abdullahtah, 1977; B. Lewis and A. Cohen, 1978). This village-mazra'a pattern develops into an upper village and a lower village when the satellite mazra'a on the lowland is settled. Village names preceded with zir- and bălu-, yurkari- and aslıqat-, or in the Balkans dolni-dólne-, gurni-görüne-görüne- reflect the same process.

The fact that most of the mazra'a:s were registered as dependent (tābī') on a village as its ekinlik, reserved fields, can be taken as proof that the Ottoman administration generally recognised the mazra'a as an indivisible part of village economy. Such mazra'a:s secured an extra source of income for the villagers and provided land for the surplus population. Often villagers cultivated such land without the government's knowledge, arguing that it had always belonged to them. As a result, the rule was made that no abandoned land could be exploited without the Sultan's prior approval (Meħemmed the Conqueror's Kānīn-nāme, Barkān 390, art. 16). Because the benefits of such exploitation were vital for the village economy, villagers vigorously contested against timār-holders or government agents who chose to rent such mazra'a:s to outsiders. In opposition to such outsiders, including members of the military elite, who were particularly interested in renting mazra'a:s in order to turn them into big čiftlik, villagers often rented them collectively.

Whether a mazra'a was registered in the faḍarī or not determined its status. It could be registered as part of a village or of a timār or of a waqf independently in the register. A mazra'a, being abandoned land, quite often escaped the surveyor. When discovered it was called "unregistered mazra'a with no fixed taxes"
Such mazraca's were rented out and their revenue collected by government agents called kharidji emini. Such lands could also be assigned to a timar-holder (Arunad defteri, no. 178). This was because the government was concerned that no arable land, however small, be left uncultivated and without bringing in some sort of revenue. Under the mukàa’a system, such abandoned or unregistered lands as mazra’a, çiftlik, or samin were offered to any bidder, military or townsfolk, Muslim or Christian, or even to a foreigner, anyone who would guarantee to the treasury a steady revenue from it. In 1545 in Bosnia, Venetians were able to rent mazra’a (Gökbilgin, 1964, 208). Otherwise, in principle, the government’s policy was ultimately to convert all such lands into villages or ra‘iyyet çiftlikts [see çiftlik] under the tapu system. In other words, arable lands were basically reserved for the exploitation of the registered peasants, ra‘ûya [q.v.], excluding the townsfolk and the military, and such lands, comprising the great majority of arable land in the empire, were categorized as tapulu ardî. Under the tapu system, the peasants were responsible for paying regular ra‘iyyet taxes, including çifresmi [q.v.]. In contrast, those lands not in the possession of the registered ra‘ûya were treated fisally as a separate category under the mukàa’a system, and such lands were called mukàa’a ‘ulu ardî as opposed to the tapulu ardî.

Newly-conquered and abandoned land, since no previous record was available for its taxation, was also treated as a mazra’a and was submitted to auction in order to achieve the highest possible revenue derivable under the circumstances (Kanun i Kanunname, 1, 64). It was through an auction that the mazra’a amount of a mazra’a was determined. The usual reference, “it is cultivated by those who come from outside” (khrigidjing eden ekilur) on mazra’a and mukàa’a ‘ulu çiftlikts indicates a situation in which the land was not possessed and cultivated by yerî, the local ra‘ûya, under the tapu system, but by those ra‘ûya who were not registered with the land and were consequently considered “outsiders”. The latter were normally déymungânek, literally “people living in tents”, but in practice meaning any wandering ra‘ûYa who might come and exploit the land on a temporary basis, paying rent or tithes to the ‘owner’, sâhib, of the mukàa’a, the ‘owner’ being the renter of the land. If the ‘outsider’ settled on a timar-holder’s or on a vakif land for three consecutive years he automatically became a yerî and then the land was given to him under the tapu.

Thus in principle, mazra’a were fisally exploited under the mukàa’a system, which consisted simply of renting under a contract, temessuk or hâdidjet. The record of the rental in the register, which specified the possessor and the obligation, had binding force for both the state and the individual. The possessor’s payment for the mazra’a consisted either of tithes or of a fixed amount in cash. When a mazra’a was given in the way of yardûluk (ber vâdî-i yardûluk), it was possessed as a hereditary frehold property, usually on condition of sending a cavalryman [see tekkânîy] to the sultan’s campaigns. In some cases, this obligation was forgiven (Konya TT’40, 17).

The next question is to determine how mazra’a emerged and under what conditions their number increased or decreased. The peasant populations would abandon their villages, temporarily or permanently, for various reasons. Natural and economic conditions conducive to mass flight included exhaustion of the land, desertification, and epidemics. Social and political conditions were no less important. First and foremost, peasants left their villages en masse to avoid being despoiled by passing troops, brigand bands, or caravans. A particularly important cause of flight was to avoid registration for taxes [see tapu] and tax collection. The peasant’s most effective means of getting a tax reduced or abolished was the threat of being scattered abroad (perâkende ve perîgân olmak). Assuming the character of a mass protest, scattering became in effect a peasant strike and was frequently resorted to. When it made it more frequent was that peasants did not own the land they cultivated under the tapu system, and there were always other lands available. The growing number of villages in the forests is largely due to this situation. On the other hand, the big landowners, and particularly vakif lands, promised better conditions in order to attract the registered ra‘ûya of the tapu lands. Thus the rural population in the Ottoman Empire, especially in Anatolia and the Balkans, became quite a mobile population, which accounts for the unusually large number of deserted villages in the Empire.

The increase or decrease in the number of mazra’a can be taken as an indication of demographic and economic decline or development in a particular region; and the relative number of villages and mazra’a can be determined for most of the provinces through the survey books (see tapu, and maps in Tanoglu, 1954; Hütteroth and Abdülâfettah, 1977). In 1597 in some districts in Palestine (Hütteroth and Abdülâfettah, 23, 24, and maps nos. 3, 10, and 13) the number of mazra’a was two or three times greater than the number of villages (in the sanjak of Safad there were 610 mazra’a as against 282 villages), whereas in the sanjak of Aleppo before the mukàa’a and the mazra’a numbered about one thousand (Venzke). Hütteroth (1986, 25) estimates that at the turn of the 18th century, about half of the Anatolian population depended on the various types of periodic settlements, and he finds it one of the most important features of the Middle Eastern cultural area.

In the formation of mazra’a conditions other than peasant exodus were also to be taken into consideration. Sometimes the peasants used nearby marginal land for cultivation, or reclamation were made on wasteland (mauvât [q.v.]) in the forests or swamps, or pasturelands in the yayla were used for cultivation; mazra’a formed in these ways are frequently referred to in the survey registers. Also, conversion of the tapulu lands into livestock ranches gave rise to mazra’a-type formations. When the central bureaucracy’s control weakened during protracted wars, struggles for succession to the throne, uprisings, etc., the military’s acquisition of abandoned lands became widespread. Those who acquired such lands under mukàa’a were called ashab-i mukàa’a, owners of the mukàa’a ‘ulu land.

Since the abandoned mazra’a could be given to anybody paying the rent, mukàa’a, including the military, the latter used this loophole in the Ottoman land system to enter into possession of the mirî [q.v.] or state-owned lands, and to run the land as an estate. As such mazra’a needed a labour force for their cultivation, the military offered favourable conditions to attract registered ra‘ûya and thus caused disruption in the mirî-based settlements. At other times, because of the labour shortage, they converted their mazra’a into livestock ranches. When the large landowners were able to attract ra‘ûya to their lands, they usually had recourse to the method of sharecropping (ortaklijik). They furnished land and often seed, oxen, and domiciles to the sharecroppers.
In Anatolia, large areas of arable land abandoned by villagers were converted into ranches, partly because of the high price of meat in general and partly because of the military's difficulty in finding sufficient labour for cultivation. In any case, the Ottoman military class, unlike western landlords, was not capable, for various reasons, of owning land and organising it as big estates. In the period 1596-1610, the Djeñli [see Icara in Suppl.] depredations and insecurity in the countryside caused a tremendous increase of mazra'as and mazraca's land use throughout Asia Minor, resulting in a great diminution of agricultural land and grain production. A similar usurpation of the small plots of peasant families by “the powerful” in the provinces occurred in Byzantine Asia during the 10th century, and the emperors were forced to take radical measures against this development.

The second method used by the military to provide agricultural labour was the settlement of war prisoners on the land. As early survey registers demonstrate, the first Ottoman sultans as well as the members of the military class, the frontier begs in particular, employed this practice quite extensively.

The sub-village periodic settlements and exploitations could increase or decrease, and thus a pasture (çayır, yayla, kâğıla, or oba) could become a mazraa over the course of time by being converted into fields, or vice-versa. The state took the initiative in promoting settlement and cultivation and in restoring abandoned villages. The grant of land as freehold, tamlik (sec milk), is one method.

In Serbia, abandoned villages were brought back to cultivation by the settlement of the Vlachs in the same way that nomads or wandering peasants (boyamângi) were encouraged to settle on the land. (Farroghi, 1984, 191-266.)

This situation reflects the economic dependence of the towns on such agricultural reserve land, without which the towns could not survive. Given the exorbitant transportation costs of the time, towns had to rely on this hinterland for an important part of the foodstuffs, fuel for their populations and raw materials such as cotton, wood, and hides for their handicrafts. The economic and social dynamics of such villages and sub-village settlements appear to be vivid and complex compared to that of “independent” rural settlements. The villages near towns were transformed into mazraa'os or çiftlik probably because the village population, attracted by better opportunities in town, migrated there, and once deserted, the village land was acquired under mukâlaa by well-to-do town residents and turned into a kind of estate çiftlik (Farroghi, 1980, 87-99).

As far as present-day Anatolia is concerned, human geographers (A. Tanoğlu, 1954; Hütteroth, 1968, 24-52; Tunçdelik, 1971, 17-55; Hütteroth and Abdülfattah, 1977, 29-32) study mazra'as among the periodic settlements or small rural settlements on the way to becoming villages—rural mahalle, yayla(k), kâğıla(k), omb, oba, and diwan. Throughout eastern Anatolia today, a great number of villages with a small settlement and having no formal village institutions such as mukâhâtlik come under the name mazer, mezze, or mezê. Settlement of marginal lands as the result of rural overpopulation is considered to be the underlying reason for such settlements. In the survey books, no mention is made of kum or rural mahalle, which may be local names for mazraa (cf. Tunçdelik, 1971, 43).

Kum is to be found in eastern Anatolia; it differs from a mazraa by being a kind of ranch for animal breeding and is usually owned by an absentee landlord. It surrounds sheepfolds and shepherd huts. Oba is the grazing area of a nomadic household and should be studied rather within the yayla structure (Tunçdelik, 1971, 44). When settled by the nomad households which shift to agriculture as their main occupation, the oba assumes rather the character of a mazraa. The process is attested from early Ottoman history. At the present time, all obas are of this developed type. Doun was apparently a tribal superstructure over the obas (Tunçdelik, 47-8; Barkan, Kanuni, 28-32), which disappeared as settlement progressed. Some isolated çiftlik, settled by one or a few families devoted to agriculture and livestock breeding, are considered, like the mazraa, as a kind of settlement liable to develop into a village (Tunçdelik, 43). In Palestine, Transjordan, and Syria (Hütteroth and Abdülfattah, 1977, 29-32), mazra'as were “small agricultural areas, dispersed amongst the hills, lying within the village area but apart from the main fields belonging to the village, as is still the case today.”

According to the regulations and survey registers (ibid., 31), the size of a mazraa varies widely. It may consist of only one or two çiftlik or have the size of a village, judging from its estimated revenue. However, as was made explicit in some kâmûn-names (q.v.), the typical mazraa is a deserted village which always has a large area of arable land, a water source and a centre marked as a village.

*In Anatolia, large areas of arable land abandoned* by villagers were converted into ranches, partly because of the high price of meat in general and partly because of the military's difficulty in finding sufficient labour for cultivation. In any case, the Ottoman military class, unlike western landlords, was not capable, for various reasons, of owning land and organising it as big estates. shaykh recognised as head of the family resides.

In East Africa, in Kenya and on the island of Pemba (in the present Republic of Tanzania), fourteen lineages are recorded, descended from three lineages which migrated from `Umân between ca. 1698 and ca. 1800. Of these, the most celebrated provided an almost uninterrupted succession of rulers of Mombasa from 1698 until 1837, when twenty-five of the principal males were banished to Bandar `Abbâs by Sayyid Sa'id of `Umân and Zanzibar, many of them dying unaccountably on the voyage and the remainder in prison. Other Mazru'î lineages and the main one also provided subordinate rulers at Takaungu and Gazi, and of Pemba Island, generally with the Swahili title liwalî, corrupted from Ar. khalîf. In addition, the family produced a remarkable number of men of high ability and personal distinction, kâdîs and junior magistrates, lawyers, administrators, historians, genealogists, scholars, poets, merchants and landowners, military commanders, a steamship captain and a harbourmaster, as well as men of religion. The history of the family from 1698 to 1835 is recounted in Shaykh al-Amlî b. Ahmad al-Malindi, a member of the former royal family of Malindi, a member of the former royal family of Malindi [q. v.], and including several subordinate rulers of towns and settlements. At the successful conclusion of the siege in December 1696, Nâsur's appointment was by no means uncontested. The Swahili, as they saw it, called the `Umânîs in as allies; and an important faction, lead by an individual with the strange name of Sese Rumbe, rebelled against the `Umânî determination to stay as conquerors. After some fighting, a composition was reached by which Nâsur was recognised in office and married either a sister or a daughter of a certain Shaykh b. Ahmad al-Malindi, which the Portuguese had installed as kadî of Mombasa [see Mombasa], in 1698-1727, m. Karima bt. Shaykh b. Muhammad al-Malindi, karima of the lineage of Shaykh al-Malindi. Two sons, incl. Ahmad, kâdî of Mombasa *ca. 1850-40

2. Muhammed b. Sa'id al-Ma'amirî 1729-30
3. Sâlih b. Muhammad al-Hâdrâmi 1730-33
5. Sayf b. Khalaf 1746-7

According to Shaykh al-Amlî, the first of the family to come to East Africa, Nâsur b. `Abd Allâh, was appointed liwalî of Mombasa at the same time that Mbarak b. Qarib was appointed commander of the `Umânî forces at the siege of Fort Jesus, Mombasa [see Mombasa], in 1696-8. The actual date of appointment is not known. His remit was as "overseer of all the `Umânî possessions in East Africa", an area defined by Shaykh al-Amlî as from Ras Ngomeni, north of Malindi, to the town of Pangani, on the River Ruvu, and including several subordinate rulers of towns and settlements. At the successful conclusion of the siege in December 1696, Nâsur's appointment was by no means uncontested. The Swahili had, as they saw it, called the `Umânîs in as allies; and an important faction, lead by an individual with the strange name of Sese Rumbe, rebelled against the `Umânî determination to stay as conquerors. After some fighting, a composition was reached by which Nâsur was recognised in office and married either a sister or a daughter of a certain Shaykh b. Ahmad al-Malindi, a member of the former royal family of Malindi [q. v.], which the Portuguese had installed as sultans of Mombasa in 1592, when the Shirârî dynasty of Mombasa failed for want of heirs. (The word Shaykh is used as a given name quite commonly in East Africa.) This was a political move of profound local significance, with precedents at Kilwa and at Pate [q. v.] at the foundation of both dynasties. Thereafter, apart from Portuguese raids, Nâsur's
term of office appears to have been peaceable. He died on a visit to Uman.

No concept of a hereditary succession of governors is apparent at this point. Nāsur had recommended the succession of his nephew Muhammad b. 'Uthmān, but two other Liwalīs followed in rapid succession who were not members of the family. It is not known why Muhammad b. Sa'id al-Mā'āmirī was relieved after only a year, but Sāliḥ b. Muhammad al-Hadrami was so harsh in his dealings with the people that he was removed from office when civil war broke out. Muhammad b. 'Uthmān was now proclaimed Liwalī, and his succession welcomed in Mombasa. He had been ruled for ten years when the Yaʿrub dynasty was deposed in Uman by Ahmad b. Sa'id al-Bū Sa'idī. This was no clear-cut transition [see 'Uman], for chaos ensued for several years, and 'Uthmān ceased to remit taxes to Maskat. That he said "The Imam has usurped 'Uman, and I have usurped Mombasa" is a most unlikely use of language that several writers have placed in his mouth. Nevertheless, it reflects local sentiment, in the same way that the Swahili History of Pate speaks of Ahmad b. Sa'id al-Bū Sa'idī as a shopkeeper, with every assumption of an aristocratic disdain. Shopkeeper or not, Ahmad knew how to consolidate power, and he had Muhammad b. 'Uthmān assassinated, by assassins sent from 'Uman, but with the support of the faction that had earlier opposed Nāsur. One of the assassins, Sayf b. Khalaf, was now appointed Liwalī. Shaykh al-Amlı's account at this point is by no means clear, and by misconception there is no reliable account in any European source.

Ahmad b. 'Uthmān's brother 'Ali was imprisoned by Sayf b. Khalaf, and several accounts exist of his exciting escape from the fort with the connivance of Balūfī soldiers of Ahmad b. Sa'id's that, nevertheless, were loyal to the Mazrūtī. Then, at the critical moment, a European arrived with an armed vessel, which by agreement with 'Ali, bombarded the fort. Sayf b. Khalaf was taken prisoner and killed, and 'Ali acclaimed as Liwalī by those who had supported his brother and uncle. An attempt by Ahmad b. Sa'id to install one 'Abd Allāh b. Dja'id al-Bū Sa'idī as Liwalī was frustrated, and 'Ali now ruled with confidence.

It is a mark of that confidence that was now felt in Mombasa that in 1754 'Ali assembled a fleet and an army to take Zanzibar from the Bū Sa'idī. It is claimed that he went with 80 ships, but we do not know their size or complements. Certainly, they were enough for success to be immediate. At this juncture, however, 'Ali's nephew Khalaf ran amok and stabbed him in the back. Various reasons have been suggested, that he was mad, that he was possessed by magical powers, or that he had a genuine ambition to seize power from his uncle. Occurrences such as this are paralleled in plenty in the annals of the Gulf States. A son of Nāsur, Mas'ūd, now took power, and led a demoralised army back to Mombasa. There is some argument whether or not a second attack on Zanzibar was to take place, but nothing happened.

By all accounts, Mas'ūd was an astute politician, adroit in seeking conciliation. It is in his reign that Mombasa's involvement in the affairs of the sultanate of Pate begins, with a garrison sent to Pate to assist the sultan in keeping out the Bū Sa'idī. In 1776 the Kilifi faction that had opposed the preceding Mazrūtī Liwalīs encouraged certain persons in Pate to attack Mombasa. It was not countenanced by the Sultan of Pate, and amounted to no more than a raid that was easily scotched. A rebellion now took place in Pate against Sultan Bwana Mkuu b. Shhe, and in the mêlée of his assassination the Khalaf who had murdered 'Ali b. 'Uthmān was himself murdered while attempting to defend the sultan. Then in 1779 Mas'ūd died. Shaykh al-Amin praises him for his cunning and diplomacy. His days, he says, were days of prosperity, ease and peace, in which he was much engaged in trade. This, perhaps, was the halcyon period of Mazrūtī rule.

On his death, eleven sons of previous Liwalīs contested the succession "violently", but within the day they settled upon 'Abd Allāh b. Muhammad. Shaykh al-Amin is silent about his short reign of two years only: "like his predecessor, he was of good character and fair from making war". His next brother, Ahmad, succeeded him and now ruled for twenty years. Shortly after his accession he had to deal with a rebellion in Tanga. At the end of his reign, war arose between Mombasa and Pate on the one hand, and Lamu on the other [see Pate], with the result that the Mombasa forces were severely defeated at Shela. Very shortly after, Ahmad died: his epitaph in the Mazrūtī cemetery describes him as malik, the only liwalī so to describe himself or be so described on an epitaph. It is a reflection, perhaps, of the weakness in East Africa of the earlier part of the reign of Sayyid Sa'id that a liwalī should be able to use so uncompromising a title of royalty with impunity.

Ahmad's son 'Abd Allāh, the former commander of the Lamu garrison, now succeeded him, without any opposition, as the man with the most experience and competence. His first action was to reorganise the army and the administration, appointing several new subordinate liwalīs. One of these, Sa'id b. 'Abd Allāh al-Buhīrī, was murdered by the Digo tribe on his way to take up his post as Liwalī at Mtang'ata. (His great-grandson, 'Ali b. Humayd b. 'Abd Allāh, of Tanga, was said by the late J. Schacht to be the most learned authority on Islamic law that he had ever encountered.) The murderer was none other than the chief and spiritual head of the Digo, but he was forgiven on payment of the blood price. 'Abd Allāh now turned his attention to Lamu, and to Sayyid Sa'id, to whom he sent, as a gesture to show his independence, a coat of mail, a horn for measuring powder, a small quantity of powder and some musket balls, intimating that Sa'id could come and fight. Here indeed was provocation, and on the monsoon of 1238/1822 Sa'id's uncle Hamad b. Ahmad b. Sa'idī came with 4,000 men and thirty ships. At Lamu, he defeated 'Abd Allāh's son Mbarak, and got possession of Pate as well. He then proceeded to Pemba, which he took after several days' battle. The loss broke 'Abd Allāh's heart, and he died.

His uncle Sulaymān b. 'Ali was now elected as a compromise candidate. Shaykh al-Amin describes him as "an intelligent man, decisive and a lover of peace"; a British official document describes him as "aged and feeble"; while Captain W. F. W. Owen, who met him personally, described him as "an old dotard who had outlived every passion except avarice". Fearing to lose Mombasa to Sayyid Sa'id, a delegation was sent to Bombay to ask for the protection of the British Government. Before a reply could arrive, a letter came to request that the British be permitted to survey Mombasa Island and to purchase cattle. No one could read it. The Mazrūtī and the people took it as an affirmative answer, and hoisted the Union Flag. On 3 December 1823, H. M. S. Barraeus, under the command of Lieutenant Boteler, arrived at Mombasa, as part of Captain Vidal's command engaged in surveying the islands. Lieutenant Boteler, joined shortly by Vidal, knew of no reason to
acquire for Britain an unimportant city on the African coast that had no commercial or strategic advantages. They fended the Mazrū'i off as best they could. But on 7 February, Captain W. F. W. Owen arrived on H. M. S. Leen, at the very moment that a fleet sent by Sayyid Saʿīd was bombarding the Mazrūʾi into submission. Owen was a passionate crusader against the slave trade, and believing that Mombasa could be used as a centre from which to destroy it, he ascended to the request for a Protectorate. A treaty was drawn up, of which Shaykh al-Amin’s version differs somewhat, but only in detail, from British sources. It was that:

(1) Great Britain would cause to return to the Liwalī all the territories he had ruled formerly;
(2) The Chief of the Mazrūʾi should administer the sultanate which would be hereditary in his descendants;
(3) A Commissioner of the Protecting Power would reside with the Liwalī;
(4) Customs duties would be divided between the contracting powers;
(5) British subjects would have permission to trade in the interior;
(6) An end would be put to the slave trade in Mombasa.

Shaykh al-Amin claims that ‘Abd Allah b. Sulaym, the commander of Sayyid Saʿīd’s forces, was delighted with the treaty, a view wholly contrary to that evidenced in British official documents. Saʿīd, indeed, awaited the reaction of Bombay, which, with Whitehall, took the view that neither Mombasa nor its coast, in fact, awaited the reaction of Bombay, which, with Whitehall, took the view that neither Mombasa nor its coast, indeed, awaited the reaction of Bombay, which, with Whitehall, took the view that neither Mombasa nor its coast, indeed, awaited the reaction of Bombay, which, with The origins of the Mazrāïdids, as established by G. Makdisi (see BIBL. p. 66) and as reported by the family itself, were in the 9th century. The family first appears on the political scene in the 9th and 10th centuries, when it came to power in the region of Khuzestan. The Mazrāïdids were able to maintain their power for several centuries, despite the constant threats they faced from both internal and external enemies.

The Mazrāïdids were known for their military prowess and their ability to handle internal conflicts. They were also able to maintain a strong connection with the Abbasid caliphate, which provided them with support and legitimacy. Despite these strengths, the Mazrāïdids were eventually overthrown by the Buyid dynasty in the late 10th century. The Mazrāïdids' legacy, however, continued to influence the region for centuries to come.
ther trouble from a third brother Thabīt, who allied with the Turkish commander Arslān Bāṣāsīrī [q.v.], and from the rival Khaṣṣāja Bedūins. During the fighting in central ʿIrāk which finally led to the establishment of the Saldjūk protectorate over Bāḥgādād, Dūbays now supported Bāṣāsīrī in proclaiming the cause of the Shīʿī Fāṭimīdīs at Bāḥgādād, espousing what was in the end to prove the losing side, whilst his enemy the ʿUkaylīd Kurayyah b. Bādrān at first supported Toghrīl Beg. Nevertheless, after the pacification by Toghrīl of ʿIrāk, Dūbays managed to retain his position, dying in 474/1082 at the age of 58. After the brief reign of his son Bāḥā al-Dawla ʿAbū Kāmīl Mānsūr, the latter was succeeded in 479/1086-7 by Sayf al-Dawla Abu ʿl-Ḥasan Sāḍaqa (I) b. Mānsūr, who was recognised by the Saldjūk sultan Malik Shāh as lord of the central ʿIrāk lands to the west of the Tigrīs. In the subsequent struggle for power between Malik Shāh’s two sons Bērk-Yaʿrub and Muḥammad, Sāḍaqa at first supported the former, but after a dispute with Bērk-Yaʿrub’s vizier, in 494/1100-1 switched his allegiance to Muḥammad, at first making the Khiṭa in al-Hilla for Muḥammad but soon afterwards dropping the name of both Saldjūks from it and acknowledging only the ʿAbbasīd caliph al-Mustaṣḥirī. It was Sāḍaqa who, as noted above, launched extensive building operations in his capital. The confused situation in ʿIrāk further allowed him to expand Māzyādīd influence over a wide sector of the country, including Hit, Wāsiṭ (in 497/1104), al-ʿBaṣra (499/1106) and Takrit (500/1106). Muḥammad, by now the sole Saldjūk sultan in the west, became alarmed at the rising power of his subject; he set out in 501/1108 with an army from Bāḥgādād, defeated and killed Sāḍaqa at al-Nuʿmānīyya and captured his son Dūbays. Like others of his family, Sāḍaqa had been commonly accorded the title of Malik al-ʿArab “Lord of the Arabs” [i.e. of the Bedūins along the ʿIrāk desert fringes], Rex Arabum in Latin Crusader sources, and contemporaries mourned his passing as a brave and noble figure, uniting the ideals of Bedūin chivalry and Islamic fervour, and as a generous patron of Arabic learning.

The same sort of praise is accorded to his son and successor Nūr al-Dawla Abu ʿl-ʿAzz Dūbays (II), whom al-Harrīrī [q.v.] refers to in his 39th mašākima, that of ʿUmayn, as an ideal figure for nobility and piety. He was only able to regain his seat in al-Hilla after Muḥammad’s death in 511/1118, but soon enjoyed a new authority as a consequence of the rivalry between the two Saldjūk contenders for the sultanate, Muḥammad’s sons Muḥammad and ʿAbd al-Muṣṭarṣīd, against whom the Shīʿī Dūbays uttered threats of razing Bāḥgādād to the ground. During these years, various reverses at the hands of these rulers nevertheless sent him in temporary flight to the Frankish Crusaders in northern Syria, where in 518/1124 he allied with the King of Jerusalem Baldwin II in a fruitless attack on Aleppo; to his father-in-law the Artūkīd Il-Ghāzī in Mārūn; and, in alliance with the Saldjūk prince Toghrīl b. Muḥammad, to the Saldjūk sultan in the east, Sandjār. The reviving power of the ʿAbbasīd caliphate blocked his plans for expansion in ʿIrāk, and he had finally to take refuge at Marāṣqa [q.v.] in Aḍḥabāʾyddīn with the Saldjūk Mašūd, who in 529/1135 treacherously killed both al-Muṣṭarṣīd and Dūbays. Sayf al-Dawla Sāḍaqa (II) supported Mašūd’s cause against his nephew Dāwūd b. Muḥammad, but lost his life in the course of this warfare (332/1137-8). His brother Muḥammad was then recognised as lord of al-Hilla, but soon afterwards lost the town to his brother ʿAli (II), and when the latter died in 545/1150-1, control of the town oscillated between the ʿAbbasīd caliph al-Muṭakaff and Turkish commanders of the Saldjūk sultan Muḥammad b. Arslān Shāh. The caliphal troops withdrew from al-Hilla in 551/1156-7, but in 558/1163 the caliph al-Mustanẓījd, whose power in ʿIrāk was increasing with the decline of Saldjūk authority, sent an army against al-Hilla. His troops and their allies of the Banu ʿl-Muṭaṣṭīfīk wrought slaughter amongst the remaining Māzyādīds and their Asādī supporters, and expelled those left alive. The hold of the Asād on the town was thus permanently broken.

That the Māzyādīds, coming as they did from an untutored Bedūin background, were able to survive for two centuries as a significant force in the intricate politics and changing patterns of alliances in ʿIrāk is a tribute to the skill and sagacity of their leaders; and it is probable that their leadership as fervent Shīʿīs furthered the expansion of Shīʿīsm in central and southern ʿIrāk.

### Bibliography

The main primary sources are those for the history of ʿIrāk in the Būyid and Saldjūk periods, including Rūḏrāwīrī, Ibn al-Dżawzī, Bundārī and Ibn al-ʿAbīr (follows Ibn al-Dżawzī). Ibn Khallīkān has biographies of Sāḍaqa I (ed. ʿAbbās, ii, 490-1, no. 302, tr. de Slane, i, 635-4) and of Dūbays II (ii, 263-5, no. 226, tr. i, 504-7). Of secondary sources, see J. von Karabačeck, Beiträge zur Geschicht der Maudjitēn, Leipzig-Vienna 1874; M. von Oppenhein, Die Beduinen, iii, Wiesbaden 1952, 455-6; G. Makṣūsī, Notes on Hilla and the Maudjīdīs in medieval Islam, i, JAOS, lxiv (1954), 249-62; ʿAbd al-Dżabbār Nadjī, al-Imārāt al-Maudjīdīya, Baṣra 1970; and scattered mentions in histories dealing with the period such as H. Busse, Chalīf und Grosskönig, die Buymen im Iran (945-1055), Beirut-Wiesbaden 1969, and Bosworth, in Cambridge history of Iran, v. On the relations of Dūbays II with the Crusaders, see R. Grouset, Histoire des Crusades et du Royaume Franc de Jérusalem, i, Paris 1934, 625 ff.; S. Runciman, A history of the Crusades, ii, Cambridge 1952, 171-3; M. W. Baldwin et alii (eds.), A history of the Crusades, i. The first hundred years, Philadelphia 1955, 423-5. For chronology, see Zambur, Manuel, 137, and Bosworth, The Islamic dynasties, 51-2. ### MAZYĀR [see KĀRĪNĪDS].

MBWENI, a settlement on the East African coast. It lies on the Tanzanian coast north of Dar es Salaam, and has a ruined Friday mosque of 14th or
15th century date divided into two aisles by three central pillars. There is an extensive cemetery, with tombs, some highly decorated with elaborate carvings, of the past five centuries. It includes a pillar and also as Yarhisar-oghfi Kosc Me (whilst his given name was Mehmed). He is one of a considerable number of modestly gifted, as yet imperfectly known poets who share the popular Turkish taste in choice and handling of subject matter. (It is true, perhaps, that Meâlî led a rather more libertine life than most of his peers.) He is very fond of puns and lavish in his use of idiomatic expressions. He is very fond of food and incense. The deceased was a member of a family celebrated for its energy in disseminating the teachings of the Uwaysî branch of the Kâdiriyâ.

MEÅLÎ, minor Ottoman poet of the first half of the 10th/16th century, known under this medâfî and also as Yarhisâr-oghfi Kösî Meâlî (whilst his given name was Mehmed). He is one of a considerable number of modestly gifted, as yet imperfectly known poets who share the popular Turkish taste in choice and handling of subject matter. (It is true, perhaps, that Meâlî led a rather more libertine life than most of his peers.) He is very fond of puns and lavish in his use of idiomatic expressions. At times he has a candid tongue. His sense of humour, though never subtle (and sometimes more than crude), can show an endearing playfulness. Meâlî's father was Muşâfâ b. Ewhak al-Dirî Yarhisâr (a man derris and later kâdi of Istanbul; his mother Fatima bint Mehmed Beg was a Fenârî. The date and place of his birth are unknown. He became a müddâm (q. v.) of Tabrîz-zade Diwâ'î Celebi and of Zeyrek-zâde Rûkân al-Înî Efendi and subsequently kâdi of Muhâlîl-Kebîlûd-Fîrît, of Fîlîbe, and lastly of Gelibolu, where he died in 942/1535-6.

Meâlî's poems are to be found in the one known (incomplete) copy of his Divân in various medâfîm/âs. The bulk of his Divân consists of 270 gazelât, a special interest is a dershân in hâfez metre and a charmân-camân on the death of his cat.

Mêd, a people who lived in Sindh at the time of the early Arab invasions. Arab historians mention the Mêd in their brief descriptions of the battles which the Arabs waged in Sind but fail to furnish us with any substantial information concerning them. Even the form of the name is not certain: the manuscripts read either m-ya'd or m-n-d (cf. al-Balâdhûri, 435 n. f; al-İsâhârî, 176 n. c), and the article on this people appeared in EP under MAND. However, some modern ethnographers report that the name is Mêd (H. Riesle, The people of India, London 1913, 145, 328); this is valuable evidence in support of this version.

Several encounters with the Mêd are reported by al-Balâdhûri. Râqûd b. 'Amr al-Dîjûdayî, appointed by Ziyâd b. Abîbi to rule the area of Makrân [q. v.] on the Indian frontier, was killed by them during an incursion into Sind (al-Balâdhûri, 435). An attack perpetrated by the "Mêd of Daybul" (q. v.) on a ship bringing Muslim women from "the island of rubies" (ızzârîl-ı-yâkût); this has been frequently identified with Ceylon, but see S. Q. Fatimi, The identification of Jâzîrât al-Yaqût, in Islâm. of the Asiatic Soc. of Pakistan, xi [1964], 19-35, who suggested identifying it with Sumatra) is given as the reason for which al-Hodjîdî decided to launch around 90-2/708-11 a major expedition to Sind (al-Balâdhûri, 435-6; Gibelî, in East ad West, xv [1964-5], 282-3; Friedmann, in M. Rosent-Ayalon, ed., Studies in memory of Gaston Wiet, Jerusalem 1977, 312 n. 19). Muhammad b. al-İsâm, who commanded this expedition, concluded an armistice with the people of Surat (?), who were "Mêd, pirates of the sea" (yâkûsâna fi l-bahr) (al-Balâdhûri, 440); the name of this place recalls Şarûhârja, i.e., Kâshâwî (B.C. Law, Historical geography of ancient India, Paris 1954, 297-9). In the reign of al-Mu'asâîm, İmrîm b. Mûsâ attacked the Mêd, killed 3,000 of them and built a dam known as "the dam of the Mêd" (şakr al-İmed), probably to disturb their irrigation (ibid., 445). Then he resumed the campaign against the Mêd with the support of the Ẓût [q. v.], whom he had subjugated; a canal (şehr) was dug from the sea and the lagoon (bafta) of the Mêd was inundated with salt water. Later on, a certain Muhammad b. al-İfa'd b. Mâhân launched a naval expedition against "the Mêd of Hind" and conquered a city of theirs (ibid., 446).

Of the geographers, Ibn Khurradâbhîm mentions al-Mêd both as a geographical region (56) and as a people who lived about four days' journey to the east of the Indus and were robbers (62). Al-İsa'udî, who went to India in 304/916-17 (Brockelmann, i, 44) says that the city of al-Mansûra [q. v.] is continually at war with the Mêd (Mûsîdî, i, 378; cf. also Tanbîh, 55). Al-İsâhârî (176 = Ibn Hâwâl, 323-4) says that the infidel peoples of Sind are the Budha and the Mêd. The Mêd lived on the banks of the Indus (şâhrî Mîhrân [see MIHRAN], from Mûlât [q. v.] to the sea, and occupied parages in the desert which stretched between the Indus and the city of Kâmuhul. According to al-İdrîsî (Opus geographicum, Naples-Rome 1970-8, 170; tr. Jaubert, i, 163), the Mêd dwelt on the borders of the desert of Sind. They were nomads (rabbâhâ; Jaubert, loc. cit., seems to have read râdja'dja and translated "un peuple très brave"); cf. S. Maqîbal Ahmîd, India and the neighbouring territories as described by ... 171, 336), and pastured their flocks up to the border of Mîmânhul (Kâmuhul?)). They were numerous and owned many horses and camels; their raids extended as far as al-Rîr (cf. Elliot and Dowson, The history of India as told by its own historians, London 1867, i, 363) and sometimes even to Makrân.

The town of Kâmuhul, which marks the south-eastern limit of the area inhabited by the Mêd, was identified by Elliot and Dowson (op. cit., i, 363; S. Hodîvâl, Studies in Indo-Muslim history, Bombay 1939, 38) with Anhâlwarâ, which is modern Patan in northern Baroda (cf. EP, iii, 407; Imperial gazetteer of India", Oxford 1908, xx); Cunningham (Report 1863-864, 290) places "Mîmânhul" at  İstanbul; this would place the Mêd much more firmly in Sind. Of special interest among the Muslim sources is the anonymous Mûdîm al-tawâjîr, Storey, i, 67). A part of this work seems to be a résumé of the Mâkâhîbîrâtâ. It begins with a chapter on the Mêd and the Ẓût who
lived in Sind and are said to be descendants of Hām, the son of Noah. The two peoples were hostile to each other and fought a number of wars. Having become tired of fighting, they resolved to approach king Daḥğan b. Dahrān (Duryodhana son of Dhratarṣastra) and asked him to appoint a ruler over them. Daḥghan gave the country to his sister Dusal (Daḥslālā), who married the powerful king Dṃdrat (Jayadratha). The country was then divided between the Zutt and the Mēd (J. Reimand, *Fragments arabes et persans inédits*, Paris 1845, repr. 1974, 2-3, 25-7). The story reflects an attempt to forge a link between the history of the Mēd and the Zutt and the Indian tradition. It must be noted, however, that the Sanskrit original of the *Mahābhārata* makes no mention of peoples bearing these names in the passage dealing with Daḥslālā’s marriage to Jayadratha, king of Sindhu (Mahābhārata, i. 108. 18). Moreover, the Indian tradition does not seem to contain anything definite about the Mēd, with the possible exception of occasional remarks in the *dharmasastra* literature about a low caste or, according to some, untouchable people called Meda, of unspecified geographical location or provenance (*Manusmṛti* 10.36, with Medhāhitihis’s remarks; cf. Rai Bahadur B.A. Gupte, *The Mēds of Makran, in* *Indian Antiquary*, xl [1941], 147-9).

It seems that the Mēd are not mentioned in later Muslim sources. It is true, however, that the *Cāc-nāma* (ed. Daudpota, New Delhi 1939, 89) mentions a people called *N-h-a-m-r-a* or *N-h-a-m-r-ñ* which they appear in *al-Baladhun*. In its description of the *dharmasastra* which not only swept away all such new ideas but also brought a period of anarchy and indecisiveness lasting until 1839, when a new era of the *Tanzimāt* (*q.v.*) reforms was opened. The reformers mentioned above in its description of the model to be emulated and were pointing out decisively the desirability of the appropriation of the superior (*mergāb*) methods of civilisation.

The shortcomings of the *Tanzimāt* efforts of appropriating the fundamentals of *Medeniyyet* were due to a great extent to the vagueness, devoid of historical and sociological dimensions, and the naivety displayed in the mechanistic views of these men. A small group of intellectuals (the “New Ottomans” or Yeni ʿOğmānlar), who lived abroad in exile, saw shortcomings in the *medeniyyet* current in Europe. In their criticisms of the *Tanzimāt* reforms they made implicit, and sometimes explicit, distinctions between the “material” and the “moral” parts in all civilisations. They too lavished praises on the achievements of material civilisation achieved in Europe, but they were less enthusiastic about the second part.

Thus from the late 1860s onward the word *medeniyyet* ceased to imply a political régime and one peculiar only to Europe. Later years saw the rise of much wider connotations of the term and of controversies, particularly when it was challenged by another term, *hargā*, coined by Ziyā (Diya) Gökals to correspond to the much older Western concept of culture.

Though the term *medeniyyet* had lost its early political meaning, it still carried a political tinge in 1920s during the War of Independence. A poem written and intended as the national anthem contained a verse cursing *medeniyyet* as “the monster with one remaining tooth”—an obvious reference to European imperialism. When Muṣṭafā Kemāl (Atāturk) glorified what he called “contemporary civilisation”, he appears to have taken side with those who identified *medeniyyet* only with enlightenment and progress, but not with a political régime.

(Niyazi Berkes)

MEDİHI, the pen name (makbûs) used by a number of Ottoman poets whose poetry is known to date mainly through the samples found in medânastrâ and telhkires. Judging by these, they are all poets of secondary importance at best. Two should be singled out.

1. Mahmûd Efendi of Gelibolu (Gallipoli), known as Kara Mahmûd (or Kara Kâzî-zade according to Beyânî). A madâzim of Şeykûh al-Islâm Abu 'l-Suûd Efendi [q.v.], he first became a müderres. After being dismissed from a position with a daily salary of forty akçes, he was appointed in 984/1576 to the Şâh Kûlbân medresesi in Istanbul (cf. Câhid Baltaci, XV- XVI. asırlarda Osmanlı medreseleri, Istanbul 1976, 435). In 987/1579 he became miftûh of Kefî, in 992/1594 kâdi of Marâşh, from 994/1595-6 until 995/1596 he was kâdi of Kütahya, from 996/1595 until 998/1599 again kâdi of Marâşh, from 1000/1599 until 1002/1599 and from 1003/1599 until 1004/1596 kâdi of Gelibolu, and from 1005/1597 until 1006/1597 kâdi of Tripoli in Syria. He died in 1006/1597-8 in Gelibolu, and is buried there in the vicinity of the Çâhiû Sultan Pasha mosque. The târîkh or chronogram Fâtiha Mahmûd Efendi râhîna inscribed on his tombstone (as described by Bursâh Mîhmed Tâhir), which is by Na'îr or according to others by Ni'meti, confirms this.

A very short passage of his Kâlemiye, a treatise in Arabic, is quoted by 'Atâ'î. Two mss. of his Dîvân are known to exist (Mîlet Ktp., Emiri, manzum eserler ser. 399, and Hürrem Pasaâ look) (Mîrûsh Sultan 37076, 435).

Bibliography: Cf. the telhkires of 'Abîd, Mîlet Ktp., Emiri, tarh, 774, fol. 177a; Kâniýe-zade Hasan Celebi, ed. i. Kutuk, ii, Ankara 1981, 885-6; Beyânî, Mîlet Ktp., Emiri, tarh, 757, fols. 94b-95a; Riâyî, Nuruosmaniye Ktp., 3724, fol. 133b; Kâfâ-zade Fâîîîî, Mîlet Ktp., Emiri, manzum, 1325, fol. 99a; also 'Atâ'î, Dîvân-i Şahgîyî, Istanbul 1268, 416-5; M. Thüreyyê, Sûfîîî-i Âmîhînî, iv, Istanbul 1315, 353; Bursâh Mîhmed Tâhir, Âmîhînî mû'ellîfîleri, ii, Istanbul 1333, 384-5.

2. Nûh-zade Scyyîd Mûsâtîfâ Celebi of Bursa stands out because his name has come down to us also as a medâd [q.v.]. Actually, he started a career as a müderres after being a madâzim of Şeykûh al-Islâm Âbu Sa'id Efendi. Upon his dismissal from a position with a daily salary of forty akçes, he aspired to a career as kâdi. When, however, he was promised the kâdâ of Çoru but the realisation of this promise was delayed, he became a medâd. He died on 18 Râbi'î 1091/14 August 1680, and was buried in Bursa in the vicinity of the tomb of Emîr Sulûh.

MEDHİ, the pen name (makbûs) of two Ottoman poets whose poetry is known to date only as far as the samples found in medânastrâ and telhkires allow. On the strength of these, neither appears to be of more than minor importance.

1. Muştâfâ (according to Kâniýe-zade Hasan Celebi and Beyânî, whereas 'Aşîkî Celebi gives his name as Muşîl—or Muşlu, the Turkish abbreviation of Muşûl al-Din) Celebi of Shirûz (Serres), who lived during the reigns of Suleymân I (926-74/1520-66), Selim II (974-82/1566-74) and up to the middle of that of Murâd III (982-1003/1574-95). A dâvûnîmhed of Kâziâ-zade Ahmed Efendi (who became kâdi-âsker under Selim II), then a madâzim of 'Atâ'î Allah Efendi, he served as kâdi of a number of kasâbas, the last being Shirûz. He came to be known in the circle of his peers for his numerous servants and attendants and his love of display.

2. Mehmed of Istanbul was a madâzim, then a müderres until he attained a position with a daily salary of forty akçes. Upon dismissal from this position, he agreed to a career as kâdi and went to Egypt (according to the ms. Österr. Nationalbibl., H. 139, of Şafîîîî telhkîresi, he was appointed as kâdi to the kâdâ of Burullus), where he became renowned for his ability for story-telling and his indulgence in the pleasures of life. He died in 1083/1672-3.

MEDINE, town in Saudi Arabia [see AL-MADINA].

MEDICINE [see THIB].

MEDINA, from Arabic madina "town", is used in French (médine) to designate, above all in the Maghrib, the ancient part of the great Islamic cities, beyond which have been constructed the modern quarters of the city. Moreover, Medina has survived in Spain in a certain number of toponyms. The main ones of these are: Medina de las Torres, in the province of Badajoz; Medina del Campo and Medina de Rioseco, in that of Valladolid; Medina de Pomar, in that of Burgos; and also, Medinaceli [see MADINAT SALIM] and Medina-Sidonia [see MADRIN].

(MEDINA) TOWN IN SAUDI ARABIA [see AL-MADINA].

MEDINE — MEDINA 969
MEDINACELI, a leader, as Rā'ī Când Pūrbiya, of the Pūrbiya (= "eastern") Rajputs, with tribal possessions in the Čandānegī [q.v.] district and hence feudatories of the sultans of Mālwā [q.v.], who became prominent in Mālwā-Gujaratī-Mewār-Dīhlī politics early in the 10th/16th century.

The Mālwā succession had been fiercely contested after the death of Nāṣir al-Dīn Shāh Khādджī in 918/1512, who had designated his third son, A'ẓām Humāyūn as his heir. He duly succeeded, as Māhmūd Shāh Khādджī [q.v.], with his elder brothers Shībāb al-Dīn and Sāhīb Khān as active contenders for the throne in a situation exacerbated by rival factions of Muslim nobles at court; one faction had already compassed the assassination of the strong and competent (Hindu) wazīr and the banishment of a second Hindu minister. The perpetrators remained unpunished by Māhmūd, and their power increased until the leader of the second faction, Muhāfiz Khān, turned the sultan against them. They escaped to Khāndērī [q.v.] to join Shībāb al-Dīn, but the latter died suddenly before any action could be taken. In the meantime, Muhāfiz Khān, now appointed wazīr, had become too powerful, and confined Māhmūd to his palace, proclaiming Sāhīb Khān sultan as Muhām-med Shāh in the capital MāndĪ [q.v.]. Māhmūd managed to escape, chased by his brother, to Čandānegī, where he received no support from the governor Bahdjar Khān, on the pretense that he obeyed only the ruler of MāndĪ. At this point, Rā'ī Când Pūrbiya brought his Rājdūṭ troops to Māhmūd's assistance, and, becoming Māhmūd's adviser, was given the title of Mēdīnī Rā'ī. He pursued Sāhīb Khān and expelled him from MāndĪ (917/1512); Sāhīb Khān fled to Gujaratī, accompanied by Muhāfiz Khān.

Mēdīnī Rā'ī, appointed wazīr at MāndĪ, strengthened the administration and appointed his own Rājdūṭs to some important posts; but there was some opposition from Muslim nobles, increased when Sāhīb Khān returned from Gujārāt without, however, having secured any assistance from its sultan. In 918/1512 the governors of both Satwār (Nēmāwar) and Mālwā, accompanied by Mūshish Khān, surrendered the disturbances at Satwār and then, with Māhmūd, marched on Čandānegī, where Bahdjar Khān (not obeying the ruler of MāndĪ!) had not only proclaimed Sāhīb Khān as sultan but also sought help from the Dīhlī sultan Sikandar Lodi, promising to read the khutba and Gudjaratī influence, requested Muzaffar to recall it; but after this was done, Malwa lost much of its territories to Rana Sanga or lost little under his protection, including Mēdīnī Rā'ī, who was established in the now independent Čandānegī. He fought with Rana Sanga against Bābur in the battle of Khānuwā in 933/1527, and shortly afterwards was killed in Bābur's assault on Čandānegī. He was the most able of the minor Rājdūṭ chieftains, as skilful in warfare as in administration; he never abandoned his respect for or courtesy to Māhmūd Shāh, treating him and his family with consideration and generosity.

J. BURTON-PAGE

MEDJDI, MEHMEĐ ĖLĪBÁRI, an Ottoman literate and biographer of the 10th/16th century known by the pen-name of Medđi, d. 1599/1591. He was born the son of a merchant in Edirne (Allī, Kānī al-ākhbār, Ist. Univ. Lib. TY 5959, fol. 493b). He completed his education at the Bāyezīdíyye madrasa in Edirne, and became a dāntīmīnd ("advanced student") of the Bāyezīdíyye. He later spent time in the Gudjarat-body of troops and in the Bāyezīdíyye, while Newr-ī-zādī "Aṭār (Hadīk al-Shakdīk) ft takmirat al-Shaβakatī, Istanbul 1268, 334 states that he became a candidate for office (mulāzim) under the quota of nominees allowed Akhaweyn as a mūdirīn at the Şahīn, where he taught before being appointed to the Bāyezīdíyye. Medđi held a number of kāḏīfīls in Rumeli and reached the rank of 150 aṣpers' daily salary; he died in Istanbul in 1599/1591 while awaiting a new appointment and was buried at the zādwīye of Emīr Bakhrāī outside the Edirne gate.

As a poet, Medđi was particularly influenced by Emīr (also a native of Edirne) and by his teacher Akhaweyn, and his contemporaries "Aḥđī (Gūlghān-ī shavāra)," Ist. Univ. Lib. TY 2604, fols. 110 ff. At the death of Rā'yādī Meḥmed, Tādšīkī, Ist. Univ. Lib. TY 761, fol. 119a; Beyānī Muştāfatī, Tādšīkī, Ist. Univ. Lib. TY 2568, fol. 79a; Kāfāfè Pādhī, Zadālāt al-āğrār, Ist. Univ. Lib. TY 1646, fols. 97a-98a; "Aṣṭī, 356-65) and in contrast to Edirne Hist. (I. tunkarsī, musāmīrīn, Millet Lib., Emīrī, tarih no. 68, fol. 80b; Bādi, Rā'yādī-i bele-ye Edirne, Bayezid Devlet Lib. no. 10392, i, 545-6; O. N. Peremeci, Edirne tarihi, Istan-
The significance of the Medjelle can be measured not only by the work more widely available, undertaken its translation into Turkish, which he completed and dedicated to Murad III in 995/1587. Medjdi compensated for the dry simplicity of the original with a courtly style and capacity to compose good Arabic prose with two treatises: Sayf-Al(Kuddiliz) and Asaigion (Şuleymanlı Lib., Esad Ef. no. 3416, fols. 28b-30b) and the Şam'iyâ (quoted in part by 'Ali, Külâizâde, Beyâni and 'Atâ'î, loc. cit.).

Medjdi displayed his scholarly and literary ability in the work for which he is justly renowned, his translation of the Shâkâh'âl-Nâmînîyya fi 'ulâmâ'î al-‘adwâ’î al-âdâwî ‘al-‘Othmânîyya. As previous translations and commentaries, his was the most suited to the conditions of the times, in accordance with the principle of taqlîdyya. While the justificatory memorandum (sebbâhî mazăibe nadbatâ) submitted to the Council of Ministers, said that the authors of the code “never went outside the Hanafî rite” (Liebesny, 69; Berki, 12; Dutrânî, i, 27; Aristarchi, vi, 15), some of these opinions had in fact originated with non-Hanafî jurists (Anderson, 17, 47-8). Such eclecticism became a major feature of later efforts on the part of the state. See A. Subhi Furat's notes to his edition of the Medjelle over the period from 1285/1869 to 1293/1876 (Dutrânî, i, 20-164; ii, 38-425; iv, 93-125; Berki, passim; Aristarchi, vi-vii; Young, vi). The various books were placed in force by decrees (irâde) of the sultan, dating from 6 Dhu ‘l-Ka‘da 1286/1870 (Berki, 113) to 25 Sha‘bân 1293/1877 (ibid., 422).

In the şarÎî terms, the Medjelle thus acquired legal force from the power of the sultan as sanî ‘almî-l-mussîlin in order which several legal opinions should be followed in a given matter (Dutrânî, i, 29; Heidborn, i, 286; Anderson, 48). The Medjelle opens with two sections which define fîkh and its divisions and which state its basic principles largely according to the Aghâhî wa-l-nâzîrîr (Aristarchi, vii-viii [1945], 136 ff.) and the Şâkâh ‘al-Nâmînîyya tercime ve zeyilleri, in Türkiye Memnuat, vii-viii [1945], 136 ff.) had been made, some scholars had added explanatory and supplementary notes (bâhâzîs and mlâ‘ikî) to the margins of the Arabic text. Medjdi, in order to make the work more widely available, undertook its translation into Turkish, which he completed and dedicated to Murad III in 995/1587. Medjdi compensated for the dry simplicity of the original with a courtly style and ornate language, adorning his translation with poetry, aphorisms, word plays and chronograms. He also used the sources at his disposal to expand and correct the work. These sources included marginal additions to the original Şâkâh‘al-Nâmînîyya, such as the notes made by 'Arab-zâde (see Medjdi, 331, 373-4, 385, 486) and Seyrek-zâde (ibid., 494); documents such as waqf-nâmes, hudjîfsiz and temessûs found in the judicial (kâddîlık) archives; authors such as al-Suyûtî, Ibn 'Arabgâhî, and Hanbali-zâde; early Ottoman chronicles, particularly the Haci bâktî; tadhkîrîe authors such as Sehî, Laﬁûî and 'Asghîrî; and such works written by the subjects of his biographies as he was able to see plus accounts transmitted by their relatives and students (for an indication of the extent of these additions, which Medjdi labels tadhkîrî, see A. Subhi Furat’s notes to his edition of the original, qiy-Şâkâh'âl-n-Nâmînîyya fi 'ulâmâ'î d-devletî l-‘Othmânîye, Istanbul 1985). Thus it can be said that Medjdi’s work, which he entitled Hâdâ’î‘al-Şâkâh‘al-Medjelle, rather than being a translation, represents an attempt to produce a new work based on the Şâkâh‘al-Medjelle, as a complement to the Şâkâh‘al-Medjelle which was of high literary quality, became the formal and stylistic model for later continuations, and the edition published in 1269/1852 is a primary reference work for researchers.

Medjelle (A. Madjalla). Originally meaning a book or other writing containing wisdom, or even any book or writing, the term refers in its best-known use to a book or other writing containing wisdom, or even any book or other writing.

The drafting commission evidently intended to continue its work by codifying the law on the family and inheritance, but soon found itself paralysed by the suspicions of the new sultan. 'Abd-ül-Hamîd II (1876-1909 [g.v.]) (Heidborn, i, 285; Mardin, art. Mecelle, 435). Despite its bases in fîkh, the Medjelle differs from traditional şarÎî law in several respects, including its codification and official promulgation and its explicit admission—necessary, given its intended scope of application—of non-Muslims as witnesses (Schacht, 93). The Medjelle also differs from European civil codes in omitting non-contractual obligations, types of real property other than freehold (milk), joint ownership and partnership (shirkâ), and inheritance, as well as in including some şarÎî procedural provisions (Liebesny, 65).

The significance of the Medjelle can be measured not always incorporate the dominant opinions of that school. Rather, all of the opinions ever advanced by Hanafi jurists, the code incorporated those deemed most suited to the conditions of the times, in accordance with the principle of taqlîdyya. While the justificatory memorandum (sebbâhî mazăibe nadbatâ) submitted to the Council of Ministers, said that the authors of the code “never went outside the Hanafi rite” (Liebesny, 69; Berki, 12; Dutrânî, i, 27; Aristarchi, vi, 15), some of these opinions had in fact originated with non-Hanafi jurists (Anderson, 17, 47-8).
only from the respect that it continues to command as evidence of the possibility of achieving its original purpose, that of systematising the şari'a so as to obviate the adoption of new family law codes (Fadzul Rahman, 29), but in a more tangible way, the code's significance also appears from its remarkable afterlife. In the niṣānimya, though not the şari'a courts, the Ottoman government did replace the procedural provisions of the Medjelle with a Code of Civil Procedure, based on French law, in 1879 (Liebesny, 66; Heidborn, i, 386-7; Diirer, iv, 257-317; Young, vii, 171-225). The Turkish republic thus abrogated the Medjelle in 1926. Yet it remained in force in Bosnia-Herzegovina after the Austrian occupation of 1878, in Albania until 1928, and in Cyprus at least into the 1960s. In the Middle East, the Medjelle, though never in force in Egypt, was not replaced by new civil codes until 1932 in Lebanon, 1949 in Syria, and 1953 in 'Iraq, where many elements of it survived in the new civil code of that year. The Medjelle has remained basic to the civil law of Israel and Jordan. It has also continued to serve as the civil law of Kuwait (Schacht, 93; Liebesny, 93, 100, 109).

In terms of the approach to legal reform which it represented, another aspect of the Medjelle's continuing influence appears in the Ottoman Law of Family Rights (Hukuk-i Âtile Kanûnînmesi) of 8 Muharram 1337/21 February 1919 (Schacht, 39-40, 48-50; Schacht, 103). Enactment of this law completed what appears to have been the original programme of the drafters of the Medjelle. In addition, the new law resembled the Medjelle in combining codification with an eclectic approach to şari'a sources, as well as in applying to both Muslim and non-Muslim subjects, a breadth achieved in this case by incorporating provisions drawn from the religious law of the various sources, as well as in applying to both Muslim and non-Muslim subjects, a breadth achieved in this case by incorporating provisions drawn from the religious law of the various communities (Shaw and Shaw, 307). The 1917 family law further resembled the Medjelle in that it remained in force in various of the successor states much longer than in Ottoman territory, where it was repealed in 1337/1919 (Shaw and Shaw, 333; Diirer, xi, 299-300). For the 1917 law "remained valid in Syria, Lebanon, Palestine, and Transjordan (as they then were), and is still part of the family law of the Muslims in Lebanon and in Israel" (Schacht, 1964, 103).

MEDJIDIYYE (Romanian, Medgidia), a small town in eastern Romania, situated in the central Dobrudja (q.v.), midway between the Danube and Constanța (Kustendje), and on the site of the earlier Ottoman settlement of Karasu, which had served as a relay-station on the old sâgh kol, the military road from Istanbul to the lower Danube and the Crimea. The importance of Medjidiyye stems from its being, in its inception, a mid-19th century Ottoman planned town, founded by the local wâli, Sa'id Paşa, in the course of the Crimean war, to house Krım Tatar refugees, and named in honour of the reigning sultan ʿAbd al-Medjîd. Within a few months of its foundation in 1854 it contained over one thousand completed houses, a khan and a bazaar. The large mosque, which still stands, and serves a population still 30% Muslim, is dated 1277/1860-1. In the reorganisation of the provincial administration of Rumel in 1284/1864, Medjidiyye, as a kâdâr in the sâğk of Tuhla (not Varna, as in E², art. Dobrudja), formed part of the new Tuna wilâyet (Sâhâname 1294, 432), and its prosperity was subsequently increased by the building of the railway from Bucharest to Constanța. By the terms of the Treaty of Berlin (art. xvi), Medjidiyye passed from Ottoman into Romanian possession, along with all that part of the Dobrudja north of a line drawn from Silistra to the Black Sea. At the time of the out- break of the First World War, its population was estimated at approximately 2,200 Muslim and 1,300 non-Muslim households.

Ayverdi, Avrupada Osmanlı mimari eserleri, vii, 2, Istanbul 1979, 53, 55-6; IA art. Dobruca (A. Decei); E² art. Dobrudja (H. Inalok). (C.J. Heywood)

MEDJIDIYYE [see SIKKA].

MEDJILIS-I WALA, in full, the Ottoman Medjîls-i Walâ-yi Âkhâm-i ʿAdliye, or Supreme Council of Judicial Ordinances. This was created in 1838 by the reformer Mustafâ Reşid Paşa for the purpose of taking over the legislative duties of the old Divân-i Hümâyûn in order to originate or review proposed legislation and thereby create an "ordered and established" state by means of "beneficent reorderings" (tanzimat-i hâyiyye) of state and society, with all other legislation being turned over to a second legislative body, the Dâr-i Şirâ-i Bâb-i Âli (Deliberative Council of the Sublime Porte). The Medjîlî-i asâlî hardly had a chance to begin its deliberations when, following the accession of Sultan ʿAbd al-Medjîd I (q.v.) and promulgation of the Khatâ-i Hümâyûn of Gûlkânne which proclaimed the Tanzimat reform movement as the
major goal of the new régime, it was expanded into the principal legislative body of state with the abolition of its sister body. Beginning its work on 8 March 1840 in a building constructed especially for it near the office of the Grand Vizier at the Sublime Porte, it originated most of the Tanzimat legislation, though its powers were severely limited by regulations which allowed it only to consider legislation proposed to it by the ministries or the executive. It was supplanted for reform legislation by the Meclis-i Vâlâ-yl Ahkâm-î Âdliyye, which was divided into departments for Laws and Regulations, which assumed the legislative functions of both councils, Administration and Finance, which investigated complaints against the administrative misconduct, and Judicial Cases, which assumed the old council's judicial functions, acting as a court of appeals for judicial appeals. Conflicts of jurisdiction between the two bodies, however, and a substantially increasing workload created such a backlog of legislation that in 1861 the two were brought back together into a new Medjlis-i Vâlâ-yl Ahkâm-î Âdliyye, which was divided into departments for Laws and Regulations, which assumed the legislative functions of both councils, Administration and Finance, which investigated complaints against the administrative misconduct, and Judicial Cases, which assumed the old council's judicial functions, acting as a court of appeals for cases decided by the provincial councils of justice and as a court of first instance in cases involving misconduct on the part of higher officials in the central government. Regulations allowed it to originate as well as to review proposed legislation, to question members of the executive and to try such officials for misdeeds, greatly increased its ability to act decisively in order to meet the problems of the time, with the sultans interfering only rarely to veto or change the results of its work. In 1867, however, in response to complaints about the autocratic nature of the Tanzimat system, the Medjlis-i Vâlâ was replaced by separate legislative and judicial bodies, the Vâlâ-yl Dewlet, or Council of State, whose members were at least partially elected and representative, and the Divân-î Ahkâm-î Âdliyye, chaired respectively by the famous Tanzimat leaders Midhat Paşa and Ahmed Djewdet Paşa.

Shaw, History of the Ottoman empire and modern Turkey, London and New York 1977, repr. 1985, ii, 38, 76-81; Başbakanlık Arşivi, İrade, Meclisi-i Mehtes-i Meclis-i Mehtes-i Mecûs; see G. Moravcsik, "Tanzimat des Mehemmed I" in Das Aufzeichnen des Genuesen laçope de Promontorio... um 1475, Munich 1957, 29, n. 1 (where Colín's note, mentioned above, is also given); see also, for an example of deliberate alteration (Mamad), L.P. Harvey, Crypto-Islam in sixteenth century Spain, in Actas del primer congreso de estudios árabes e islámicos, Madrid 1964, 199, no. 15, 177, l. 9. Contemporary Byzantine and European sources indicate that in the 9th/10th century the predominant pronunciation of the name was "Mahmoud"; F. Babinger, commenting on the form "Mehmet" in Die Aufzeichnungen des Genuesen laçope de Promontorio... um 1475, Munich 1957, 29, n. 1 (and there, with further bibliography, proposing "Mehemed" as the current pronunciation), adds Angiolello's "Mehemmed", and the Myzqüt and similar forms which is regular in Ducas, Sphrantzes and Çritoboulos (for these and the other Byzantine texts see G. Moravcsik, Byzantinoturcica, ii, s.v. Myzqütça). In modern Turkey, the name finally appears as "Mehmet", as a consequence of the general phonological principles (J. Deny, Principes de grammaire turque, Paris 1955) of the devocalizing of a final voiced consonant, the predilection for front vowels in loanwords, the assimilation (progressive and regressive) of vowels, and the fall of an unstressed middle vowel in a tri-syllable.

The Editors, taking the view that to employ the spelling "Muhammad" in the Ottoman context would be hypercorrect (and "Mehmed", for the earlier centuries, anachronistic) have adopted the convention that all the relevant Ottoman rulers figuring in the Encyclopedia will be referred to consistently as "Mehmed", whilst lesser personages shall be referred to as "Mehmed". (Ed.)

MEHAMED I, Ottoman sultan, reigned 816-24/1413-21, also known as Çelebi (Turkish "of high descent", "prince") or as Krytzes (from Krýtze, meaning in Greek "young lord"). During the period of interregnum, 804-16/1402-13, he ruled over Anatolia from Tokat, Amasya, and Bursa while his brothers Süleyman (804-13/1402-11) and Musa (813-16/1411-13) had control of Rûm (from Edirne. Mehemed brought under his rule Bursa and western Anatolia in the years 805-6/1403-4 and 813-16/1410-13, and finally achieved the unification of the two parts of the Ottoman state under his sole sovereignty in 816/1413. He was the fourth son of Bäyezid I [q.v.] by a slave girl Dewlet Khâtnûn (Uzunçarşı, in IA, viii, 496).

1. Birth and early years.

Born in 788/1386 or 789/1387, Mehemed was sent when he reached the Şârî age of adolescence in 973 [q.v.] attached to the Prophet's name without risking letting it become profaned, above all by insults and abuse addressed specifically by name to these persons. On the problems posed by alterations of this kind in the sphere of Islam and those which the name of Muhammad has undergone in the European languages, see G.S. Colin, Muhammad-Mahomet, in BSLP, xxvi (1925), 109; J. Mouradian, Notes sur les alterations du nom de Mahomet chez les Noirs islamisés de l'Afrique Occidentale, in Bull. du Comité des études historiques et scientifiques de l'Afrique Occidentale Française, xxi (1938), 459-62; A. Fischer, Vergleichung und Tabuisierung des Namens Muhammad's bei den Muslimen in Beiträge zur Arabistik, Semitistik und Islamwissenschaft, Leipzig 1944, 307-39; F. de la Granja, A propósito del nombre Muhammad y sus variantes en Occidente, in And., xxxiii (1968), 231-40 (where Colin's note, mentioned above, is also given); see also, for an example of
Shawwal 801/June 1399 as governor over the province of Rüm, which included Amasya, Tokat, Sivas and Ankara, formerly the territory of the Ėreṇa [q.v.] dynasty. Mehemmed’s six brothers were Erteğrul (died 802/1400, Zachariadou, Erteğrul, 157), Mustafā (captured by Timūr and taken to Samarkand in 804/1402; Dostār-nāme, 90), Süleyman (in contemporary sources also known as Muslumān or Amuslumān), ʿĪsā, Mūsā and ʿ Jáṣīm. In 804/1402, ʿ Jáṣīm, aged under 12, was in Bursa in the palace while Mūsā was captured together with his father by Timūr. Süleyman, ʿĪsā, Mūsā, and Mustafā fought to get control of Bursa, still considered as the Dār al-Saltāna, and of Edirne, capital city of Rûmili.

2. The status quo established by Timūr in Anatolia.

During Timūr’s siege of İzmīr (from 6 Dūmādā I 805/2 December 1402 until 10 Dūmādā II/6 January 1403), Süleyman was given a jurāfā granting him the rule of ‘all the territories beyond the Bosphorus’ (arastā-yaka, Yazdi, fol. 424b). Mehemmed, whom Timūr called to come in person to Kütahiya, could not or would not obey the order (for details in the Manākbār-nāme, see Bibl.).

Mehemmed’s first deeds against the Turcoman begs in the Tokat-Amasya region, rendered in an epic style in the Manākbār-nāme, appear actually to have been local clashes which evidently resulted in compromises giving recognition of Mehemmed’s overlordship in return for his confirmation of the begs’ freehold possession of their lands (cf. Neşri, ii, 480). In the future, these hereditary mulk ṭimārāns would create problems when Ottoman centralist control was re-established. These local dynasts in control of Turcoman and ‘Tatar’ forces would provide the bulk of Mehemmed’s army (cf. divisions of Tatars and Türkmen in the battle against Mūsā in 816/1413; Neşri, ii, 512-13).

Kara Dwesteqhān, Kubād-oglu, Mīzād Beg and the family of Tāʃān (on the family’s origin, see Bazmīrīyye).

As the well-established Turkish tradition, every son of a ruler had the right to succeed his father, and his legitimacy could not be contested since there was no law which regulated succession (see Inalcik, Verāšt). As the Manākbār-nāme (see Neşri, ii, 432, 446, 456, 461, 504, 508) makes clear, people at large often told the rival princes struggling for recognition that they had first to win the fight, which was interpreted as a sign of God’s favour. The principle of seniority was never decisive, although Mehemmed at the beginning recognised his elder brother Süleyman as representing supreme authority (Anonymous chron. Paris, Bibl. Nat. 1047, fol. 29b; ed. Giese, 47).

On the struggle among the Ottoman princes, Celebis, the account of the Manākbār-nāme, which is actually a contemporary account of the events for the period 1402-13, should be followed. According to this source, in various encounters Mehemmed defeated ʿĪsā and took Bursa, although the latter secured the alliance of the western Anatolian begs and İsfendiyār of Kastamuni (Manākbār-nāme, in Neşri, ii, 422-50; İdris, 263-7). Mehemmed finally captured and killed him at Eskişehir (apparently in 806/403-4; Zachariadou, Süleyman, 281-3, believes that ʿĪsā was killed by Süleyman in 1403). Then, in 806 (begins 21 July 1403), Mehemmed lost Bursa and Ankara to Süleyman (Mehemmed minted an akçe in Bursa in the same Hīḏra year, see Table, nos. 3, 4). Mehemmed had to retreat to his Tokat-Amasya base, and later encouraged Mūsā to go to Rūmeli (Manākbār-nāme, in Neşri, ii, 474; İdris, 275-6). Accepting the Wallachian Vâyvode Mircea’s invitation, Mūsā arrived by sea in Wallachia in 809/1406 (A. Dersca

Bulgaru, Les relations, 116-17, citing Guboglu, gives the year 1406; the date is confirmed by the details in Mehemmed, in Negri, ii, 478. For Mehemmed’s death which occurred in 17 Radjab 809/28 December 1406; Idris, 278). His success in the eastern Balkans finally forced Suleyman to leave Bursa for Rumi. At first victorious at the battle of Yanbolu (13 February 1410), MUIS was later twice defeated (June and July 1410, A. Dersca Bulgaru, 122, 123). Finally, by a surprise attack, MUIS captured Edirne and killed Suleyman (17 February 1411). Upon Suleyman’s departure from Anatolia, Mehemmed re-occupied Bursa (Menekh-nâme, in Negri, ii, 480). Not honouring his agreement with Mehemmed, MUIS acted independently, and espousing the frontier begs’ aggressive policy, he alienated the vassal states from himself, who now sided with Mehemmed (Menekh-nâme, in Negri, ii, 490-500; Idris, 281-4) in 814 (begins 25 May 1411); these two clashes are confirmed by Ducas, 109-110) Mehemmed finally overcame his rival and eliminated him, thanks to the alliance of the frontier begs and vassal states (Menekh-nâme, in Negri, ii, 506-16; Idris, 286-8; Braun, 47-55) on 5 Rabî’ II 816/15 July 1411. According to the Menekh-nâme, in Negri, 88, 486, 516 and 544, Mehemmed, Suleyman reigned 10 years, 10 months and 17 days, MUIS 2 years, 7 months and 20 days and Mehemmed 7 months, 11 days. 

The principal Anatolian dynasties, the DJandarids, the Karamanids, the rulers of Germiyân, Sarukhân, and Aydîn in Western Anatolia, which had all been restored to their principalities under Timûr’s overlordship, were actively involved in the struggles between the Ottoman princes for Bursa, still considered the principal capital or Dâr al-Salâma. Their policies were basically determined, like those of Byzantium, Wallachia and Serbia, by their concern to maintain the status quo established after the battle of Ankara. Each Ottoman prince, for his part, tried to gain their support or neutrality by showing himself respectful of their autonomy or independence. However, Timûr’s departure made the Anatolian dynasties realise that Ottoman power and supremacy were still a fact, and some of them, for the sake of survival, recognised the overlordship of whichever Ottoman prince had control of Bursa.

Byzantium and the vassal states in the Balkans, subjected and paying tribute under Murâd I [q.v.] and Bayezid I, were now independent and even recovered some of their territories (see Jorga, COR, i, 325-77; Barker, 200-385; Zachariadou, Suleyman; Jirecek, ii, 137-56) They played off one Ottoman prince against another, gave refuge to and used the Ottoman pretenders against any Ottoman prince whenever he became powerful enough to assert his sovereignty over them. Thus, the political manoeuvres of Mircea and the Byzantine Emperor Manuel II strongly influenced the struggle between the Ottoman princes. Except for MUIS, who adopted the policy of the frontier begs of recovering lost lands and engaging in raiding, the other princes, Suleyman and Mehemmed, involved themselves politically with the Christian rulers, often making compromises and concessions to them. All through the Ottoman interregnum—Byzantium plunged into a social role and managed to keep the respect of rival Ottoman princes. This was actually due to the fact that, after the treaty of 1403 (Denis, Treaty, Zachariadou, Suleyman, 270-83), the Byzantines controlled the sea passage between Anatolia and Rumi. Ottoman public opinion (see Anonymous Paris 1047, fol. 29b) interpreted the treaty of 1403 as such. When in 806/1403 Suleyman decided to remove the legitimate successor of Orkhan from the Ottoman throne as the legitimate successor of Suleyman.

Mehemmed’s final success depended a great deal on his conciliatory and even compliant attitude towards the Emperor, whom he called father (Ducas, ii, 114). Apparently, MUIS’s harsh personality, or rather, his centralist and autocratic policy, which the hereditary frontier begs resented, alienated them from him.

3. Unification and the resurgence of the Ottoman supremacy.

In 816/1413, upon his accession to the throne in Edirne as the sole ruler of the Ottoman lands, Mehemmed I received embassies from tribute-paying vassal countries, including Byzantium, Serbia, Wallachia, Yanina, the Morean despotate and the Prince of Achaia (Athens), and sent them back with strong guarantees of peace and friendship (Ducas, ii; Setton, ii, 6, cf. Anonymous Paris 1047, fol. 35a).

Feeling secure in the Balkans, Mehemmed made in the following two years a series of campaigns to reassert his sovereignty in Anatolia and to punish those amirs who had helped MUIS against him. In 817/1414 he made the whole of western Anatolia submit by defeating Djunayd, who, abandoning MUIS, had returned and revived his emirate of Izmir (Ducas, 115-19). The emirate was invaded and turned into an Ottoman sanjak. In this campaign, Germiyân, Menteşe, and the Genoese of Chios, Mytilene and Phoceca and the Hospitalers of Rhodes, were allied with Mehemmed on account of Djunayd’s aggressive acts. During this campaign, Mehemmed demolished the fortress which the Hospitalers had begun to construct again in Izmir. The ruler of Menteşe now recognised Mehemmed as suzerain (Wittek, Menteşe, 97).

In 816/1413, while Mehemmed was in Rumi preparing against MUIS, the Karamanids Mehmed II laid siege to Bursa and burned down the quarters around the castle (al-Makrizi, Suluk, iv, 47a; Negri, 141-2). Upon the news of Mehemmed’s victory over MUIS, the Karamanids retreated after a 31-day siege. Mehemmed at first proposed a campaign against Isfendiyar of Kastamuni, who however submitted in time, promising to send auxiliary forces to Mehemmed’s planned campaign against Karaman. Germiyân, which had been invaded by the Karamanids, was a natural ally and vassal (Negri, ii, 516-34). Prior to the major campaign against Karaman, Mehemmed sent an embassy with rich presents to the Sultan of Egypt, who was considered a protector of the Karamanids (Ibn Hâdîjî, ii, 518; letter from Inegöl, in Feridûn, i, 145, dated awâsîl Qiatis 3/317/817/February 1415). Mehemmed defeated the Karamanids and laid siege to Konya (Muhammar 818/13 March-11 April 1415). The Hamîd-îli and Sa‘îd-îli were annexed to the Ottoman state (Vakseski, 20, 56; al-Makrizi, iv, 51a).

With the Ottoman re-unification of Anatolia and Rumi under one ruler and that ruler’s attempts at re-imposing suzerainty on the former Ottoman vassal states, the Emperor increased his diplomatic activities in conjunction with the Pope and Venice, calling for
a crusade against the Ottomans (Barker, 290-353; Thiriet, ii, no. 1592). Profiting from the Ottoman interregnum, Venice had succeeded in extending her control in Epirus, Albania and the Morea. Negotiation for an agreement with Mehemmed after his final victory over his brothers dragged on unsuccessfully. During the campaign against Djunayd in 1414, the Venetian Duke of Naxos had not joined the other Aegean Latin rulers in the renewal of submission. So, in 1415, Mehemmed released the sea ghazis of western Anatolia against Venetian possessions in the Aegean, and sent his fleet of Gallipoli (112 ships, 13 of them galleys) under Calf Beg to strike at the Cyclades (Ducas, 119; Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564). Mehemmed's fleet and the Emperor (Thiriet, ii, nos. 1563, 1564).

Mehemmed's brother Mustafa brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire. Mehemmed had at the same time to deal with a Timurid plan becomes clear in Shahrūkh's preparations for a large-scale campaign in the west. First, he released Mustafa from captivity in Samarkand, an action which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire, which brought back internecine war in the Ottoman empire. Shahrūkh's protest against Mehemmed's elimination of his brothers (his letter to Mehemmed, Feridun, i, 150-1). In his reply, the latter tried to prove that he did not support the Karakoyunlu Kara Yusuf, and argued that the division of the Ottoman state only helped the enemies of Islam, many places including Salonica having been lost to Islam because of that division. Shahrūkh's preparstions for a large-scale campaign in the west in 1422/1419 caused great concern in the Ottoman capital and generated an exchange of embassies between the Kara Koyunlu and the Ottomans (Feridun, i, 150-7). Invading Adharbaydjan, Shahrūkh warned Mehemmed not to give refuge to the son of the defeated Rūm sultan who might take refuge in Ottoman territory (Dhu 'l-Hijjah 823/January 1420). In his reply, Mehemmed expressed his complete submission (farman-bar). The Ottoman court was meanwhile following in great anxiety the developments on the eastern frontier (see Taktakmir, 20, 56). Upon Iskandar's victory over the Ask Koyunlu Kara "Oğlan (Rabi' II 824/April 1421), Shahrūkh entered eastern Anatolia and won a crushing victory against Iskandar (Radjab 284/July 1421). All this time, Mehemmed was maintaining friendly relations with the Mamluks (Feridun, i, 145-6, 164-7), equally threatened by Shahrūkh. In his last years, Mehemmed appears to have fallen ill. Now his great concern was to secure the throne for his eldest son Murād without a crisis. Although Sülüymān's son Orkhan was blinded and kept in custody, Mehemmed's brother Mustafa was a serious rival, since he had actually been recognised as sultan by some of the Ottoman leaders and could be released by the Emperor at any time. Prince Murād's supporters spread the rumour that Mustafa had died and that the challenger was a false (duzme) Mustafa. To make sure of Murād's accession, Mehemmed showed himself most liberal toward the members of the ruling elite and made an agreement with the Emperor (Ducas, 129; for the agreement of the same nature with Stefan of Serbia, see Braun, 56-8) that Murād
Mehmed II, Ottoman sultan (reigned 848-50/1444-6 and 855-86/1451-81), called Abū l-Fath or Fatih "the Conqueror".

Considered the ultimate founder of the Ottoman Empire, he was born in Edirne on 27 Radžab 835/30 March 1432 as the fourth son of Murād II [q.v.] from a slave girl in the hareem, and as a youth was sent to the governorship of the province of Armania with his two lalaq [q.v.] in the spring of 846/1443. In Rabii' II 848/July 1444, at the age of twelve, he was recalled and declared sultan by his father, who abdicated in his favour in order to ensure his succession against Orkhan, an Ottoman pretender in Constantinople. Mehemmed's first sultanate, Rabī' II 848/July 1444-Đīumādā II 850/August 1448, witnessed a fierce rivalry for power between the grand vizier, Candarlı Fahtих, and the young sultan's two lalaq, Zaghānūz and İbrahim. While Candarlı, of 'ulamā' background, favoured a foreign policy of peace and compromise, Zaghānūz, who belonged to the military faction, advocated a programme of conquest—having particularly in mind the conquest of Constantinople—which would secure full authority to the young sultan and his lalaq. Because of the youth of the sultan and his inability to neutralise the rivalry among the two factions, the Ottoman state could not deal decisively with the fateful internal and external crises facing it (the Ḥurūf uprising in Edirne on 8 Đīumādā II 848/22 September 1444 and a Crusader army which crossed the Danube 4-8 Đīumādā II 848/18-22 September 1444). Everywhere in the Balkans the vassal rulers and seigneurs set about recovering their independence and lost territories. In panic, many Turks began to emigrate to Anatolia. However, Orkhan's attempt in the summer of 848/1444 to attract the frontier begars and to seize Edirne failed. While the Crusader army came to lay siege to Varna in Radžab 848/November 1444, Candarlı hastened to call the sultan's father with the Anatolian army to come and take command of the Ottoman forces. The Ottoman army was at Varna (28 Radžab 848/10 November 1444) created an ambiguity about who was really the sultan. Officially, Mehemmed II was still sultan, but Candarlı acted as if Murād had resumed the sultanate. Finally, by secretly inciting the Janissaries to rise, Candarlı brought Murād back to the throne in actuality (9 Đīumādā I 850/2 August 1446). Mehemmed was sent to the governorship of Manisa with his lalaq Zaghānūz and İbrahim. Although deposed, Mehemmed was treated by his supporters as still having the supreme power (see İnalık, Fathih deর, 102-9). Anxious to ensure his son's succession after his death, Murād II took Mehemmed with him to his major campaigns in the Balkans and against the Hungarians at Kossova in 852/1448, and against the Albanians in the summer of 854/1450. Murād married his son to Sitti Fahtих, the daughter of the Dhu 'l-Kādirid [see DHU 'L-KADR] ruler, who was traditionally considered an Ottoman ally against the Karamānids. It was only shortly thereafter that Mehemmed received the news of the death of his father; he ascended to the Ottoman throne for the second time on 16 Muharram 855/18 February 1451. In order to obtain concessions from Mehemmed, who was seen as an inexperienced young man, the Byzantine Emperor attempted to obtain further concessions by a second threat to release Orkhan. Mehemmed came to an agreement with the Karamānīd and quickly returned to Edirne to deal with this new challenge. Under the influence of Zaghānūz, he decided to put an end to the truncated Byzantine empire and began to make preparations for the conquest of Constantinople. As the construction of the Boghaz-Kesen castle on the Bosporus. Already agreements with Venice (13 Shāhān 855/10 September 1451) and Hungary (25 Shāwāl 855/20 November 1451) secured peace in the west and the hire of Urban, a Hungarian expert, who would make for Mehemmed the most powerful cannons ever seen in order to batter the city's legendary walls. In an extraordinary meeting in Edirne, where the decision for the siege was taken, Candarlı drew attention to the impregnability of the walls and the danger of a crusade from the West, while the war party, principally Zaghānūz and Şihāb al-Dīn, enthusiastically supporting the sultan's decision, emphasised the constant threat which Byzantium posed to the existence and unity of the Ottoman state. The outcome of the siege depended on the timely arrival of the Ottoman artillery. A long siege would give the Hungarian and Venetian forces the opportunity to come to the aid of the besieged. Thanks to the bombardment of the Ottoman heavy cannons, which tore down the walls, the whole siege took less than two months (26 Rabī' II 857/6 April 1453 until 20 Đīumādā I 857/29 May 1453; on the siege itself, now see sources collected and edited by Pertusi). The most dramatic moment during the siege was the failure of the Ottoman navy to bar the entry of provisions ships into the Golden Horn. At this critical point, defeatist rumours arose among the besiegers, and Candarlı advised the lifting of the siege. Zaghānūz and Ak Şams al-Dīn [q.v.], Mehemmed's spiritual mentor, emerged as strong supporters of the young sultan, who was being blamed by the Janissaries for lack of resolution by the soldiery. The preparations for the final general assault were made by Zaghānūz. On 20 Đīumādā I 857/29 May 1453, the city was taken by assault [see ISTANBUL]. I] and the consequences of an 'amānī conquest were inevitable [see HARĀB]. Mehemmed regretted the ruin of the imperial city, which he immediately declared his capital. Throughout his reign, one of his main concerns was to build and repopulate it [see ISTANBUL I]. The Podestà of the Genoese Pera [see GHALATA in Suppl.] surrendered sulhām on the same day. Mehemmed granted an 'ahd-nāme on 1 June 1453 which guaranteed amān [q.v.] and certain communal privileges for the indigenous non-Muslim population as 'ulāmā subjects of the Ottoman state and capitulary privileges for the Genoese merchants. Mehemmed's first acts after the victory were the arrest of Candarlı and the execution of Prince Orkhan, who had fought against Mehemmed on the walls. Zaghānūz was made grand vizier. By the conquest of Kustantiniyya al-Uzma [see KUSTANTINIYYA], as it was designated in Islamic tradition, Mehemmed II assumed an unprecedented charisma and claimed to be the sole 'holder of the sword of the ghaza' in the Islamic world (in his fathām to the Sultan of Egypt, Fawād, i, 236). Ghaza' became indeed the legitimising principle of the Ottoman sultan even against his Islamic rivals. Muslim rulers who resisted or challenged him...
MEHEMMEDE II 979

(Anatolian Turcoman rulers, the Ak Koyunlu Uzun Hasan [q.v.] and the Mamluk sultan of Egypt) were declared to be acting against the true interests of Islam by handing them over to ghazi activities. This assumption would lead the Ottomans to claim supremacy throughout the whole Islamic world in the 10th/16th century (see Camb. hist. of Islam, i, 320-3). Also, by declaring himself the Kayser, the sole heir to the Roman Empire, as the possessor of the imperial city, Mehemmed believed that he could eliminate all the members of the Byzantine imperial family (Ibn Kamal, vii, 86, 113) and lay claim to all the territories once under the eastern Roman Empire, including the Balkans, the southern coasts of the Crimea and Italy. Following Byzantine tradition, he claimed the supremacy of Constantinople over Rome, and his taking of Otranto in 885/1480 was considered a prelude to the conquest of Italy. The conquest of Rome, symbolised as Kilil Elma, the Golden Glove, remained as the ultimate goal for the Ottoman ghazi ideology. Mehemmed's use of historical traditions and images served as legitimation of his efforts at conquest. Again, in order to legitimise his campaigns to annex the Serbian despotate, he always cited his inheritance rights through the marriage of his predecessors with Serbian princesses [see a'azar]. On the other hand, the revival of the first Ottoman Empire as founded under Bayazid (791-804/1389-1402) definitely motivated the Conqueror in his conquests (Ibn Kamal, vii, 288).

Although his conquering activities were determined basically by his plan to build up a centralist empire in the Balkans and Anatolia, the course of his military actions followed historical circumstances (Babinger's work, Mehmed the Conqueror and his time, is the latest attempt at centralization and monograph of the event; for a review of it, see Inalcik, Mehmed, in Speculum, xxxv [1960], 408-27; A. Pertusi, La caduta; Inalcik, art. Mehmed II, in IA, v, 510-12). In the last analysis, Mehemmed's wars appear to have been motivated by his plan to establish his control of the Straits, the Black Sea and the Aegean, the Balkans north to the Danube and the principalities in the lower Danubian basin, as well as central Europe and the Ottoman capture of the area and the Uighurs. His main interest was in the west. During the fourteen-year period after 1453, Mehemmed made a series of campaigns in Europe to eliminate the Balkan dynasts: the Serbian despot (1454-9), the Greek despots and Latin seigneurs in the Morea and the Aegean and the Euphrates as the natural borders of his empire. By fortifying the Dardanelles and the Straits, the Conqueror in his conquests of the region. The Ottoman-Ak Koyunlu rivalry developed into an extremely dangerous crisis for Mehemmed, since Uzun Hasan [q.v.] and Venice attempted to make a common enemy of the Ottoman Empire and to bring together all the small states in the Levant into an anti-Ottoman coalition (Inalcik, art. Mehmed II, in IA, v, 523-9; Babinger, Mehmed, 267-327, Setton, op. cit., 315-45). Mehemmed's victory at Bash-kent (16 Rabii 1 886/3 May 1481), was against the Mamluks rather than against the Hospitallers of Rhodes.

Keeping Hungary and Venice neutral with peace talks over this period, 873-8/1468-73, Mehemmed focused his attention on central Anatolia, where the dynastic disputes among the Karamanids had given a pretext to the rising Ak Koyunlu (Woods, The Aqquyunlu, 100-14) to extend their influence in the region. The Ottoman-Ak Koyunlu rivalry developed into an extremely dangerous crisis for Mehemmed, since Uzun Hasan [q.v.] and Venice attempted to make a common enemy of the Ottoman Empire and to bring together all the small states in the Levant into an anti-Ottoman coalition (Inalcik, art. Mehmed II, in IA, v, 523-9; Babinger, Mehmed, 267-327, Setton, op. cit., 315-45). Mehemmed's victory at Bash-kent (16 Rabii 1 886/3 May 1481) was indeed a turning point in his whole career and confirmed the Ottoman annexation of the Karamanid territory (865/1469). However, it took six years to subdue the Turcoman tribes in the Taurus range. This also led to an open rivalry between Mehemmed and the Mamluks, who claimed a protectorate over the Karamanids and saw a challenge in Mehemmed's alliance with and protection of the Dhul-Kadrinds. It was said (Tursun Beg, Tavibâ, text, fols. 157b-158a) that Mehemmed's last campaign, on which he was engaged when he died (4 Rabii 1 866/5 March 1481), was against the Mamluks rather than against the Hospitallers of Rhodes.

Mehemmed II is the true founder of the classical Ottoman Empire, establishing its territorial, ideological and economic bases. Territorially, he organised his autocratic rule the lands between the Danube and the Euphrates as a centralised domain which remained for four centuries afterwards the solid core of the Ottoman Empire. Byzantine tradition and early Ottoman documents show how Mehemmed was able to establish full control over the Danube, the Straits, the Aegean and the Euphrates as the natural borders of his empire. By fortifying the Dardanelles and the
Bosphorus, he achieved a compact empire, duly taking the title of the sultan of the two continents, Anatolia and Rumelia, and the Kâbus of the two seas, the Black Sea and the Mediterranean. His centralist empire came into being by the suppression or reduction under central control of the local aristocratic landed families in the Balkans and Anatolia. Such families either became regular Ottoman timars-holders or were totally replaced by the sultan’s kuls [q. v.]. His sweeping “land reform” of 883/1478, in which a great number of the freehold (mâl) and wa’d lands in the control of such hereditary landlords were turned into state lands (see Inalcik, op. cit., at 533), constituted his major move in this direction. Also, by emerging as the greatest ghażâ, he overshadowed and reduced the autonomy of the principal frontier beg families who had thus far played a determining role in the empire’s politics [see MEHEMMED I and MURAD II]. In brief, Mehemmed II created in his person the typical autonomous Ottoman Pâdâlisâh.

In his efforts to establish a bureaucratic machinery, the principal tool of his centralist empire, Mehemmed employed indiscriminately experts of various origins, Persian Azeris, Arabs, Greeks, Jews, Italians, as well as native Ottoman Turks (râmis). In this, as attested by his Kânun-nâme [q. v.] of state organisation and by biographies of the mijâhâdâns [q. v.] and the defterdar [q. v.]s, the Turks must have played the major role, as before. However, such sâlama only made up a part of his bureaucracy, and were unable to interfere in the sultan’s autocratic and independent conduct of state affairs. Mehemmed appears to have been the first Ottoman, perhaps the first Muslim ruler, to codify state laws based on the ruler’s independent law-making power, “wa’d” [q. v.], apparently inspired by a Turkic-Mongol tradition. His two codes [see Kânûn-nâme] dealt with state organisation, penal law, and the relations of the state and the “military” class with the taxing subjects, the ra’âyâ. The latter law code, considered as the basis of a “just rule”, strictly defines the impositions upon the ra’âyâ. Mehemmed’s law codes remained the core and basis of subsequent Ottoman laws to the 19th century.

With the guidance of the great astronomer ‘Ali Kushdî [q. v.], Mehemmed also organised religious teaching (tâdrîs, kâdîf), and the sâlama hierarchy (târîk) in the Ottoman Empire. It was his unprecedented charisma as Abu ‘l-Fâth which enabled him, with the help of a host of talented leaders from East and West, to put into place a centralist bureaucratic empire perhaps never before so perfectly accomplished in Islamic history. His rationalistic and practical education under a legist, Mollâ Khoresh [q. v.], in his faith in the support of God and the inspiration of his shahâd, Aş Şams al-Dîn [q. v.], his espousal of a combination of Islamic and Roman imperial traditions, might explain his extraordinary accomplishments. But no less important in the foundation of the empire appears the fact that the peasant masses, exploited by the local rent-gathering landlords, military and religious, who were operating free from any control in the Balkans and Asia Minor, tacitly or openly welcomed the restoration of a strong centralist power as a guarantee of protection. The sultan’s edicts always professed that the imperial power was with the poor (yoksullar) against “the powerful” (kudretliler). His bureaucratic apparatus, the land surveys [see TAHRIR] and the law codes reveal emphatically the concern to maintain the supremacy of the state and its power, in possession of small farm plots, the so-called khâne bâ çift units. Mehemmed’s “abrogation”, makh, measures with respect to the exploitative wa’âds and mâls, meant more than just a military reform. It also meant the extension of state ownership and a closer protection and control by the state of the peasant producer and labourer against feudal exploitation.

On the other hand, the native urban populations, Greeks and Slavs, and the Orthodox Church, do not seem to have resented the establishment of the autocratic rule of the Ottoman padishah, who was seen as, and called, bâsalı or czaar. But Mehemmed was only following his predecessors, or in fact the Islamic tradition, when he re-installed the Greek Orthodox Church with all its traditional privileges as an integral part of the Ottoman imperial system (Muharram 858/January 1454), while he banned all Latin Catholic organisations, which were under the Roman papacy, from his dominions.

Autocratic principle, which made the sultan’s person the one and only source of authority and legitimation and claimed it as the foundation of both state and society (for this political theory expounded by Mehemmed’s contemporary Tursun Beg, see text, 2-17), found its full expression under Mehemmed II. The urban economy and the conditions of craftsmen and merchants, too, were regulated by the sultan through his establishment of bazaars, bedestân (bazâ-วัณสิน), kapi (kabûns), weighing stations (kânûr), custom houses (gaziâ), and the unrestricted issue of new silver coins, akâ, and prohibition of the use of the old ones, which was tantamount to taxing all cash capital in the hands of individuals, thus making a strong impact on the economy. Turning all rice-growing lands into state-owned properties and organising labour on them under close state control (Inalcik, Rise cultivation, 78-113) well demonstrates his autocratic handling of economic issues (for the basic source on his economic regulations, see Anhgger and Inalcik, Kânûn-nâmâ; also ISTANBUL, at IV, 531-4; Inalcik, Türkiye’nin ikitsadi vaziyeti, 676-84), Mehemmed fully espoused the theory that the monarch’s presuming to organise society and economy as complimentary to the state was based on the ruler’s ultimate duties of ghâzâ, making God’s word, Islam, ruling over the world, and man’s duty to guide and take care of his subjects’ well-being, conduct and salvation in this and the next world. As is repeatedly underlined in the sultan’s edicts, “the ra’âyâ were a trust (wa’dâ’s) of Allah to the ruler.” The Marxist interpretation, however, is that all these superstructural and ideological assumptions were designed to serve the exploitation of the direct producers by the Ottoman “feudal” state and classes (Moutafchieva, Agrarian relations; Wettner, Die Geburt, 273-358).

(HA Hit Inalcik)

MEHMEHED III, thirteenth Ottoman Sultan (1003-12/1595-1603). He was the son of Murâd III [q.v.] and his Albanian Hâjîzâ, Safiyye [q.v.], born early in the first decade of Dhu ‘l-Ka‘da 973/29 May 1566 in the summer-camp on Bôzdâ near Manisa when his father was sangak-begi of Sarukhân, his birth being announced to his great-grandfather Sulaymân I [q.v.], who named the baby, at Pazarджik as he marched towards Hungary, on 13 Dhu ‘l-Ka‘da 973/1 June 1566 (Selinâki, 22).

After his father’s accession on 8 Ramadân 982/22 December 1574, he lived with his mother and sisters in the New Palace in Istanbul. In 990/1582 his cir-cumcision, to which monarchs of East and West had been invited, was celebrated with feasting and pageants of unrivaled magnificence (splendidly recorded in Topkapı Museum, ms. Hazine 1344), lasting from 6 Dümâdja I-3 Radjab/29 May-24 July, the operation being performed by Djêrâb Mehmed Pasha, the grand vizier, who was, in turn, performed on Terrâme the third day of Dümâdja/28 May.

Murâd’s law of fratricide promulgated by Mehemmed II on 22 Dhu ‘l-Ka‘da 991/7 October 1583 saw the Grand Vizier Damad Ibrahim Pasha reinstated as Grand Vizier at the behest of Safiyye. On 2 Dümâdja I/22 December the sultan entered Istanbul, with great rejoicing. However, the violence of the Djâlânî [q.v. in Supplement], dissatisfied elements who had gathered under Karâ Yaza’dî [q.v.], a rebellious press-gang leader conspiring for the campaign, together with the Firârî, Anatolian ispâhânî who had fled before the battle but thus had been deprived of their timâr, raged until 1603, devastating Anatolia. Peace initiatives were rejected by the Imperialists, who regained Raab on 21 Şâhâbân 1006/29 March 1598. During 1008/1599-1600 the deaths occurred of Sa‘d al-Din and the poet Bâkî [q.v.], and the murder of Safiyye’s Jewish Kira [q.v.].

After the fall of Gardi, the harem. A similar rising in the capital on 23 Radjab 1011/6 January 1603 took as victims two more Palace officials, Ghâdanfer Agha [see Karî Aqâsi] and ‘Othmân Agha. As the crippling war with the Empire dragged on, with the castle of Kaniza [q.v.] surrendering to the Ottomans on 13 Rabl 1009/22 October 1600, in 1012/1603 the Persian Shah ‘Abdâs I [q.v.] launched an offensive in the east, taking Tabriz on 19 Rabl/12/1603. On 27 Dhu ‘l-‘Hidjja 1011/7 June 1603 Mehemmed, in a fit of suspicious rage, ordered the execution of his eldest son Mahmûd; he lies buried, with his mother, in a mausoleum beside the Şeh-zade mosque. Consequently, the child Ahmad was to succeed his father, who died suddenly, probably after a heart-attack, on 17 Radjab 1012/21 December 1603. His mausoleum is beside Aya Sofya. He composed poetry under the name Aydîr. Selântâkl, in Cambridge history of Islam, i, 303.

Murâd’s harem, his dwarfs and jesters, were swept out for Egri [q.v.], which fell after a siege of three weeks on 19 Safar 1005/12 October 1596. On 3 Rabî‘ 1/25 October a great battle was fought on the plain of Mecîr-Keresâtes [q.v.], and the following evening the Ottomans, reinforced by a Tatar army under their Khân Feth Girîyâ, were victorious almost at the very moment of defeat, thanks to the strategy of Çiğhâlê-zêde Sinân Paşâ [q.v.], who was promoted Grand Vizier. The English ambassador Edward Barton was present on the campaign; he, his successor Sir Henry Lello, and the French ambassador François Savary de Brâcq were playing important roles in Ottoman policies.

During his first campaigns in Egypt, 1004–5/1596–7, Mehemmed, influenced by his father’s tutor Khoştâ Sa‘d al-Din Efendi [q.v.] and under pressure from the Janissaries, resolved to lead the army into Hungary, a custom abandoned since the reign of Sulaymân I. On 23 Şawwâl/20 June, with the Grand Vizier Dâmād Ibrahim Paşâ [q.v.], he set out for Egri [q.v.], which fell after a siege of three weeks on 19 Safar 1005/12 October 1596. On 3 Rabî‘ 1/25 October a great battle was fought on the plain of Mecîr-Keresâtes [q.v.], and the following evening the Ottomans, reinforced by a Tatar army under their Khân Feth Girîyâ, were victorious almost at the very moment of defeat, thanks to the strategy of Çiğhâlê-zêde Sinân Paşâ [q.v.], who was promoted Grand Vizier. The English ambassador Edward Barton was present on the campaign; he, his successor Sir Henry Lello, and the French ambassador François Savary de Brâcq were playing important roles in Ottoman policies.

The power in the state was at that time divided between the court, where the old waîide Kösem [q. v.] and Mehemmed's mother, the waîide Târkhân, held the reins, and the rebellious soldiery of the Janissaries and the Sipahis. The lack of stability in the government at this time is shown by the fact, that, until the nomination of the grand vizier Köprüîlû Mehemmed [see köprüülê] in 1066/1656, there were no less than thirteen grand viziers. In 1061/1651 the old waîide Kösem was strangled and at the same time the resistance of the Janissaries was broken; the régime of the court party that followed under the sultan's mother did not improve the situation. The grand vizierate of İshâr Muşafâ Paşa (1064-5/1654-5 [q. v.]), who at first seemed to be the strong man needed, was brought to an early end by his rival Murâd Paşa, and in the meantime the Cretan war against Venice was exhausting the resources of the Empire. In Dümâdâ I 1066/March 1656 a military rebellion forced the sultan to allow the execution of several of his favourite courtiers.

The real strong man proved to be Köprüîlû Mehemmed Paşa (vizier 1066-72/1656-61), who eliminated immediately the influence of the harem on state affairs and became until his death the real ruler of the empire. His régime began with a Turkish maritime defeat by the Venetians at the Dardanelles, but already in the following year he obtained as seizer successes in Transylvania and succeeded at the same time in establishing firmly Turkish authority in the Danube principalities; the collaboration with the Khân of the Crimea [see kânîm] was here of great value.

In 1068/1658 and 1069/1659 he was able to suppress rebellions in Anatolia, and in the Venetian war a great fleet of Venetian ships and other Christian allies did not succeed against the Turkish forces on Crete. After his death (1072/1661), he was succeeded in his office by his son Köprüîlû Ahmed Paşa, who completed the work of his father by carrying through the final conquest of Crete (surrender of Kanâdiyûsul [q. v.]. In Rabî' II 1080/September 1669) followed by peace with Venice. In 1071/1661 the war with Austria had begun again, where Sultan Mehemmed took part in several campaigns, notably that of 1073/1662, where the Austrian commander Czárkó (Zámky) was taken. In 1075/1664 took place the famous battle of St. Gotthard-am-Raab, where the Turks were beaten by an allied army, a part of which was formed by French troops; still, the peace concluded with Austria in 1075/1664 at Vasvár was favourable for Turkey. In 1083/1672 the sultan took part in the campaign against Poland, where the Ottoman army under Mustafa Pasha Merzifonlu [q. v.] overran Hungary and the Austrian main army was driven back to the border of Austrian Hungary (Kamzhe, Istanbul 1290; A. Tietze, Queen Elizabeth and the Levant Company, known as awdji Elizabeth and the Levant Company, ed S. M. Rosedale, Documents from Islamic chanceries, I, after p. 18; portrait, 73. For the circumcision

Mehemmed IV, nineteenth sultan of the Ottoman dynasty in Turkey, known as awdji Elizabeth and the Levant Company, known as awdji Elizabeth and the Levant Company, ed S. M. Rosedale, Documents from Islamic chanceries, I, after p. 18; portrait, 73. For the circumcision
hostilities with Venice had been reopened in the Morea (q.v.) and in the Archipelago.

All these disasters caused a revolt of the troops in the field; they marched on the capital in Di‘a‘u-Ka‘da 1390/September 1677 under Sivyugh Pasha of Aleppo. This time the sultan himself fell a victim to them, and was made to bear the responsibility for the defeats. To satisfy popular demands and to forestall further rebellions, Mehemmed was deposed on 2 Muḥarram 1399/9 November 1677 by the ka‘īm-makām Fādil Muṣṭafā Pasha Kōpūrūlī, the Shaikh al-Islām Dābbāgh-eza Mehemmed Efendi and other religious dignitaries. He was said to have received this decision gracefully, and he retired to his beloved Shaykh al-Fadfl Mustafa Pasha Koprulu, the Islam Muharram 1099/8 November 1687 by the kōrūm-nāme; Silahdēr Mehemmed Agha, Ta‘rīkh ‘Abd ‘Al-‘Azīz, Rawdat al-‘abrūr, Mehemmed Khālīfe, Ta‘rīkh-i Qhīmānī. These, some still in ms., are utilised by M. Cavid Baysun in his Arat. Mehemmed IV.

(M. J. KRAMERS*)

MEHEMMED V RESHĀD, thirty-fifth and penultimate Ottoman Sultan, was born on 2 November 1844, the son of Sultan ‘Abd al-Majid (q.v.). During the reign of his brother ‘Abd al-Ḥamīd II (q.v.) he lived in seclusion: his very existence inspired hopes that even the mention of the name Reshad had to be avoided in his presence (cf. Snouck Hurgronje, Vorbereite Geschriften, ii, 232). He was a man of mild character, who owed his acces-

sion to the throne (27 April 1909) to the victory of the Young Turks (the Committee of Union and Progress [see İttihat ve Terakki Cemiyeti]) over the Reactionaries who had briefly ejected them from power in "the incident of 31 March" (13 April 1909 in the Gregorian calendar), and to their subsequent decision to depose ‘Abd al-Ḥamīd II. Mehemmmed Reshad was a pious man; he felt particular sympathy for the leaders like Enwer Bey and Talat Pasha, whose government signed the peace treaties with Bulgaria (29 September 1913), Greece (14 November) and Serbia (14 March 1914). The Ottoman Empire thus lost all its European possessions west of the Meriç (q.v.) (Maritsa) river, and also the Aegean islands and Crete.

However, it was not the grand vizier, but Unionist Enver Pasha (q.v.) who came to control the destiny of the Empire. Enver’s pro-German views triumphed over the hesitations of the government, which had decided to stay neutral when the First World War broke out. A secret treaty was signed with Germany; the German battleships Goeben and Breslau were given refuge in the Straits (where they were formally handed over to the Ottomans); and finally, the Ottoman fleet under the command of the German admiral Souchon bombarded Russian harbours in the Black Sea (29 and 30 October 1914). This led to the Allied declaration of war, in which Enver Paşa became Deputy Commander-in-Chief (deputising nominally for the Sultan), while Ta‘fat Pasha became grand vizier in February 1917. Initial Ottoman offensives were repelled (Sarıkamış operation against the Russians; Suez operation against the British), but the Turks successfully defended the Dardanelles (the Allied forces which had landed on the Gallipoli peninsula were all withdrawn by January 1916); they were at first successful in I‘rāk (surrender of General Townsend at Kut al-‘Amāra (q.v.), April 1916), and fought also in Palestine, Macedonia and Galicia. Before the end of the war, as Ottoman armies were being gradually worn down and while the country was prey to increasing privations, Mehemmmed V died on 8 November 1918. His last official functions were to welcome the Austr-
Hungarian Emperor Charles on a state visit to Istanbul in May, and, a few days before his death, to visit the Prophet's relics at the Topkapı Palace. He was a sad and ineffective figure: "Is Edirne ours?", he asked after the city had been recaptured; and his comment on the effects of the Great War was "The Palace excelled in two things: prayers and food. Both have gone off" (Görür işıktıklarım, 269, 268).

Bibliography: The events of the reign are related in all standard histories, e.g. S.J. Shaw and Ezel Kural Shaw, History of the Ottoman empire and modern Turkey, ii, Cambridge, 1977; 8:Levels, The emergence of modern Turkey, Oxford 1961, and there are references to Mehemmed V Reshad in many memoirs, especially those of his two Chief Secretaries: Halid Ziya Uşakligil, Saray ve ʻıleti, Istanbul 1965, and Ali Fuad Türkügeli, Görür işıktıkları, Ankara 1951, and of his Chief Chamberlain, Lütfi Simavi, Osmanlı sarayının son günleri, Istanbul n.d. (the edition in modern Turkish of his Sultan Mehemet Resad ve ihanetinin sarayında gördüklerim). The Sultan's decrees appointing grand viziers, as well as biographies and evaluations of the latter, are to be found in Ibnilemin Mahmud Kemal İnal, Osmanlı devrinde son sadrazamlar, Istanbul 1966. See also P. Mansel, Sultans in their splendour: the last years of the Ottoman world, London 1988; IA art. Mehmed Resad (Ertiş Ziya Usukgil, Saray ve ʻıleti, iii, 2054-5).

MEHEMMED VI WAHİD AL-DİN (Wahdeddin), thirty-sixth and last Ottoman Sultan, was born on 14 January 1861. He was the son of Sultan ʻAbd al-Majid [q. v.] and succeeded to the throne on 3 July 1918, after the death of his brother Mehemmed V Reshad [q. v.], the former heir to the throne Yusuf ʻızz al-Din, son of Sultan ʻAbd al-ʻAziz, having died in 1916. In November of the same year, Wahdeddïn, as the new heir, represented the Sultan at the funeral of the Unionist grand vizier Talat Pasha, to reach an accommodation with Mustafa Kemal's nationalists, who moved their headquarters to Ankara on 27 December, came to an end when the Allies placed Istanbul under military occupation on 16 March, and arrested a number of nationalist sympathizers. On 5 April, Wahdeddin re-appointed Dâmid Ferid Pasha as grand vizier, overruling contrary advice with the words "If I so desire, I can appoint the Greek or the Armenian patriarch, or the Chief Rabbi" (Ali Fuad Türkügeli, Gürür işıktıkları, 261). On 11 April the Sultan dissolved parliament, which had itself decided to adjourn. On the same day, the Şeyhülislâm ʻAbd Allâh Dürri-zade issued a number of fatwas outlawing the nationalist resistance in Anatolia (texts in Ibnilemin Mahmud Kemal İnal, Osmanlı devrinde son sadrazamlar, xiii, 2054-5).

Nevertheless, a number of deputies from the dissolved parliament made their way to Ankara and, together with other nationalist representatives, met as the Grand National Assembly (Büyük Millet Meclisi) on 23 April, which selected its own government (İdris ʻIkkililer Heyeti, Committee of Executive Commissioners) from among its own members. However, the Assembly sent a petition to Wahdeddin in which it proclaimed its decision to repudiate by the Grand National Assembly the peace treaty of Sevres on 10 August 1920 was repudiated by the Grand National Assembly. After the first major nationalist victory against the Greeks at the first battle of İnönü, the GNA voted a new constitution on 29 January 1921 which was based on popular sovereignty. Allied moves to establish contact with the Ankara government led to the resignation and departure for Europe of Dâmid Ferid Pasha, drawing from the Sultan the comment "The rascal brought the state to these straits and then left" (Son sadrazamlar, xiii, 2067). Tewfik Pasha, who became grand vizier for the last time (21 October 1920), deferred to the representatives of the Ankara government at the unsuccessful London conference in February-March 1921.

The final success of the nationalists, whose forces defeated the Greeks and entered İzmir on 9 September 1922, brought about the armistice of Mudanya [q. v.] (11 October 1922), to which the Sultan's government was not a party. A nationalist
commissioner, Refet Paşa, arrived in Istanbul and warned the Sultan to confine himself to the palace and receive no visitors, advice which the Sultan disregarded (Son sadrazamlar, xiv, 2097-8). Matters were brought to a head when the Allies invited the Sultan’s government, along with the Ankara government, to send delegates to the peace conference in Lausanne. Rejecting any rival government, the GNA passed a law on 1 November 1922, separating the offices of sultan and caliph, and declaring the Ottoman sultanate abolished from 16 March 1920 (the date of the Allied occupation of Istanbul). Tewfik Paşa resigned accordingly on 4 November. At his last āmūz in 10 November, which was attended by a handful of courtiers, Wahdeddin was given only the title of caliph in the ǧulta. Believing his life to be in danger, he asked the British commander General Sir Charles Harington to arrange his departure abroad. He was smuggled aboard HMS Malay and left Turkey on 17 November 1922. The next day, the GNA divested him of the caliphate, in favour of his uncle ʿAbd al-Majid, son of Sultan ʿAbd al-ʿAziz. Having gone first to Malta, the ex-Sultan proceeded to Mecca as the guest of King Husayn. From here he launched a proclamation to the Islamic world, in the date of the Allied occupation of Istanbul. Tewftik Turkish forms of the name Muhammad in this shariʿa caliphate from the sultanate was contrary to the Abd al-Madjid, son of Sultan Abd al-ʿAziz. Uncle GNA divested him of the caliphate, in favour of his son Mecca as the guest of King Husayn. From here he launched a proclamation to the Islamic world, in which he maintained that the separation of the caliphate from the sultanate was contrary to the ʿshārīa (text in OM, ii, 702-5). This appeal found hardly any response in the Islamic world. The last Ottoman Sultan left Mecca again, and went to live in San Remo, where he died on 16 May 1926. In 1924, he had even recognised King Husayn’s claim to the caliphate. wahdeddin has been described by his courtiers as short-tempered, pious, intelligent, but fearful, hesitant and unwise in his judgments, above all in the trust which he placed in his brother-in-law Damad Ferid Paşa. Throughout his reign he paid lip-service to the Ottoman constitution, while being inspired by a desire to secure the survival of the dynasty. He had not studied Arabic and Persian, but was credited with a knowledge of fikr. He was fond of music, and composed Turkish songs. His failure to grow a beard after his accession was considered a break with tradition. Refet Ersoy (1873-1936), persuaded ʿAkif to compose a stirring Independence March (İstiklal marchi), which was immediately adopted as the Turkish National anthem. He was still concerned, also, with religious affairs, as a member of an Islamic research committee (Tebkât uswet il-īslāmîyye endûrûm) in the Ministry of the ʿshārīa and Ewkef. But as a devout Muslim and convinced Pan-Islamist, he became increasingly concerned about the trend of events after the Nationalist triumph, with the abolition of the caliphate in March 1924, the abolition of the office of ʿshārī of Islam, of the Ministry of the ʿshārīa and Ewkef, and of the ʿshārīa itself, and of the closing of all the madrasas in the spring of 1924. Unlike the ideologist of Pan-Turkism, Diyaʾ (Ziya) Gök Alp [q.v.], ʿAkif was unable to adjust his ideas to the new, secularist Nationalist ideals, for he had still hoped that the new Turkey could be the focus of Pan-Islamic aspirations. In the 1923 elections, he did not get a seat in the GNA, and at the age of 50 was jobless and virtually penniless. Hence in October of that year, he left for Egypt to stay with an old friend, the Egyptian Prince ʿAbbas Halîm (d. 1934), and in 1925 settled there, teaching Turkish in Cairo, but by now, as a disappointed man, producing little of his own literary work. He returned to Istanbul after eleven years, a sick man, and died there on 27 December 1936. Already as a student, ʿAkif had been a voracious reader of the Islamic classics, with a particular love for the poetry of Fudûlî, Ibn Fârid and above all Saʿdî, and also of French Romantic literature. He published Turkish translations of the Persian classics in the Thaer-î Fûnin from 1898 onwards, and his own poetry in the Resimli Gazete from 1896 onwards. After 1904, he seems really to have found his artistic feet, and he began to write Persian and Arabic poems, showing a sympathy with the depressed classes of society,
but was unable to publish these in the period of the Hamidian censorship, until the Revolution of July 1908 opened the floodgates for publication. Akif and his friend Esref Edib began to publish the Şair-i Müstakbal, a conserving journal concentrating on religious and social topics; this periodical soon began to have a wide circulation amongst the Turkish peoples outside the Ottoman lands, including in Russia, and later changed its name to the Şehit-i İstiklal. At the same time as he put forward his ideas of Pan-Islamism, he also acquired an interest in Islamic modernism, studying the works of Muhammed Abduh and of Dżamal al-Dīn al-Afghanī with the professor Lahmet İmam who decided to commission a new translation of and commentary on his first book, the Kur'an. Although Akif was persuaded, with some misgivings connected with his firm belief in the basic untranslatability of the Holy Book, to undertake the actual translation, but after spending several years of his stay in Egypt at the task, retracted what he had written, fearing that his translation might be used as a part of Atatürk's Turkicization plans in religious matters; the eventual fate of his translation remains a mystery to this day.

Mehmed Akif was thus an enthusiastic Muslim but not a fanatic, a conservative in politics who nevertheless openly proclaimed his detestation of the Western modernists, and even Western classical music. From 1911 onwards, he began publishing collections of his poetry as Şafihat ("Phases"), with a total of seven volumes, the last, entitled Gâbler ("Memories") (1915), whose atheistic poem Tarih-i Kadası ("Ancient history") he regarded as corrupting Turkish youth. Akif also engaged in translating the Kur'an into Turkish, and this remains a controversial episode in his life. The successor to the Ministry of Şair-i, the Directorate of Religious Affairs (Diyânî İhtisab Rûûeti) decided to commission a new translation of and commentary on the Kur'an. Akif was persuaded, with some misgivings connected with his firm belief in the basic untranslatability of the Holy Book, to undertake the actual translation, but after spending several years of his stay in Egypt at the task, retracted what he had written, fearing that his translation might be used as a part of Atatürk's Turkicization plans in religious matters; the eventual fate of his translation remains a mystery to this day.

Mehmed Emin, who continued his education, as was still possible at that time, by serving, without pay, in the chancery of the office of the grand vizierate (Sadret Eunuk Kalemi). In 1888 he married Müzeyyen Kâşânî, from a notable family of Kahta-Hı bás-ı Şarkî (modern Şebinkarahisar), in north-eastern Anatolia, which he visited several times, sometimes for long periods and where he enriched his observations on the plight of the Anatolian peasantry. In 1889 he registered at the School of Law (Mektebi-ı hukuki) which he abandoned two years later for an opportunity of studying further in America, which he did not eventually materialize. While still a student in the Law School, he published his first book (see below) and sent a copy to the grand vizier Dâewâd Pasha [q.v.], on whose recommendation he was appointed (1890) as a clerk of the secretariat of the Custom’s office (Rüşûmat emnâtesi tahribâtı kalemi). Two years later he became director of the archives (târikh nâmeleri) of the same office, where he remained for 15 years. In 1907, he became a member of the secret revolutionary Committee of Union and Progress (CUP [see İttihat we Terakî] dîevât-yi tawarîh). The same year, he was sent to Erzurum, in Eastern Anatolia, as superintendent of the customs (rüşûmat nâmeleri) which, under the Hamidi regime, amounted to political exile. The Sultan had become suspicious of his choice of subjects in his poems, particularly his insistence on the poor (see below).

After the restoration of the Constitution in July 1908, he was transferred to Trabzon with the same office. After a short service as counsellor at the Ministry of Marine and as governor (waâli) of the Hidây (1909) and Sivas (1910), he resigned and joined in Istanbul the Turkist movement (see B. Lewis, Emergence, 243-52 and Tâhâ Dağlı), and was made president of the Turkish Hearths [see Türk odârû] in 1911. He soon set up another Turkist association, the Türk Yurdu ("Turkish Home"). As he was preparing to publish the organ of the association, with the same name, which later became famous as the organ of the Turkish Hearths (see Türk Yurdu), he was appointed governor of Erzurum. In the meantime, he expressed in many writings, his disappointment with the CUP and his disagreement with its arbitrary and despotic actions of the administration. He was retired from Government service in 1912. Elected deputy for Mawsil (Mosul), he settled in Istanbul and continued his literary and patriotic activities. He witnessed the collapse of the Empire and the occupation of Istanbul by the Allies. He joined the Nationalist government of Ankara in April 1921, which sent him on a special mission to Antalya and Adana where he stayed until the end of the War of Liberation, when he went to İzmir to join Muştafa Kemal Pasha (Atatürk [q.v.]) with whom he returned to Ankara (September 1922). He was elected deputy for Şarkî Karabaşâr. Later, he continued to serve in Parliament as deputy for Urfa and Istanbul. He died in Istanbul on 14 January 1944. During the last years of his life, he had been collaborating with the Turkish Historical Society in Ankara (to which he donated all his personal archives) to prepare a revised and critical edition of his complete works (see Bibl.).

Mehmed Emin who, following the law on surnames, took in 1934 the family name of Yurîdakül ("slave of the fatherland"), was known in his lifetime as Miîli şârî or Türk şârî Mehmed Emin ("Mehmed Emin, the national poet or Turkish poet par excellence"), as he consistently wrote in the spoken Turkish of ordinary people and used exclusively the syllabic metre of folk poems as opposed to the Arabo-Persian prosody (şârîf) of both old and most modern poets of his day [see Bûkûr, Köâa twekîr, in Suppl.] and devoted all his literary work to his country and its people, their plight, their misfortunes and their glory. He completed his personality and private life. He published his first book (a short essay), while a law student in 1308 A.H./1891, Fadîlet we aşılet ("Virtue and nobility"), in which he claims that real virtue and nobility are not necessarily hereditary but are rather obtained by a person’s talent, diligence and spiritual maturity. As was customary at the time, he sent the book to several literary authorities, who all wrote complimentary takrîfs (presentation pieces) which were written with the book. Mehmed Emin’s first published poem Köyde firîna ("Storm in the village") appeared in Reşimî Qâzise of 5 October 1311 A.H./17 October 1895, which was confiscated before distribution (Akâraqoglu Yusuf, Türk yill, Istanbul 1928, 387, where the date is wrongly given as 1903); it was reprinted in Mu'tebes, no. 10, 1317 A.H./1900. This remarkable poem, with its social implications and which contains most of the characteristics of his later poems, with typical language, style and content, was written as the height of the famous westernist Terwet-i Funûn [q.v.] literary movement, which was linguistically conservative to the degree of precisity and which disdained the "finger counting" (parmak-î dîevât-yi fûrûz) metre of the "ignorant bards". Although almost all the sources, including the poet himself, assert otherwise, it seems chronologically probable that the young poet read this particular poem to Dâmil al-Din al-As'îî [q.v.], who recommended him to continue (see below). Several poems of the same type, published in various periodicals, including in the Terwet-i Funûn itself, immediately before and during the April-September 1897 war with Greece, particularly the one called Anadolu'dan bir ses yâhûd dîevat-geden ("A voice from Anatolia, or Going to war") published previously but in the same year in the newspaper Asrî ("Century") in Salonica, made a sensation in Turkey, among the Muslim Turks in Russia and among orientalists abroad (see Bibl.; for a correct text of this poem, see Nizîhether Hâşîn, Millî edebiyeti tarihi, Istanbul, 1920, 737-38). Although there was a long but often ignored tradition of simple, straightforward Turkish prose (see Fahr Ifz, Ottoman and Turkish, in Essays in Islamic civilisation presented to Niyazi Berkes, ed. D. P. Little, Leiden 1976, 118-39), a similar but occasional movement to write simple, pure, common or exclusive Turkish (basî, sâde, kaba, ışîf, yahîsî türkî) verse always existed also (for a detailed discussion of this subject, see Körpûlû-zade Mehmed Fuâd, Millî edebiyeti dîevat-ı hukuki in mîrîbût-ı hukuki ve dîevat-yi şûsî, Istanbul 1928, Roman script edition in Edebiyat arşîmatılar, published by T.T.K., Ankara 1966, 271-315). The Türkîmân writers claimed that simple, everyday Turkish was necessary to communicate with the public, but did not apply their principle except in a few pieces. The revolutionary and journalist Ali Suâwî [q.v.] and the publicist and novelist Ahmed Midhat [q.v.] did write a remarkably simple language, and their associates gave occasional examples of simple Turkish verse. But as the famous lexicographer and writer Şems el-Dîn Sâmî [q.v.], who was the most conscious and advanced of them, admitted in an article, greeting the publication of Mehmed Emin’s first book of poems Türkîde şârîer ("Poems in Turkish") (see below), "...although Türkîmân writers talked and wished to write in simple Turkish, it was Mehmed Emin who carried it out, and
this book was the foundation stone of future Turkish literature" (Sabah, 1 March 1313 Rumi/13 March 1899). The British orientalist E.W. Gibb congratulated Mehmed Emin warmly in a letter in Turkish of 6 June 1899, in which he said "... The Turk has found his natural voice... your predecessors imitated the Persians and the French. You expressed the feeling of your countrymen in their own language. Six centuries have been waiting for you..." (the original letter is in the Mehmed Emin Archives, in the Turkish Historical Society, Ankara). Like the preceding examples in the dictionary of the 19th century poets Nedim [q.v.] and Gahlib Dede [q.v.] and in most of the 19th century poets, there seems to be a latent desire to express themselves occasionally in everyday Turkish and sometimes in syllabic metre. These examples seem to multiply particularly in the works of minor poets during the last decades of the century [see Turks. Literature]. However, as Shems ed-Din Sāmī points out in the above-mentioned article, Mehmed Emin's work was not a random experiment. It was the beginning of a conscientious, systematic and lasting movement. So much so that his colleague and biographer Akchuraoghlu Yusuf [see YUSUF, AKCHURA] says that A voice from Anatolia can be called the manifesto of linguistic Turkish (Akchuraoghlu, op. cit., 391). This current was enriched with the deeply felt lyricism and more inspired poems of Ridda Tewfik (Böhmhojghi), who, during the ensuing violent controversy between the partisans of simple Turkish and those who supported the fashionable Mischsprache of the leading poets and writers, became his most enthusiastic defender (see Nizhet Hāshim, op. cit., 7-10; Akchuraoghlu, op. cit., 387-91). This "simple Turkish" movement spread to the provinces and was supported by several minor writers, including Mehmed Nedjī [see Tahir Alangu, Ömer Seyfettin, Istanbul 1968, passim] who had launched a similar movement independently in İzmir, culminated in April 1911, in Salonica, with the "New language" (Yeni lisan) movement of Ömer Seyf el-Din [q.v.] which Diya'ī (Ziya) Gökalp [q.v.], espoused and propagated among young poets and writers, setting up a new literary current, the "National literature" (millî edebiyyet djereydni) (see Turks. Literature). Mehmed Emin candidly admits his association with Djamal al-Afghānī and the latter's influence on the beginning of a conscientious, systematic and lasting development of his ideas. The standard biographies of the 19th century poets, including Nedjī and Ghalib Dede [q.v.], are usually silent on his unofficial Turkish connections (see, e.g., Nikki R. Keddie, Sayyidjamāl, 1976). Mehmed Emin's other poems, published in various periodicals but not included in his books, have been collected in F.A. Tansel (see Bibliography), while most of them have been published recently in different periodicals. Two of them are taken from the preceding. The majority of the poems dwell upon social problems. Some are inspired by the Pan-Turkist movement of the second decade of the century. The following three works contain patriotic poems written during the First World War:

1. Türkçe şehrleri ("Poems in Turkish") Istanbul 1316 A.H./1918;
2. Türk sazi ("Turkish sazi") Istanbul 1330 rami/1914; contains 191 poems written between 1896 and 1914, most of them published previously in different periodicals. Two of them are taken from the preceding. The majority of the poems dwell upon social problems. Some are inspired by the Pan-Turkist movement of the second decade of the century.

The following two works contain his poems written during the War of Liberation (1919-22):

3. Türk vecw ("Turk, wake up.") Istanbul 1330 rami/1914;
4. Tan seleri ("Voices of dawn") Istanbul 1331 rami/1915;
5. Ordunun destanı ("The epic of the army"). Istanbul 1334 rami/1918.

6. Yassına dagrın ("Towards Turan"), poems written during the last years of the First World War and inspired by Pan-Turanism. The following two works contain his poems written during the War of Liberation (1919-22):

7. Aydın kızları ("The daughters of Aydın"). Ankara 1921, 3rd edn. as Mustafa Kemal, Istanbul 1928; and

Mehmed Emin's other poems, published in various periodicals but not included in his books, have been collected in F.A. Tansel (see Bibliography).

MEHMED ES'AD [see ES'AD EFENDI; GHAİL DEDÊ]

MEHMED GÎRAY, DERWİSH MEHMED GÎRAY b. Mûbarek Giray Çingizî, member of the Crimean Giray [q.v.] dynasty, probably a brother of Khân Murâd Giray (1268-83) and historian. His chronicle, Ta'rihi-i Mehmed Gîray, preserved in the unique ms. H.O. 86, Austrian National Library, Vienna (Flügel, Catologue, ii, 277-8), deals with Ottoman and Crimean history from 1094/1682 to 1115/1703, from Crimean khanate and the Ottoman Empire was at that time still largely a corollary of the relationship between the Grand Prince Vasiliy III (1505-33) had created a new power among the heirs of the Golden Horde. Mehmed Pursued his education under well-known scholars such as Yanyaî Efğad Khodja and Bursâli Ismaîîl Hakkî, received a certificate of competence in calligraphy from Suyoðdju-zâde Nöçî Efendi, author of the Da'âbît al-kâtîbât, spent some fifteen years in Egypt and became an adept of Sezâî Hasan Efendi, founder of the Sezâî branch of the Gullîken mystical order (tarşıfî). Despite having completed a very specialised training, Mehmed decided to forego a career in the theological field and instead filled successive positions as trainee (gîhâfî) in the secretarial bureau of the Grand Vizierate, beginning in 1155/1742 as assistant to the chief at the Arsenal (tersââne), followed in quick succession by posts such as bureau chief in the treasury department of imperial estates (gûcîlar mukaddam) in 1164/1753, chief secretary of the regiment of the armourers (dërebîliler kâtibi) in 1172/1759, chief secretary of the cavalry regiments (sipahiîlî kâtibi) in 1174/1761, and a second appointment as dërebîgîlî kâtibi in 1176/1763. In addition to these secretarial positions in the departments of the treasury, Hâkim was appointed official court chronicler (waq'î-nâwî) from 1 Regêb 1160/4 May 1753, when this position was vacated through the incumbent 'îzî Sûleyâm Efendi's resignation prior to his performing the pilgrimage to Mecca. Hâkim strove to record all the events from the date of his appointment in 1753 until his resignation in mid-1180/October-November 1766. Four years later, on the night of Raghâb 1181/25-6 October 1770, he died and was buried in the cemetery of Ayvîrok Çeçênîsî in Haydar Pâsha (see B. Kellner-Hunkele, Ayrillk Ceshmesi in Haydar Pâsha (see B. Kellner-Hunkele, Ayrillk Ceshmesi in Haydar Pâsha). His other literary works was recognised by his contemporaries (see the lists of his works in Bursâli Mehmed Tâhir, 'Othmânî mûalîfleri, İstanbul 1333, ii, 142, and Kütükoğlu, op. cit., 74-5. See also Rûhî-i Boghâdî tarikî-i bendîne nâzîre, Ist. Univ. Libr. İstanbul 1352, fols. 100b-105a, the Nofat al-da'ât ve Vîşfî, a compendium to the nomadic Nagû [q.v.] tribes of the region. In 1521 he refused Sultan Sülaymân Kânünî's [q.v.] order to join him in a campaign against Hungary, and instead, led a great expedition against Muscovy, which so far had been on friendly terms with the Ottomans.应注意梅赫梅德·吉拉伊的终身斗争，最终没有成功。他被赋予了指挥天课对克里米亚的统治者卡扎恩以及阿斯特拉罕（1523）的干预。被克里米亚的民族，他所被赋予了其无情，不忠诚和放纵的生活，他被暴君和他的努格亚联盟。

MEHMED HAKİM EFENDI, 18th century Ottoman literary personality, statesman and official court chronicler (waq'î-nâwî). Born in İstanbul, his father was sayyid Şahî Efendi, known as “Emir Çelebi the knife-maker (biçakçı)”. Mehmed pursued his education under well-known scholars such as Yanyaî Efğad Khodja and Bursâli Ismaîîl Hakkî, received a certificate of competence in calligraphy from Suyoðdju-zâde Nöçî Efendi, author of the Da'âbît al-kâtîbât, spent some fifteen years in Egypt and became an adept of Sezâî Hasan Efendi, founder of the Sezâî branch of the Gullîken mystical order (tarşıfî). Despite having completed a very specialised training, Mehmed decided to forego a career in the theological field and instead filled successive positions as trainee (gîhâfî) in the secretarial bureau of the Grand Vizierate, beginning in 1155/1742 as assistant to the chief at the Arsenal (tersââne), followed in quick succession by posts such as bureau chief in the treasury department of imperial estates (gûcîlar mukaddamî) in 1164/1753, chief secretary of the regiment of the armourers (dërebîgîlî kâtibi) in 1172/1759, chief secretary of the cavalry regiments (sipahiîlî kâtibi) in 1174/1761, and a second appointment as dërebîgîlî kâtibi in 1176/1763. In addition to these secretarial positions in the departments of the treasury, Hâkim was appointed official court chronicler (waq'î-nâwî) from 1 Regêb 1160/4 May 1753, when this position was vacated through the incumbent 'îzî Sûleyâm Efendi's resignation prior to his performing the pilgrimage to Mecca. Hâkim strove to record all the events from the date of his appointment in 1753 until his resignation in mid-1180/October-November 1766. Four years later, on the night of Raghâb 1181/25-6 October 1770, he died and was buried in the cemetery of Ayvîrok Çeçênîsî in Haydar Pâsha (see B. Kellner-Hunkele, Ayrillk Ceshmesi in Haydar Pâsha). His other literary works was recognised by his contemporaries (see the lists of his works in Bursâli Mehmed Tâhir, 'Othmânî mûalîfleri, İstanbul 1333, ii, 142, and Kütükoğlu, op. cit., 74-5. See also Rûhî-i Boghâdî tarikî-i bendîne nâzîre, Ist. Univ. Libr. İstanbul 1352, fols. 100b-105a, the Nofat al-da'ât ve Vîşfî, a compendium to the nomadic Nagû [q.v.]. He also tried to dominate the nomadic Nagû [q.v.] tribes of the region. In 1521 he refused Sultan Sülaymân Kânünî's [q.v.] order to join him in a campaign against Hungary, and instead, led a great expedition against Muscovy, which so far had been on friendly terms with the Ottomans. Mehmed Giray I, who was distracted by his wars against Persia and the Mamlûks. The rising Muscovite state under the Grand Prince Vasily III (1505-33) had created a new power among the heirs of the Golden Horde. Mehmed Giray reacted by alternately allying himself with Poland-Lithuania and Muscovy, and by interfering in the dynastic affairs of Kâzân and Astrakhân [q.v.].
Mehmed Hâkim Efendi — Mehmed Khalife b. Huseyn

Mehmed Hâkim Efendi is best known for a chronicle of the events of the period falling between the last quarter of the 12th century and the first half of the 13th century, containing poetical works and treatises in Hakim's own hand, see ibnulemin, Fatih, tarih 789, fol. 14a; Dâvid Fażî, Khâtîmîl-at-şârî, Istanbul 1271, 52-3.

MEHMEH KHALIFE B. HUSEYN, Ottoman courtier and historian who flourished under the three sultans Murâd IV, İbrahim and Mehemmed IV [q. v.], (regned 1052/1623 to 1099/1687).

From Bosnia, he came to Istanbul in 1043/1633-4 as ıç-şefâr of Köçha Kenân Gurdi Paşa and stayed with him in 1047/1637 appointed to lead an expedition against the prince of Transylvania George Rákóczi [see erdai].

Returning to Istanbul, he probably entered Sultan İbrahim's office for diplomatic missions as a şefîr, and at some unknown date became a khâlîfî at court. He was also a poet, using the tâhîkîsî of Ülîeti, the date of his death is unknown. See Refik, biografm intro. to the Ta'riîkî-i Ghilâmînî edition cited below; Babinger, GÖW, 209-10, no. 180.

Mehmed Khalîfe is best known for a chronicle of his time that he called the Ta'riîkî-i Ghilâmînî because it was written for the personnel of the Inner Palace. In its initial form the work is a disorganised and unsystematic personal memoir which does however reflect the author's own ideas and attitudes and depicts vividly scenes of life in the Ottoman Palace of the 11th/17th century. The first version is represented by an amateurishly-written manuscript that covers the events of the year 1043-7/1633-6; it lacks its final pages (Vienna, Nationalbibliothek, H.O. 82), as a description, see G. Flügel, Die arabischen, persischen und türkischen Handschriften, ii, 271, no. 1068; for a facsimile, see Bugra Atsiz, Das osmanische Reich um die Mitte des 17. Jahrhunderts nach den Chroniken des Vecihi (1637-1660) und des Mehemmed Halîfa (1633-1660), Munich 1977; on the value of this manuscript as an historical source and its comparison with the final recension, see B. Kâmp, Tarih-i Gilâmînî (H. 17-20) redaksyonsuna dâir, in Tarih Dergisi no. 27 [1973], 21-40).

The Ta'riîkî-i Ghilâmînî was given a somewhat more elevated literary form between 1070/1659-60 and 1075/1665 as corrections and additions were made to this first recension; events were arranged in chronological order, the text was divided into sections and subsections (hâhs and faîhs), and occasionally verses and chronograms were inserted. This last recension comprises events from the accession of Murâd IV (1032/1623) until the Treaty of Vassar (1075/1664). Although it does not contain the author's biography and passages that reveal some of his attitudes and concerns which are found in the first recension, this final recension includes an epilogue (âdîgme) dealing with the necessity of mildness in the behaviour of rulers, the special qualities of Sultan Mehmemed IV and the scholars and craftsmen trained in the Enderûn who were contemporaries of the author.

Mehmed Khalîfe's work, which presents the events he experienced from the perspective of a functionary of the inner Palace, was used by Abdi Paşa and Na'imî (see Atsiz, op. cit. pp. CXXVII-CXXVIII).

With its publication by Ahmed Refik (Altinay) as suppl. no. 11 to TOEM, nos. 78-83 = N.S. 1-6 (1340-
MEHMED KHALIFE B. HUSEYN — MEHMED PASHA, BALTADJI

1/1921-2), based on a manuscript of the final recension (Turk Tarih Kurumu Lib., ms. 509) it has also become one of the sources most frequently referred to by recent historians. Finally, Bursa Mehmed Tahir, *Oğlanlı mu'alletleri*, iii, 142, attributes to a Mehmed b. Huseyin of Sultan Ibrahim's time a translation of the Persian history of 'Ali b. Şahih al-Din Hamadani, the *Dhakhtrat al-muluk*, at the command of the governor of Bakhchid, Derwish Mehmed Pasha [q. v.], in 10 bâb, to which he added two further bâbû and called the whole the *Tuhfat al-mahallat*. This history however, nevertheless be by Muşlîl b. al-Din Muştafa b. Şahbân (d. 969/1561-2) (see Kâtip Çelebi (Hadjdi Khalifa), *Kafil al-zunun*, Istanbul 1941, i, 824, and from it, Bur- sa Mehmed Tahir, ii, 226), and this is strengthened by the fact that the *Dhakhtrat al-muluk*, as described in the above two sources, is not a history but a treatise on political ethics (see Storey, i, 946-7 n. 4).

*Bibliography:* In addition to sources mentioned in the article, see IA art. Mehmed Halife (Bekir Kütkökoğlu), (Bekir Kütkökoğlu). *MEHMED LALA PASHA* [see MEHMED PASHA, LALA].

MEHMED LALEZARI [see LALEZARI], MEHMED PASHA, BALTADJI, TEBERDAR (1071-1124/1660-1 to 1712), Ottoman Grand Vizier (1704-1711) (see Katib Celebi (Hadjdi Khalifa), *Beglerbegi ve birun aghas*, secretarial function. By favour and through the patronage of the poet Nabi 'Ali Ağa and other birun ağhas, he entered the service of the Wâlide Sultan Khağâr Târîhân, attaining the rank of *Kâmil* in 1099/1687. The prince Ahmed (the later Ahmed III) appointed Mehmed as apprentice to the corps of the "Baltadjis of the Old Saray", where he became known as the "beautiful muezzin" because of the musical quality of his voice. When in 1695 Habibî 'Ali became Dâr al-Sâ'idâ ağahtist to Sultan Mustafa II [q. v.], Baltadji Mehmed became personal scribe to his protector and was thus admitted to the proximity of the sultan and of Prince Ahmed. At the accession of the latter on 10 Rabî' II 1115/21 August 1703, Mehmed, with 9 years' experience of confidential service and having travelled all over the empire, was promoted to the rank of Mîr Ahkîr, but his appointment as tarihîdâr of Aleppo removed him from the palace service. The Grand Vizier Kalâyîlkoz Ahmed Pasha promoted him to the rank of vizier (8 Rabî' II 1704) with the function of Kapudân Pasha. Already on 27 Şebhân 1116/26 December 1704 he became Grand Vizier (1704-6/1116-18). He had to maintain his position against the rival faction led by Corluî 'Ali Pasha and Newshârihî (Dâmâm) İbrahim Pasha [q. v.]. He made himself indispensable to his monarch by playing upon the latter's constant fear of revolt and deposition. The Grand Vizier managed to free himself from the supervision of financial affairs by means of an intrigue, falsely accusing the Nishândji Hûseyin Pasha of plotting a revolt and consequently sending him into exile at Istanîköy Island (Cos). The Sultan for long tolerated his old familiar companion in spite of his marked lack of ability in financial matters. At last, the Sultan decided to replace Baltadji Mehmed Pasha by Corluî 'Ali Pasha (19 Muhaarram 1118/3 May 1706), his trusted intimate as well as a competent statesman. The ex-Grand Vizier was honourably exiled with the appointment as Beglerbegi of Erzurum. In 1119/1707 he was transferred to Chios (Ott. Sakîz [q. v.]), from which post he went to Aleppo as Beglerbegi. In that city, the poet Nâbi [q. v.] belonged to Baltadji Mehmed Pasha's salon.

On 7/17 September 1120 (O.S. 12 July 1711), Mehmed III decided to appoint his old companion as Grand Vizier again. The latter actually took office in Istanbul by 3 Şebhân/27 September. By this time a "war party," which aimed at a renewal of the war against Russia, had gained the upper hand. The intrigues to that end were assisted by the King of Sweden, "Iron Head" (Demir Bağ) Charles XII, who had found refuge in Ottoman territory since 1709. His Ottoman ally was the Khân of the Crimean Dawlat Giray II [see Giray] (second reign, 1120-5/1708-13) who came to Istanbul in 1122/1710 to further his aims of war against the Russian Tsar Peter. A Council was held in the Sultan's palace (Mesgûvat-ı Azime of 28 Ramazân 1122/21 November 1710) and war was declared on Russia. The new Grand Vizier was to command the army. The so-called Pruth campaign began in the spring of 1123/1711. The Tsar's diplomacy could not curb the Ottoman initiative and the two armies marched towards each other, meeting on 12 Dümâdâm II/28 July 1711 in Moldavia (Ott. Böggân [q. v.]) near Khân Tepesi (= Stanilesti) on the river Pruth, downstream on the road from Jassy (Ott. Yâş [q. v.]). Nobody in the Russian army was aware that Baltadji Mehmed Pasha was already close to the Russian fortresses at Taganrog, Kamenny Zaton and Demir Bash (Head""). The Russian troops were provided with food for their three weeks. The support promised in a secret treaty concluded in view of the Russo-Turkish war by the prince of Moldavia Demetrius Cautemir (1673-1723) was not delivered, for the crops had failed as a result of drought and locusts. On 5 Dümâdâm II/21 July 1711, Baltadji Mehmed's army completely surrounded the Russians and was preparing for the general attack with an artillery barrage. The Tsar Peter, who was with his army, realised that his forces would be annihilated and decided quickly to sue for an armistice and peace. For this move, he found support not only from his Vice-Counsel Peter Shafrov but also from his wife Catherine. This lady's involvement probably gave rise to the historical legend that the corrupt Ottoman Grand Vizier gave in easily to the Russian proposals, as these were accompanied by the offer of the jewelry and the charms of the Tsarina to his person. In any case, lacking insight into the true situation of the two powers, Baltadji Mehmed was too easily content with the Russian proposals. He was already satisfied with the retrocession of Azov (Ott. Azak [q. v.]), the demolition of the newly-built Russian fortresses at Taganrog, Kamenny Zaton and along the Dniepr, the closing of the permanent Russian embassy at the Porte, the evacuation of Polish territory and a guarantee of non-interference in Polish affairs. All Ottoman prisoners were to be set free and the King of Sweden was to be allowed safe passage. The Russian troops were provided with food for their free retreat. A preliminary treaty of peace was hurriedly agreed upon on 6 Dümâdâm II 1123/23 July 1711 (O.S. 12 July), notwithstanding the protests of Dawlat Giray II Khân and the representative of Charles XII, the Polish general Stanislas Poniatowski. Baltadji Mehmed Pasha seems to have been carried away by his own unexpected success. It must be realised, however, that Peter Shafrov had only his own stomach for fighting in this desolate country and that the Sipâhis were always reluctant to face the costs of...
prolonged fighting. Moreover, the Grand Vizier’s distrust of the political pressure group around the Swedish King at Bender may have induced him to continue the battle, which could interfere on the spot.

The news of the victory and the peace was well received at Istanbul at first. The Sultan, however, became suspicious of his Grand Vizier when the latter postponed his return to the capital because of protracted negotiations with the Russians concerning the implementation of the treaty. Indeed, the absence of direct positive results of the peace caused a general dissatisfaction with the Grand Vizier’s policy. The anti-Russian party, joined by the leading dignitaries—if not the only one—who, entrusted with a considerable weight of responsibility, enjoyed the unlimited confidence of the Sultan. Furthermore, the Grand Vizier’s distrusting attitude towards the Grand Vizier also contributed to the distrust of the Sultan. The Grand Vizier was accused of high treason against Islam and the Ottoman state and fulsome praise for a victor.

The Grand Vizier’s political career was probably interceded to save his life, but two main assistants in office, his kadiya and his mektubcu, were condemned to death. Baltadji Mehmed Pasha died on 30 December 1521 at the age of 38. His death was a great loss to the Ottoman state, as he was a typical product of the seraglio culture, and according to A. N. Kurat, was a man of the pen rather than a statesman, an Ottoman gentleman rather than a Turkish warrior.

MEHMED PASHA, BIYIKLI, ("mous-tachioed") Ottoman general and administrator, d. 928/1521.

He seems to have been in the service of the Shahzâd Selim b. Bâyazîd II, at the time when the latter was viceroy of the Eastern province of Persia. There is evidence that he held the post of Chief Equerry (amir-ābâr bâbâli) from the time of the accession of Selim I, and he fought alongside him in battles against the Shahzâd Ahmed b. Bâyazîd: near Bursa, where he commanded the vanguard and his force was routed on 7 Safar 919/14 April 1513; then at the battle of Yeşilheir on 24 April. The following year, he took part in the campaign of Çâlzâhâr [v. v.] and, on his return to Taĥriz, was entrusted with the mission of storming the stronghold of Baybûrûd, which had been unsuccessfully besieged since Qâmûdâd 920/July 1514 by an Ottoman expeditionary force. The conquest of this fortress earned him the title, granted on 25 October, of beg of the sangûks of Baybûrûd, Tobrûzînd, (Shebîn) Kara Hisâr and Dînâk. In the spring of 1515 he was given the task of laying siege to Kemûkh [v. v.], and he maintained a blockade on this Safawîd-held town until the arrival of the sultan, who took it by assault on 5 Rabî‘ II 921/19 May 1515. In the course of the summer, Selim I appointed him commander-in-chief of an army of considerable size (Ottoman troops, volunteers and contingents from the Kurdish principalities) raised for the purpose of conquering western Kurdistan, which was in revolt against the Safawîs and where the diplomatic activity of İdrîs Bîlîsî [v. v.] had ensured that the territory would affirm its loyalty to the Ottoman government. Mehmed Paşa entered Âmid on 10 Shawâbî 921/19 September 1515, was made beglerbeg of Diyar Bâkr on 5 November, and completed the conquest of the country by annihilating in Rabi‘ II 922/1516, at Eski Koç Hisâr, near Mûrûdân, the last Safawî army still claiming by Mehmed Thiûreyya) and was buried at Aktepe, near the Fatih Paşa mosque of which he had laid the foundations.

In spite of the important role which he played and the relatively plentiful documentation concerning him, little research has been so far done on Bîyîkli Mehmed Paşa. In any case, examination of the sources gives the impression that, under Selim I, he was one of the few senior Ottoman dignitaries—yet not the only one—who, entrusted with a considerable weight of responsibility, enjoyed the unlimited con-
fidence of the sultan and, in return, served him with exemplary loyalty. This loyalty continued to be asserted under the reign of Selim I’s successor, when, as is now known, he published documents of the Topkapı Archives, Mehmed Pasha remained, against the advice of Süleyman and his advisers, the last supporter of all-out struggle against Kızılbaș Iran, the primary objective of the foreign policy of Selim I.

MEHMED PASHA, ÇERKEŞ (d. 1034/1625), Ottoman Grand Vizier.

Educated in the palace school or Enderun [q.v.], he reached the rank of sildîdar and left the palace with the appointment of Beglerbeği of Damascus. In 1621 he is mentioned as the fifth Kabbe Wizir (Na’îmî, Ta’hâ, Istanbul 1280, ii, 208). Upon the execution of the Grand Vizier, Kemâneḵâh ‘Ali Paşa [q.v.] (14 Dhu ‘l-Qa’dâ 1104/9 April 1692), Murad IV [q.v.] forced him to accept the appointment of himself as successor. Çerkes Mehmed Paşa thus became vizier-in-chief of the army sent to suppress the revolt of Abâza Mehmed Pasha [see ABÂZA], and to reconquer Bagdad from the Persians. Passing Konya, he failed to take Niğde from the hands of the rebels. On 21 Dhu ‘l-Qa’dâ 1099/23 September 1687, near Kayseri, he found Abâza Mehmed Paşa’s troops in position at the bridge of Karasu. In a bloody battle, the Grand Vizier, thanks to his field artillery, was able to defeat the rebel forces. Katîb Celebi [q.v.], being among the corps of the sildâbdar, witnessed this battle and gives a detailed description (cf. his Fâdîleke, Istanbul 1287, ii, 54 ff.). Pursuing Abâza’s fleeing troops, the Grand Vizier was able to capture Abâza Mehmed Paşa, who was executed by Abâza’s commander from Niğde to Sivas. Having come as far as Tercan, the Grand Vizier was met by a mission from the rebellious Paşa of Erzurum with the request for a pardon. Considering it as being late in the campaigning season, Çerkes Mehmed Paşa accepted this on the condition of a Janissary garrison being placed in the citadel of Erzurum. Following this, the Grand Vizier withdrew the army to Tokat for the winter (December 1624). There he fell ill and died on 17 Rabî’ II 1054/27 January 1625. His last days are reported by the historian Peçevi İbrahim Efendi, who met Çerkes Mehmed in Tokat (cf. Peçevi, Ta’hâ, Istanbul 1283, ii, 401). All Ottoman historians agree on the just and incorruptible character of this old vizier, described as a fâr-i nânâni by Na’îmî (Ta’hâ, ii, 296).

MEHMED PASHA, ELMÂS (1071-1109/1662-97), Ottoman Grand Vizier.

He was born in Hoşalay (formerly Mezed, to the east of Kerempe Burnu) (Kastamonu), the son of a shipmaster. A young man (reputedly beautiful, hence his surname Elmas “Diamond”), he was taken into the service of the state by a chief inspector of the Sultan’s treasury (Baş Bâki Kula), Divriği Mehmed Aga, who was appointed governor of Tripoli in Syria from 1089/1676-7 and therefore of the service of the treasury. Mehmed Pasha Elmas was soon promoted to the palace service, to the Khâṣîs Oda [q.v.] from where he made quick career as Râkîbâdî, Sildîlādîn in 1099/1687-8, Mir-i ‘Alem (Standard-bearer) and Khâsîs Kêtîłîdâlî, leaving the palace service with the rank of Beglerbeği to become Nâṣîrîdî in 1101/1698-90. Soon afterwards he was made a vizier (Kabbe Wizir [q.v.]), Sultan Suleyman II (1104/1695-1703) appointed him Kâ‘îm-makâm at Istanbul on 23 Dışmâdî II 1106/9 February 1695. During the preparations for the campaign against the Emperor in Hungary, the Sultan decided to make him Grand Vizier instead of Süleymi ‘Ali Paşa [q.v.], who was executed (4 Shaywâl 1106/18 May 1695). Mehmed Paşa Elmas joined the three campaigns of Sultan Mustafa II and was seen fighting at times. He distinguished himself during his second campaign when on 27 Muharram 1108/26 August 1696 the Ottoman army defeated the Na’d-Kirân Frederick Augustus, Elector of Saxony, who had laid siege to Temesvár [q.v.], in the battle near the Bega River at Cencei (Buldur Köyü Boghadî). During the campaign of 1697, he was again accompanied by the Sultan. In the council of war held at Belgrade on 27 Muharram 1109/1697, the Grand Vizier and Commander-in-Chief followed the advice of the majority of his commanders who advised with the Vizier Kodja Djafer Paşa, and ordered his army to march north across the Banat instead of following ‘Amûdija-zâde Hüseyîn Koprulî Paşa’s [q.v.] sugges-
tion to go west in the direction of Peterwardein (Waradin [q.v.]). While crossing the Tisa river eastwards, the Grand Vizier’s army was surprised by the Imperial army commanded by Prince Eugene of Savoy, who had reached this spot by a forced march towards nightfall on 11 September. This was near Zenta [q.v.]. A frightful bloodbath was the result of Prince Eugene’s immediate attack. The Turks lost about 20,000 killed and 10,000 drowned. The Sultan, who watched the disaster, fled. The Janissaries broke into a mutiny and killed the Grand Vizier and many officers of his staff.

Elmas Mehmed Paşa was a young and elegant man of the palace (celebi), of a lively character, intelligent and with experience in financial affairs, all of which assets made Mustafa II select him for the highest office. However, it seems that he did not make himself popular with the viziers and the army. He left behind a son, Muşâfa Bey.

Bibliography: See IA, art. s.v. (C. Orhonlu), with a listing in eniextro of ms. sources and literature; Sîldâbdar Findikli Mehmed Aga, Nusret-nâmê, ed. i. Parnakszogolu (in simplified version with defec-
MEHMET PASHA, ELMALS — MEHMET PASHA, GURDJU (II)

Of Georgian origin, he served among the white eunuchs of the imperial harem under Sultan Mehmed III [q.v.] (1003-12/1595-1603). He was appointed Khâş-ü-Əstä Başî by Sultan Ahmed I shortly after his accession (2 Şaban 1012/1 January 1604). Around Rabî I 1013/September 1604, Kâdîm Mehmed Agha was given the rank of First Vizier in the Diwan, but as Grand Vizier, on the 27 Rabî I 1012/22 September was appointed beglerbegî of Egypt. He was able to restore order in that province and punished the rebels among the Ottoman regular troops (kul tâ'fîyes). Dismissed around Şafar 1014/June 1605, he left Egypt for Istanbul and was appointed beglerbegî of Bosnia (Ott. Bosna [q.v.]) as well as being put in charge of the military government (mâpdfaza) of Belgrade and the shores of the Danube. In Şafar 1018/May 1609, upon appointment as serdâr-i īkrem (commander-in-chief) of the Grand Vizier Kuyuđî Murâd Pasha [q.v.], he was made kâm-üm-kâkım while still at Belgrade. During the next year’s campaign, Mehmed Paşa Gurdju was again left in charge as kâm-üm-makâm in the capital, in which function he continued till the return from the Persian front of the succeeding Grand Vizier Nasîrî Pasha [q.v.]; I Şâh-i Şân 1021/27 September 1612). During his tenure of this office, he supported the granting of capitulations to successive Grand Viziers. An efficient man, he was able to turn the campaign in Crete in a favourable direction, and could diminish Pasha, the oldest of all viziers at the time, in the next year, holding successive provincial appointments next to that office. He was appointed the old and infirm Grand Vizier on 11 Shawwal 1061/27 September 1664, and was again dismissed twenty-three days later. He was unable to turn the campaign in Crete in a favourable direction, and could not dislodge the Venetian fleet from the Dardanelles. Nor were his diplomatic efforts to reach an armistice with Venice in any way effective. On the other hand, he provided posts for his brothers, son and many

MEHMET PASHA, GÜRDJÜ (II) (d. 1076/1666), Ottoman Grand Vizier. Having been a slave (but not an eunuch) of Koca Sinâm Pasha [q.v.], he entered the palace service, beginning as an apprentice in the kitchen (mâpdfa eminîşî) department. By Djumâddâ 1023/July 1614, he reached the rank of a gâhrî bâhi. While on campaign in an anti-Mehmed Agha [q.v.], in the East, he was appointed mescûr bâhi [q.v.] in Dhu ’l-Ka’dâ 1026/November 1617. In Rabî I 1029/February 1620 he was made kâçûfû, bâhi, in which function he participated in Sultan Ọthmân II’s Khottin campaign of that year. His career was not affected by the political upheavals of those years, and in Rabjâb 1032/May 1623 he became beglerbegî of Rumeli, the first of a long series of provincial government posts in the Asiatic and European parts of the empire. Mehmed Paşa Gürdjü saw a great deal of active military service, both in the successful suppression of revolts and in the Persian wars. Having reached vizieral rank as beglerbegî of Damascus previously, he was made beglerbegî of Diyarbekir in 1035/1626 and member of the Diwan in the next year, holding successive provincial appointments next to that office. He joined Sultan Murâd IV [q.v.] during the Erivan campaign of 1625 and the Baghdad campaign of 1638 in various governmental capacities. After 3 Dhu ’l-Ka’dâ 1049/25 February 1640, he was a kâbegî vezîr once again and fell out with the Grand Vizier Sultanâzîde Semîn Mehmed Pasha [q.v.] (Muharram 1055/March 1645). At the behest of the all-powerful Dâr al-se’âde Ağha Uzun Sîleyman Ağha, Sultan Mehmedreddâ IV [q.v.] appointed the old and debilitated Pasha, the oldest of all viziers at this time, Grand Vizier on 11 Şawwâl 1061/27 September 1651, in which function he lasted eight months and twenty-three days. He was unable to turn the campaign in Crete in a favourable direction, and could not dislodge the Venetian fleet from the Dardanelles. Nor were his diplomatic efforts to reach an armistice with Venice in any way effective. On the other hand, he provided posts for his brothers, son and many

linked with the latter by family, intishâb and târîkât relationships. Gürdjü Mehmed Paşa was one of the favourite targets of the satirical verse of the poet Nefî [q.v.].

Soon the two prisoners were released again, and Mehmed was made kâm-üm-makâm once more by the Grand Vizier Cerkes Mehmed Paşa [q.v.] (April 1624). The lack of success of the seven months’ siege of Bagdaddî by the Grand Vizier (Safr-Şawwâl 1035/November 1625-July 1626) led the Janissary and Sipâhi soldiery at Istanbul to level once more their suspicions of treason or incompetence against Mehmed Paşa Gurdju (I) and Kâdîm (II) 1035/August 1626). This time the probably unfounded accusations led to the execution of the old statesman who, according to some sources, was 90 years old by this time. Three water fountains (räfs) were piously dedicated by Kâdîm Gürdjü Mehmed Paşa in the Kâhihîlîgar, Hürkâ-yi Şerîf and Şehzâde-Başî quarters of Istanbul. His târî is at Eyvûb in the second courtyard of the great mosque.

Bayrak, Istanbul’da gümüşhâ meşhur adamlar (1453-1978), Istanbul 1979, 46 (no. 33); IA art. Nefî (A. Karahan), A. H. de Groot, MEHMET PASHA, GÜRDJÜ (II) (d. 1076/1666), Ottoman Grand Vizier. Having been a slave (but not an eunuch) of Koca Sinâm Pasha [q.v.], he entered the palace service, beginning as an apprentice in the kitchen (mâpdfa eminîşî) department. By Djumâddâ 1023/July 1614, he reached the rank of a gâhrî bâhi. While on campaign in an anti-Mehmed Agha [q.v.], in the East, he was appointed mescûr bâhi [q.v.] in Dhu ’l-Ka’dâ 1026/November 1617. In Rabî I 1029/February 1620 he was made kâçûfû, bâhi, in which function he participated in Sultan Ọthmân II’s Khottin campaign of that year. His career was not affected by the political upheavals of those years, and in Rabjâb 1032/May 1623 he became beglerbegî of Rumeli, the first of a long series of provincial government posts in the Asiatic and European parts of the empire. Mehmed Paşa Gürdjü saw a great deal of active military service, both in the successful suppression of revolts and in the Persian wars. Having reached vizieral rank as beglerbegî of Damascus previously, he was made beglerbegî of Diyarbekir in 1035/1626 and member of the Diwan in the next year, holding successive provincial appointments next to that office. He joined Sultan Murâd IV [q.v.] during the Erivan campaign of 1625 and the Baghdad campaign of 1638 in various governmental capacities. After 3 Dhu ’l-Ka’dâ 1049/25 February 1640, he was a kâbegî vezîr once again and fell out with the Grand Vizier Sultanâzîde Semîn Mehmed Pasha [q.v.] (Muharram 1055/March 1645). At the behest of the all-powerful Dâr al-se’âde Ağha Uzun Sîleyman Ağha, Sultan Mehmedreddâ IV [q.v.] appointed the old and debilitated Pasha, the oldest of all viziers at this time, Grand Vizier on 11 Şawwâl 1061/27 September 1651, in which function he lasted eight months and twenty-three days. He was unable to turn the campaign in Crete in a favourable direction, and could not dislodge the Venetian fleet from the Dardanelles. Nor were his diplomatic efforts to reach an armistice with Venice in any way effective. On the other hand, he provided posts for his brothers, son and many
friends and relations. His dismissal followed on 13 Rādjab 1062/20 June 1652. After a short stay in Yedi Kule prison, he was allowed to live in his private residence in the Eyyūb quarter of the capital till he managed again to secure an appointment as provincial governor successively of Teneşâvar and Cyprus (Kutrub [q.v.]) and Buda (Budan [q.v.]). It was probably there that he died of old age before 1 Shawwal 1062/20 June 1652, when the news of his death reached Istanbul, according to the historian ʻAbdī Paşa (Weqāfī-nāme, ms. Beyazid, Umumı 1514 946).

(A. H. DE GROOT)

MEHMED PASHA, ʻĪWAD, ḤADDĪJ (EL-ḤADDĪ) (1085 or 1086-1165/1775-1743), Ottoman Grand Vizier.

He was the son of a descendant of the Eyyūb-i Fāṣāl, one Naṣr Allāh, a ʻāmir holder at Jagodina. Educated for state service (hence ʻīwād), he served with high-placed officials at Belgrade (1100/1689) and at Jiđđada (1107-1696), during which period he made the pilgrimage to Mecca. Having returned to Istanbul just before the Patrona Khalīf rebellion of 1730, he acted as Ǧumruk Emini, Commissioner of the Istanbul customs house, on behalf of Yegen Mehmed Efendi Paşa (Pasha ). Later, he served as Treasury Inspector (Bash-Bēki Kulu). The Grand Vizier Hedjâdji ʻAli Paşa (q.v.) promoted him Cannoğ Bushā (q.v.) (1752).

In 1753 he became a vizier and acted for a short time as kāʿim-mākāṃ at Istanbul, after which he was sent to govern the sandjaks of Niğbolu and Vidin. During the war, for two years successively he defended his area against Austrian attacks. He was able to take the fortresses of Hisorva and Fethulislam (the Yugoslavian Kladovo) as well as Semendire (the Yugoslavian Smederevo), Mehâdiye (the Rumaniyan Mehedia) and Yeji Palanka. Mehmeh Paşa ʻĪwad served as commander-in-chief (serdar) on that front when, at the behest of the powerful Kizlar Ağhası (Dār al-Šārāda Ağhası) Hadjîdji Bashir Ağha, he was also appointed Grand Vizier (12 Dhu ʻl-Hijja 1151/23 March 1739) to replace Yegen Mehmed Paşa, whose policies he continued however along the same lines, on the one hand by opening diplomatic contact with the Austrians, on the other by aiming at the reconquest of Belgrade. He became famous for his splendid defeat of the Austrian army under Field-Marshal Olivier Wallis (56,000 strong plus light cavalry, artillery and irregulars). The Grand Vizier took up a defensive position to the north-west of Grocka (Ott. Hisārđîk) (on 15 Rabār II 1152/22 July 1739) overlooking the road from Belgrade which went through a defile. After fifteen assaults by the Janissaries, Field-Marshal Wallis retreated at nightfall, losing 3,000 killed and 7,000 wounded. Four days later, Belgrade was laid under siege by the Ottomans. Negotiations led to the conclusion of the peace treaty (1-18 September) between the Sultan, the Austrian Vizier and the Tsar at Belgrade, which meant an important restoration of Ottoman power in the Danube area.

In Rabār 1153/June 1740 a local disturbance in the capital formed the pretext for Bashir Ağha and the ẉādīl Sultan to have Mehmeh Paşa ʻĪwad dismissed as Grand Vizier, relegating him to the governorship of Jiđđada, from which place he soon was able to transfer to Canea (Ott. Haniya). During the next three years, he successively served as military governor of Salonica, in Herzegovina (Ott. Hersek), Bosnia, Negroponte (Ott. Egriboz) and in Crete again. He died while acting as military governor of Lepanto (Aynabakhti [q.v.] in Dūmādd 1 I1566/July 1743. His elder son Ibrahim became twice Șeyhül-Islam and his younger son Khalll became Grand Vizier in 1183/1769.

MEHMED PASHA, KARAMANI, Nihat ʻič, (d. 1866/1841), Ottoman Grand Vizier and historian.

A descendant of Djūdal-al-Din Rūmī [q.v.], he grew up in Konya where he received his education as an ʻinām from Muşannaf ʻIbbid, who introduced him into the patronage of Memnūd Paşa [q.v.]. Mehmeh Paşa served as a clerk in the diwan of that Grand Vizier and later became medium in the medrese founded by the same at Istanbul, being at the same time a general adviser to his patron. Thanks to the latter, he became nişābūrī [q.v.] in 869/1465, which high office he kept for about 12 years. From 4 Dhu ʻl-Ka’dā 862/13 September 1458, he already ranked as a vizier. His appointment as Grand Vizier following the dismissal of Gedik Ahmed Paşa [q.v.] dates from Muḥarram 881/May 1476 (cf. Kīwāmī, Fet-nāme-yi Sultān Mehemmed, ed. F. Babiner, Istanbul 1955, 273). In his new position, he became the main author of Sultan Mehemmed II's [q.v.] legislative policy. This statesman, with his years of experience in matters of state and administration, was the real creator of the new state institutions laid down in the kānīn-nāmes [q.v.] of this period (cf. the editions of MOG, i [1922], TOEM [1300/1912] and ʻOzcan [1982]). One of his lasting innovations was the division of the judiciary among two kāsîʾiʾaskers, one for Rumeli and one for Anadolu. A great number of ʿawāf and private landed properties were converted into state property as a base of the timar system, which had to support an increasing amount of military personnel. Mehmeh Paşa's full support of the centralising policy of the Sultan caused his unpopularity among his fellow ʿulāmāʾ and the old-established landowners of the ghāzi aristocracy (cf. ʻAshikpaşağzade, Twārīx-i ʿAl-ī ʿOṯmān, ed. Ç. N. Atsiz, Istanbul 1947, 244).

When Grand Vizier, Mehmeh Paşa Karamanî supported Sultan Mehmed II in furthering the claim to the succession of Prince Ǧiđem [q.v.] against Prince Bâṣâyd. His personal link with the city of Konya must have offered a special opportunity, since Ǧiđem Sultan was governor of Karaman. Bâṣâyd (I) [q.v.] counted Karamanî Mehmeh amongst his enemies henceforth (cf. R.C. Repp, The Miḥf of Istanbul, 21, 72, 144, 199-201). The Grand Vizier accompanied the Sultan at the departure for the campaign of
MEHMED PASHA, KARAMANI — MEHMED PASHA, LALĀ

886/1481. Thus he assisted his monarch during his last illness in camp at Maltepe (cf. Tursun Beg, Ta’rīkh-i Abu l-Fath, ed. and tr. H. Inalcık and R. Murphy, Minneapolis, etc. 1978, 64, Ay 157 b-158 a). The Grand Vizier, Mehmed Pasha Karamanlı (4 Rabī‘ 1 886/5 May 1481) a secret, but sent the news to both Prince Bâyezîd and Prince Djiem. His aim was for Djiem to arrive first in Istanbul and to make his accession there a fait accompli.

For that purpose, the mortal remains of Mehmed II were secretly brought back to the capital by the court physicians, and then all communication was cut between the two shahs of the Bosnian. Mehmed Karamanlı moved the A’dâm-oghlanı out of town and had the city gates closed, but his enemies intercepted his men and the news of the Sultan’s death spread quickly. The Janissaries managed to cross the water by private Grand Vizier.

Minor poets such as Kabûlî and Hamdî wrote the rise of the Ottoman Empire in the form of works representing a group of sources distinct from the other covering the years 855/1451 to early 885/1541, the building of the Imperial Stables (856/1453). The latter includes 10 chronograms in verses describing his own deeds: 1. the building of Rumeli Hisari (856/1453). 2. the conquest of Albania (871/1466-7). 3. the reconstruction of the wâlî’s castle on the castle hill of Konya (872/1467-8). 4. the building of the “New Seraglio” (Topkapı Sarayı) at Istanbul (873/1468-9). 5. the taking of the fortress of Egbirhob [q. v.] (Negroponte) (874/1469). 6. the victory over Uzun Hasan (875/1470-2). 7. the death of Prince Mustafa (875/1472-3). 8. the taking of Şahrî Karâhisar (875/1472-4). 9. the building of the wall containing the “New Seraglio” (883/1478-9). 10. the building of the Imperial Stables (İstanbul-i sâmiye (883/1478-9). These chronicles seem to be a recasting into Arabic of a simple calendar (lakwim) to which chronograms and ornate passages of artî have been added (cf. Ménage, The beginnings of Ottoman historiography). Karamanlı Mehmed’s text is one of a number of early historical works representing a group of sources distinct from the group of Aşkîpasha-zâde, Uruđî and the anonymous Ta’avârîk. This group contains a different tradition about the origin of the Ottomans which is based on an older source than that used by the other group of histories dating from ca. 1399 (cf. Inalcık, Rîse). Minor poets such as Kabûlî and Hamdî wrote kâdînî and other poetry in praise of the nishâhı and Grand Vizier.

Mehmed Paşa Karamanlı had two wives. His first was Muşînînâfik 4‘Allâ’ al-Dîn ‘Ali b. 135îmâlî’s daughter, who gave him a son Zayn al-Abîdîn 4‘Ali Celebi, who in his turn had a son of some renown, 4‘Allâ’ al-Mawla Mustafa b. ‘Abîdîn 4‘Ali b. 135îmâlî. The Second was 4‘Allâ’ al-‘Adîm 4‘Allâ’ al-Mawla Mustafa b. ‘Abîdîn 4‘Ali b. 135îmâlî. This group contains a different tradition about the origin of the Ottomans which is based on an older source than that used by the other group of histories dating from ca. 1399 (cf. Inalcık, Rîse). Minor poets such as Kabûlî and Hamdî wrote kâdînî and other poetry in praise of the nishâhı and Grand Vizier. Thus he assisted his monarch during his last illness in camp at Maltepe (cf. Tursun Beg, Ta’rīkh-i Abu l-Fath, ed. and tr. H. Inalcık and R. Murphy, Minneapolis, etc. 1978, 64, Ay 157 b-158 a). The Grand Vizier, Mehmed Pasha Karamanlı (4 Rabī‘ 1 886/5 May 1481) a secret, but sent the news to both Prince Bâyezîd and Prince Djiem. MEHMED PASHA, LALA — MEHMED PASHA, MELEK

Esztergom [q.v.] which he had to surrender to the imperial Commander-in-Chief Peter Ernst, Count Mansfeld (1517-1604). The negotiations were conducted on the Ottoman side by inter alio Ibrahim Pasha (1601-1605) and on the imperial side by Peter Ernst. Lala Mehmed Pasha, who had been commander in chief of the Ottoman army during the Russo-Ottoman War (1769-74), surrendered Esztergom on 3 Muharram 1014/12 October 1605 (cf. the eyewitness account of Peçewi, Târîq-ı, 305 f.). The taking of this famous fortress and its surrounding places was followed by the conquest of others: Veszprém and Palota, and Neuhäusel on 9 Radjab 1014/20 November 1605. The Grand Vizier ordered a razzia of Tatar and Hungarian light cavalry into the Austrian lands, Croatia and Styria under the command of his nephew, "Sarhad" Ibrahim Paşa, the Beglerbegi of Kanisa. At Rakos on 7 Dümâdâ II 1014/20 October 1605, Lala Mehmed Paşa held a coronation ceremony for Stephen Bocskai, proclaimed King of Hungary. A crown had been especially made at Istanbul for this ceremony (this is now in the Kunsthistorisches Museum of Vienna, cf. H. Fillitz, Die Schatzkammer in Wien, Vienna 1964, 133, 17). Leaving Murad Paşa in charge, the Grand Vizier departed for Istanbul. It was his intention to exercise the supreme command over both the western and the eastern fronts from there. The Sultan's government, however, insisted on him going in person to the war in the east in the next season. The horse-tails (tâg) [q.v.], were already put out at Úskûdar when the Grand Vizier died suddenly on 15 Safar (or 16 Muharram) 1015/23 June (or 25 May) 1606. Rumours were current at the time that his rival Derwish Mehmed Paşa [q.v.] had made the Sephardic Jewish court physician administer poison. Lala Mehmed Paşa was buried next to the mausoleum of his kinsman Şokollu Mehmed Paşa at Eyyûb.

Bibliography: See IA art. s.v. (M.C. Ş. Tekindâq), on which the present article is largely based. A main source is PecewT's Ta'rikh, whose author personally witnessed the most important years of Lala Mehmed Paşa's career as a trusted official: I.H. MEHMED PASHA, MELEK, DÂMAD (1131/1216/1719-1802), Ottoman Grand Vizier under Sultan Selim III [q.v.]

He was the son of Bosnai Khâğıa Süleyman Pasha, Vizier and Kapudan-ı derâî in 1126/1714 and 1130/1718 till his death in 1133/1721. Born in Istanbul, he followed his father's footsteps in a naval career, becoming commander (Derya begi) in 1736, Tersâne kethâdâsi and Kapudan-ı derâî himself in 1165/1752-5. Sultan Mustafa III (1171-87/1757-74) appointed him Nizândî, and married him to the Princess Zeynep AŞIWA Sultan, a daughter of Ahmed III (1757) (cf. A.D. Alderson, The structure of the Ottoman dynasty, no. 1268, Table XL). He was then promoted Vizier and received the title of Sandıklî begi of Yanova. From 1763 onwards, he received appointments as military governor successively of Vidin and Belgrade, Beglerbegi of Anadol, Kâşmî-makâm (1765) Beglerbegi of Aydın, of Rumeli and in 1767-9 Kapudân-panşa again, during which tenure he made one tour through the Archipelago. In 1769 he was made both Muhâsîl of Morea and Kâşmî-makâm at Istanbul, which function he held during the Russo-Ottoman War (1769-74).

After a spell out of office, he was made Kapudân-
Mehmed Pasha was Grand Vizier again till his death on 26 Dümâddâ 1188/8 April 1774. During those three years, Ottoman arms were unsuccessful against the Russians. The Grand Vizier opened peace negotiations again, finally with the Austrians and also with the Russians (Bucharest conference, from November 1772 to February 1773). The Russian demands, including the independence of the Khanate of the Crimea [see Krim] and high war indemnities were not yet acceptable to the Ottomans, and peace was not reached till the Russian army under the Field Marshall Peter A. Rumyantsev encircled the Grand Vizier and Sultan and took Shumen (Bulg. Shumen) and proposed negotiations again.

Mehmed Pasha accepted this proposal immediately. The negotiations between the two delegations, the Ottoman one led by his Subâret-Kethâbâdî (afterwards Nishânîdî) Ahmed Rasmî Efendi [see idem, Kâlûşat Âl-†itâb, cf. GOV, 280, 309-12], were held at the Russian headquarters 17-21 July 1774 and led to the treaty of Kûčîkh Kaynarja [see idem]. The Grand Vizier became ill soon afterwards and withdrew to return to Istanbul. On the way near Karnobat (Tk. Karînâbاد) he died on 26 Dümâddâ 1188/8 April 1774. On the orders of his widow Esma Sultan, he was buried at Eyyûb next to the gate of the great mosque.

Bibliography:
A. H. DE GROOT, Nahih Osmanli tarihi (1020/1612) (cf. A. D. Alderson, The structure of the Ottoman dynasty, Oxford 1956, no. 124, Table XXI), a daughter of Ahmed III. There followed quickly one after another, the appointments as Beglerbeyi of Diyarbekir, Anadolu (at Kütahya) and Bosnia (1760), staying one year with his wife at his palace at Kadîrga (Istanbul), before proceeding to his post. From 1175/1762 he occupied the governorships of Rumeli and Bosnia, twice each, before being called to the Grand Vizierate on 7 Shawwâl 1176/30 March 1765. During his tenure of office, revolts in Arabia, Egypt and Georgia broke out and Russian pressure increased. The Grand Vizier did not think the Empire could sustain a war with that power, but his opinion did not prevail in the Divân.

Mehmed Pasha, Muhsin-zade was born on 23 Rabî‘ II 1182/6 September 1776 and was ordered to reside in Bogdja-Ada (Tenedos [q.v.]) Gallipoli (Gelibolu [q.v.]) and Rhodes (Rodos [q.v.]). In 1182/1776 appointed military governor (Mudâfâ‘) of the Morea, he was able to defeat the Russian-inspired rebellion there in a battle at Tripolitza (Ott. Tripolié). In Dhu l-Hijjâja 1188/April 1770, after which he restored Ottoman authority in the main centres of Patras (Ott. Bâyla Badra [q.v.]), Modon (Ott. Mûtûn [q.v.]), Navarino (Ott. Navarin [q.v.]). In 1185/1771 he went as commander of the Ottoman troops to the Danube front. From Şah-banu November 1771, Muhsin-zade Mehmed Pasha, Mehmed Pasha, Melek — Mehmed Pasha, Öküz
In command of a squadron of 30 galleys, he went out to sea in the 1022/1613 season. His aim was to attack Maltese and Tuscan corsairs who had ravaged the southern shores of Anatolia and had raidied Agha L engineer's factio to office again. Öküz Mehmed Pasha was appointed Commander-in-Chief of the army formed to counter the aggression of Şahş Abdüss I of Persia [q.v.], who had violated the treaty concluded with Naşü Pasha (26 Ramadan 1021/20 November 1612). In Qumâdâ I 1024/June 1613 the Grand Vizier left for Aleppo, too late however for action that year. The army stayed in winter quarters in Marâv. In April 1616 Öküz Mehmed Pasha left Aleppo and marched towards Erwân to confront the Persian Şahş. The Grand Vizier himself went to Kars via Gökstên Yavla and Erzurum, despaching important contingents of his large army in the direction of Erwân and Nişâwan. Having ordered the strengthening of the fortifications of Kars, he marched to Erwân (Ott. Erivan). He detached the Persian forces and laid siege to that fortress. His lack of siege artillery and the strong resistance of the garrison forced him to lift the siege after 60 (or 44?) days, agreeing to a settlement based on the terms of 1021/1612 accepting a reduction by half of the Persian tribute of silk, i.e. to only 100 yâk. The Ottoman main army then returned to Erzurum (27 Shawwâl 1025/7 November 1616). The Grand Vizier wintered at Şoghanlî Yavla. The accusation of neglect of duty levelled at the Grand Vizier after this meagre result of his campaign led the Sultan to dismiss his favourite son-in-law (8 Dhu l-Ka'da 1025/17 November 1616), who nevertheless retained the rank of Second Vizier and was ordered to assist his successor in office, Kâhlîl Paşa, towards the conclusion of a definitive treaty of peace with Şahş Abdüss. Peace was last concluded on 6 Shawwâl 1027/26 September 1618 in the Ottoman camp in the plain of Sarâb (near Ardabîl), deep inside Safavî territory.

Sultan ʿOğlumân II [q.v.] appointed Öküz Mehmed Paşa Grand Vizier again in place of Kâhlîl Paşa (1 Safer 1028/18 January 1619). In his new quality, he sent the Ottoman ratification of the Sarâb treaty to Şahş Abdüss on 13 Shawwâl 1028/25 September 1619 (cf. Qâzâ-ı nâmey-i Khâlîl Paşa, ms. Esâd Efendi 2139, fol. 119b; Ferîdûn, Manzûre, Istanbul 1275, ii, 325). Later in 1029/1619, a conflict broke out between the Grand Vizier and the then favourite of the Sultan, the Kapudân-paşa, the Vizier Gûlêzûl Istanbûlî ʿAli Paşa [q.v.], Mehmed Paşa once again, as in 1021/1612 in his conflict with Kâhlîl Paşa, tried to use the help of the ambassadors of Venice and France against his rival, but to no avail, since the Sultan dismissed him and made ʿAli Paşa Grand Vizier instead (16 Mevâr 1029/23 December 1619). Öküz Mehmed's private property was confiscated and he himself banished from Istanbul with the appointment as Beylerbîegi of Aleppo, and it was in that city that he died not long afterwards.

A türbe was built inside the zâwîya of Şahş Abdüss Abi Bakr (cf. Kârîb Çelebi, Paşâlar, i, 402). Wâlsîs founded by Öküz Mehmed Paşa included a külliye in the Karagümruk quarter of Istanbul where he was born, and a complex including a great ʿâşar and a market at Ulûkışla (in Niğde province on the road to the Cilician Gates [Gûlebek Boğazı], see CILCISA) (cf. A. Gabriel, Monuments turcs d'Anatolie, Paris 1931, iii, 367-70). At Cairo, he built barracks for the Janissary and 'Aqab corps and a zâwîya with a row of shops for the benefit of the Mawlawiya [q.v.] order of dervishes to which he was himself linked. Elsewhere in Egypt and Syria he erected facilities along the main routes to Mecca.

MEHMEladen PASHA RâMî, Ottoman Grand Vizier and poet, was born in 1065/1655 or 1086/1656 in Eyyûb, a suburb of Istanbul, the son of a certain Hasan Agha. He entered the chancellery of the Reş Efendi as a probationer (ubîrgâr), and through the poet Yâsusûf Nâbi [q.v.], he was appointed an assistant to masraf kâiti, i.e. secretary for the expenditure of the palace. In 1095/1684, through the influence of his patron, the newly appointed Kapudân paşa [q.v.] Mustaфа Paşa, he became divân efendi, i.e. chamberlain of the Admiralty. He took part in his chief's journeys and campaigns (against Chios) and on his return to Istanbul became re'si kâsidârî, i.e. pursuereceiver to the Reş Efendi. In 1102/1690 he was promoted to beylikdži, i.e. vice-chancellor, and four years later Re's Efendi in place of Abû Bakr, in which office he was succeeded in 1108/1697 by Kâtiobble Mehmed Çelebi. After the battle of Zenta (12 September 1697), he became Re's Efendi for a second time and was one of the plenipotentiaries at the Peace of Carlowitz (Karlofca [q.v.]), by means of which "he put an end to the ravages of the Ten Years' War but also for ever to the conquering power of the Ottomans" (J. von Hammer). As a reward for his services at the peace negotiations he was appointed kabbe weziîrî with 3 horse tails (tâsh) in 1114/1703 and 6 Ramadan 1114/January 24, 1703, appointed to the highest office in the kingdom in succession to the grand vizier Daftalan Mustaфа Paşa. In this office he devoted particular attention to the thorough reform of the civil administration, by reform of the civil administration, through the abuses in which he saw the security of the state threatened (cf. von Hammer, GOR, vii, 64). "By lessening the burden of fortresses on the frontiers in east and west, by raising militia against the rebel Arabs, by securing the pay of the army from the revenues of certain estates, by making aqueducts, by restoring ruined mosques, by taking measures for the safety of the pilgrim caravans and for the security of Asia Minor, by settling Turkmen tribes, by ordering the Jewish cloth manufacturers in Selânîk and the Greek silk manufacturers in Bursa in future to make in their factories all the stuffs hitherto imported into Turkey from Europe" (von Hammer), he exercised a most beneficent activity, which however soon aroused envy and hatred, and since Mehmed Paşa Râmi was entirely a man of the pen
MEHMED PASHA RAMI — MEHMED PASHA, SULTAN-ZADE

and not of the sword, he was unpopular with the army, particularly the Janissaries, and this was bound to lead to his fall (cf. Gör, vii, 72). In the great rising in Istanbul which lasted four weeks, beginning with the enthronement of Sultan Mustafa II and ending with his deposition (9 Rabii II, 1115/22 August 1703), his career came to an end. He was disgraced, but pardoned in the same year and appointed governor, first of Cyprus, then of Egypt (October 1704). His governorship there terminated unhappily as his grand viziership (cf. Gör, vii, 133, following Râşid and La Motraye). In Dümâdî 1 1108/September 1706, he was dismissed and the Grand Vizier was Mustafa, whereas he died in Dhu 'l-Hijja 1119/March 1707, either under torture or as a result of it (cf. Gör, vii, 134, quoting the internuntius Talman). Mehmed Pasha Rami is regarded as a brilliant stylist, as the two collections of his official documents (insâhi) containing no less than 1,400 pieces, distinguished by their simple clear and elevated style, amply show (cf. the mss. in Vienna, Nat. Bibl. nos. 296 and 297, Scott, G. Flagel, Die arabs., pers. u. türk. Hs., i, 271-2). Mehmed Pasha Rami also left a complete Divan, of which specimens are available in the Tekâhir of his son-in-law Sâlim (cf. F. Babinger, GÖW, 272-3; printed Istanbul 1315). His poetical gifts were inherited by his son 'Abd Allah Re'let (cf. Bursâli Mehmed Tahir, 'Olmânlî müllüfleri, ii, 187).

(F. Babinger)

MEHMED PASHA, RÜM or RÜMî (d. 883/1478), Ottoman Grand Vizier.

Being of Âlî status, his origins, whether Greek or Albanian, are obscure. Sultan Mehmed II [q.v.] admitted him into his intimate circle after the unsuccessful Albanian campaign of 870/1466 during which Mehmed Pasha became Second Vizier. In 1468/872 he was appointed Governor of Cyprus; he was successful in the campaign against Karaman [see KARAMAN-ISGÜLLAR], during which he manifested his rivalry with the Grand Vizier Mahmut Pasha [q.v.]. Instead of him, Mehmed Pasha was charged with the deportation of selected members of the populations of the cities of Karaman, Konya [q.v.] and Laranda [q.v.], mainly artisans, other professionals and merchants. The older Ottoman chronicles agree with the contemporary sources in which the Átvâr's harsh treatment of the Muslim people in question, giving a picture of this Pasha as if he were effecting an act of revenge for the Istanbul Greek population's fate (cf. Ashikpaşa-zâde, tr. R. F. Kreutel, Fom Hintezitl zur hohen Pfalz, Graz, etc. 1959 (= Osmanische Geschichtsschreiber, 3), 201 f., 238, 240 f., F. Babinger, Mehmed the Conqueror and his time, ed. W.C. Hickman, tr. R. Manheim, Princeton 1978, 254, 292 f., 286 f., 299, 454; I.H. MEHMED PASHA SARI, DEFTERDAR, BÂKÇAL-OGLU [see SARI MEHMED PASHA]

MEHMED PASHA ŞOKULLİ, TAVÜT. [see ŞOKULLİ, ŞOKULLİ]

MEHMED PASHA, SULTAN-ZADE, DHWAN KAPRÎ-BAGHî, SEMİN (1010-56/1602-46), Ottoman Grand Vizier.

He was born in Istanbul as the son of 'Abd al-Rahman Bey (himself a son of Semiz Ahmed Pasha, Grand Vizier 887-8/1579-80, and his son-in-law) and of Humâzâh 'Âşîhe Khanîm Sultan, a daughter of Cîhâlûrân, Sultan of the Istanbul Greeks [q.v.], thus being a grandson of Princess Mih-i Mâh.
Sultan [q. v.}, hence his surname Sultan-zade (cf.
A.D. Alderson, The structure of the Ottoman dynasty,
Oxford 1956, Table XXX, no. 2128). Mehmed Paşa
was educated in the imperial harem and the
ulamd. At the same time, it must be noted, he made
a large number of changes in official appointments
justified Yusuf Pasha in all respects, and he was
return to the capital, the Grand Vizier Kemankesh
[ q. v. ], Sultan Ibrahim's
corps on campaign. In fact, he was denounced by the
in and around Belgrade till 1154/1741, serving on the
mixed Ottoman-Austrian boundary commission with
Kâdî Ebî Sehil Nu'mân Efendi. Later, he was twice
made Yeniери Efendi as well. In 1745 he became
famous in the Ottoman chronology (Kâdî-âddî (q. v.)).
At the same time, he must be noted, he made
the complete restoration and extension of the Imperial
Naval Dockyard at Istanbul after its destruction by
fire. He earned Sultan Mahmud's [ q. v. ] favour and
was promoted to be "General Deputy" (kethîdi =
kapûyeh [q. v.]) of the Sublime Porte). The protection of
the Dor-î-sâîda Ağâh Haji Mustaфа Ağha provided him with a
quick career from Mir Ağâh to vizier andbeglerbegi of

MEHMED PASHA, TABANIYASSI (997–
1002), Ottoman Grand Vizier.

Of Albanian origin, he was taken from his home at
Tag˘hlija as a devshirme boy and entered the palace
service [see endnote]. The protection of the
Dor-î-sâîda Ağâh Haji MustaFa Ağha provided him with a
quick career from Mir Ağâh to vizier and beglerbegi of
Egypt before becoming Grand Vizier on 28 Shawwât
1041/18 May 1632. He assisted Sultan Murad IV
[ q. v. ] in suppressing opposition forces in the capital,
thus making it possible for the sultan to rule in person.
Mehmed Paşa was educated in the imperial harem and
the centre of power by making him beglerbegi of
Damascus (Radjab 1053/October 1643). It was there
where he received the seal of office and the appointment
as Grand Vizier (21 Dhu 'l-Ka'da 1053/January 1644),
thanks to his collaboration with the faction of
Djindji Khodja [see HUSAYN EFENDI], Sultan Ibrahim's
capera. Outside the Dardanelles, Mehmed Paşa's
powerful influence and activity with Swedish and
Transylvanian diplomacy, whilst only 19 years old, he became
highly critical of the conduct of the
sultan justified Yusuf Paşa in all respects, and he was
dismissed. In Dhu 'l-Ka'da 1055/January 1646 he
was in his turn appointed sadrî of the Cretan
campaign. Outside the Dardanelles, Mehmed Paşa's
fleet of galleys encountered the Venetian sailing
squadron of Tommaso Morosini off Tenedos (Ott.
Bozda Ada [q. v.]) and successfully passed the Venetian
blockade (19 Rabî‘ II 1056/4 June). Arriving at
Crete on 27 Djamâd al-Akhir 1056/10 August 1646, he
decided to lay siege to the fortresses of Suda and
Aprikorno near Canea. Already ill during the voyage
thither, Mehmed Paşa became ill on 8 Djamâd al-Akhir 1056/11-12 August 1646 in camp before Suda. His
body was brought home to be buried next to his
mother 'Aşîhe Khânîm Sultan in the cemetery of the
Karâ of 'Aziz Mahmûd Hâdât at Uskûdar. A son
and grandsons of his are mentioned in SØ, iv, 161 ff.

While in power (cf. Süleyman ʿİzzî, Taʿrīḫ, fols. 66a-72a).

During his tenure of office, Ottoman diplomacy saw significant changes. Pejawaz was dismissed by Nâdir Shâh [q.v.] on 17 Şebābân 1150/4 September 1746 (f. 178v), and Nâzîf Mustaṭfa Endî, İyân şerâfatnâmesi, in F. R. Unat, Osmanlı şerifleri ve şerâfatnâmeresi, Ankara 1968, 84 + ill.). In 1160/1747 Mehmed Paşa rejected the French overtures to make an offensive alliance against Austria; the Porte had not forgotten how France refused the Ottoman offer of mediation in 1158/1745 and remained distrustful of French motives (cf. F. de Tassigny, Recueil des traités de la Porte Ottomane, Paris 1864, ii, 178 f.). On the contrary, Mehmed Paşa had the peace confirmed with the new Austrian ruler, the Empress Maria Theresa, on 10 April 1747. This agreement was followed up by a treaty of friendship and commerce with Tuscany on 27 May 1747 (cf. Muʿâṣeret MeÂginâ相比于, Istanbul 1297, iii, 135 ff.; ʿİzzî, op. cit., fols. 114-121).

Sultan Mahmut I (1143-49, 1158-75) dismissed his Grand Vizier before he could leave for Belgrade. The Crimean Khan was his main adviser and later again Commissary of the Customs, leaving that position to Topâl ʿOthmân Paşa, as well. In 1145/1733 he acquired the post of Meşküfât-ı Kürpûlî-zâde Hâфиз Ahmed Paşa. In 1737/1150 he was appointed vizier and got the function of Kâtûn-makâm (23/26) Şebābân 1150/16 (199) December 1737, Şehmân-zâde, Murâb-i tevarîhid, 67, 77-85: 29 Şebābân 1150/22 December 1737). Yegen Mehmed then became Grand Vizier. Preparing for war, he desired at the same time the French ambassador Villeneuve to undertake mediation with the Emperor and with Russia. He left Istanbul as serdar on 15 Dhuʾl-Hijja 1150/5 April 1736 and moved the army via Edirne and Niş to Ada-Kale [q.v.]. After heavy fighting in that area, he was successful in the retaking of Meğdive, Ada-Kale and Semendire (26 Rabî 1151/13 August 1738). Having returned to Istanbul at the end of the campaigning season, preparations of war were mainly directed towards the reconquest of Belgrade. The Crimean Khân was his main adviser on the conduct of the war against Russia at this time. Through the influence of the powerful Dâr al-Salât Ağâlî Bâghir Agha, Sultan Mahmut I [q.v.], dismissed his Grand Vizier before he could leave for the front (12 Dhuʾl-Hijja 1151/23 March 1739).

Mehmed Paşa was now exiled to Chios (Ott. Sâkhî[z] [q.v.]) for one-and-a-half years. On 19 Rabî II 1153/14 July 1740, Yegen Mehmed was made military governor of Candia. Afterwards he received the governorates of Negroponte (Ott. Eghrîboz [q.v.]), Bosnia and (in 1157/1744) Aydîn [q.v.]. At the end of the same year, he was made Beglerbegi of Anadolu and serdar, being sent to Kars and the Persian front with a large army. Thanks to the initiative of the Crimean Khan Selîm Giray II (1743-8) and his Tatar troops, the Ottomans attacked the Persian army in its fortified position near Erivan (12 Rabî` 1158/10 August 1745). After a week of fighting, the Grand Vizier fell ill and could not exercise his command any more. Disorder ensued among the Ottoman Legend [q.v.] troops, and fighting was
MEHMED PASHA, YEGEN — MEHMED Sâid Ghalîb Pasha

broked off. The Grand Vizier died on 21 Radjab 1158/19 August 1745; his body was brought inside the citadel of Kars and buried there.

MEHMED RA'UF, Modern Turkish Mehmet Rauf (1875-1931), Turkish novelist of the late 19th and early 20th century. Born in Istanbul and trained as a naval officer, he entered the navy in 1893, was sent to Crete for further education, served as liaison officer in the launches of Foreign Embassies on the Bosphorus, retiring from the navy in 1908. Apart from publishing various periodicals for ladies and some attempts to carry on trade, he devoted his life to his writing.

Already while a student in the naval college he sent his first literary experiments to Khâlid Dîyâ [q.v.] in İzmir, who published them in the newspaper Khiâyîme. Later, he contributed to the periodical Mekteb and various daily papers. When in 1895, the leading westernising writers formed a group for modern literature [see Türk. Literature] around the periodical Therwet-i Funun [q.v.], he soon joined them and published most of his writings there. Through Khâlid Dîyâ, now in Istanbul, he met most of the Therwet-i Funun school. Most of his novels and collection of short stories, numbering a dozen each, are superficial, over-sentimental narratives with one remarkable exception, Eýül “September” (1900), which is the first example in Turkish literature, of sustained psychological analysis. This novel stands out not only among the works of Mehmed Ra'uf, but it is also one of the most outstanding prose productions of the whole period.

Eýül is the love story of Su'âd, a married woman and Nedjîb, a relative and family friend. It is set among the semi-westernised, lower-middle class families of Istanbul at the turn of the century. Thîreyeyâ is the immature, sporty husband who spends most of his time boating and swimming while his wife tries to find consolation in music and plays the piano for hours on end to escape her boring life. A deep platonic relationship develops between Su'âd and Nedjîb, who shares similar tastes with her. Entire chapters of the novel are devoted to a psychological analysis of the lovers, who, because of their strict upbringing, remain faithful to the bounds of morality. A fire breaks out in the seaside villa (yali) on the Bosphorus where the young married couple live, and Su'âd, together with Nedjîb who tries to save her, both perish in the flames.

MEHMED RE'ÎS, Ian Menezenî, Turkish ship’s captain and cartographer from an Aegean seafaring family, author of an 81 x 58 cm chart of the Aegean Sea, showing also Greece and the western coast of Asia Minor (Museo Correr, Venice). Dated 1197/5 April 1688, the chart is now in the Library of the University of Istanbul, with the corresponding maps of Piri Re'îs [q. v.], although these are not as accurate as the chart. The chart is signed in Italian (probably from the 17th century), the chart shows rhumbs and 199 names of coastal towns or islands noted in Turkish.

Similar to the Aegean sea-chart in the atlas of ‘Ali Maşrur Re’îs’ dating from 1567, the above-mentioned belongs to the portolan tradition. It is more exact than the corresponding maps of Piri Re'îs [q. v.], although some names are different from both in nomenclature. One should note that all Turkish sea-charts of the Aegean not only differ from the European ones in nomenclature but are also not as standardised as these.

MEHMED Sâîd Ghalîb Pasha, Ottoman statesman.

Born in Istanbul in 1177/1763-4, he was the son of Seyyid Ahmed Efendi, bash-khalife of the mektebi office of the Grand Vizier. After the death of his father (1188/1774-5), he entered the same office where he became bash-khalife in 1210/1795. He was appointed âmedji [q. v.] on 15 Ramadan 1213/3 February 1798 and was sent to France (April 1802) to negotiate peace, which had been broken by the French expedition to Egypt (July 1798). He succeeded in signing the Treaty of Paris on 25 June 1802 (for the text of this treaty, see G. Noradounghian, Recueil d’actes internationaux de l’Empire ottoman, Paris 1897-1903, ii, 51-4). Back in Istanbul at the beginning of 1803, he became bûyûk tâdi“In September 1806. He followed the Ottoman army in the campaign against Russia, but when the news of Selim III’s deposition on 29 May 1807 reached him, he took refuge with Musta‘îb Pasha Bayrâkdar [q. v.] at Rusçuk. Meanwhile, a few days later, on 15 Djumâda I 1222/21 July 1807, he was appointed nâbiî and charged with the negotiation of the armistice with the Russians. This resulted in the armistice of Slobosia (24 August). Ghalîb Efendi was nominated re’s ul-kûttab for the second time on 19 Sâfar 1223/15 April 1808. He maintained his position after Muşta‘îb IV’s deposition on 28 July, and remained in charge under Mehmed II up to the middle of 1811. Then he became kâtîhî of the Grand Vizier. He headed the Ottoman mission in the negotiations with the Russians, aiming at ending the war which had been resumed again in October 1808. Thus he concluded the treaty of Bucharest on 28 May 1812 (for the text of this treaty, see Noradounghian, ii, 86-92). He was appointed re’s ul-kûttab for the third time on 30 Muharrem 1229/22 January 1814, but was dismissed during the etvâsî-i Radjâgb/22 June-8 July 1814. Ghalîb Efendi remained for the following nine years out of Istanbul. He was charged, with the rank
of waizir and the title of paşa, with the administration
of different provinces in Anatolia. His banishment
was due to Hâle Efendi [q.v.], a political rival whose
influence had become preponderant at the court.
He was exiled to Konya in Ramadân 1206 (June
1827), and could regain favour only after the accession
of his rival (during the evâkıhir-i Şafar 1238/7-15
November 1822).

Qâlib Pasha was nominated commandant of the
European side of the Bosphorus during the evâkıhir-
i Müharram 1239/17-26 September 1823. He returned
to Istanbul and soon became Grand Vizier (10 Rabî'
II/14 December). The main problem with which he
had to deal was the Greek revolt in the Morea. He
charged the valî of Egypt Muhammad ʻAli Paşa [q.v.]
to crush the revolt by landing troops in the
peninsula. He was dismissed from the Grand
Vizierate on 20 Muḥarram 1240/14 September 1824.
The cause seems to be his reluctance to agree to the
proposal of the Sultan for the abolition of the
askeri of Egypt Muhammad ʻAli Paşa, who died in
the Emir Bukhari Dergah. His banishment
was terminated on 1 Şâbâbân 1160/8 August
1747, after he had completed the customary term.

Mehmed Salih Efendi was appointed commandant of
Qâlibat-i Şāhân 1163/3 November 1750, at the request of the Shaykh
al-İslâm Sayyid Murtaḍâ Efendi, he was additionally
granted the rank (pâyes) of Anadolu by Şâh-i hümâyûn
of Sultan Mahmûd. On 7 Şâbâbân 1167/30 May 1754
he entered into the functions of Anadolu kâdi ʻaskerî,
and held this post until 10 Şâhân 1169/22 May
1755. On the last day of Şâfâr 1171/12 November
1757 he was appointed askeri târîkî of Rûmî, and
having fulfilled the normal term of the appointment,
he was made Shaykh al-İslâm on 16 Qumâdâ 1171/26
January 1758, replacing Dâmâd-zâde Fâlî Âl Efendi.
In this capacity he officiated at the marriage of
Muştafa ʻÎlî's sister Şâli̇ha Sultan to the Grand
Vizier Şâhîrât Râqîb Paşa at the Sultan Şâhî Sultan
Khâsil-sarayî in Eyûb. He was finally removed from
office on 5 Dhu ʻl-Ka‘da 1172/30 June 1759,
and given permission to reside in his villa at Kanûlû.

Mehmed Şâli̇h Efendi died on 1 Şâfâr 1175/25
April 1762, the first day of Şekîr Bayrâmî.
Funeral prayers were held on the following day at the mosque
of Fâth Sultan Mehmedem, and he was buried in the
cemetery of the medrese of Kâdi ʻaskerî Mehmed Efendi.
The cemetery is located in the district of Küçek
Muştafa Paşa, alongside the Petâva-kâme of Haydar Mahallesi,
and opposite the mosque of Sinân Ağa. Mehmed Şâli̇h Efendi
was a man of good character and distinguished
qualities. His son was the Shaykh al-
İslâm Ahmed Efendi.

(MEHMEH SAİD QÂLIB PAŞA — MEHMED YIRMISEKIZ)
at Edirne, and his father was Gürdüş (“the Georgian”) Süleyman Ağa, seksondjubashlı, meaning colonel of the 71st regiment of Janissaries. He himself followed a military career, after having, apparently, attended the school for pages of the imperial palace, and he belonged to the 28th regiment, hence the nickname of “Twenty-eight” (Yirmisekiz) which he retained. He rose to the rank of őrbağlı, then to that of Schwiter Ağa. But having also acquired a scholastic education which earned him the title of efendi (and which is illustrated by poems composed under the name of Paşâ, as well as by the Persian verses which he wrote when in Iran), he was assigned to administrative and financial responsibilities in the army: in the role of topkâne nâzir, he was charged with the management of the Arsenal. His diplomatic role began with the negotiations over the Treaty of Passarowitz (1718), where he was deputy plenipotentiary with the title of “receiver of taxes of the third order” (gökk-i thâlûl defendârî). In this role he acquired, according to Bonnac, ambassador in Constantinople (1716-24) “a fine reputation among the ministers of the Christian princes who were present there”. It was as a result of this experience that he was appointed to undertake the mission to France, raised on this occasion to the rank of “chief accountant” (baş bahâne işbâşi). The sending to Paris not of a simple emissary as in previous periods, nor of a permanent representative, but at last of a specially accredited ambassador (efi [g.v.]), represented a diplomatic innovation, for which the initiative belonged entirely to the Grand Vizier, son-in-law of Ahmed III, Newsghiril Ibrahim Pasha. The latter’s ulterior motives were kept secret so as to avoid disturbing foreign powers and perhaps also to avoid friction with conservative elements at home. Officially, the ambassador was entrusted with the task of conveying to the French authorities (King Louis XV, still a minor, and the regent Philippe d’Orléans) the sultan’s authorisation of repairs to the cupola of the Church of the Holy Sepulchre, which the French had requested in their role as protectors of the Christians of the East. He was also required to discuss the problem of Maltese piracy and to obtain the release of Ottoman prisoners serving as slaves in the royal galleys. But it is probable that, having experienced the setbacks ratified by the Treaties of Carlowitz (1699 [see Karlovača] and Passarowitz, the Grand Vizier in fact envisaged a strengthening of the Ottoman Empire against the Habsburgs by means of a more or less close alliance with France (though the latter had been engaged in a system of alliances with Austria since 1718), and he also hoped to acquire information regarding the scientific and technical advances taking place in western Europe and especially in France. A passage which is often quoted from the instructions given to Mehmed Efendi, required him “to visit fortresses and factories, to make a detailed study of the means of civilisation and education and to compile a report concerning those which may be applied”. The ambassador’s journey, made in the company of his son Saîd Efendi (himself a future ambassador to Sweden and France, in 1742, and future Grand Vizier) and an entourage of about a hundred persons, lasted a year, from his departure from Istanbul on 7 October 1720 to his return on 8 October 1721. Although dubious at the very principle of his mission, the French authorities received him with respect and considerable pomp, while his public appearances excited much curiosity which he is amply reflected in the writings of the diarists and journalists of the time. Arriving at Toulon on 22 November, he had to spend a period of quarantine at Maguelone, and then reached Paris by a circuitous route through the west of the country, initially following the course of the Canal du Midi, in order to avoid the south-east which was then the scene of an outbreak of plague. Mehmed Efendi arrived in Paris on 8 March 1721. Mehmed Efendi remained in the capital and its immediate surroundings until 3 August. Returning to Sète via the Rhône valley, he began there on 7 September, his return journey, with a stop-over at La Goulette. The Sefîret-name, which is known through numerous editions in Ottoman and modern Turkish and the French (two extended versions by the “jeune de langues”, Julien-Claude Galland (nephew of the translator of the Thousand and one nights), has not yet been the object of a proper critical edition (see Bibl.). It is known that a first draft was composed during the journey itself, and a version presented to the Grand Vizier immediately after his return, followed two years later by a more extended version; from his version, passages regarded as excessively critical of the Secretary of State for Foreign Affairs, the Archbishop of Cambrai, Dubois, were excited at the behest of the Marquis de Bonnac. The account with which we have to do may not perhaps respond to all possible a priori expectations of this first discovery of France by an educated Ottoman, this spontaneous encounter between two cultures. But it is necessary to take into account the limited type of experience available to an ambassador, as well as the constraints imposed on a report designed simultaneously to be read by senior officials of the state and to be widely available to the general public. Not only has the author not seen everything, but in a more or less deliberate fashion he refrains from mentioning everything which he actually knows. However, his account, such as it is, remains a no less remarkable document, notable for the curiosity, open mindedness, descriptive qualities and aptitude for judgment which it demonstrates and which place it indisputably above the only surviving precedent, the account of Vienna by Kara Mehmed Pasha in 1665; these qualities were to make it the example to be followed by all subsequent sefîret-names. Mehmed Efendi pays little attention to manners, beyond noting the curiosity of the French, the astonishing freedom of movement of their women and the respect accorded to them. He is also somewhat sparing of political information, in the sense of French institutions, the personalities of the rulers and the content of his negotiations, which led Bonnac to remark that this was not the account of an ambassador. On the other hand, he writes enthusiastically and pertinently concerning natural phenomena and especially—corresponding to the object of his mission, as noted above—the military, scientific and technical achievements that he witnessed. He shows equal interest and discernment in the artistic domain. He thus provides detailed and vivid descriptions of the Canal du Midi and its locks, the Invalides (with the organ, the chapel, the veterans’ hospital), military parades and manoeuvres on the field of the Sablons, the collection of city models or city plans in relief preserved at that time in the Tuileries, the royal manufacturers of the Gobelin tapestries and the Saint-Gobain mirrors, the “king’s garden” (the future Museum of Natural History), the Opera, the Paris observatory, the palaces and landscaped gardens of Saint-Cloud, Meudon, Versailles, Marly (with the famous “machine” drawing water from the Seine) and Chantilly. The ambassador never explicitly advocates imitation of the marvels of the France of Louis XIV and of the Regency (the enormous costs of
which he is always at pains to point out), but his role as propagandist is all the more effective in view of his 

The resulting French influence was manifested most of all in architecture in a style known as alfafa (ala franco), especially perceptible in the improvements made to the residence of Ahmed III at the Fresh Waters of Europe, known as Sa'dibâd: the construction of a canal on the model of those of Versailles and Fontainebleau along which the houses of the dignitaries were built contiguously, with the aim of imitating a classical disposition (a procedure called hüsûr-yallâr). Similarly, the two elegant fountains built by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif, Gulf of Izmir by way of the Sakarya (cf. A. Wasif), has left no trace behind it. But his role as propagandist is all the more effective in view of his "curiosities" and artistic refinements.

Another marked effect of the diplomatic mission was the establishment, in 1727, of the first printing-press using Arabic characters, at the initiative of İbrahim Müteferrika [q. v.] and Sa'id Efendi, who was impressed by examples of printing seen in Paris, a fact mentioned by Saint-Simon (ed. Boislisle, xxxviii, 201-4) but not recorded in his father's account [see MÜTFERIKA, 2, in Turkey]. The insurrection of 1730 brought a halt—a bit occupational—to this trend which, despite its superficial and even frivolous aspects, represented an important change in attitude towards the West. Affected by the fall of his patrons, Mehmed Efendi was nevertheless entrusted with the task of conveying to Poland the letter proclaiming the accession of Mahmud I (Topkapı Archives, E. 1654). He ended his career as governor of Cyprus, where he died in 1145/1732.

MEHMET ZAİM, Ottoman Turkish historian.

All that we know of his life has been gleaned from his works. He was born in 1539/1532, for he tells us that at the accession of Sultan Murâd III, i.e. in 961/1554, when Sultan Suleyman took the field against the capture of Stuhlweissenburg, was appointed secretary in the service of the governor of Syria, Teki-i zmân, which was sent to the governors of Diyarbakr, Aleppo, and Baghdad. This office, to which he perhaps succeeded on the promotion (978/1570) of the famous Retour de bord du chevalier de Camilly, juillet 1721-mai 1722, in L 'Empire ottoman, la république de Turquie et la France, Paris 1986, 73-86; F. Müge Göçek, East encounters West, France and the Ottoman Empire in the eighteenth century, Oxford 1987. (G. VEINSTEIN)
Muharram 985 (beginning of 21 March 1577) and had completed it in Dhu '1-Hijjah of the same year (beginning of 9 Feb. 1578). The date of his death and the site of his tomb are not known but he is said to have left charitable endowments in Kafraria near Salonika.

He called his book *Humay-yi qimmi* at-tawwarkh and dedicated it to his master Mehemd Sokollu. As his sources, he mentions eleven historians from Firdawsi and al-Tabari down to the anonymous *Tawwarkh-i selatîn-i alî-i Ôhtmân* and gives as his main source the *Behgii at-tawwarkh*, from which, as has been proved, he copied whole pages without a change. The book, which is not yet printed, is divided into a prefix and five large sections (aksâm, subdivided into guruhs and then again into makâlât) and concludes with an epilogue. Rieu and others have given an account of the contents from the manuscripts. In the fourth guruh of the 5th kism he deals with the Ottomans, and here alone do we have statements of any value, when the author describes from his own experience events from 950/1543 onwards. He brought his story down to the time of writing, and the last event that he mentions took place in the month in which the book was finished.

The passages in the book relating to Hungary have been dealt with by Thûry (*Tûrk történetírők*, ii, 364-89), who also collected the above data for his life, the earlier from 1390 to 1476 are given in extracts and the later from 1521 to 1566 translated in full. Of the other less valuable parts of the book, Dietz (*Denkwürdigkeiten von Asien*, i, 212 ff.) has edited a portion of the very early history, dealing with Cain and his descendants, while Von Hammer (*Sur les origines russes*, lxi, 120) edited and translated a portion on the tribal divisions of the Turks, where the *Rûs* appear as the ninth Turkish tribe. Of the later Ottoman historians, Ibrâhîm Pečevi utilised and quoted from the work of Mehemd Za'fîm from the year 949/1542 onwards.

**Bibliography:** Babinger, *GOW*, 20, 98-9, 193, where further references are given; *Istanbul kütiphaneleri tarnh-coğrafya yazmaları kataloğu*, Istanbul 1943, 100 ff.

**MEHTER** (*P*.), a musical ensemble consisting of combinations of double-reed shawms (*zurna*), trumpets (*boru*), double-headed drum (*tabl*), kettle-drums (*nakkahre, kôr*) and metallic percussion instruments. The name (*P*. ‘greater’) apparently denotes ‘the greater orchestra’. Other terms are: Mehterkhâne, Tabl-khâne, Tabl-u *Alem* (‘drum and standard’), Mehtér-i Tabl-u *Alem*, *Djemâ*-ât-i Mehtéran, and Tabl-i Al-i Ôhtmân (‘Drum of the Ottoman House’). The Ottoman mehtér was the analogue of the wind, brass and percussion ensembles used for official, municipal and military purposes in other Islamic states. Traditions current in Ottoman and in earlier Arabic sources (e.g. Ibn Khaldûn) link the *mehtér* to the Turkic and Khurasanian elements in the caliphal armies.

The Ottoman mehtér was outlawed (and physically destroyed) in 1826. Therefore, information about it is derived from written sources, the most important of which is the *Seyyad-nâmé* of Ewlyâh Çelebi (11th/17th century). Prince Cantemir’s history contains a few important passages, and short references are found in a variety of Ottoman and European sources. Another important source lies in Ottoman miniatures which frequently portray the mehtér musicians. The absence of an authentic oral tradition for the mehtér is partly compensated by the notations found in the 11th/17th century *Magâs-yi idâže u sîc* by ‘Ali Ülkî Bey (Alberto Bobowsky) and the *Kîlîb-i idâm al-musîki* ‘alâ neql at-
Ottoman tabī was the ancestor both of the folkloric drum of the same name (called also tapan, kas or hubandž in the Balkans) and of the European military drum, which has however abandoned the bass-treble division during the 19th century.

A secondary percussion instrument was the näkkāre, a medium-sized kettle-drum made of copper. The two parts of the näkkāre were tuned differently to produce bass and treble tones, and were struck with sticks (zahme) of uniform shape. A much larger kettledrum was the kōs, which could measure one-and-a-half metres at the top. It was also made of copper. The kōs was taken on campaigns and played at official occasions.

The drum of the mehter were supported by two types of brass percussion—the hållîs or zîls (cymbals) and the çevgân, a crescent-shaped, jingling rattle with bells. These instruments were played in large groups, with the zurnas and dâwûls in equal numbers, and the other instruments somewhat less numerous. In the early 19th century, Von Hammer reports that a vizier’s or pasha’s mehter consisted of 72 pieces: 16 zurnas, 16 tâbîls, 11 Boris, 8 näkkâres, 7 hållîs and 4 kōs.

The sultan’s mehter (called mehter-khâne-yi hassanî or mehter-khâne-yi hımâyûn) was twice that during campaigns.

The mehter was conducted by the lead zurna-player (zurna-ten bâği), who was therefore termed mehterbâğa. The mehter normally performed in a circular formation. During campaigns or processions (alay), the musicians were mounted on horses or camels; the kōs was taken on a camel or an elephant.

The répertoire of the mehter was termed nevbeet or faâst. Of this répertoire, approximately sixty pieces have survived. This répertoire was related to the instrumental suite (faâst-i sâxandegân) of Ottoman court music. The dominant forms were the pêşrew and the semâ, as well as the improvised laksﬁm. The pêşrews and semâ’s of the mehter form separate genres which employed somewhat simpler rhythmic cycles and larger melodic leaps than the contemporaneous court music. One performance practice associated exclusively with the mehter was the karabatak: alternation of soft passages played by a pair of mehter drummers, with tutti passages. The mehter répertoire is identified in the sources by the names of individual items, e.g. sandâk (“standard”) allâ (“horseman”), alay düzen (“parade order”), elî (“ambassador”), or the term târî (“martial”). During the 18th century, the mehter répertoire was broadened to include instrumental versions of the classical vocal forms (beste, nakhła, semâ’s), as well as folk tunes (egei, torka, kalenderi).

In 1720 the Porte presented the Polish court with a complete mehter ensemble. The gift was very much appreciated, and soon after Russia and then Prussia requested similar ensembles. By the 1770s, many European courts had mehter bands, and some sent their bandmasters to Istanbul to study the mehter. The main musical result of this cross-cultural exchange appears to have been the introduction of several percussion instruments into European military bands and court orchestras, which gradually led to the augmentation of other instrumental sections and hence a change in orchestral texture. Possible influence of the mehter melodies themselves upon European military music of the 18th century has not been adequately researched. In addition, in the South-East European territories under Ottoman domination or influence, the music of the mehter was an important factor in the diffusion of Ottoman-Islamic musical principles.

The destruction of the Janissary Corps in 1826 led to the neglect of the mehter répertoire, which appears to have been completely forgotten by the end of the 19th century. During the First World War, an attempt was made to revive a version of the mehter in accordance with the needs of the modernised Turkish army. Hymns and marches (the latter built on a mixture of Turkish and Western musical ideas) were commissioned from classical composers such as İsmâ‘îl Hâkki (d. 1927), Kâzım Us (d. 1943) and Ali Riza Şengel (d. 1953). Some private mehter ensembles were created during the War of Liberation, but these were not institutionalised during the Republic. In 1952, a new mehterhane was established in conjunction with the Military Museum in Istanbul. The costumes and some of the performance practices of this new mehter are largely authentic, but its répertoire is drawn almost exclusively from the hybrid mehter music of the First World War.

**Bibliography:** Sources for the mehter are few. Almost all Ottoman (but almost no Western) sources for the mehter are treated by Haydar Sanal in Mehter musikisi, Istanbul 1964. Sanal’s book is the major point of reference for any study of the mehter and its music. In contains transcriptions of virtually the entire authentic répertoire of the mehter found in the works of 'Ali Ülê Kathryn and Cememir. Abundant references to Ottoman sources may be found in Sanal’s book. Of these, the most important is Evliyâ Celebi’s Şehlâne-nâm, i.e. Several aspects of the mehter were treated by Zeki Mehmet Pakalh in Orhant’s Tarîh deyimesi ve terimleri sâıcilikü, ii, Istanbul 1971, 444-51. See also H.G. Farmer, Turkish influence in military music, London 1950; K. Signell, Mozart and the Mehter, in The Consort, no. 24 (1967), 310-22. (W. Feldman)

**MEKNÈS [see MIKNÂS].**

**MELILLA** (in modern Arabic: Mîlîya, Berber Tamlit, “the white”; in the Arab geographers, Melîlah), a seaport on the east coast of Morocco on a promontory on the peninsula of Geûtîyya at the end of which is the Cape Tres Forcas or the Three Forks (Râs Hûrk of the Arab geographers, now Râs Werk). Melilla probably corresponds to the Rassadir of the ancients (cf. Rhassad or Rasat), the Russad of the Antonian Itinerary. Later Africanus says that it had belonged for a time to the Goths and that the Arabs took it from them, but in reality we know nothing of the ancient history of the town.

It is only at the beginning of the 4th/10th century that Melilla appears in the Muslim history of Morocco. In 318/930, the Umayyad Caliph of Spain, 'Abd al-Rahmân III al-Nâşir Li-Dîn Allâh, succeeded in detaching from the Fâtîmids the famous Mîknânî chief Mūsâ b. Aﬁf ‘l-’Afiya, who had established his authority over the basin of the Mououya and the district of Taza; having seized Melilla, al-Nâşir built ramparts around it and gave it to his new ally, who thus had at his command a base of defence (mâkit) against the Fâtîmids of Idrîsîyya and a port which made communication with Spain easy. Later on, the descendants of his son, al-Bâri b. Mâsû, rebuilt the town, which remained one of the strongholds of the Mîknânî in Morocco down to the time of the decline of the power of the tribe, who were definitely defeated and scattered by the Almoravid Yusuf b. Tâhîfîn in 462/1070.

But the Mîknânî must have abandoned it before their dynasty was crushed by the Almoravids; for al-Bakiî shows us that by 459/1067 a descendant of the Hammâmîd Idrîsîds of Spain had been summoned to
MELILLA — MEMON

Melilla and recognised as ruler by the people of the district.

At the period when al-Bakri wrote (460/1068), Melilla was a town surrounded by a wall of stone; inside was a very strong citadel, a great mosque, a hammam and markets. The inhabitants belonged to the tribe of the Banū Wartād (or B. Wartardā), a branch of the Baṭṭyāya group of the Sāḥḥāḍa. Melilla had a harbour which was accessible only in summer. It was the terminus of a trade route which connected Sīdīlmāsah with the Mediterranean through the valley of the Moulouya and Agarsīf (French Guerci). The trade must have been considerable; the principal exports were no doubt those mentioned by Leo Africanus, sc. iron from the mines of the mountains and honey from the Kabdana country; we may also add pearls which were taken from oysters found in the harbour itself. Al-Bakri notes that by the Banū Wartād (who also occupied the stronghold called ʿKūlī Gāret), the Matmātah, the Aḥh Kahlān, the Mānīsā of the “White Hil” (al-Kudya al-bayyadāt), and the Gḥassāṣa of the massif which ends in Cape Tres Forcas (Qaḥal Ḥurk). All this region was then independent and had no political link with the kingdom of Fās or that of Nakūr.

But in 472/1080 the Almoravid sovereign Yūsuf b. Tāshfm took Melilla and added its territory to the Almoravid empire. In 536/1141-2, in the course of the Tashfm took Melilla and added its territory to the Almoravid empire. In 536/1141-2, in the course of the Almoravid pursuit of the Almohads, a body of the latter set out from Tāmsāmān to lay siege to Melilla, which was taken and plundered. In 671/1272, the Marinid sultan Yaʿkīb took Melilla from the Almohads, and Ibn Khaldūn simply mentions it as a fortified place. It seems in fact that these three captures of the town had destroyed its commercial importance to the advantage of another town on the west coast of the peninsula of the Gelṣyya, sc. Gḥassāṣa, also called al-Kudya al-bayyadāt, the Alcudia of the Portuguese; in the 8th/14th century it is this latter town that appears as the Mediterranean port of Fās and Taza, and it was through it that political and commercial relations with eastern Spain and Italy (Genoa and Venice) were carried on.

Leo Africanus reports that in 895/1490, hearing that an attack on it was planned by the Spaniards, the inhabitants abandoned the town and fled to the mountains of the Baṭṭyāya; to punish them for this the Wazīṣārid sultan had the town burned down; when in Muharram 903/September 1497 the Spaniards arrived, they were thus able to disembark without resistance and occupied the town, abandoned and half-destroyed. The occupation of Melilla enabled the Spaniards to attack the port of Gḥassāṣa by land and it was taken in Dhu l-ʿAḍaʾ 911/April 1506. The Moroccans recaptured it in 940/1533, but the dangerous proximity of Melilla henceforth deprived it of importance. The commercial activity of this region was moved farther west to the port of al-Mazimma [see al-Muṣayma in Suppl.], and the centre of Muslim resistance in this part of Morocco was henceforth the stronghold of Tāzīḡā, which after having been the capital of the Marinid fief of the Banū Waṭās, became that of a practically independent leader of holy war.

After passing into the hands of the Spaniards, Melilla was continuously besieged by the Muslims, mainly by the forces of the leaders of holy war established at Tāzīḡā and at Mīḡlāw (the Meggeo of Leo Africanus). Occupied by the Christians, the town naturally became one of the places in Morocco in which Muslims pretenders and rebels found asylum and support against the central power, especially at the beginning of the Saʿdi dynasty. In 956/1549, it sheltered the dispossessed Waṭāsīd Abū Ḥassān, “king” of Bādis; in 956/1550 it welcomed with his family Mawlay Ṭāmb “king” of Debīl. It was from Melilla that in 1003/1595, the pretender al-Nāṣir b. al-Ghālib bi-līlāh set out against his uncle the sultan Abū al-Māṣūr.

Later, Melilla only appears in history in connection with sieges which it had to suffer: sieges by Mawlay Ismaʿīl in 1098/1687 and 1106/1695; siege in 1188/1774 by Mawlay Muhammad b. ʿAbd al-Ḥamīd, that of the Spanish-Moroccan war of 1893 (Sidi Wārayḥī affair). From 1903 to 1908 the region of Melilla was the scene of struggles between the pretender al-DjāliĪ al-Rūgī, established in the kūba of Selwān, and the troops of the sultan ʿAbd al-ʿAẓīz; defeated and receiving no support, the latter had to take refuge in Spanish territory and be repatriated. Still more recently in 1921, the same district witnessed the sanguinary battles between the Spaniards and the Rifians under ʿAbd al-Karīm (Anwāl disaster) (C.R. Pennell, A country with a government and a flag. The Rif War in Morocco 1921-1926, Wisbech, England 1986, 166-70, 198). Melilla is for Spain a “place of sovereignty” administratively dependent on the province of Malaga, like Ceuta [see SABTA], which itself depends on that of Cadiz. Before the establishment of the French protectorate, Melilla, being the most westerly part, was the landing-place for all the European merchandise (cotton, sugar, tea) intended not only for eastern Morocco but also for the Saharan regions of Morocco and Orania. It has now lost its commercial importance, but its population has considerably increased: 9,000 inhabitants in 1880, and 86,500 on the eve of Moroccan independence. It is also the seat of an important garrison.

MELLĀḤ [see MALLĀḤ].

MEMDUH SHELCKET ESENDAL [see ESENDAL in Suppl.].

MEMON [see AL-MAYMAN].

MEMON, the name of one of the three well-known Muslim trading communities of Gudjārāt, the other two being the Bohorās and Khōḍājahs [q.v.]. They claim to have embraced Islam around the 6th/12th century. Their name, originally derived from muʿīmīn “believer”, was later corrupted to Memun. They were converted to Islam from the trading Lohana and Kutch Bania castes living in Sindh and Kāčh (Kutch), either by a son or a descendant of ʿAbd al-Kādir al-Dīlān (d. 561/1166 [q.v.]). They are devout Sunnis and follow the Hanafi school of law. Most of them, except those who stayed back in Sindh, speak the Kacchi dialect of Gudjārāt. Following their pre-conversion practice, they do not allow inheritance to their widows and daughters. The most sacred shrine of their pāt, after that of ʿAbd al-Kādir al-Dīlān in Baghdad, is that of Khāṣṣā Muṣān al-Dīn Čiğait [q.v.] in Adjinār (K. B. Faridi, Gazetteer of the Bombay Presidency, i,2, Gujarāt population, Musalmans and Parsees, Bombay 1899, 50-7). They celebrate the first ten days of Rabīʿ II by reciting the life history of ʿAbd al-Kādir al-Dīlān at a religious gathering known as ziyāra maghfīs (S. Edwardes, The Gazetteer of Bombay City and Island, Bombay 1909, i, 192-3).

They were a wealthy community living in Surat during the hey-day of the city’s prosperity. As Surat
sank into insignificance with the rise of Bombay (during the 19th century), they moved to the new city, attracted by its trade and commercial opportunities. After the famine of 1815 in Gudjarat and Ka'ooth, they migrated in large numbers and first began to do business in Bombay by opening tailoring establishments in Lohar Chawl. Their status progressed steadily as Bombay advanced in material prosperity, and they indulged in every kind of trade from shopkeeping, broking and peddling to furniture dealing and timber business and included among their number some of the richest individuals in Bombay (Edwardes, Gazetteer, i, 178). The Memon Chamber of Commerce, established in 1929 with a view to promote and protect the interests and rights of members in matter of inland and foreign trade, transport, industry, banking and shipping, had over one hundred members (Modern Bombay and her patriotic citizens, Bombay 1941, 110-11). With the partition of India in 1947, a considerable number of them migrated to Pakistan, and now some of these are the leading industrialists and the wealthiest merchants of Karachi. They have trade relations with East Africa, the Persian Gulf and the South-East Asia, especially Malaya and Singapore. A conservative, revivalist movement is currently gaining strong support among the Memons of Gudjarat and Bombay.

Bibliography: In addition to the works cited in the text, see S. Edwardes, By-ways of Bombay, Bombay 1912; 82-7, for a description of middle-class Memon daily life; P. and Oliva, Strip, The peoples of Bombay, Bombay 1944; 33-4. (I. POOnAWALA)

MEMPHIS [see MANF].

MENDERES, the name of three rivers of Anatolia which are known in modern Turkish by the name of three rivers of Anatolia which is usually preceded by the pertinent epithet: Büyük ('Big'), Küçük ('Little'), and Eski ('Old'). They are the classical Maiandros, Kaystros and Skamandros.

1. Büyük Menderes. It is part of the geological and hydrological features of western Anatolia that consist of latitudinal mountain chains flanking long valleys, the latter used and enlarged by rivers that flow into the Aegean Sea. These valleys, the mountain slopes along them and the estuaries have in turn been an inviting ground for habitation and economic and cultural development. Büyük Menderes with ancient Miletus, Küçük Menderes with Ephesus, Gediz [q.v.] (ancient Hermos) with Izmır, and Bakır Çayı (ancient Kaykos) with Bergama near their estuaries or courses, are the principal ones.

The exact length of the Büyük Menderes depends on which one of its upper arms should be referred to by this name (up to 529 km; drainage area of some 25,000 km²). The noteworthy fact is that its headwaters reach into the westernmost extension of the inner Anatolian plateau. The stream usually viewed as the beginning of the Büyük Menderes is fed by springs and brooks in the mountainous vicinity of Dinar (ancient Apameia). As it descends from the plateau, this river receives such tributaries as the Kula Çayı, Banaz Çayı and finally the Ğürtük Su (ancient Lykos) near Sarayköy. After Sarayköy, the Büyük Menderes follows the long, widening valley almost due west, at a slower pace, until it is deflected in the vicinity of the ruins of Magnesia-on-the-Maeander by the south-west oriented coastal range of Gümüş Dağ; it then turns south-westward and, avoiding a second obstacle represented by the Samson Dağ, it enters the sea some 10 km south-west of Balat [q.v.] (ancient Milet). The mountains flanking the Büyük Menderes on the south are cut by several longitudinal valleys used by its principal tributaries from that side: the Vandalas Çayı (ancient Morsynos), Ak Çayı (ancient Harpasos), and Ğine Suya (ancient Marsyas). The lower part of the middle course of the Büyük Menderes, roughly between Nazilli and Soke, flows through an alluvial plain marked by a deep and soft soil layer; this and the mild inclination rate with the resulting slowness of the current produces the winding course that has made the term "meander" better known than the river itself. The large amount of silt brought by the Büyük Menderes causes the coastline at its estuary to advance several metres each year. This is illustrated by the fate of ancient Miletos, which in the first millennium before our era was a port on the Latmikos kolpos, a bay to the southeast of the ancient estuary; by the 4th century A.D., the bar created by the silt turned the bay into a lake (the present-day Bafa Gölü is a remnant of this bay) and the port into a town on the river, but several kilometres from the coast (a similar fate threatened the recent centuries the Gulf of Izmır, saved only by a re-routing of the Gediz estuary further north in 1886).

The Büyük Menderes seems to have been little noticed by Islamic geographers. One exception is al-'Umarî (d. 750/1349), whose confusion, however, stresses the unfamiliarity of Islamic scholars with this river; he states that the "Mandaros" flows into the Black Sea and is as large as the "Miletos". The river is briefly mentioned in Fîrî Reis's portolan Kitâb-i bahriyye as "Mendiraz suyi" in the 927/1521 version (Topkapı Sarayi Müzesî, Bağdad Köşkü ms. 337, fol. 22b, text; on the map, 23a, as "Balât suyi"), and as "Ulu Mendirez" in the 932/1526 version (fascim. ed., Istanbul 1935, 209; text; on the map, p. 190, as "Mâi-i Mendirez"). Kâbit Celebi's [q.v.] Dihân-nâmi (in the edition by Abî Bakr b. Bakr, section al-Dînânî, second half of the 11th/17th century) has a map of Anatolia (between pp. 629 and 630) but without any trace of the river; the "Nehr-i Mendirez" is, however, briefly discussed on p. 634 of the text, with more detailed discussions of the general area on pp. 636-8. Ewliya Celebi [q.v.] appears to be the earliest Islamic author who describes the area along the river at some length (Bâdîî, Istanbul 1935, iii, 136-7; Istanbul 1935, iv, 92). He is followed by European travellers and scholars of the 17th to the 20th centuries; the results are perhaps best exemplified by the field trips and publications of A. Philippson (see Bibl.).

The importance of the Büyük Menderes valley, dominated by the warm Mediterranean climate yet also well-watered, has persisted, throughout political and ethnic changes, since antiquity. The fertility of the alluvial plain below and of the higher fringes along the parallel mountains combine to yield abundant as well as varied agricultural, horticultural and medicinal crops and products, such as raisins, figs, olives, cereals and cotton. This productivity is reflected in a dense agricultural as well as urban population, handicrafts and commerce. The towns and settlements are mostly located at a certain distance from the river in the more salubrious foothills, the majority being on the northern side. That side has always functioned as one of the principal avenues of trade and travel linking the Aegean coast with the Anatolian interior. Miletos and Ephesus were the chief maritime outlets in antiquity. In the Middle Ages, Miletos, known as Palatia and Turkicised as Balât, retained some importance, as it could be reached by smaller ships using the Menderes to advance some 10 km south-west of Balat. In the 7th/13th century, it served as the point of departure
for maritime expeditions of the newly-established Beys of Menteshe [see MENTESHE OGHULLARI], but soon trade proved more profitable, and a treaty was concluded with the Venetians by which the latter opened navigation of the valley (by 1555; the treaty was later confirmed by the Ottoman sultans). Venetians and Genoese sold textiles, soap, tin and lead, and bought such products as alum, rags, saffron, sesame, honey and wax, nut-galls, morocco leather, liquorice, dried raisins, wheat, barley and slaves; they also bought fish, in particular eels from the Bafa lake that could be reached by fishermen (this fishing seems to have survived to this day). Trade at Balat still existed although at a diminishing rate, in Ewliya Celebi's time, when the traveller visited the place in 1082/1671-2; he states that "the saccoleva barges, the barges from Gallipoli and Kos, and the frigates from Syme and Nauplia ... sail into the Menderes river and take on merchandise at this town of Balat" (Seyidhatname, ix, 147). Gradually, Balat was abandoned, due to the continuing siltation of the estuary and to the malaria-infested climate. Another reason may have been the rise of Izmir in the modern period, the first railway concession in the modern period became the chief maritime outlet for the area. Thus the first railway concession in Anatolia, granted in 1857 to a British company, resulted in a line linking Izmir with Aydin and the Büyük Menderes valley. The railway has recently been joined by a modern and denser highway network.

The traditional assets of the Büyük Menderes valley are being enhanced by modern hydraulic works such as dams, canals and drainage systems, leading to an elimination of malaria-infested stretches on its lower course, expansion of cultivable areas and creation of hydro-electric power (the latter characteristic also of some of the tributaries, such as the Kemer Baraji on the Ak Çay). The valley, especially on its middle and lower course, it thus one of the most densely populated areas of Turkey.

2. Kütük Menderes. Unlike the Büyük Menderes, this relatively short (145 km; drainage area of 3,140 km²) river does not originate in the Anatolian plateau but among the latitudinal mountain ridges closer to the Aegean sea, near the Bozdag just north of the town of Kula (ancient Koloe). It Flows some 15 km westwards into the valley between the two mountains chains that separate it, on the north, from the valley of the Gediz and, on the south, from that of the Büyük Menderes. There, near the town of Beydağ, it sharply turns west and follows that course until the hills of Alaman Dağa deflect it south-westward. Having crossed the coastal plain, it enters the sea some 5 km west of the town of Selçuk and the ruins of ancient Ephesus. The latter city was one of the principal ports on the Aegean in antiquity, but the river, like the Büyük Menderes in the case of Miletos, brought silt that ultimately made the coast advance to the point of leaving Ephesos as a harbour. As in terms of physical geography, in those of human geography too, the Kütük Menderes displays both analogies with its larger namesake and differences from it. The alluvial plain of the valley, the higher slopes along the mountains and the warm Mediterranean climate accompanied by an adequate water supply, make this area yield an abundance and variety of agricultural products; this has spurred dense habitation since antiquity, the growth of towns and handicrafts, and a commerce facilitated by the maritime outlets, exemplified by Ephesus in antiquity, its successor Ayasoluk [q.v.] and the latter's successful rival Scalannuva (Kuşadası) in the Middle Ages, and Izmir in the modern period. The valley of the Kütük Menderes, however, does not reach deep enough into the Anatolian interior, and today as in antiquity and the Middle Ages, the principal routes in that direction follow the course of the Büyük Menderes or of the Gediz; the modern railway in the Kütük Menderes valley, an offshoot from the Izmir-Selçuk-Aydın line, stops at Odemis near the eastern end of the valley.

3. Eski Menderes. The sources of this short river (about 75 km) are on the northern slopes of the Kaz Dağ (ancient Mount Ida) north of the Gulf of Edremit. It enters the Çanakkale Boğazı [see ÇANAKKALE BOĞAZI] at its south-western end near Kumkale some 7 km north-west of the ruins of ancient Troy.

MENDERES, ADNAN (1899-1961), Turkish statesman. Born and educated in Izmir, he studied at the Ankara University Faculty of Law, following service in the First World War and Turkey's War of Independence. His political activity commenced upon his joining Ali Fethi Oktay's Free Party in 1930, when he became this party's chairman in Aydin. When the party was closed down, he joined the People's Party (later called Republican People's Party, RPP) and was elected repeatedly to the Grand National Assembly (GNA) in Aydin from 1931 onwards. By 1945, he was a prominent parliamentarian. He then presented to the RPP's parliamentary group a a "Four-man Proposal", signed by himself, Celal Bayar, Fuat Köprüülü [q.v.] and Refik Koraltan, requesting liberalisation. Menderes, Köprüülü and Koraltan were ousted from the party and Bayar resigned; together with other breakaways from RPP, they formed the Democrat Party [see unter, ii] on 7 January 1946. The DP won 62 GNA seats in that
The DP won the 1950 electoral campaign by representing itself as an agent of change and Menderes began to carry some of its promises, including: (a) Economics and development: Mechanising agriculture, building roads (largely in rural parts), encouraging industry (chiefly consumer industries), erecting dams (for irrigation and energy production), and reconstructing the larger cities. (b) Social services: Increasing the scope of old-age and life insurance payments, building workers' hospitals and encouraging trade union activities. (c) Cultural: Inaugurating the Aegean University in Izmir, the Middle East Technical University in Ankara and the Ataturk University in Erzurum, and expanding the scope of primary and secondary education. However, Menderes' appeal to private initiative (instead of the RPP's statism) to finance these projects proved only moderately successful. The United States provided tractors and credits, which sufficed only in part; hence, Menderes opted for encouraging foreign investments and loans, which eventually increased Turkey's debt and raised inflation. His foreign policies were moderately successful. The United States provided military credits, which contributed to the American revivification of Islam. In the face of a growing political and economic crisis, Menderes had to withdraw, ironically, from his earlier championship of individual and political liberties: martial law was imposed repeatedly, rival political groups were banned or deterred, the press was muzzled and the military became increasingly politicised in the late 1950s. On 27 May 1960, the military intervened, arresting Menderes and the entire DP leadership. They were tried in Yassada; Menderes was sentenced to death and executed on 17 September 1961. The trials were considered fair, but many Turks thought the sentences too harsh: the Justice Party, set up in 1961 largely as a successor to the banned DP, took its name from a popular demand to rehabilitate Menderes and the other DP leaders. In the late 1980s, Menderes was rehabilitated in Turkey; streets were being named after him in various localities.

Turkey's politics: the transition to a multiparty system, Princeton, N J. 1959, index; Altemur ... land on the Peloponnese and the castle of Vatika, from where the ecclesiastical authorities derived most of their dues in Venetian hands, together with a strip of land on the Peloponnese and the castle of Vatika, from where the ecclesiastical authorities derived most of their dues.
and the inhabitants had much property and where the corn was grown needed to feed the city. The rock itself produced nothing. During the war of Bayezid II with the Signoria (1480 to 1500), the town of Menekshe, which was captured by the last Venetian strongholds on the Peloponnesse, Koron, Modon and Navarino and the coastal strip in front of Menekshe. Only Nauplion and Menekshe held out for some decades and were left to Venice in the treaty of 1502-3. After that, all food had to be imported from the Ottoman-controlled mainland. Vatika, now Ottoman, was maintained as a stronghold. The Venetian register T.D. 367 of 1528 (pp. 171-3) mentions a garrison of 36 men and a Divâdar, all Muslims, and a Greek auxiliary force of 15 men, who were freed from divîye and ispensî and the extraordinary taxes in exchange for their services.

During the treaty of 1540, which ended the Ottoman-Venetian war of the 1530s, the last remaining Venetian bases on the Peloponnesse were ceded to the Ottomans. The Venetian soldiers, the artillery and all inhabitants who wished to leave, left the town on 24 November 1540. On the following day, the Venetian Podesta Antonio Garzoni handed the town over to the Imperial Dragoman Yenus Bey under command of Kasim Pasha, Sandjak Begi of the Morea. The evacuated inhabitants were settled elsewhere on Venetian territory. Scions of the Mamonas family went to Zante-Zakynthos, others were transplanted to Crete. Trade was hard, on a low plateau on the shores of a bay, and the few of them returned and became Ottoman subjects. The acquisition of Menekshe is only briefly mentioned by the Ottoman chroniclers, including Lutfi Pasha, who had a large share in the negotiations of the treaty. After the Ottoman conquest, the town lost its importance as a trading community and outpost of the West. Its population must have been considerably smaller than in the Byzantine-Venetian period, and its importance largely military. The lemal Defter T.D. 565 (pp. 79-88) of the sandjak of Mezistra (Mistra), from 981/1573-4 mentions a force of 104 men under a Divâdar and six gunners under a Serî Topçîyan. The total tax yield of the town, which was an Imperial khabîs, was 28,665 akês, of which 6,000 akês came from harbour dues. Between 1540 and 1570 the town was parceled out in the Byzantine-Venetian period, and after the last-mentioned date was incorporated in the town of Mezistra, with a total population of 2,075 families (including 450 Muslims, 700 non-Muslims as well as 191 bachelors. This brings us, together with the garrison and their families, to a total population of ca. 2,500 people, which is relatively large for the small inhabitable space. Seven local Christians had a special status, delivering gunpowder to the castle in exchange for a tax reduction. Not a single Muslim settler is recorded. The greater part of the tax on economic activities was collected from the harbour dues (7,500) and market dues (5,000) leaving 4,725 akês for all the other activities. The amounts for flax and wine and olive oil tell us something of the importance of these sectors. Grain had almost entirely to be imported from the mainland. The dues on these agricultural products tell us that the town had regained some property on the mainland.

During the Cretan War (1645-69), Venetian forces tried to capture Menekshe but failed (1653). The lower town, on a low plateau on the shore, was one of that occasion surrounded by new walls, those which we can still see today. Ewliyâ Celebi, who visited the town in 1667 on his way to Crete, describes the new walls with some detail, calling them the work of Sultan Mehmed IV. The dangerous situation created by the war is also reflected in the increase of the garrison of the town: 523 men according to the budget of 1079-80/1669-70, with a group of ‘‘New Gunners’’ and soldiers and gunners for the Western and the Eastern Bulwark mentioned explicitly. The yearly expenditure for this large garrison was defrayed by the divîye of the district and the harbour dues of Menekshe itself. The budget also mentions a repair of the walls of the lower town. Ewliyâ has left a detailed description of the town as it was in his time. He mentions 500 houses in the citadel and another 1,600 small stone-built ones in the lower town, which must be a gross exaggeration; the enclosed space measures only 4 hectares. In the citadel on the rock was the Mosque of Sultan Süleyman, or Ferhiye Djamî, a converted church. This is the 13th century Byzantine church of St. Sophia, built by the Byzantine Emperors Andronicus II and still preserved. Besides that one, Ewliyâ mentions the Mosque of Deriş Mehmed Agha. In the lower town were another two domed mosques and two meşîtes, besides two meşîtes, two nekîebes and fifty shops. The meşîtes do not appear on the official and contemporary list of meşîtes in European Turkey and must be a mistake; Islamic life was not very developed in the town.

During the war of 1683-99 with the Christian Powers, the Ottomans lost Menekshe and the entire Morea to Venice. The town surrendered in August 1690 after a fourteen months’ siege, the last stronghold in the Morea to give up. Two thousand Turks came out of the fortress, 300 of them soldiers. During Venetian rule, a large number of churches were built in the town, which still exist today (17 of the 25 preserved churches). The Ottoman buildings were destroyed except the church-mosque on the rock. The Venetian census of 1700 mentions 428 families living in the town of Menekshe, altogether 1,622 souls. According to the same source, the town was the chef-lieu of a district numbering 17 villages and 3 monasteries, with a total population of 2,675 families or 8,366 souls. The Venetians were masters of the Morea in 1715, after the swift campaign of the Grand Vizier Dâmid ‘Ali Paşa. The town surrendered again, although it had two years’ provisions. When in 1128/1716 an Ottoman census commission described the town, it had only three Muslim inhabitants, of whom two were converts, and 144 grown-up non-Muslim males (nefr) (Kuyudu Kadime no. 20, Ankara). The tax account shows that, on the mainland belonging to the town, a considerable quantity of cotton was produced. Wine is no longer mentioned. The town recovered yet again, remaining the chef-lieu of a kada and seat of the Greek archbishopric. When Pouqueville visited it at the beginning of the 19th century, it had 2,000 Turkish and Greek inhabitants. The kada produced a considerable amount of flax and olive oil for export. Martin Leake, who visited the town in the spring of 1805, mentions that there were 300 houses in the (lower) town and 50 in the castle: all, except about six, were Turkish. Before the Russian invasion of the Morea (1770) there were 150 Greek families, but they, as well as the Greek inhabitants of the villages in the districts, fled after that event to Anatolia (the lands of the Dere Beys) or to the islands. During the Greek War of Independence, Menekshe was stormed into submission as early as 1820. It was surrendered on terms. The survivors, some 500 or 700
people, were brought to Asia Minor by ship. After the War and the disappearance of the Muslim community, the town never recovered. Sir Thomas Wyse, British plenipotentiary in Athens, counted during his visit in 1838 no more than a hundred Greek families, half the houses being in ruin. Nowadays, the upper town on the rock is an empty field of ruins, whilst for a long time the lower town was a ghost city in which only a few families lived. The Greek census of 1961 gives only 82 inhabitants. A small fishing village has developed on the mainland, opposite the rock, and eventually also a railroad from Izmir to Manisa and the Anatolian interior, with the coastal road (and passim 1953-56), which was part of the "Tourkoy" had moved into the "Mainenomenu kampsos"; this term is reflected in "Aşağı-Paşa-zade's " [q.v.] history as "Menemen owasi". The Turks, led by the Beys of Sarukhan [q.v.], eventually controlled the area, and Menemen became one of this principality's possessions; the earliest dated building in Menemen would appear to be a mosque erected by the Sarukhan Bey Isâk (Ülu cami or Sinbul Pasa camii, inscription dated 1759/1557-8). Menemen continued to be a possession of the Sarukhan also for some time after the Ottoman conquest effected early in the reign of Murâd I (761/911/1360-89).

The name of Menemen was also pronounced and written as Melemen, whereas that of the district (kadâ) appears in Ottoman documents and Ewliyâ Celebi (1587-1659) and later in the works of the Turkâniyev (see the latter work for the etymology attributed to these names). Ewliyâ Celebi gives a detailed description of Menemen. The kadâ, administered by a voyvodâ, was part of the sandjak of Sihla or Sughlâ; it was a kâhâs of the wilâde sultan (possibly since Süleyman's mother Hafsa Sultan's time), yielding 400 yâses annually; the town had 300 shops and a bezâme; in summer it suffered from a mosquito infestation that became proverbial (Sevbatinme, Istanbul 1935, ix, 84-7). The town also had a Bekrî tekke with the tomb of Bekrî Baba. Prior to the exchanges of the Republican era, the population of both the town and the district was mixed; Greeks predominated in the town itself (4,683 Rûm, 3,606 Muslims), and Muslims in the kadâ as a whole (17,261 Muslims, 7,195 Rûm; there were also smaller numbers of Armenians, Jews, Catholics and "foreigners" (Seybatname, Istanbul 1935, ix, 84-7). The town continued to be a possession of the Sarukhan also for some time after the Ottoman conquest early in the reign of Murâd I (761/911/1360-89).

**MENEMENLI-ZADE MEHMET TAHİR,** minor Turkish poet of the *Therwet-i Funun* [q. v.] period (1862-1902). He was born in Adana, into a notable family, the son of Hâşim Habib, director of the telegraphic department in the office of the Grand Vizierate. He was educated in Istanbul and graduated from the school of Political Science in 1883. After serving as Director of Education in Adana, İzmir and Salonica, where he also taught Turkish literature in the local lycées, he became, in Istanbul, director of the secretariat in the Ministry of Education and, at the same time, he taught in the School of Political Science and in the University. He died suddenly at the age of forty. He collected his poems, which follow the language and style of the *Therwet-i Funun* school, in various booklets, the most known of which is *Eliban* ("Melodies") (1885). His *Edêhesiyyet-i edemâyîyye* ("Ottoman literature") is a didactic book on the rules and technical terms of Turkish literature. *Regiyîzâde Mahmed Ekrem* [q. v.], a later Tanzier writer and critic, who had become the leader of young Westernist writers, published in 1886 his *Takdir-i edelâh* ("Appreciation of the melodies") in praise of Menemenli-zâde, where he severely criticised Mu’allim Nâdî [q. v.], the leader of the conservatives, who retorted in his *Demdele* ("Angry talk"), (1887) more violently. This famous controversy made Menemenli-zâde Tahir a well-known poet in the late 1880s.

(FAHİR 12)

**MENGLİ GİRAY I,** one of the greatest kâns of the Crimea (Kırım [q. v.]).

As the contemporary sources are controversial, the chronology of his three reigns up to 883/1478-9 cannot be firmly established. On the death of Hâddüji Giray Kâhan I (671/1466 [q. v.]), disputes arose among his numerous sons about the succession. Mengli Giray first succeeded in seizing the throne for several months, but finally had to cede it to his oldest brother Nûr Dewlet. Mengli Giray's second reign probably lasted from 672/1468 to 879/1474-5, when he had to flee to Mangub (Menkiş) or Kafa, while Nûr Dewlet and, later, two other pretenders struggled for primacy. In 833/end of 1478 or beginning of 1479, Mengli Giray regained power and remained kâhan until his death in Dhu'l-Hijjah 920/Feb. 1513. Since the leader of the Şirîn clan, Eminek, in 879/spring 1475 had sought Ottoman intervention in the Crimea for military strife and help against the menacing Great Horde [see BAYRÎ], with the result that the Genoese colonies along the Crimean shores had passed under Ottoman control, the kâhanate was considered as under Ottoman protection. In 889/1484, Mengli Giray participated in Sultan Bayezid II's successful campaign into Moldavia and was recompensed with territorial gains on the Dniepr and Dniestr [see MAGYAR].

No mere Ottoman vassal, Mengli Giray generally sought to stay on good terms with Muscovy, which he considered an ally against the Great Horde; while for Muscovy, the kâhan's friendship meant support against the declining Poland-Lithuania. After Mengli Giray had subjugated the Great Horde in 900/1502, he demanded the traditional tribute from Muscovy and Poland-Lithuania for himself. A Crimean-Russian confrontation, however, broke out only under Mengli Giray's successors. Mengli Giray, who was also a patron of the arts, must be considered as the real founder of the Crimean state. He also played a role in the struggle for the throne of the later Sultan Selim I, his son-in-law (1511-12).

(B. KELLNER-HINKELE)

**MENGÜÇEK** (Manguşçak), a Türkmen chief who was the eponym of a minor dynasty which appears in history with his son Isâk in 512/1118 in eastern Arran, and with the town of Erzînjân [q. v.], but including also Divriği and Koghomia/Colonia-Kara Hisar Şarki.

His territory accordingly lay between that of the Dânîşîmdînis [q. v.] on the west, of the Saltûkids [q. v.] of Erzurum on the east, of the Byzantine province of Trebizond on the north and of the Artukîd principalties [see ARÔKUS] on the south; it thus commanded the traditional highway for invasions from Iran into Anatolia. Hardly anything is known of the history of the Mengüçekids. In 1118, menaced by the Artûkîd Balak, Isâk allied with the military commander of Trebizond, Theodore Gavras; both of these were taken prisoner by the Dânîşîmdînî Khâzî, Isâk's father-in-law, who speedily freed him. In the middle of the 6th/12th century, the Mengüçekid principality was divided between two brothers, the younger one receiving the little town of Divriği [q. v.]. The elder branch acquired some fame under the long reign of Bahramşâh (ca. 555-617/1160-1220). He made Erzînjân a cultural centre, for which evidence is provided by his protégés, the Persian poets Nizâmî and Khâkânî [q. v.], and the Arab scholar 4Abî al-Laîfî al-Bâghdâdidî [q. v.], who spent 12 years there. The town was, however, also the greatest Armenian centre of eastern Anatolia, still famed for carpet manufacturing in Marco Polo's time. But after Bahramşâh's death, the
Menguč kids were drawn into the complex happenings linked with Djalal al-Din MankubirtT's [q.v.] invasion, and the Seljuk KaykubidT I [q.v.] annexed their territory, compensating the Menguč kids with small fiefs. The Diwirgi branch, known through the remarkable mosque constructed by its members, continued there, it seems, till around the time of the Mongol conquest as vassals of the SeljukS. MENSÜKHAT ( ), pl. of mensük “annulled”, an expression used in the Ottoman Empire, after the abolition of certain early Ottoman army units (yaşı, mülkemi[.]), in the 11th/17th century, for the fiefs and other grants these units had previously held. These were referred to as “annulled fiefs” (mensükâh[im]). The Ottoman finance department administering these holdings, the “Bureau of the Annulled [grants]” (Mensükhâh kâlemi), allotted them, when needed, as fiefs in return for services. When the Ottoman navy was expanded, such holdings were attached to the Admiralty (Deryâ kâlemi [see DARYA] and assigned by the Kapudan Pasha [q.v.]. Some appointments were submitted to the Grand Vizier (Sâdî-kâlemi [q.v.]) and marked off in the registers of the naval archives. The possessors of these holdings (mensükhâh efendî) formed a unit whose duties were to guard the coasts and serve on ships. They could pay for exemption from duty when they were called to serve.

MENTESHE-ELI, a region in the southwestern part of Anatolia. It derived its name from the Turkish Menteshe-oghullari [q.v.] who established a principality there. There are, however, some claims that the name is of pre-Turkish origin. The region corresponds to classical Caria (today centred on the city of Muğla). There is no doubt that, like other western Anatolian districts, Caria was also occupied by the Seljuks towards the end of the 5th/11th century; but later, Byzantine domination was restored there. The Turkmans in the border areas who settled down in Central Anatolia and the western Taurus continued their raids. Moreover, the loss of Rum Seljuk power in Anatolia in the second half of the 7th/13th century after defeats suffered at the hand of Mongols provided a gradually increasing freedom of movement for these tribal groups who gathered in the frontier areas, so that Turkish pressure on the Byzantine defence line was continuously being increased. After 659/1261, the region of Caria which stretches inland from the coastal areas was occupied by the Turks. The Turkmans who founded the principality of Menteşhe and ultimately gave their name to the region first arrived in this region by sea and occupied the shore line. But to maintain their rule in this region it was necessary to cooperate with the Turks who pressed from the interior towards the shore (see P. Wittek, Menteşhe beyliği, Turkish tr. O.S. Gökyay, Ankara 1944, 46). When John, brother of Michael VIII (1259-82), the Emperor of Byzantium, went on a campaign under the command of his son Andronikos, he had settled inland to withdraw to their bases in the mountains; but he never thought of capturing the ports which were held by the Turks in the south-west corner of Caria. It is possible that the founder of the principality of Menteşhe was at that time the ruler of the shore region of the Gulf of Makri (Fethiye). Although in 1278 the Emperor Michael VIII sent an army under the command of his son Andronikos to Anatolia, the regions of Menderes and Caria had already been captured by the Turks. Andronikos’s fortification of Tralles (Aydın) was therefore rendered useless; the Menteşhe Beg who had captured Tralles and Nysa (Sultánhisar) had annexed the territory to his principality. Upon the Karamanids’ siege of Konya, Gaykhatu, the Il-Khanîr ruler, came to Anatolia in 690/1291 and punished the Turkish principalties which had revolted against him. During Gaykhatu’s punitive campaign, the Il-Khanîr army entered Menteşhe-eli (Wilâyet-i Mentešhe) and plundered it (see Tarıkâh-i Al-i Seljük dar Anadolu, ed. F.N. Uzuk, Ankara 1952, 88, Turkish tr. 62). Following the Byzantine Empire’s unsuccessful attempts to reconquer the area in 1296 and 1302, the Turks became the unquestioned masters of Caria. In his description of the principality of Menteşhe, Münedjidîn-bashî says that the principality consisted of many cities, namely Balâî, Bozûyûk, Mîlas, Pedjîn (Badrîn), Mazîn (Mârîn), Çine, Tâwâs, Bûrnâm, Makri, Köyêgïhêz (Köyçegiz) and Muğla, which was the capital (see Münedjidîn-Bashî, Dîmi al-dâwâl, Nurusmaniye Libr. no. 3172, fol. 130b; Wittek, op. cit., 172-3). The Fûke (Fînike) region of Lycia was also included among these names at the beginning of the history of the principality. Ibn Baṭûtâ, who visited this part of Anatolia (Bâlîd al-Rûm) in 732/1333, which he also designated by the name Menteşhe-eli, says that Mîlas [q.v.] was one of the most beautiful cities of Anatolia, and fruit, gardens and water were abundant. At this time, Ibn Baṭûtâ met with Şudjâf al-Dîn Orkânî Beg, the ruler of the principality. He tells us that his residence was at Pedjîn, two miles from Mîlas, and this city, which was rebuilt on a hill, was adorned with beautiful buildings and mosques (see Rûhî, ii, 278-80, Eng. tr. Gibb, ii, 428-30, Turkish tr. M. Sharîf, Istanbul 1333-5, i, 321-3). According to Şîhâb al-Dîn al-’Umarî, there were 50 cities and 200 fortresses under the control of Orkânî Beg (see Masâ'îl al-vâhir, Ayasofya Libr. no. 3146, II, fols. 122a-b). Thus it is clear that Menteşhe-eli extended over a large area. In his account, al-’Umarî says that Orkânî Beg’s country was located between Dâwâz (Tâwâzî), Sakîz and İstânbûk. It is clear, then, that the Fûke region was also in Menteşhe-eli.

Following Baṭyâzî I’s succession to the throne in 791/1399, an alliance was formed against the Ottomans at the instance of the Karamanids, and the Menteşhe Begs also participated in this. Baṭyâzî I had moved into Anatolia, and the regions of Balâï and Muğla, which were under the rule of the Menteşhe principality, soon passed into the hands of the Ottomans. But a line of the dynasty went on to rule in Mîlas and Pedjîn. Following the battle of Ankara (804/1402), the Menteşhe-oghullari regained at the hands of Timür their previous territories. However, this situation did not last. In 827/1424 Murâd II annexed Menteşhe-eli to Ottoman territory; later,
Menteshe-eli came to be one of the sandjaks of the eyalet of Anatolia.  

Bibliography: In addition to the works given in the text, see I. H. Uzunçarşı, Anadolu beylikleri, Ankara 1969, 70-83; idem, art. Menteshe Oğullarî, in IA; Besim Darkot, art. Menteşe, in IA (E. Mercıl).  

Menteshe-ogullari, a Turkish principality founded in the south-west of Anatolia.

The Turkomans who founded this principality came to this region by sea and settled between the shore and Dehîzî. However, it is quite difficult to pin-point the foundation of the principality in the chronology of the early Begs. The Turkomans had captured the Carya (today Mуглa) region after 1261, starting from the shores. Menteshe, the founder of the principality, was perhaps the Beg of the shore regions (Amir al-Sawdî), in the bay of Makrî (Fethiye). There are also difficulties in establishing the genealogy of Menteshe Beg. His father was said to be Amîr al-Sawdî Hâddî Bahâî al-Dîn (Bahâî), who was one of the amirs of the Saljûqs (see Shîkârî, Karaman tarihî, Konya 1946, 11 ff., and Müneveddijim-Bashî, Djâmî al-duwal, Nurusmiyâni no. 3172, fol. 131a). However, in the inscriptions of Ahmed Ghaçî, one of Menteshe’s grandsons, his father is mentioned as Eblîstan and the father of the latter as Kûrî or Kara Beg. This region had been given as an ikiá by the rulers of the Anatolian Seljûks. Later, the Seljûk chronicles speak of the Menteshe Beg. Although in 1278 the Seljûk Emperor Michael VIII sent an army under the command of his son Andronicus and the latter fortified Tralles (Aydin), it was almost useless. In 1282 Menteshe Beg had conquered Tralles and Nyssa (Sulhân şişar) and annexed them to his territory. A coin minted in 690/1291 at Mîlas in the name of the Seljûk sultan Masûd II leads us to the conclusion that the Menteshe-ogullari had at first accepted the protection of the Saljûqs (see İsmâ’llî Ghaçîlî, Takwîm-i maskûkî-i Seljûkuyya, Istanbul 1309, 93). Upon the Karamânî’s siege of Konya, the Il-Khânî ruler Gaykhatu came to Anatolia to punish them in 690/1291, and during this campaign, the Il-Khânî army plundered the Menteshe-eli. When Alexius Philopapos, the Byzantine commander, moved south through Menderes (1296), Menteshe Beg was already dead. After Menteshe Beg, his son Mas’ûd became the head of the principality. But his other son Kirmân (Karmân), following or perhaps opposing his brother, continued to rule in Fûke (Finike). The historical sources do not clearly explain the relationships between these two brothers. Although in 1300 Mas’ûd Beg had seized an important part of Rhodes, later, on 15 August 1308, the Knights Hospitallers recaptured the island (see S. Runciman, A history of the Crusades, London 1965, iii, 435; other scholars give the date as 1310). Mas’ûd Beg’s efforts to regain the island were unsuccessful. His death was probably before 719/1319. Shûdîl al-Dîn Orkhan Beg, who inherited the throne after his father, Mas’ûd Beg, probably secured power by removing a brother whose name may have been İbrahim. Orkhan Beg was unsuccessful in his struggles against the Knights to capture Rhodes after 1320. Ibn Baṭṭûta visited Orkhan Beg in Pedjîn while he was travelling in Anatolia, and has mentioned him as Sultan of Mîlas (see Ribâha, ii, 279-80, Eng. tr. Gibb, ii, 429-30, Turkish tr. M. Şarîfî, Istanbul 1333-5, i, 321-2). Al-‘Umarî, on the other hand, gives information about the cities and the number of the soldiers under Orkhan Beg. He also mentions that the Fûke branch of the Menteshe principalcy was in 1330 subject to the Hâmîdî-ogullari (see Masûlîk al-abîrî, Ayasofya no. 3146, III, fols. 98 a-b and 122 a-b). Orkhan Beg’s death was probably before 1344, and his son İbrahimîm succeeded him. İbrahimîm Beg made preparations to help Umur Beg in regaining Mîlas, which had fallen into the hands of the Latins, but when Umur Beg fell in battle in 1348, this effort came to nought. The Venetians, with their fleet placed in Balât harbour, threatened İbrahimîm Beg, who prepared for a campaign against them, but as a result of an agreement made with the assistance of Marino Morosini, the Count of Crete, between the years 1347-48, they were forced to disband. İbrahimîm Beg died some time before the year 1360. After his death, three of his sons reigned in various parts of the principality. It is believed that Mûsâ Beg ruled in Pedjîn, Balât and Mîlas; Mehmed Beg in Mughla and Cine; and Ahmed Beg ruled, in the south, in Makrî and Marmaris. After Mûsâ Beg’s death (before 1375), Mîlas and Pedjîn also presumably passed into the hands of Ahmed Beg. In 1365, as a result of Ahmed Beg’s attacks against the ships between Rhodes and Cyprus, the fleet of Peter I, King of Cyprus, threatened the shores of Aydin and Menteshe. However, the Venetians, concerned about their people living in Ayasuluk and Balât, intervened, and peace was made. Although Ahmed Beg ruled in Balât for a period, this was not for long. We see that before 1389 Balât and its environs were under the rule of Ghiyâth al-Dîn Mahmoud, the son of Mehmed Beg. However, losing the struggle for sovereignty made against his brother İlyâs Beg, he took refuge with the Ottomans. Following the battle of Kosova (1389), Bâyezîd I ascended the Ottoman throne. With the urging of the Karamânîs, İlyâs Beg and his father Mehmed Beg entered into the alliance arranged against the Ottomans in Anatolia. During Bâyezîd I’s Anatolian campaign against his alliance, Balât and the lands of the Menteshe principality in Mughla were occupied. Mehmed and İlyâs Beg fled to Djiändî-oglu İskandar Beg (in the winter of 1389-90). During this campaign, Ahmed Beg continued to reign in Mîlas and Pedjîn. His survival was perhaps due to the rugged topography and comparatively impregnable position of the region. Tadj al-Dîn Îlyas Beg died in Şabîban 299/July 1391. His territories were later occupied by the Ottomans. Wittet (Menteshe beyliği, 86) accepts that, until the Ottoman occupation, Mehmed Beg ruled in the Menteshe principality, later flecing to Djiändî-oglu Islandîyâr Beg.

Following the battle of Ankara, Timûr, as he did with most of the other principalities, restored İlyâs Beg’s territories (1402). After this restoration of the territory, İlyâs Beg continued for a time as vassal of Timûr. In the quarrel for sovereignty among Bâyezîd’s sons, he made an alliance with the Aydîn-ogullari and the Sarukhân-ogullari, supporting İsâ Celebi against Mehmedem Celebi. Following Mehmedem I’s victory against this alliance, İlyâs Beg was forced to recognise the sovereignty of the latter (1405). Because İlyâs Beg was inflicting losses upon the Latins in the islands through maritime warfare, in 1403 the Venetians made an agreement with him through the aid of Marco Faileri, the Count of Crete. But later, conflicts between the two sides continued, and as a result of the Venetians’ actions, İlyâs Beg was forced to renew the previous agreement with Admiral Ser Pietro Civrano (17 October 1414). In the same year, İlyâs Beg accepted Ottoman rule and in 1415 he had coins minted in the name of Mehmed. Moreover, he was compelled to send his two sons,
Layth and Ahmed, to the Ottoman Palace. After the death in 1421 of Ilyas Beg, his sons managed to flee from Edirne and to take up the rule of the principality in Menteshe-eli. When Sultan Murad II captured the territory of Menteshe, he seized and imprisoned these two brothers, thus putting an end to this principality.

The Menteshe-oghullari embattled their country with many fine buildings. Among these are the Hadiğâl Ilyas Mosque at Mîlas (1330), Ahmed Beg’s Medrese at Peğin (1375), and his Great Mosque at Mîlas (1376) and Ilyas Beg’s Great Mosque at Balâ (1404). The Menteshe-oghullari patronized scholars and men of letters, and under their patronage some works were translated into Turkish. For example, under the patronage of Qiyâqâl al-Dîn Mahmûd, the Bâz-name on falconry was translated from Persian into Turkish. A manuscript of this work, located in Milan, was published by Von Hammer under the name of Falkner-ko ( Pest 1840). In addition to this, there is a short medical book, the Ilyâyî, which was also translated under the patronage of Ilyas Beg.

MÊô, a mixed Indian tribe of largely north-eastern Râdîpôt stock, a branch of whom were converted to Islam in the mid-8th/14th century. Their conversion seems to have been nominal, as they are described as offering animal sacrifices to a mother-goddess, worshipping at shrines of the Hindî god of the homestead Bûmîyû, and following the Pâçpîrya (Pînî Pîr [q.v.]), especially Sâlîr Mûsâ (E. Moschini). This was done in an attempt of their devotion at the išâb-i bardî (eve of 14 Shab‘ân), as well as the Khâyâ‘a Sâhib of Adîmîr (Mûnîn al-Dîn Çîshî [q.v.]); they celebrated Hindî festivals, and followed Hindî practices of exogamous marriage and male inheritance. The Muslim Mêôs are frequently called Mewâtî, both they and the Hindî Mêôs were mostly robbers and freebooters, causing much trouble from the times of the early Dîlîh sultanates until quelled under Bâbur; but there was a resurgence of their turbulence during the decline of the Mughal empire, and in 1857 they were described as “conspicuous for their readiness to take advantage of disorder”. See further Mewât.

J. Burton-Page

MERCENARY [see MAYSH].

MERCIMEK AHMET [see MERDJUMEK].

MERCURY, planet [see 4UTARID].

MERCURY, metal [see ZîBKK].

MERDJUMEK, Ahmed b. Ilyas (Modern Turkish: Merdümek Ahmed), fl. first third of the 9th/15th century, the author of a translation of the Old Ottoman of the Kâbîs-name, a “mirror for princes” composed in Persian prose and occasional verse by Kay Kâûs b. Iskandar [q.v.] in 475/1082.

Merdjumek mentions himself by this name three times in his work (all references are to British Library ms. Or. 3219: introduction (fol. 1b), chapter 11 (fol. 50a) and 31 (fol. 112b). He is not referred to in pre-modern Ottoman biographical or historical works. From his Kâbîs-name translation we can glean very little information (none on how he acquired his strange designation Merdjumek, Persian for “lentil”). He was a servant or courtier of Sultan Murad II (824-55/1421-51), and his writing shows him to have been well versed in the traditional religious and secular learning of his time. We can only deduce that he was moderate in his habits from his remark that Merdjumek never indulged in the “calamitous” practice of morning wine-drinking (fol. 50a).

In Ottoman ezîhî [q.v.] literature, the Kâbîs-name held a special place in the 8th/14th and 9th/15th centuries. No less than five completely independent Old Ottoman prose versions composed in this period have survived, of which the latest and best is Merdjumek’s, completed on 23 Shab‘ân 836/26 April 1432. The translator records that while at Philippopolis in Sultan Murad’s service, he found the sultan reading the Kâbîs-name in Persian. When Murad complained that an existing Turkish version was dull and unclear, Merdjumek immediately undertook a new translation “complete, without omitting a word; to the best of my ability explaining the more difficult words in it by extended comment so that the readers might enjoy its [full meaning]” (fol. 1b-2a), the book has no independent title; ms. of it are marked by such headings as Kâbîs-name-yi Turki or Terdjemî-yi Kâbîs-name.

Merdjumek showed much greater literary skill than his predecessors. Unlike them, he was neither slavishly literal nor given to cavalier omission. He freely added explanatory comments, as he promised, or he paraphrased, when literalism might have concealed the author’s purpose. Occasionally, he further enlivened the text by spontaneously inserting apt Turkish proverbs, or verses of his own composition (e.g. ch. 32, fol. 122a-b), in addition to his usual practice of rendering key Kay Kâûs’s illustrative Persian verses in his own Turkish verse.

At a time when literary Turkish was at a crossroads, with some writers developing a complex and bombastic high inşîhî style, full of Persian literary artifices, and reducing the Turkish lexical material to a minimum in favour of Arabic and Persian loan words, Merdjumek chose a manner which was essentially simple, based on spoken Turkish, and lexically mainly Turkish. In subsequent centuries, a minority of writers continued to favour simple Turkish, but most Ottoman writing became increasingly high flown and Persianised. By the beginning of the 12th/18th century, Merdümek’s simplicity of style and vocabulary had come to be considered archaic and uncouth, and the well-known stylist and historian Nazmî-zade Muradî (not Mustafâ, as in Kay Kâûs‘, iv, 815, col. 2, 13) of Bagdad was commissioned to revise Merdjumek’s Kâbîs-name in accord with contemporary literary taste (1117/1705).

Turkish nationalist currents of the 20th century have enhanced the growing interest in the Turkic elements in Turkey’s national language, and have brought a renewed and still continuing appreciation of Merdümek Ahmed’s work.

The indigenous population of sea nomads, known to Thais as Chao Nam or Chao Lay and to the Malays themselves as Moken, to the Burmese as Salon, to the Chinese as Murat, and to the British as Oran Laut ('boat people'), numbered 868 according to the 1884 Census and were classified as "nature-worshippers" (animistic). Today, they are probably outnumbered by Burmese and Chinese, even on their own islands, and have been partly converted to Theravada Buddhism in the north of the archipelago, whilst Islam is believed to have made some inroads in the south of the archipelago, district of Burma and, under the British, of the Tenasserim Division, extending on the mainland from the boundaries of Tavoy District (13° 28' N.) to the mouth of the Pakchan River (8° 38' N.) and the Inhmun of Kra in the south, and including the Burmese part of the Mergui Archipelago. The region is covered in dense jungle, and its economic wealth rests on tin, coal and gold reserves, as well as on the fisheries industry. The main townships are Mergui, Palaw, Tenasserim, Bokpyin and Malawin. According to the 1921 Census (1924 Mergui District gazetteer), the total urban population of Mergui District was numbered 25,382, of which 11.66%, or 1,679 persons, returned their religion as Muslim. This comparatively low figure, although representative of the position of Islam in the Mergui District during the 20th century, in fact belies the importance of the region as a channel for the spread of Islam to Thailand and northern South-East Asia during earlier centuries.

1. Mergui archipelago. This is a large group of islands (said to number 804), commencing in the north with Tavoy Island (ca. 13° 13' N.), and stretching southwards beyond Point Victoria into Thai waters, terminating beyond Ko Chan in ca. 8° 50' N. The indigenous population of sea nomads, known to themselves as Moken, to the Burmese as Kabun, to the Thais as Chaol Nam or Chaol Lay and to the Malays as Oran Laut ('boat people'), numbered 868 according to the 1884 Mergui District gazetteer, and were classified as "nature-worshippers" (animistic-shamanistic). Today, they are probably outnumbered by Burmese and Chinese, even on their own islands, and have been partly converted to Theravada Buddhism in the north of the archipelago, whilst Islam is believed to have made some inroads in the south (Annandale, 1903; Lebar, 1964).

2. Mergui District. This is the southernmost district of Burma and, under the British, of the Tenasserim Division, extending on the mainland from the boundaries of Tavoy District (13° 28' N.) to the mouth of the Pakchan River (8° 38' N.) and the Inhmun of Kra in the south, and including the Burmese part of the Mergui Archipelago. The region is covered in dense jungle, and its economic wealth rests on tin, coal and gold reserves, as well as on the fisheries industry. The main townships are Mergui, Palaw, Tenasserim, Bokpyin and Malawin. According to the 1921 Census (1924 Mergui District gazetteer), the total urban population of Mergui District was numbered 25,382, of which 11.69%, or 1,679 persons, returned their religion as Muslim. This comparatively low figure, although representative of the position of Islam in the Mergui District during the 20th century, in fact belies the importance of the region as a channel for the spread of Islam to Thailand and northern South-East Asia during earlier centuries.
MERGUI

described by Ibn Sa'id (d. 685/1286) as standing near a large river “which flows down from a mountain in the north” (the Tenasserim River? - Tibbetts, 1979, 95, 128-35). By the time of Sulayman al-Mahri, however, this uncertainty has disappeared, for in his early 10th/16th century Umanda (Tibbetts, 1979, 229), the master navigator identifies Mergui as the main port for Tenasserim, and explains that from this landfill both local people and Arabs travel overland, via Tenasserim, to Shahr-i Naw (the “new city”, or Ayutthaya, capital of the Thai Kingdom of the same name, founded by King Phra Narai Tibbetts in 1539 A.D.).

During the first two centuries of Ayuthayan rule, the Tenasserim trade route—which passed under Thai control in or about 775/1373—was frequented by Muslim and Hindu merchants from South Asia, as well as by Arab and Persian merchants from the Middle East. It seems certain that, after the Portuguese conquest of Malacca in 1511, Muslim usage of the Tenasserim trade route increased in a partly successful attempt to bypass the Portuguese Catholic stranglehold on trade with the Far East. During this period, Muslim traders from Surat, Dabul, and increasing numbers of Arabs, Persians and even Turks, had attained to positions of great power and prestige within Siam. Nor was the Mergui-Tenasserim route used purely for commerce; Muslim emigres from Golconda and Iran (Ibrahim, 43-52), and possibly from Acheh (Penth, passim), are known to have travelled to Ayuthaya by this route, both with the intention of improving trade and, apparently, in the hope of converting the Thai king to Islam (Graham, ii, 294).

By 1679, the South and West Asian Muslim community in Siam had become so numerous and influential that they had their own quarter in Ayuthaya (as distinct from the various Malay Muslim districts), whilst an English factor of the Honourable East India Company was able to report of the Mergui-Tenasserim region: “The Persians and Moors … are now in effect masters of that part of the country as well as the commerce … the colonies they have planted in those parts do almost equal the number of the natives, but far exceed them in wealth and power” (White, IOR E/3/40). During this period, the governors of Mergui, Tenasserim, Phetchaburi and Bangkok were all Muslims of West or South Asian origin, as were the captains of Phra Narai’s merchant vessels trading with Golconda. Indeed, during the first half of the 18th/17th century, Thai trade with the west (that is, with the Bay of Bengal and the Indian Ocean littoral) was almost entirely in Muslim hands, whilst Phra Narai employed a succession of at least three (ostensibly Persian) Muslims as phra klang, or foreign minister (the most powerful position at the Thai Court), and even maintained a squadron of Muslim horse guards (de Choisy, 196).

Islamic influence at Ayuthaya entered into sharp decline during the latter part of Narai’s reign, particularly following the rise in power of the Greek adventurer, Constant Phaulkon, who came to dominate the Thai royal court in ca. 1670-1679 (Hall, 364-74). Phaulkon perceived the “Moors” as political and commercial rivals, and as his belief their position and influence was gradually diminished, whilst that of the Europeans (and particularly of France) was correspondingly increased. During this period, the Muslim merchants dominating the Mergui-Tenasserim region were gradually displaced, and in 1683 an Englishman, Samuel (“Siamese”) White, was appointed gahbandar of Mergui, with disastrous consequences for non-European regional commerce as a whole. Two years later, as a result of Phaulkon’s commercial and political intrigues, war broke out between Siam and Golconda. Shortly thereafter, in 1687, a final blow was dealt to the Mergui-Machilipatanam trade when Golconda succumbed to the advancing armies of the Mughal Emperor Awrangzib [q. v.], and its capital was reduced to the status of a fishing village (Alam, 1959, passim).

The Mergui-Tenasserim trade route never fully recovered from these setbacks, although Indian Muslim merchants continued to trade with Ayuthaya via Mergui throughout the first half of the 18th/17th century. In ca. 1779/1765, however, even this diminished trade was brought to an abrupt end by the Burmese conquest of both Mergui and Tenasserim. Two years later, in 1767, Ayuthaya was itself captured and sacked by the Burmese armies of King Hsinbyushin.

Following the Burmese conquest, the entire Mergui-Tenasserim region as far south as Point Victoria was incorporated within the Burmese empire. The new frontier between Siam and Burma, now much advanced in the latter’s favour, remained sealed to trade (Low, iii, 287, 290); besides, the overland portage route from Mergui to Ayuthaya had become increasingly anachronistic, and regional inter-Asian trade had come to be increasingly dominated by European commerce. With the Burmese conquest of 1765, therefore, Mergui ceased to serve as a channel for Muslim commerce and concepts into Siam, and became instead a Burmese backwater. It still retained a substantial Muslim population, however, and it is interesting to note that indigenous Burmese chronicles possibly dating from the late 12th/18th century describe the rebuilding of Mergui in ca. 1770, and record the allocation of a special area (the Kakauk quarter) to the township’s Muslim population (Kyaw Din, 252-3).

MERIC, THE TURKISH NAME OF A RIVER CALLED HEBROS IN CLASSICAL GREEK AND MARITSA IN BULGARIAN. IT IS THE principal river of the south-eastern Balkans and, under the Ottomans, of the eyalet of the Rumeli. Al-IdnsI (Opus geographicum, Naples 1977, 796 = 4TH (OPUS GEOGRAPHICUM, OF THE RUMELI. EYES, 232, 1978, 766/1364 resulted in a defeat near the left bank of the Meric, during which the fleeing army sought salvation by crossing the river, a pre-dawn rawn remembered by the place-name Sipr Sndli (zakaSel adasi (zakaSel adasi, ed. Giese, 141). BEFORE THE CONQUEST OF CONSTANTINOPLE, EDIRNE WAS THE principal residence of the Ottoman sultans, and, even later, the Meric witnessed some of the pomp of court life. Thus in 981/1456-7 Commandies festivitites of the Meric, during which the fleeing army sought salvation by crossing the river, a pre-dawn rawn remembered by the place-name Sipr Sndli (zakaSel adasi (zakaSel adasi, ed. Giese, 141). THE BROAD FERTILE VALLEY OF THE MERIC was appreciated in Byzantine times as one of the granaries of Constantinople; this role was further increasing during the Ottoman rule after the Turks had introduced there the cultivation of rice in the 9th/15th century. The river itself served as a transportation route for these supplies by boat to Enex, from where they were carried by sea-going craft to Istanbul (this role of the Meric ceased only in the 1870s with the construction of a railway from Istanbul). The economic importance of the Meric valley in the Ottoman period was also demonstrated by the prosperity of Filibe (Psychodi), Enex and Dzrez, and by the creation of Tatar Pazardjik; this town, founded in 890/1485, was settled mainly by Bessarabian Tatars and Ottoman sipahis; its annual fair, held in July, was frequented by merchants from many parts of the empire. The valley represented an age-old route of communications, transportation and troop movements that continued beyond the Meric to Sofia and Belgrade. In the Ottoman postal organisation, the stages along the Meric pertained to the orta kol system. The effectiveness of the route was enhanced by the construction and endowment of kes and bridges; especially remarkable is the 10th/16th century bridge known as Dzir-i Mustafa Pasha, with a kes on either side, in present-day Svilengrad 40 km west of Edine. THE Meric acquired a special political significance in the final years of the Ottoman empire when the question of the Turkish-Bulgarian and Turkish-Greek borders arose. With the successful completion of the War of Independence in Anatolia, the Turkish demands that the British authorities persuade the Greeks to withdraw their forces beyond the Meric were met, and the Treaty of Lausanne (July 1923) established the river as the definitive border between Turkey and Greece.

MERIDA [SC MARIDA].

MERINID [SC MARINIDS].

MERKA, THE OFFICIAL SPILLING OF MARKHA (AS IN AL-IDNSI) AS THE SETTLEMENT WHICH LIES IN LAT. 1° N AND 44° E, SOUTH OF MAKDIKG (S.V.) IN THE REPUBLIC OF SOMALIA. IT IS MENTIONED ON 943 A.D. BY AL-MASFUDI.
among places in Africa inhabited by the descendants of Kush [q.v.], but the reading must be considered doubtful because the other places enumerated are in western Africa (cf. Muradi, ed. Pellat, index, s.v. Maranda). At present section 6 mentions no fixes in the north, as associated with the Hausiwi, one of the groups of the Somali; Ibn Sa'īd (apud Abu 'l-Fidā'ī) states that it was their capital, and that it was inhabited by Muslims. In so far as they can be dated by external features, the mosques appear to be of late 18th century date or later. The Friday Mosque, nevertheless, it was their capital, and that it was inhabited by the Somali; Ibn Sa'īd (apud Abu '1-Fida) of the mosque at Uthman to A.D. 1560. The grave and that of Shaykh Siinus, in this structure appears to be older, for it incorporates stonework with a cable pattern that may be compared with that in the mihrāb of the mosque at Kizimkazi [q.v.], Zanzibar, where the inscription in floriate Kufic and other decorations are dated by an inscription equivalent to A.D. 1107.

(G.S.P. Freeman-Grenville)

MERKEZ, SHAYKH MUΣLIH AL-DIN b. Muṣṭafā, the head of an Ottoman Şafi order and saint. Merkez Muṣlih al-Din Muṣṭafā b. Kālībī b. Ḥadżdaj belonged to the village of Şarī Māhmūdī in the Anatolian district of Lādhikīyya. He was at first a pupil of the Mollā Ḩabīd Paşa, son of Ḥabīrī Ḍeg [q.v.], and later of the famous Ṯālāwī Shaykh Sūnbul Siinān Efdīni, founder of the Sūnbulīyya, a branch of the Ḥabīwīyya, head of the monastery of Kōḡa Muṣṭafā Paşa in Istanbul (see Bursali Melik Mēhdī Ṭabīḥ, Ṭabīḥīyā, Muṣṭafīyā, i, 78–9). When the latter died in 936/1529, Merkez Efdīni succeeded him in the dignity of Pir. He held the office of head of a monastery for 23 years and died in the odour of sanctity in 959/1552, aged nearly 90. He was buried in Istanbul in the mosque which bears his name (cf. Ḥadīṯ al-qaawīnī, i, 230–1; J. von Hammer, GOR. i, 95, no. 495) before the Yeşil Kapu. At the tomb of Merkez Efdīni there is a much-venerated holy well, an ayazma, to which one descends by steps. Its reddish water is said to have the miraculous power of healing those sick of a fever (cf. Ewliyâ Celebi, i, 372; von Hammer, Constantinopolis, i, 513; idem, GOR, loc. cit., following the Hadīṯ al-qaawīnī, loc. cit.). Besides it is the cell (zāwa) of Merkez Efdīni, of which miraculous stories still circulate among the people. He had many pupils, including his son Ahmad, famous as the translator of the Kāmī, his son-in-law Muṣlih al-Din (cf. Ewliyâ, loc. cit.), the poet Râmah Efdīni, called Bihbīghi, and many others.

tury (cf. V. Guinet, La Turquie d'Asie, Paris 1892, i, 761); the madrasa of Mehmed Celebi (built 817/1414 by one Abü Bekr b. Mehmed, to which an incongruous clock tower was added in the 19th century); and the complex built by Kara Mustafa Pasha, with mosque (built in 1077/1667-7), madrasa and caravanserai (see G. Goodwin, A history of Ottoman architecture, London 1971, 20, 362, 419).

In the 19th century, Merzifün was the centre of American Protestant missionary enterprise in the vilâyet of Sivas (in which Merzifün was in late Ottoman times situated), with the Anatolia College, a theological seminary, schools and charitable institutions, proselytism being aimed mainly at the local Armenians (Guinet numbered the town's population at 13,380 Muslims, 5,820 Armenians and 800 Greeks). There were also Roman Catholic Jesuit and Gregorian Armenian schools. Most of these did not survive the First World War and the Armenian massacres, with the consequent liquidation of that ethnic element from the town, as also the Greeks (the 1927 census enumerated only 11,334 inhabitants of Merzifün), but a small body of American missionaries and a school were still functioning in the late thirties. Modern Merzifün is the chef-lieu of an iles or district of the same name in the il or province of Amasya, and is noted for its cotton textiles. The population of the town was in 1970 28,210 and that of the district 59,777.

(F. Babinger-[C. E. Bosworth])

MESÌF(ÀLE) ("Torch"), a journal published in Turkish, of which eight numbers only appeared between 1 July and 15 October 1928. It had been founded by Djewdet Kudret (Cevdet Kudret Solok), Kenân Khulüsi (Kenan Hulusi Koray), Şabrî Es'ad (Sabri Esat Sıvarygül), Waşfi Mâhîr (Vasfi Mahir Kocatürk), Diâyâ ʿOthmân (Ziya Osman Saba) and Yâyân Nâbi (Yaşar Nabi Nayır) at the unexpected success of an anthology (Yedi mesâle, Istanbul 1928) of the above-mentioned authors plus Muʾammar Lüfî. These young writers, the Mesâleliler (Mesâleleiler), wished to combat the general, unfavourable judgment pronounced upon the literature of the country through the novel expression of a literary production devoid of the expression of the authors' individual feeling. The contrasting influences, whose action they felt, did not reach maturity, but they certainly felt the need of a call to order, more clearly discernible, it was true, in other Western intellectual, in order to give a new response to the confused expectations of their national revolution. Mesâle had the aim of functioning solely in the sphere of literature and art, but its founders were not unaware of social cares, and a few years later, a journal, Kadro (1932-5), was to endeavour to shape, within Kemalism, a new political and ideological milieu. Mesâle lived though the changes and contrasts of the age, even in its external aspect, since in the latter issues, Latin characters began to replace the Arabic ones, and its decorative designs were always in the style of the twenties of the West, the same elegant and objective artistic style desired by the Mesâleliler poets, whilst the prose writer Kenân Khulüsi was closer to Symbolism.

Under the patronage of Yusuf Diyâ (Yusuf Ziya Ortaç), Mesâle provides us with a useful panorama of the Turkish literature of its time, and the foreign authors presented in it confirm the French influence on Turkish culture. That some young people, with the help of writers already well-known, should have endeavoured, by means of journals like Mesâle and Kadro, to bring about a new cultural atmosphere, shows the desire for social action on the part of the Turkish intellectuals. In their literature, it is always nevertheless more essential to search out the elements of continuity and originality which lie beyond external appearances, together with those enduring elements of faithfulness—sometimes not discernible as such—towards tradition.

Bibliography: For the traditional view, see R. Mutluay, Çağdaş Türk edebiyatı (1908-1972), Istanbul 1973; a new interpretation is furnished in C. E. Carretto, Saggi su Mesâle. Un'avanguardia letteraria turca del 1928, Venice 1979, which develops further two articles of 1976 and 1977. MESIH MEHMED PASHA — MESIH PASHA

MESIH PASHA. Ottoman Grand Vizier in 906/1501. Mesîh and his elder brother Kö hàs Murâd were sons of a brother of Constantine IX Palæologus (Babinger, Eine Verfugung). Apparently Mesîh and Murâd were captured during the conquest of Constantinople and brought up as pages in Mehemmed II's seraglio.

The Greek faction under this Sultan first came to power when he decided to conquer the Greek island of Euboea (Eghriboz) in 875/1470. Mesîh distinguished himself for the first time during this campaign as sanjak beyî of Gelibolu [q.v.] and admiral of the navy. But soon afterwards he offered, as Venetian documents testify, to surrender Gelibolu, the Ottoman naval base, and the fleet to the Venetians in return for 40,000 gold ducats, aspiring to become ruler over the Morea (Babinger, Mehmed, 290). Mesîh appears to have been a vizier in late autumn 1476, or in early 1477 (see discussion in Reindl, 280). Two documents (Gökblign, 138, 148 n. 133) indicate that he was already second vizier in 19 Sha'bân 882/26 November 1477 and also in 883/1478, Mehmed Paşa Kârâmânî [q.v.] being Grand Vizier in both cases. A contemporary source (Donado da Lezze, 112) states that he was a newly-appointed fourth vizier when he was made commander-in-chief of the army and navy against Rhodes in the spring of 995/1480. Having failed at the siege, he was dismissed from the vizierate (Ibn Kemîl, cited by Reindl, 281), but apparently left with the sanjak of Gelibolu as admiral of the navy. During the indecisive period after the death of Mehmed the Conqueror II (5 May 1481), Mesîh, who belonged to the military dewshîrme [q.v.], vigorously opposed the appointment of Gedik Ahmed, appeared as a vizier in the Divân. Bringing Bâyza II to the throne, the military dewshîrme faction had then full control of the government.

While Gedik Ahmed, with the support of the Janissaries, acted too independently, Mesîh won the trust of the Sultan as an opponent of Bâyza [q.v.]: when in early summer 887/1482 Gedik Ahmed, suspected of being pro-Bâyza, was imprisoned in the Seraglio, the Janissaries invaded the palace and threatened the Sultan, who sent a group of dignitaries, including Mesîh, to negotiate. He succeeded in appeasing the soldiery by accepting all their demands including the promise never to appoint viziers outside the dewshîrme (da Lezze, 179-80). This convinced Bâyza that he was completely dependent, for his safety on the throne, on the military faction. Mesîh, closely co-operating with the seraglio, demonstrated his diplomatic ability and loyalty once again when Bâyza took refuge with the Hospitalers of Rhodes. During negotiations, while Gedik Ahmed proved to be uncompromising, Mesîh achieved an agreement to the satisfaction of Bâyza, thus becoming the architect of Bâyza's policy in respect of the Divân question. Now members of the military dewshîrme (Dâwid, Mesîh and Hersek-oghlu Ahmed) dominated the Divân, while Bâyza sent to the most sensitive governorships his eunuch köfî-aghas from the seraglio (Yâyâ, Ya'kûb, 'Ali, Khallil and Pirzû). Supported by the seraglio, Mesîh managed to survive Bâyza's bold decision to reinstate Gedik Ahmed, whom he believed to be a threat to his throne. After his execution (18 November 1482), a new era, that of the seraglio's direct control of government, began. Mesîh was second vizier in the Divân in 888/beg. 9 February 1483 (Anonymous chronicle, B.N. Paris, suppl. 1047, fol. 93a; also Ya'kûb Paşa’s awdîyya dated awâl Maharrâm 888/aed-February 1483, Epstein, 285, 322). He had already replaced in this post Djem, the then Grand Vizier Kâsun Pasha, a bureaucrat famous as “the founder of the Ottoman bureaucratic tradition”. When Ishâk Paşa, Grand Vizier and supporter of Gedik Ahmed, had to leave the Divân (in the summer or early autumn 888/1483, see Reindl, 171, 236, 283), Dâwid Paşa, who was already second vizier in 867/beg. 20 February 1492, and apparently favoured by the seraglio faction, became Grand Vizier. It is suggested that Mesîh succeeded Ishâk in the grand vizierate (Reindl, 171, 236, 283, on the authority of the contemporary historian Ibn Kemîl), and kept the position until 890/1485. But Mesîh is shown in the Anonymous chronicle, fol. 93b, as second vizier and Dâwid as Grand Vizier in 889/beg. 30 January 1484.

In 890/beg. 18 January 1485, Mesîh was suddenly dismissed from the vizierate by Sultan Ishâk and was infatiuated at something which we cannot determine (Ibn Kemîl, cited by Reindl, 283). He was first banished to Filibe as its sâbâhi, and then was transferred to Kafà [q.v.] as its sanjak beyî in 892/1487 (Kafà, like Salonica, had become an exile for demoted viziers). The customs register of Kafà dated 892/1487 shows that Mesîh then owned a ship which was active in the traffic between Istanbul and Kafà and at that time his kettîkâdî took for him slaves at Azak. Mesîh apparently left Kafà when Prince Mehemmed was sent as its governor toward the end of 895/1489 (Reindl, 284). Next we find him in our sources as sanjak beyî of Akkerman (Akkerme) in Rabî‘ II 903/beg. 27 November 1497. According to the Anonymous chronicle, fols. 118b-121a, he played a major role in stopping a Polish army which invaded Moldavia 1496-7, in cooperation with the Moldavian Vovode Stephen. Mesîh took advantage of this achievement to gain the sultan’s favour, sending him 29 standards and enslaved Polish nobles. The news was welcomed in Istanbul, and Venice was informed as a warning (Sanuto, I Diarii, i, 845; Fisher, 56). Mesîh's pilgrimage in the summer of 904/1499 seems to be a calculated move to go to Istanbul and exploit his recent success in Moldavia. Actually, considering his experience in naval affairs, his knowledge of western politics and his family connections with Venice (Reindl, 279), he was a man who would be most useful in the war against Venice, which began in June 1499. Shortly after his return from Mecca he was appointed a vizier (basî in Sanuto, quoted by Reindl 285, does not mean necessarily Grand Vizier). In fact, in Radjab 905/February 1500, the Grand Vizier was Ya'kûb Paşa, Bâyza II’s first Grand Vizier of palace eunuchs, who came to this post following the death of Candarlı İbrahim Pasha at the end of Muhammar 905/August 1499. Mesîh entered the Divân as second vizier while his friend Hersek-oghlu occupied the post of third vizier (Anonymous chronicle, fols. 124a). Eunuchs (jawshî) were never welcomed by the bureaucratic and military factions, but they estab-
lished supreme authority over government affairs and were particularly favoured by Bayezid II. In Muham-ram 906/July-August 1500, Mesih was still mentioned as second vizier (Reindl, 221-2, 354, believes Mesih was made Grand Vizier immediately after İbrahim’s death in 1499), and in Ramadan 906/March-April 1501 he left Istanbul for Taşlîli in Karaman to quell the rebellion of the Warsak tribes which were supporting a Karamanid pretender by the name of Mustafa. There is no doubt that in the spring of 1501 Mesih was appointed Grand Vizier for the first time to lead this important campaign (details in İdris Bilici, *Hükümet, TKP Library, Hazine 1855*).

Combining the skills of a general and diplomat, Mesih was able to persuade the tribal chieftains not to give their support to the Karamanid pretender. Soon after his return to Istanbul, a joint Franco-Venetian invasion of the island of Mytilene (Midilli [q.v.]) infuriated the sultan, who struck his Grand Vizier (see Reindl, 142, no. 799). For the *askâf* for his mosque and *madrasa* in Gelibolu, see Gölbğin, 439. Its *waqfiyya* is dated 888/1487. The names of his three sons: Ali Beg, Mahmûd Çelebi and Bali Beg, are known. The latter was sângâb beg of Vukorün in Rabl 1 909/August-September 1503.

**Hâli Ilkeç**

MESIHI, an important Ottoman poet of Bayezid II’s time (886-910/1481-1512), who died after 912/1512, possibly even after 924/1518 (see V.L. Ménage, *An Ottoman manual of provincial correspondence*, in WZKM, lviii [1976], 3-45, and idem, art. on Gûl-i sâd-berg in Osmanî, Amâsrâlman, forthcoming). His given name was ğisâ. Born in Pristina, he came in his youth to Istanbul, where he became a medrese student and also soon distinguished himself as a calligrapher. He was able to find favour with the Grand Vizier Khâdîm ‘Ali Paşa, whose divân secretary he became, and through his patron he had no cause to be annoyed with him because of his undisciplined, pleasure-oriented life and his lack of conscientiousness in the performance of his official duties, and is reported to have spoken of him as a *shehr əghlânî* ("street Arab"). He nevertheless held this position until Khâdîm ‘Ali Paşa fell in 917/1511 fighting the Şhi’i rebels under Əlı Kull. Mesih composed a deeply-felt elegy on his death but, having need of a new protector, ended with a mention of ənhem ağaşı Yûnus Paşa (cf. I. Morina, Mesihî ‘in Hâmid Ali Paşa’ya yazdıdı meti, in *Qevren*, viii [1981], no. 31, 53-63). Based on the information given by ‘Aşkî Çelebi, it was formerly accepted that Mesihî did not succeed in gaining the protection of either Yûnus Paşa or the Nişâbûrî Tâdžî-zâde Dâfer Çelebi, that he had to be content with a small fief in Bosnia and that his attempts to gain the patronage of Selim I failed likewise. This assumption should now be revised insofar as Selim’s statement that Mesihî was in the service of Yûnus Paşa has been shown by Ménage to be the more reliable.

Mesihî’s place in Ottoman divan poetry is that of a highly gifted and original poet without an extensive oeuvre. His language is relatively plain and clear, his manner devoid of affectation. Some poems and passages of his captivity through their lyricism. There is wealth of charming new images, associations and ideas. A touch of Rumelian dialect here and there is of linguistic interest.

Mesihî’s life/work comprises: (1) His not especially voluminous *Divân* has not yet been printed. Critical editions in typescript form exist, however: Mine Ozoğlu, *The Divan of the 15th century Ottoman poet Mesihî*, Ph. D. thesis, Edinburgh University 1969, and S. Jaber, Mesihî ‘in hayâtı ve dîvânını tekrârî metni, Ph. D. thesis, Istanbul 1953. Best known in Europe is his *murâhâb* on spring which Sir William Jones published with a Latin translation in *Persus Asiae*, commentarium libri sex, Leipzig 1774, and which was thereafter repeatedly translated into German, French, Italian, Russian and Serbian (cf. F. Bayrak, Mesihî ‘in dîvânı dâyetâyına yer alan “Bahariye’i”, *in Istanbul Üniversitesi Edebiyat Fakültesi Türk Dili ve Edebiyat Dergisi*, xxii [1974-6], 213-9; i. Eren, “Bahariye’i’nin Fransızça, Rusça ve Sırpça çevirileri, in ibid., 221-7. (2) The *mehnewî* *Shehr-əghlânî* ("rouser of the city") is Mesihî’s most original work. It is a humorous description of the handsome youths of Edirne, all of whom have Muslim names and are of the lower middle class, with mention of their or their father’s profession. (Except for four of the total of 47, two verses are dedicated to each youth.) Cf. on the text, i. Morina, XV y.y. büyük Türk sanı Prîstînî ‘îmsîhî* (1481-1512) [sa], in *Qevren*, viii [1981], no. 30, 39-56. Its language is plain, unpretentious and easily understandable. Mesihî’s *Shehr-əghlânî* became popular and he had numerous followers in this poetic genre.

It is generally but not unanimously accepted that the *şehr-əghlânî* by Dâfer would appear to date from just about the same time, and that it had no Persian model (cf. Mine Mengi, Mesihî ‘in hayâtı, sairîzeti ve ezetleri, *in Türkiye Dergisi*, vi [1974], no. 1, 109-19; A. S. Levend, Türk edebiyatında şehr-əghlânî ve şehr-əghlânî zâde Istanbul, Istanbul 1958; and M. İzzet, *Türkoloji Dergisi*, vi [1974], no. 1, 109-19; A. S. Levend, Türk edebiyatında şehr-əghlânî ve şehr-əghlânî zâde Istanbul, Istanbul 1958). (3) *Gûl-i sâd-berg* ("the many-petalled rose") is an *inîhâb* collection of elegant stylistic samples not without historic interest. Only a very few ms. of this have been reported to exist (cf. the article by Ménage cited above).

became warriors (sc. to the death); the king crushed the fort, and Čítaw₁ became Islām; he may not be historically accurate (Padmānāt, ed. V. S. Agrawal, verse 651), for Anīr Khushraw [q.v.], who was present with 'Alā’ al-Dīn; but with a sincere spirit, the mass self-illusion of the womenfolk. Čítaw₁ fell in 702/1303, by what seems to have been peaceful surrender (epidemic or famine in the garrison have been suggested as the reasons). Ratansen delivering himself personally to 'Alā’ al-Dīn; Čítaw₁ was then renamed Khidrābād and assigned to the young heir-apparent Khidr Khān, although the administration lay in the charge of a Čítaw₁ in 'Alā’ al-Dīn’s service who was connected by marriage to the Guhillōt house. Ratansen was dethroned and the succession passed to a cadet branch of the Guhillōts, the Sisodiyas, several princes of whom died in attempting to regain Čítaw₁. After Maladeva’s death in 721/1321, the sequence of events is not clear, as the bardic chronicles present a garbled account, often confounding events of the 8th/14th and 10th/16th centuries in a romantic medley. The ruler who emerged was Hammīr, in whose reign Sisodiyas rule was restored at Čítaw₁ (probably profiting from either the dynastic change at Dihlī from Khaḍījī to Tughlūkis, or from the dispositions ca. 739/1338 under Muhammad b. Tughlūk’s rule); his heroism and chivalry are much extolled, but the Čítaw₁ traditions are so much at variance with one another, none of them being compatible with either the few inscriptions or the exiguous references in the Muslim historians, that the chronology of Mēwār until ca. 823/1420 must be regarded as obscure; but certainly Hammīr’s successor Kghetrisingh successfully withstood an attack by the Mālwā [q.v.] ruler Dilāwar Khān Ghirār. Early in the 9th/15th century, the discovery of silver and lead mines increased Mēwār’s prosperity, and many defensive works were constructed. The long reign of Rana Kumbha, 836-73/1433-68, saw a state at first weakened by interference from the Rāthōfs of Mēwār in Mēwār affairs (although chronologies are again doubtful, since the bardic accounts of Mēwār do not tally with one another), and by a conflict between Rana Kumbha and his brother Khēm (Khēmā) Karan; nevertheless, some border territories were brought under tribute and garrisoned. Some of these lands had previously acknowledged the suzerainty of Mālwā, which had grown to considerable strength under Mahmūd Khaḍījī I, and which had long annoyed Mēwār by harbouring disaffected Mēwār chieftains and courtiers; but Mēwār had similarly given refuge to 'Umar Khān, the pretender to Mahmūd’s throne. Conflict between Mēwār and Mālwā was inevitable, and Mālwā forces (often joined by Khēm Karan with an army of Čítaw₁ followers) invaded Mēwār on many occasions with varying success (the assertion, however, that Mahmūd’s forces were routed in a battle at Sārangpur [q.v. in 840/1437, and that he himself was taken prisoner to Čítaw₁, does not bear examination), each state erecting a column in token of victory over the other. The Čítaw₁ Kīrttanśā inscription, however, seems to refer more to the campaigns against Kūbt al-Dīn Ahmad Shāh of Gudjārat; these were occasioned both by border disputes and by Mēwār attacks on Nāgawār [q.v.], a pre-conquest site of Islamic learning, for long under the Dīhlī sultanate but by now under the rule of the descendants of Shams al-Dīn Dandānī, brother of the first sultan of Gudjārat. Mālwā and Gudjārat acted jointly against Mēwār in 861/1457, but without pronounced success; the Rāthōfs of Mēwār, and Khēm Karan, added to
Mewaf’s difficulties by campaigning against Kumbha at the same time. Further forays by the Muslim armies took place over the next few years, with some regions being overrun and laid waste, but little more, and there were no major incursions until after Kumbha’s death.

Kumbha was succeeded by the pattride Udaya, who was poorly supported in the state and hence tried to curry favour with his Muslim neighbours by ceding certain border territories; then, less popular than ever, having apparently disorganised the whole state, he was deposed in favour of his younger brother Raj Bakla, 878/1473-1509, who was faced with the task of reorganisation while continuing with civil war (a renewed attempt by Khém Karan to come to power), further attacks by Málwà, now under Ghilwán al-Dín Kháldí, and an insurrection by certain aboriginal tribes. The Málwà army was worsted, and Málwà invaded in its turn, Mewaf occupying the Khérwafà district. A quarrel between Ráyamál’s sons developed into a war of succession, resolved by the eventual acquisition of the capable and ambitious Ráñg Sángra [q. v.], 915-35/1509-28. In his first 15 years of rule he consolidated the state; in this time the ascendency in Málwà of Médíni Ráñ [q. v.], a son of Múzaffar II of Gudjarát, who moved to support and reinstate Mámúd Kháldí II. The latter attacked Mewaf in 925/1519, but was badly defeated, taken prisoner to Gíawéd, and released only after the payment of a large indemnity and the surrender of a son as hostage to the Mewaf court. Next an incident at Idrá [q. v.] drew Mewaf into war with Gudjarát; but Sángá, strengthened by having secured the support of Málwà by releasing the royal hostage, was apparently able to come to some conciliatory agreement with Gudjarát.

This left him free to pursue his ambitions against the sultanate of Marwaf and Amber. His ambitions towards the conquest of the Díllí sultanate led him to propose to the Mughal Bábúr a simultaneous attack on Ibráhím Lódí. Bábúr, of course, carried out his part of the undertaking by its defeat of Ibráhím Lódí at Pánípat in 932/1526, but, contrary to Sángas’s expectation, showed every sign of remaining in India. Sángá, by managing to secure the Gudjarát throne for the exiled prince Bahuní, drove a wedge between Díllí and Gudjarát, and it was accordingly against Sangá that Bábúrs efforts were now directed, culminating in the battle of Khánú’á in 935/1527 in which Sangá with a confederated Rájput army was completely routed. Mewaf as an independently acting kingdom thus lost its power; the subsequent activities of the region are described in the bibliography. Bibliography: The difficulty of reconciling the various bardic accounts has been mentioned in the text; of the many kháyatí texts of Múhanotí, in Hindi translation and ed. G.H. Ójha, Banaras 1982, is perhaps the most acceptable. J. Tod, *Annuals and antiquities of Rajasthan*, 3 vols., ed. W. Crooke, Oxford 1920, gives the Mewaf traditions in extenso but uncritically. A failure to assess the Mewaf histories *vis-à-vis* the Muslim chronicles appears even in G. H. Ójha, *Rájputání kí tiháh [in Hindi]*, Ajmír 1936-7, and in H.B. Sánda’s *Máhánáná Sángrá, Ajmír 1918*, and *Máhánáná Kumbha, Ajmír 1932*. For the Muslim sources, see *Biblia* to GUDJARAT and MÁLWA; also to RIDÁR and MEDÍNÍ RÁÑ. See also BÁBUR and RÁSHTÁN.

MEWÁT, a generally imprecisely defined region of India to the south and southeast of Delhi, the broken country around Alwar, Tidjára, Bharatpur, Díg, RÉWÁRÍ, Mathúra and GúrGaón, “land of the MÉWÁ” [q. v.], robbers, marauders and cattle thieves. Punitive excursions under Itútmish, ca. 660/1220, and Balbán as nábí of Násir al-Dín Mámúd in 646/1249 and 658/1260, had only a temporary effect, and Mewaf was not effectively pacified and controlled until Balbán’s first regent year as sultan, 653/1257 (full account in Díyá al-Dín Baráni, *Ta’rik-í Fírúz Sháhí*, ed. Bibl. Ind., 56 ff.). In the following century, a branch of the MÉWÁ were converted to Islam, and their leader Bahádúr Náháí, from his strong Kótí near Tidjára, came to be recognised as a powerful noble in the Díllí court; he supported Abú Bakr, a grandson of Fírúz Sháh, in the succession struggles after that sultan’s death, and was treated as a rebel by later Tuglukid sultans, although when in 789/1385-6 Khídhr Khán took refuge with him in Mewaf he is described as the nakúJTá. Bahádúr Náháí later opposed Khídhr when he became suzerain after Tímúrs invasion, and Mewaf under him and his successors (now usually known as Khán-zádás) again became a rebel area. The “Sayyíd” ruler Múhrárák Sháh made attempts to subdue revolt in Mewaf in 929/1522 and 931/1528 under the twin grandsons of Bahádúr, Djalál Khán and ʿAbd al-Kadr Khán ("Djalíl" and "Kaddú"); Kaddú was captured and executed for complicity with the Shártí forces of Díwanpur [q. v.], but Djalíl, after again harrying the Díllí forces, was eventually compelled to submit and render tribute the following year; a similar sequence of events followed in 936/1432, and on both occasions the Mewafús pursued a “wrenched earth” policy (fullest account of this period in Yahyá b. Abdmal Sirhdí, *Ta’rik-í Múhrárák Sháhí*, ed. Bibl. Ind., 148-230 passim). Bahúl Lódí [q. v.] was similarly troubled by Ahmad Khán Mewaf in both during his struggle to rise to power and after his accession to the Díllí throne; Ahmad, compelled to submit, was deprived of seven parganas of his kádrí and compelled to send his uncle Múhrárák Khán to Díllí. In 784/1379 Múhrárák took refuge with him in Mewaf, and in 793/1385-6 he deserted the Bahádúr and allied himself with Husán Sháh Shártí of Díwanpur, although Mewaf itself remained virtually independent of both sultanes. It remained peaceful for some years thereafter and ʿAlam Khán Mewafís served happily under Sikandar Lódí, even in 903/1502 leading forces against Dholepur in Sikandar’s campaign against Gwlíyár, although Mewaf was not counted as part of the Díllí sultanate; but in Ibráhím Lódí’s reign (923-32/1517-26), when many of his own nobles were in rebellion against him and the hand of the Mughal Bábúr was about to fall upon the Díllí sultanate, Hasan Khán of Mewaf declared his independence. He joined Ráñá Sángá of Cítawr against Bábúrs advance (the Bábúr-námá, tr. Beveridge, 523) refers to Hasan Khán as an “impious mannikin” and the sole leader of the “tribal and mischief”], and was killed in the battle of Khánú’tá in 935/1527; after this Bábúr reduced Mewaf and entered Alwar; some parganas were assigned to Náháí Khán, Hasan’s son, who swore allegiance to Bábúr, after which Mewaf seems to have had no further power as a political force, and the strong forts of Alwar and Tidjára were controlled by Mughal officers. There is no account of Mewafís insurrection even at the time of Humáyún’s dispossession by Shérf Sháh; the latter struck coin at Alwar.
Mewat seems to have remained quiet under Mughal rule in the 11th/17th century. Humayun ... Osmanh devletinin ilmiye teskilati, Ankara 1965, 38, 46-8, 57, 85-91, 96-102, 110, 117, 263-5, 276-80; M.Z. Ghanem which was responsible for the collection of the kalemi was annexed to the bureau handling treasury duties paid by bakers in Istanbul; (iii) Khalifesi, emin vacant fiefs and other grants, and from fief holders mewkufdcl sandjak [q.v.], was assigned by the Alwar and Tidjara, the tomb of Fath Djang in Alwar (A^m-i Akbari festin-i agrd). Ghanem which managed the relay service; and (iv) (kalemiyye) from farmed-out lands; (ii) Nawul (i) Kalemiyye dd^iresi, issues, [see ASHAM]. Eshdm muhdsebesi kalemi Mewkufdt who went from village to village agents, Khan-zadas. Of their few monuments in and around soldiers in military campaigns, and provided money expense allocations, and from vacant fiefs and other grants. The bureau under him also confiscated land finance department. His main task was to manage the revenues'' (Mewkufdt kalemi] to the Judicial districts of the Two Holy Cities, Mecca and Medina; (iii) Bahri kddi in khamse kalemiyyetleri, judicial districts of the Five Cities, Edirne, Bursa, Damascus, Egypt and Filiibe; (iv) Bilad-i :shere meyleviyyetleri, judicial districts of the Ten Cities, to which an eleventh was later added: Jerusalem, Aleppo, Tîhrâl Yenishchei, Galata, Izmir, Salonika, Eyub, Uşkûdar, Sofia, Crete and Trebizond. (v) Devezvey meyleviyyetleri, judicial districts held in rotation by kddi of Marshah, Baghdad, Bousia, Belgrade, Anitoch, Kutahya, Beirut, Adana, Van, Rusçuk, Sivas and Cankiri. For a meyleviyyet appointment, an applicant was required to graduate from a madrasa [q.v.], and obtain a license, idjaz-name [see IDJAZA]. He could then either teach through all madrasa grades or become a kddi in the smallest judicial unit, kadif [q.v.], rise to the larger judicial unit of a sangid [q.v.], and then go back and teach through the highest madrasa grades. He would then become a candidate for bilad-i 'ashere meyleviyyetleri, which were also called makhreli meyleviyyetleri [see MAHKRELI], judicial districts whose scholars just 'going out' from teaching at madrasas were appointed. Appointments were usually for a year. Meyleviyyet appointments were proposed to the Sultan by the Grand Vizier, sadr-i a'lam [q.v.]. Before the 10th/16th century, the kddi 'usker supplied names of candidates to the Grand Vizier; after then, the shaykh al-islâm provided the list of names. After the 10th/16th century, the term of the appointment was extended when the number of candidates began to exceed that of available posts in the empire. The title was therefore separated from the post itself. A candidate held the title of meyleviyyet pâyins for a year before he was appointed to the post itself, meyleviyyet manjili. Some who were assigned these posts preferred to reside in the capital, and sent deputies, na'ib, to represent them. During later centuries, titles given without appointments, assignments to sons and to household members of influential families who had not been through the educational system, together with the sale of licenses, brought about a deterioration in meyleviyyet appointments. MOGE GÜRK) MEWLÂNA KHNâKIR [see MELVânA KHNKâR] MEWLEVIYYET or MOLLÂLI, title given to certain judicial districts in the Ottoman Empire. I.H. Uzuncarsih located the earliest reference in the 9th/15th century, when kddi [q.v.] posts with the highest fee of 500 akces [q.v.] were defined as bagîyiz meyleviyyetleri. These posts consisted of Istanbul, Edirne, Bursa, Filibe, Salonika and Sofia. Until the late 9th/15th and early 10th/16th centuries, these meyleviyyets were not ranked. This practice was introduced in the late 10th/16th century after the shaykh al-islâm [q.v.] formally became the head of the Ottoman religious hierarchy. The kddi of Istanbul came fourth in rank after the shaykh al-islâm and the Anadolu and Rumeli judges of the army, kddi ’usker [q.v.]. The other meyleviyyets were unranked. During the 10th/16th and 11th/17th centuries, as the empire expanded, many new meyleviyyets were formed. With minor exceptions, their relative ranks did not change after the 12th/18th century. Uzun- carsi lists five ranks of meyleviyyets in decreasing importance: (i) Istanbul kddi, the judicial district of Istanbul; (ii) Hazemeyn meyleviyyetleri, judicial districts of the two Holy Cities, Mecca and Medina; (iii) Balkar mewkufd in khamse meyleviyyetleri, judicial districts of the Five Cities, Edirne, Bursa, Damascus, Egypt and Filiibe; (iv) Bilad-i ‘ashere meyleviyyetleri, judicial districts of the Ten Cities, (v) the Judicial districts in the Ten Cities, to which an eleventh was later added: Jerusalem, Aleppo, Tirâh Yenişchei, Galata, Izmir, Salonika, Eyûb, Usküdar, Sofia, Crete and Trebizond. (v) Devrezvey meyleviyyetleri, judicial districts held in rotation by kâddî of Marşâh, Bagdad, Bouia, Belgrade, Antioch, Kutahya, Beirut, Adana, Van, Rusçuk, Sivas and Cankiri. For a meyleviyyet appointment, an applicant was required to graduate from a madrasa [q.v.], and obtain a license, idjaz-name [see IDJAZA]. He could then either teach through all madrasa grades or become a kâddî in the smallest judicial unit, kadif [q.v.], rise to the larger judicial unit of a sangîl [q.v.], and then go back and teach through the highest madrasa grades. He would then become a candidate for bilad-i ‘ashere meyleviyyetleri, which were also called makhreli meyleviyyetleri [see MAHKRELI], judicial districts whose scholars just ‘going out’ from teaching at madrasas were appointed. Appointments were usually for a year. Meyleviyyet appointments were proposed to the Sultan by the Grand Vizier, sadr-i a’lam [q.v.]. Before the 10th/16th century, the kâddî ‘usker supplied names of candidates to the Grand Vizier; after then, the shaykh al-islâm provided the list of names. After the 10th/16th century, the term of the appointment was extended when the number of candidates began to exceed that of available posts in the empire. The title was therefore separated from the post itself. A candidate held the title of meyleviyyet pâyins for a year before he was appointed to the post itself, meyleviyyet manjili. Some who were assigned these posts preferred to reside in the capital, and sent deputies, na’ib, to represent them. During later centuries, titles given without appointments, assignments to sons and to household members of influential families who had not been through the educational system, together with the sale of licenses, brought about a deterioration in meyleviyyet appointments. Bibliography: I. I. H. Uzuncarsih, Osmanh devletinin ilmiye teskilati, Ankara 1965, 38, 46-8, 57, 85-91, 96-102, 110, 117, 263-5, 276-80; M.Z. (J. BURTON-PAGE) MEWATI [see MÔDÔ] MEWUKÂFATCI or MEWUKÂFAT, title given to the director of the ‘‘Bureau of Retained Revenues’’ (Mewkufat kâlemi) in the Ottoman finance department. His main task was to manage the mewkuf aristocracy, money accruing from unused state expense allocations, and from vacant fiefs and other grants. The bureau under him also confiscated land not registered in land surveys, allocated depots for state purchases, kept records of contribution units (‘‘awarîd-kânîe’’ [see ‘‘AWARID’’], registered relay stations, maintained military depots at all frontiers, allotted food and forage, straw and hay rations to soldiers in military campaigns, and provided money to civil servants accompanying the army. In the 12th/18th century, this bureau had four departments: (i) Kalemiyye dîrîresi, which collected a 10% registration fee (kalemiyye) from farmed-out lands; (ii) Nawul Kâfillisi, which kept the books of food depots and of duties paid by bakers in Istanbul; (iii) Mencci Stjualfisi, which managed the relay service; and (iv) Oshenm kstaâbî which was responsible for the collection of the sheep-tax (kâdet-i aghnam). The Mewkufet emini, a commissioner from the bureau in each sanliuk [q.v.], was assigned by the mewkufet to gather the yearly revenues accruing from vacant fiefs and other grants, and from fief holders who did not join military campaigns. The emin had agents, mewkufcüs, who went from village to village collecting these revenues. In 1838, after the establishment of the Ottoman finance ministry, the Mewkufat kâlemi was annexed to the bureau handling treasury issues, Eshdî mâhâmî kâlemi [see ASHAM]. Bibliography: I. I. H. The first detailed article on the battle was written by Andras Komaromy, A Horthy és a harmincezések (Chief Justice). Contemporary evidence tends to show that there were two appellate courts in the metropolitan city of Agra: the first was presided over by the ważir, while the second, being the supreme court, functioned under the personal supervision of the sultan. Generally, the appellant moved to the Supreme Court, if he was not satisfied with the judgment given by Mi‘ān Bhu‘ā. The anecdotes contained in the Wādikī-i Mushtakī and Tabakī-i Akbarī cast light on the interest that the wāzir and the sultan took in dispensing justice, irrespective of creed, or birth and status of people.

Mi‘ān Bhu‘ā encouraged, in his capacity of sādr, the scholars and intellectuals who came from abroad to settle in Agra and Dihlī on a permanent basis and made land-grants to them for their maintenance. Himself interested in learning, he also gathered a fairly large sprinkling of these scholars in his own service and thus emulated his master Sultan Sikandar Shāh. They undertook at his instance the compilation of works on various themes, literary as well as scientific. The Arabic and Sanskrit classics were collected and transcribed by expert calligraphists and then translated into Persian by capable scholars with the help of Brahmans. Of these translations, the Mādān al-ṣafarī‘-i Sikandar Shāh, based on Sanskrit classics such as Sarvat, Jā Deo kart, Rās Ratnakā, Śuṅgadhār, etc., is considered an important work on medicine, compiled by Mi‘ān Bhu‘ā himself. The terms and names of the herbs and plants were translated into Persian and, if the equivalent of any term was not found in the Persian language, it was simply transliterated with the necessary explanation. Indirectly emphasising the importance of his work, the Mi‘ān says in the preface that the medical science imported from the Muslim countries did not suit the constitution of the Indians, due to climatic dif-
ferences, and he had undertaken the compilation of the work with royal permission, for the Indian system of medicine had been found more effective.

Unfortunately, other books, with the exception of the (LA, s.v. Ma'mar bin Farhad), were compiled by Mi'ān Bhu'a, a Persian translation of Sanskrit classics and one dealing with Indian medicine, produced by different scholars employed by Mi'ān Bhu'a, have not survived.

Mi'ān Bhu'a, as a pious Muslim, constructed mosques and made endowments for the benefit of public: the beautiful mosque in Dihlī, popularly known as al-mu'tadī, was constructed at his cost and is known for its attractive features. The shape and proportion of the five main arches of the façade and the domes, the design and grandeur of the doorway and projecting balconies at the sides show that a talented group of craftsmen was employed for its completion. The evidence of the Maktubāt-i kuddāsī reveals that its ample facilities included arrangements for students, travellers, teachers and Sufi saints, all of whom got food from the kitchen maintained with the money endowed by Mi'ān Bhu'a.

The followers of Mi'ān Bhu'a also enjoyed prestige in the city. The newly-recruited soldier, no matter whether he was a suwa'r or a foot-soldier, could approach any saraf or money changer and borrow money from him for one or two years, after showing him the parasea or letter of appointment. According to the custom, he was assigned agricultural land in lieu of a cash salary. Mi'ān Bhu'a is said to have had villages and pargāns of his maintenance iḥād scattered in different sarkārs around Dihlī and Agra, so that it was possible for him to assign to his retainer maintenance-land in the village of the last one's choice.

Mi'ān Bhu'a retained his position after the death of Sultan Sikandar Lodi, but subsequently failed to enjoy the confidence of the new Sultan Ibrahim Lodi (923-32/1517-26), who ordered him to be put under arrest and handed over to Malik Adam Kākār, one of the confidants of the last Sultan and friend of Mi'ān Bhu'a; this was a mild punishment for the aged ważir, for many of his companions were subjected to torture on account of the royal displeasure. Of the mediaeval writers, Shaykh Kabīr Bāținī says that the ważir was punished because he did not comply with the royal farās, which was the grant of money to a royal favourite, the Rā'ī of Gwālīor. It may be that, owing to old age, he had become negligent of his duties and the Sultan had become doubtful of his loyalty. This seems to be near the truth, because Mucātikī's reference to Mi'ān Bhu'a's imprisonment implies that it occurred before the annexation of Gwalior to the Lodī empire. On his dismissal, the 'adwār was separated from the ważarat; Mi'ān Bhu'a's eldest son, Dilwār Khān, was assigned the ważarat, while Shaykh Farād Būkhārī, an 'allim and the Sultan's teacher, took over as 'adrār.

MICDAD, the common Arabic word, together with its synonym hbr, for ink. Derived from the root m-d-d, it originally meant ‘anything that is added to a thing, because of its utility’, and therefore one of its more specific meanings is ‘that with which one writes’ (Lane, Lexicon, s.v.), or ‘that with which the writer is provided’ (LA, s.v.). There is a single Kur'ānic mention of middd: ‘If the sea were ink for the Words of my Lord, the sea would be spent before the Words of my Lord are spent’ (XVIII, 109). Tradition has it that on the Day of Judgment, the ink of scholars will be measured with the blood of martyrs, and that both scales of the balance will then be in equilibrium (al-Kalkashandī, Subh, ii, 461).

In Middle Eastern manuscripts, two types of black ink were generally used, both of which date from pre-Islamic times. One was prepared on the basis of carbon and oil, and the other one from galluts and ferrous compounds. The former originally being designated as middd, the latter as hbr. Later, the two words were used as synonyms (Grohmann, Arabische Paläographie, i, 127). A considerable number of recipes for ink have survived from mediaeval times, many devised by scribes for their personal use and improved for their purpose by trial and error. Numerous recipes have been transmitted by al-Mu'izz b. Bādis (d. 453/1061) in his Umudat al-kutub, especially in chs. 2-10. Grohmann (i, 127-131) mentions some from other sources as well. For coloured inks and inks used in secret writings, a whole range of natural ingredients was used, but it is often difficult exactly to identify these ingredients from the literary sources.

As Middle Eastern manuscripts continued to be made till well into the 19th century, it may be assumed that in more recent times imported ink, like imported paper, was used as well. The rise of polychrome manuscripts in the Maghrib in the second half of the 19th century may be explained from such imports. A systematical chemical analysis of the inks used in Middle Eastern manuscripts, both in mediaeval and recent times, has not been undertaken so far. An account of the survival of mediaeval practices in bookmaking, including the handling of ink, in recent times, albeit in a Christian environment, has been given by H.S. Sergew (see Bibl.).

MIDHANA [see MANARA].

MIDHATH PASHA (1822-84), Ottoman provincial governor, twice grand vizier, and father of the 1876 constitution. Midhat was born in Istanbul in 1230/October-November 1812, the son of Rusçuklu Hadži Ali Efendi-zade Hadži Häfiz Mehmed
Eshref Efendi. He was named Ahmed Sheftik. Having memorised the Kur'an at 10, he was then called Hafiz Sheftik. In 1833 he moved with his family to Vidin, where his father was an assistant judge. When his family returned to Istanbul the next year, he became an apprentice in the secretariat of the imperial divan. His talent earned him the name Midhat, which thereafter replaced his given names. In 1835-6 Midhat was in Loфa, where his father held another judicial post, before returning to Istanbul in 1836-7. Midhat had already begun to study Arabic; he now began Persian and attended courses at the Fatih mosque while again working in the secretariat. In 1840 he was transferred to the grand vizier’s office.

The bureaucratic career on which Midhat was now launched falls into four phases: 1840-61, increasingly responsible posts as staff member of commissions and councils and as special investigator; 1861-72, three provincial governorships; 1872-7, two grand vizierates and constitution-making; 1877-84, exile, two grand vizierates,triangle, exile and death. The second and third phases of his Midhat at the secretariat.

In 1842-4 Midhat held a secretarial post in Damascus. Thereafter he was secretary to one of the "commissions of improvement" sent out to the provinces in 1845-7, first in Konya, then Kaставумону, under Sаmi Bakir Pашa. During this period, he came on the payroll of the protocol office (madhaba adad) of the madjlis-i wilâyet-i ahkam-i "ulule, the influential Supreme Council of Judicial Ordinances, and remained in its employ to 1859, even while undertaking special assignments. In 1848 he married. He became chief clerk in the protocol office in 1851. For six months, probably in 1852, Midhat was in Damascus as commissioner to investigate a dispute between two pashas over the farm of customs revenues, and to look into alleged misconduct by Kibrисli Mehdjed Pашa, commander of the army of Arabia. Midhat settled the revenue question advantageously to the Treasury. He found misdeeds by Kibrисli Mehdjed in relation to the Druze that led to the commander’s removal from his post. When the Supreme Council’s paperwork was split in two, Midhat became second secretary of the Anatolian session.

During the Crimean War, in 1854-5, Midhat was sent as investigator to the Rumeli wilâyet. Kibrисli Mehdjed, now grand vizier, may have sent him thither to get his revenge by putting Midhat in a difficult situation. But Midhat, working out of Edirне, successfully curbed depredations by башы-безакs and brigands. On return to Istanbul, Midhat gave the new grand vizier Reхdi Pашa [q.e.] a memorandum containing his ideas on provincial reform. Again in 1855 Midhat was sent out, this time to Bursа on earthquake relief. In 1856-7, after successfully defending himself against a false charge of illegal participation in the farm of Istanbul fishmarkets, Midhat was despatched to investigate administration by the walis of Silistre and Vidin. His vigorous actions in those wilâyets led to dismissals of officials, whose friends in the palace got a new investigator appointed. Midhat, in protest, asked for leave, which was granted by the grand vizier 4Pашa. He then spent six months of 1858 in Paris, London, Brussels and Vienna, improving the French he had recently begun to study, and finally gaining some first-hand knowledge of western Europe. In September 1859 Midhat became chief secretary of the Supreme Council itself. While in this post he served on the commission to investigate the Kületi affair, an abortive conspiracy in Istanbul against Тanсимса [q.e.] westernisation.

Midhat entered on the second phase of his career when he was promoted to vizier and appointed walis of the wilâyet of Nish on 29 January 1861. During his three years in Nish, Midhat displayed the energy, the briskness, the secular-mindedness, the egalitarian attitude, the Ottoman patriotism and the honesty that caracterised his activity in all posts thereafter. His programme of action was also characteristic. He sought the cooperation of local notables of all creeds. He created a gendarmerie, curbed banditry, and tried also to curb nascent nationalism among the Bulgars. He deferred collection of some onerous taxes. He built barracks, in part by requiring several days of unpaid labour from peasants in the locality. He built schools, in part with convict labour. He started schools. Because of his success, the Porte joined the Prizren wilâyet to Nish for Midhat to administer. The success also led the grand vizier Fuгd и Pашa [q.e.] to bring Midhat back to Istanbul in 1864 to draft, with him, a new plan for provincial organisation. The wilâyet system, modelled somewhat on French practice, was embodied in a law promulgated on 8 November 1864. It was to be tested in one sizable wilâyet, named tuna (Danube), newly formed of the old wilâyet of Silistre, Vidin and Nish. Midhat was appointed its governor on 13 October 1864, even before the new system was official.

Midhat organised the seven sanjakсs and 46 kodis of the tuna wilâyet, including the local mevlevis, each containing some non-Muslims; at each administrative level [see BULGARIA]. He embarked on a public works programme, which in his three years produced 3,000 km. of roads and 1,400 bridges by his count; various public buildings, including schools, model farms with imported European machinery, industrial arts training schools for the poor and service on the Danube, and harbour works at the port of Rusчuk, the seat of wilâyet government. Tatar and Circassian refugees from Russia were successfully settled in the wilâyet, though not without some problems. A modest economic development was aided by such measures, as well as by the increased security which Midhat established through a gendarmerie and occasional use of regular troops. Midhat started a few small factories. He wore homespun clothes to boost local products. He measured with the longest lasting consequence was his creation of agricultural credit cooperatives, menэfi sanдiklари, to lend to peasants at low interest rates. Modern Turkey’s Ziraat Bankasi is a descendant. Midhat also created the first official provincial newspaper in the Empire, the Tuna, published in Turkish and Bulgarian and beginning on 10 Шаввâl 1201/8 March 1865; Ahmed Midhat [q.e.] soon became its editor. Midhat hoped to win the Bulgarians to Ottomanism through just administration and mixed schools, but the developing Bulgarian nationalism was barely blunted. Midhat dealt severely with rebels; in 1866 he repressed a premature Russian-financed Bulgarian revolutionary rising. On the whole, the wilâyet system had proved workable. In 1867 it was extended to most of the Empire, Midhat again being brought to Istanbul to consult on revising the regulations.

When in 1868 the Supreme Council was replaced by a Council of State (Шаръ-и Девлет) and a Judicial Council, Midhat was appointed, on 5 March, to head the former. Its function was to discuss and draft laws. Under Midhat it elaborated regulations on adoption of the metric system, on nationality, on mining and on a real estate credit bank for small employers. Friction arose between Midhat and the grand vizier 5Ali Pашa on both legislative and personal levels. The
result was Midhat’s transfer on 27 February 1869 out of his first high national office to the wild yetcy of Baghdad. He had already in the autumn of 1868 been sent back to Bulgaria by the sultan on an interim 20-day mission to subdue another rebellion.

In Irak, Midhat’s activity, although similar in many ways to that in Bulgaria, was circumscribed by the local tribalism. Midhat, however, was not only wild but also, extraordinarily, commander of the Sixth Army. He used military force when needed to subdue tribes, to collect taxes and to impose conscription. Success was partial. Midhat tried to induce tribes to settle. At least one shaikh exchanged that title for the new one, under the wilayet plan, of mutasarrif of a sanjak. Settling tribes was also part of Midhat’s process for bringing land under state control. He applied the Ottoman land code of 1858, furnishing tara deeds that gave freehold right to the cultivator; most such deeds, however, came into the possession of tribal shaikhs, city merchants or former tax-farmers rather than of ordinary tribesmen or peasants. The marshlands of southern Irak, and date-palm culture, became more prosperous with pacification and settlement. Ottoman control was even extended over Kuyayvat and, precariously, into al-Hasa and part of Najd.

Midhat organised the councils of the wilayet system, and appointed the provincial ministers. For Baghdad, Midhat named a good many Irakis to government offices. He tore down some of the old Baghdad walls to allow city expansion, introduced some paving and street lights, procured fire engines, started a water supply system, and built the only bridge the city possessed before the 20th century. He started wool and cotton mills and an army clothing factory. He established schools, including a military school and a craft training school for orphans, a savings bank, a hospital, and a tramway utilising horse cars to the Kazimayn suburb. He promoted regular steamer service on the Euphrates and shipping in the Gulf. The first newspaper in Irak, the official Zaora, in Turkish and Arabic, appeared on 16 June 1869 and semi-weekly thereafter. Midhat also eased relations with Iran concerning border tribes and currency circulation.

After Midhat’s resignation as justice minister, for Baghdad, Midhat vied with the new grand vizier, Mahmud Nedim Pasha, for control of the grand vizierate. On 9 March 1876, a “Manifesto of the Muslim Patriots”, probably by Midhat or his adviser Odian Efendi, went out to European statesmen and was circulated privately in Istanbul; it called for a constitutional government, an elected representative, consultative assembly.

As public discontent mounted in 1876, Midhat became convinced that the present assembly was not a majority of political change. He may have helped to spark demonstrations in Istanbul by sofis or religious students on 10 and 11 May which resulted in the dismissal of Mahmud Nedim and appointment of Medjdum Mehmed Rûhdû Pasha as grand vizier. On 19 May, Midhat was made minister without portfolio. Along with the minister of war Hüseyin Âwni Pasha and the military academy director Süleyman Pasha, Midhat plotted the deposition of the erratic and spendthrift Abd al-Âzîz. It was effected, bloodlessly, on 30 May, and Murad V received the oath of homage. Immediately, Midhat, who on 5 June again became president of the Council of State, began pressing for the elaboration of a constitution. Hüseyin Âwni and others opposed him. Serious impediments arose also from unsettling events: the suicide of the ex-sultan Abd al-Âzîz on 4 June; the murder by a Circassian officer of Hüseyin Âwni and the foreign minister Râcid at a meeting at Midhat’s house on 15 June, the expanding war against Serbia and Montenegro, and, above all, the nervous breakdown of Murad V, who was never girded. Despite discussions of a constitutional draft by ministers and a mejdî-i 4umâmî, progress was minimal. The ministers finally decided that Murad V would have to be replaced by his younger brother, Abd al-Hamid, and, on 27 August 1876, Abd al-Hamid took the oath of allegiance.

The new sultan was, however, slow to redeem his promise. On 8 October he approved a constitutional commission of leading Muslim and Christian officials, with Midhat as chairman. The commission considered many models and drafts, including one by Midhat himself. The draft submitted to Abd al-Hamid in late November incorporated Midhat’s proposal for a prime minister instead of a grand vizier. The sultan was enthusiastic, and his objections were supported by other ministers and officials, including Ahmed Dëwet [v.s.]. Finally, on 6 December 1876 the new sultan approved a revised draft by the commission, which enlarged the sultan’s powers and restored the office of grand vizier.
al-Hamîd accepted the constitution when a clause empowering the sultan to exile dangerous individuals was added. Mehmed Rûşhdû then resigned, the sultan appointed Midhat grand vizier on 19 December, and the constitution was ceremoniously promulgated on 23 December 1876.

Midhat hoped that the act of promulgation might induce the great-power conference on plans for restructuring Ottoman administration in the Balkans, then meeting in Istanbul, to agree that the new constitutional régime should do it instead. He wanted the powers not only to accept but also to guarantee the constitution, and sent Othân secretly to London to ask for support. But the powers treated the constitution as if it were a sham. The conference went ahead to propose drastic changes. Because the election process for the chamber of deputies was not nearly completed, Midhat convened on 18 January 1877 an unusually large medîls-i umumi, which with patriotic emotion rejected the Constantinople Conference scheme.

Midhat has been blamed for pursuing a hard line with the powers that eventuated in a Russian invasion in late April 1877. But Midhat sought further negotiation, not war; had he remained in office, he might have avoided war, but he was grand vizier for only 49 days. From the start he and Abd al-Hamîd were on a collision course. The sultan rejected proposals by Midhat; Midhat failed to carry out orders of the sultan, one of which was to send his constitutionalist friends Nâmîk Kêmîl [q.e.] and Diyâ out of the capital. Those two and others started recruiting a volunteer guard unit that worried the sultan. But basically, 1Abd al-Hamîd feared Midhat as one who had deposed two sultans and who might try it again. Further, Midhat conducted himself as if he were a prime minister answerable more to the nation than to the monarch. The sultan also was answerable to the nation, Midhat believed, and this view was incorporated in the famous letter of 30 January 1877 which Midhat is said to have written to the sultan, although its authenticity is debated. The sultan may even have believed charges that Midhat leaned to republicanism. Hence on 5 February, Midhat was abruptly dismissed and sent in exile to Brindisi on the imperial yacht.

Midhat visited Naples, Rome, Marseilles, Andalusia Paris, Plombières, London, Vienna and Scotland. He wrote memoranda to European statesmen, especially British ones, supporting the Ottoman cause in the Russian war of 1877-8. He collected funds for the relief of Muslim refugees from the Balkans. He courted European opinion with a pamphlet defending Ottoman reforms and attacking Russian subversion. Because Midhat was so popular in Europe, and because of British pressure, 1Abd al-Hamîd allowed his return to forced residence. Midhat arrived in Crete on 26 September 1878, going to live with his family in Halepa, outside Hanya (Canea).

In his nearly two years as governor of the Syrian wilâyet [see Dimashk], Midhat acted much as in Tuna and Baghêdad. He started schools, including a vocational school, built roads, built a tramway from Tripoli to its port, created a stronger gendarmerie and appointed some Christians to it, appointed some Syrians to the bureaucracy, founded a theatre and a public library, etc. He was less successful in setting tribes and quieting rebellions. With the Druze, he achieved a standoff; he made the Djabal Durûz into a new kada, with its own Druze kâmaks. Midhat felt that he needed authority over the military and the courts, as well as over the bureaucracy and finance, to be effective. But his requests for broader powers and approval of extensive reforms were refused by the sultan. Twice Midhat resigned, on 23 October 1879 and 30 May 1880, but the sultan refused consent.

1Abd al-Hamîd was, however, receiving zurnâls from informers stating that Midhat sought to be ruler or khedive in an autonomous Syria and was currying local favour to that end. Midhat in fact opposed any Arab or Syrian separation, but he may have counthey his anti-Ottoman position and persuaded 1Abd al-Hamîd that he needed broader powers. The sultan evidently decided that Midhat might be a danger in Damascus, and so ordered his transfer to İzmir on 4 August 1880. Midhat left Syria on 31 August, and again was not allowed a visit to Istanbul.

Midhat's governorship of İzmir lasted less than a year. It was unremarkable, except for warnings which he received from friends in Istanbul that he might be charged with complicity in the alleged murder of the ex-sultan 1Abd al-âzîz. Midhat declined, however, to flee to Europe. At about 2 a.m. on 17 May 1881, troops entered his house to arrest him. Midhat escaped through a garden gate to the French consulate. The next day, the Paris government refused asylum, and Midhat agreed to arrest provided that his trial were public, and such an assurance was given. Midhat was taken by ship to Istanbul and interrogated on board by Dewdat Pasha, the justice minister, who willingly undertook this mission to apprehend his opponent. Midhat was confined in the Malta Kiosk in the Yıldız Palace grounds.

The Yıldız trial, though semi-public, was a travesty of justice. The case against Midhat and nine others was built on weak testimony, presumably obtained through torture, bribery and sycopancy. The trial of the ten began on 27 June 1881. On 28 June, all of them, including Midhat were found guilty. On 29 June, Midhat and seven others were sentenced to death. An appeals court, obviously under Palace influence, reversed the sentenced. But widespread Ottoman and European opinion urged leniency, as did a minority of a special medîls convened for review. 1Abd al-Hamîd thereupon converted Midhat's sentence to life banishment. On 28 July 1881 Midhat and others were hustled aboard the yacht 1Izz ad-Dîn without even a change of clothing, transported to Djidda, and thence to imprisonment in a fort in al-Djâbâl. There, Midhat suffered increasingly harsh treatment, and in the early hours of 8 May 1884, he was strangled by soldiers, evidently acting on 1Abd al-Hamîd's orders. His death was reported as due to a carbuncle and other abscesses. He left two widows, three daughters and a son, 1Ali Haydar. In 1951 his bones were repatriated to Turkey.

Midhat Pasha had proved to be one of the ablest Ottoman administrators of the 19th century. His energy and creativity were most effective in provincial governorships where he had wide authority, although some of his measures were obviously hastily and some were superficial. His forthrightness and arrogance hampered him as grand vizier, especially in dealings with the palace. For his day, he was a liberal; he shared many views with the Yeffî 1Oğmânîlar or Young Turks, especially on the desirability of a parliament. Without Midhat, the constitution of 1876 would not have come into existence. Although ambitious for himself, Midhat fundamentally acted on
his belief that the task of a government official was to serve the people and the fatherland.

**Bibliography:**

The principal sources are biographies of his father by: Allâhverdî Midhat Pasâ, Mevlid-i Huzurdan, the largest Greek island after Crete and Euboea, and the seventh largest of the Mediterranean. It has a roughly triangular shape, its broad base, ca. 70 km long, running from east-south-east to west-north-west, while the line from its apex in the north to the middle of this base measures 47 km. The relatively straight lines of its coast are interrupted by two gulfs on the south and south-east, that of Kallonis (also known by its classical name of Pyrrha), 21 km long, and that of Yeras, 14 km long. These gulfs, together with the Straits of Chios, are narrow passages from east-south-east to west-north-west can be seen from the former. The islands of the Aegean on either of al-Idrisi's maps. Malone: The first Ottoman constitutional period, Baltimore 1963; Enver Ziya Karal, Osmanlı tarihı, v-vi, Ankara 1954-56. Further bibliography, including references to the standard older Turkish histories of the period, is conveniently found in the works cited above by Baykal, Davison, Fadeeva and Gökdöglu, and in the *EP* art. s.v. (Fr. Babinger).

**MIDILLI** (Turkish form of Muradiye, Mystilene, the Greek name of its capital), the island of Lesbos in the eastern Aegean alongside the Turkish coast near the entrance to the Gulf of Eredrim [q.v.] and the town of Ayvalık (Aywâlk [q.v.]); the straits of Mystilene and Mystilene that separate it from Turkey on the north and east average 10 and 16 km in width. With an area of 1614 km², Lesbos is the third largest Greek island after Crete and Euboea, and the seventh largest of the Mediterranean. It has a roughly triangular shape, its broad base, ca. 70 km long, running from east-south-east to west-north-west, while the line from its apex in the north to the middle of this base measures 47 km. The relatively straight lines of its coast are interrupted by two gulfs on the south and south-east, that of Kallonis (also known by its classical name of Pyrrha), 21 km long, and that of Yeras, 14 km long. The island is earthquake-prone; it contains many springs, some hot with beneficial mineral content; several of the latter have been valued since antiquity. The dense oak and pine forests that once grew on Lesbos had dwindled to scattered remnants already in Hellenistic times. Classical Lesbos was famous for its ideal climate and fertile soil; these assets, combined with an advantageous position near strategic commercial and maritime routes and an enterprising population, led to a remarkable prosperity and to political and cultural achievements (for the island's long and rich classical history, see Pauly-Wissowa, xii, 1925, 2107-33, s.v.; *Der Kleine Pauly-Wissowa*, iii, 1969, 583-87, s.v.; *A. Philippsen, Die Griechischen Landschaften*, iv, 1959, 233-44, I.D. Kontes, *Lesbos kai he Mikrasiatike tes perihsis*, Athens 1978) The principal city and port of Lesbos, Mytilene (a name of probably pre-Greek origin), first developed on an islet connected with the island's eastern coast by a possibly man-made isthmus. The city spread to this connecting neck and eventually also to the adjacent coast (see the engraving facing p. 390 of J. Pitton de Tournefort, *Relation d'un voyage du Levant*, 1, Amsterdam 1718). In the Middle Ages, Lesbos came to be known by the name of its capital as the island of Mytilene or, through a metathesis, Meliten; this sometimes caused its confusion with the island of Malta or Melita (as shown by the association of the legend about St. Paul and the island among the Aegean on either of al-Idrisi's maps. In the other hand, St. Paul's letters [21:8-20; 22:1-21; 27:1-24] raied the island as part of his mission to the eastern Aegean alongside the Turkish coast.
MIDILLI

of his forays throughout the Aegean all the way to the Propontis (the Sea of Marmara, Marmara Denizi [q.v.]) to the point of making the inhabitants of Erexis (legendary home of the poetess Sappho) abandon their city and move to Mount Athos (A.A. Vasilev, Vizantija i Arabi, St. Petersburg 1910, ii, 46-7; French tr. Byzance et les Arabes, Brussels 1968, ii/1, 53).

Lesbos came under Muslim rule for the first time in or soon after 1089 and remained so until 1093 as part of the brilliant but short-lived successes of the Turkish amir Caka (reconstructed from the Greek Tzaschos), who founded the earliest Turkish maritime power from his base at Izmir. This Turkish threat was the principal cause of a renaissance of the Byzantine navy, rebuilt by Alexis I Comnenos; Caka himself, however, fell victim to Byzantine diplomacy that convinced his assassination in league with the emperor’s relative, the Saljuk sultan Khayr al-Din, in 1093 (H. Ahweler, Byzance et la mer, Paris 1966, 184-9; S. Vryonis, The decline of medieval Hellenism in Asia Minor, Berkeley 1971, 115; A.N. Kurat, Caka, Istanbul 1936).

By the time that the Aydin bag Umur (1334-48; see P. Lemerie, L’empire d’Aydin, Paris 1957; I. Melikoff-Sayar, LeDestan d’Umut Pacha, Paris 1954; and soyulmogultu) repeated and surpassed Caka’s exploits (without, however, occupying Lesbos), the growth of Turkish and Latin power in the area made Byzantine hold on the island, among other places, precarious. Thus in 1355 the emperor John V Paleologus gave Lesbos, his sister Mary’s dowry, in an act of gratitude and as a practical solution, to his brother-in-law, the Genoese Francesco Gattilusio. This family then ruled Lesbos until its conquest by the Ottomans in 1462 (W. Miller, Essays on the Latin Orient, Cambridge 1921, 313-53, ch. “The Gattilusio of Lesbos”; W. Heyd, Histoire du commerce du Levant, Leipzig 1885, i, 510-12; E. Armao, Il giro per il Mar Egeo con Vincenzo Cornellesi, Florence 1951, 110-11). The rule of the Gattilusios was characterized by the pragmatic, commerce-minded goals of Latin, mainly Italian, possessions in the Aegean. When Timur [q.v.] occupied Izmir in 1403, the Gattilusios hastened, like the Genoese company of the Mahone on Chios, to send presents and proclaim their loyalty. On the other hand, these Catholic overlords do not seem to have been fully accepted by the mainly Greek Orthodox population, a circumstance that may have facilitated the gradual spread of the Turkish dominance.

After the conquest of Constantinople by Mehmed II, Dorino Gattilusio (1426-55) managed to conserve his possession by means of a tribute of 3,000 ducats (a sum raised at the accession of Dorino’s son Domenico in 1455 to 7,000 ducats). In 1458 Domenico was imprisoned and subsequently murdered by his brother Niccolo. This, as well as irritation at the refuge which both Domenico and Niccolo gave to Catalan corsairs, is often cited as the cause of Mehmed’s displeasure and eventual conquest, but a more decisive factor may have been the island’s economic and strategic importance. Thus in the context of the conquest of 1462, a Turkish fleet under Mahmut Pasha [q.v.] anchored off Mytilene, while the sultan set up camp on the mainland near Aywali. Niccolo refused to surrender, but did so after a siege of three weeks. The richer inhabitants were then moved to Istanbul, a number of boys and girls were encouraged to settle in the island (Miller, op. cit.; F. Babinger, Mehemd el Conqueror and his time, Princeton 1978, 210-12, and passim; Aşiklî, Vakif ve Hâkim, ed. Nature, Kalenderhane, Istanbul 1976, 162, lists representatives (mostly vice-consuls acting for their consulates at Izmir) of Great Britain, Austria-Hungary, the United States, Sweden-Norway, Belgium, Greece, Holland, Iran, Spain, France, Italy and Germany. Their presence was due both to the economic importance of the island and to its position on crucial shipping routes. The port of

women, were encouraged to settle in the island (Miller, op. cit.; F. Babinger, Mehmed the Conqueror and his time, Princeton 1978, 210-12, and passim; Aşiklî, Vakif ve Hâkim, ed. Nature, Kalenderhane, Istanbul 1976, 162, lists representatives (mostly vice-consuls acting for their consulates at Izmir) of Great Britain, Austria-Hungary, the United States, Sweden-Norway, Belgium, Greece, Holland, Iran, Spain, France, Italy and Germany. Their presence was due both to the economic importance of the island and to its position on crucial shipping routes. The port of
Mytilene, the busiest of the archipelago, consisted, as in antiquity, of two harbours separated by the isthmus, a northern and a southern one; the northern harbour, protected by a bay, was the principal one. In 1305/March 1889-Febr. 1890 3,462 ships called there (V. Cuinet, *La Turquie d’Aire* Paris 1894, i, 469). The ratio of the Greek to the Turkish population on the island was about 4 : 1, the sănâname, no. 10 for 1310/March 1894-Febr. 1895, 241, lists 98,882 Ottoman subjects besides a small number of foreigners; of the Ottoman ones, 85,328 were Greek Orthodox and 13,524 were Muslims. In the capital itself, the Turks were, according to Newton, “a decaying and decreasing population” (i, 57); there were, according to him, no very rich Turks except for the Pağha and his son, for the wealthy Lesbots were the rich landowners of the Greek bourgeoisie. Other sources mention also Greek merchants and bankers. The island’s principal source of wealth and article of export were, throughout its history, olives and olive oil, although the fertility of its soil could have yielded an abundance of cereals as well; olive growing was favoured, according to Pococke, because it required little labour, which in turn could be done by women and children, and grain had thus to be imported. Nevertheless, the cultivation of wheat, famous in antiquity, again expanded in the final decades of the Ottoman period in view of the increasing demand for the Mediterranean. Equally favoured, but of more difficult access, was the gulf of Kalloni. The harbours of Mytilene, a Greek one with 97 students and a Turkish one with 40 students, with the fragrance of its Mediterranean vegetation, and the climate was salubrious. The only serious ailment was tuberculosis, chiefly limited to the wives, sequestered in their women’s quarters, of the more opulent Greek and Turkish inhabitants (Cuinet, i, 451).

In the final decades of the Ottoman period, the vålet of Dziçazâr-i Bahri-i Safid (which had by then lost any connection with the office of the commander of the Ottoman navy) consisted of four sandşaks: Rodos ([q.e.], Chiós (Sakiz [q.e.]), Lesbos and Lennos (Limmîn [q.e.]). That of Lesbos was divided into four kadâ’s: of Midilli, Molyvo (Methymna), Pîlmar (Plomari) and Yunda; the last-named, known in Greek as Monoektos or Kekatonesía, consisted of a group of small islets dominated by the larger Alibay Adası facing Ayvalik; this kadâ was the only part of the sandşak that remained Turkish at the conclusion of the Balkan War. The title of the sandşak’s governor was mutasarrîf, while the kadâ’s were administered by kaymakâmâns, and the nahiyes by müdîrs. Lists of government officials in the sănânames show that majority were Turks, but that Greeks also participated in the administration.

Ottoman rule on Lesbos ended in December 1912, when a Greek fleet landed troops on the island and took control of it (Ali Haydar Emir [Alpagur], *Balkan harbinde Türk filosu*, Istanbul 1932, 249-53). Greek annexation was ratified by the London Conference in May 1913. The Turkish inhabitants left Lesbos as part of the population exchange between the two countries in the 1920s.

MIDRAR (Banu) or MIDRARIDS, minor Berber dynasty which was established in Sidjilmâs(a) [q.v.] and which enjoyed relative independence until its final absorption in 366/976-7. The history of this dynasty can be briefly outlined, thanks to al-Bakrî [q.v.], who lived in the 5th/11th century and thus possessed quite recent information in order to write the chapter that he devotes to it (Mughrib, 148 ff., Fr. tr. 282 ff.), before Ibn Idhârî (7th-8th/13th-14th century [q.v.]). Ibn Khaldûn (8th/14th century [q.v.]) and several historians of the Maghrib and Maqrîzî were able to take their turn at tackling this; but a number of important episodes of this period were recorded in the works of the kâdî al-Nu'mân [q.v.] available today, in particular the Ittihâd al-da'wâ wa 'l-musayyarár, sometimes also in the Autobiography of the chamberlain Djâfar b. 'Abbâs [see Bibl.], although the latter sources, contemporaneous with the events which they relate, express the often biased point of view of the Fatimids.

From the start, it is difficult to date the birth of the dynasty which, despite appearances, does not seem to coincide with the foundation of Sidjilmâs, itself not well established. One tradition links the foundation with a member of the tribe of Mikhânâ [q.v.], Abu 'l-Kâsim Samghû/Samghûn (i.e. Samgû or Samgûn) b. Wâsâl al-Mikhânî, who had adopted the doctrine of the Sufî [q.v.] Khârijî; this man is said to have gathered hadîth, in Ifrîkiya, from 'Ikrima [q.v.], the famous nauâlî of Ibn 'Abbâs, whom legend depicts as the propagator of Khârijism in the Maghrib, a region where he probably never set foot. The Samghû/Samgûn in question, who, it is said, pastured his flocks on the site of the future town of Sidjilmâs, gathered around him some Sufis, and, as soon as the group numbered 40, set out, in 140757-8, to build houses; the small community surprisingly chose as its chief a negro by the name of 'Isâ b. Mazyad (rather than Yazîd) al-Aswâd, whose father had been converted to Islam, but his conduct so offended those he governed that they tied him to a tree and left him to die in 155772; he had reigned 15 years (al-Bakrî, 148/286; Berbères, i, 261). According to the sources, his successor was the first-mentioned personage, Abu 'l-Kâsim Samghû/Samghûn, who reigned 147778-83. This tradition, which traces back the foundation of the town and, consequently, of the dynasty, if not of the family, to 140757-8, is preferred by our first informant, al-Bakrî (149/284); Ibn Idhârî (i, 157) and Ibn Khaldûn (Berbères, i, 261) only know of it, while the Mášâbír al-Barbar [q.v.] (48) reports on the authority of 'Arîb b. Sa'd [q.v.] that Abu 'l-Kâsim Samghû ruled over Sidjilmâs, founded in 140 by his grandfather (sic) 'Isâ b. Yazîd. Al-Bakrî reproduces in any case a second tradition, according to which a smith from Cordova called Midrâr, who had taken part in the Revolt of the suburb (in 202/818 [see KURTUBA]) and was consequently a Rabâdi, was able to escape and came to settle near the market whose site was to be occupied by the capital of the Midrarîs; while suggesting that the first of the two accounts is "more in conformity with the truth", this author nevertheless asserts (149/285) that the rulers of Sidjilmâs are descendants of the smith Midrâr, since "they were subjected to satirical insults on this subject." The Ittihâd (204), for its part, draws on the two traditions, which it moreover mixes; it calls Midrâr b. 'Abd Allah the alleged disciple of 'Ikrima, and says that the Midrâr who escaped from Cordova was black, a fact which earned for his descendants gibes or epigrams. As for E. Lévi-Provençal, he admits the Cordovan origin of the founder of Sidjilmâs (Hist. Esp. mus., i, 170, n. 1).

This latter tradition, which appears seductive in the form in which it is presented by al-Bakrî, does not, however, pose the problem of chronology which is imposed, for the impression is given that the town existed as early as the end of the 2nd/8th century. In fact, after 168784-5, al-Bakrî (150/286) and Ibn Khâlidun (i, 262) have a son of Samghû/Samgûn mentioned as reigning by the name of Abu 'l-Wazîr al-Yâsî b. Abî 'l-Kâsim, who was dethroned in 174790-1 (the date of 170 mentioned by Ibn Idhârî is to be corrected) by his brother Abu 'l-Muntasîr (sometimes called Abî 'l-Manṣûr, but probably wrongly) al-Yâsî, who remained on the throne until his death in 208823-4. This long reign was to be quite brilliant and beneficial, for al-Yâsî, who is said to have been of a particularly violent and despotic character, subjugated all the Berbers of the region who resisted him, levied the fifth on the mines of Darâ [q.v.] and had built in 199814-15 (al-Bakrî, 148/282-3); Jacques-Meunîé, i, 201) the town wall with 12 gates in it, of which eight were covered in iron so that the enemy could not set fire to them. It is stated that this wall, the lower part in stone and the upper in unfired brick (Ibn 'Idhârî, i, 157), was undertaken entirely at his own expense, and that the work force cost him 1,000 measures of grain (al-dâm) a day. He also adorned the town with a certain number of palaces and public buildings, notably the Friday mosque (al-Bakrî, 148/283; Berbères, i, 262; Jacques-Meunîé, i, 201).

Given, on the one hand, that the total duration of the dynasty is reckoned at 160 years (al-Bakrî, 149/284; Ibn Idhârî, i, 157; Ibn al-Abbar, Hulla, i, 191-2) and that, on the other hand, disregarding the Rabâdî mentioned above, the first Midrâr cited is the son of al-Yâsî, al-Muntasîr, who ascended the throne in 208823-4 (al-Bakrî, 150/286; Berbères, i, 262), it is perhaps from this year that we have to date the birth of the Middâerd line, in spite of the fact that, in general, the eponym of dynasties may be the father of the first of their members, that Ibn Idhârî (i, 157) clearly states that it came to an end in 296 after approximately 160 years of rule, that Ibn Khâlidun (i, 260) goes so far as to mention the name of Banû Wâsâl, which would also take it back to the year 140, and that G.-S. Colin, in the article Sidjilmâs in Ep. makes "the Mikhânî dynasty of the Banû Midrâr" begin in 155771-2, i.e. with the immediate successor of the first ruler of the town, which is in conformity with al-Bakrî’s opinion and calculation, but completely disregards the figure of 160 years and the absence of a person called Midrâr before 208823-4. For this reason, we will begin arbitrarily with:

I. Abu Mâlik al-Muntasîr b. al-Yâsî, whose surname Mîdâr (— one who produces much milk or pours forth abundant rain, etc.), which had no doubt been given him as a title of good omen, served to designate the ruling family whom al-Mas’dî (Marûq, iv, 39 = § 1367) further named as the Banû 'l-Muntasîr, which justifies the decision taken. This author estimates the extent of the amîr’s dominions—one would wish to know on what basis— at 400 farâbghâs by 20 (400 farâbghâs by 20), and makes one Ahmad b. al-Muntasîr the ruler of the land of Astûlâ (?) which measured, according to him, 400 farâbghâs by 250. According to Ibn Khurraḍî (ed. and Fr. tr. M. Hadji-Sadok, 9), the territory of the Banû Midrâr included the Darâ, where a silver mine was located, and the town of Ziz, i.e. it probably extended present-day Tafillaût.

Midrâr, a nominal vassal of the 'Abbâsids (in

whose name the kharit had been pronounced, at least in the time of the caliphs al-Mansur and al-Mahdi, i.e. from 140 to 169/758-85, if we are to believe Ibn Khaldûn, i, 262) may have acknowledged a certain dependence on Cordova, but no doubt one much less strict, as E. Lévy-Provençal says (Hist. Esp. Mus., i, 281-2), than that of the Rustamids of Tâhârt [q.v.], with whom he had moreover some affinities, since, like them, he was a Khâridjite; he had even married Arwa bint Abd al-Rahman b. Rustam (al-Bakn, 150/287; Berbères, i, 262; G. Marçais, 103-4; Jacques-Meunie, ii, 201). It so happens that his reign was troubled by the rivalry of his two sons, both of them with the first name of Maymûn, born to him by the Rustumiyya and another woman by the name of Thakiyya (?) Bakiyya in Ibn 'Idhârî, i, 157). After having ended three years of dispute, Midrâr, who was inclined to favour the former, banished the latter, but was himself dispossessed by the son to whom he had given preference. The population of the town then rebelled, offered the throne to the son of Thakiyya, who refused it and gave it to Midrâr, who made the mistake of appearing firm in his intention to entrust it to Maymûn Ibn al-Rustumiyya. This time, the inhabitants of Sidjilmasa besieged their sovereign in his palace and gave their allegiance as chief to ii. Maymûn b. Thakiyya, called al-Amîr. The deposed dynast died in 253/867, while his son ruled until his death, in 263/876-7, and was succeeded by iii. his son MUHAMMAD, who died in Safar 270/August-September 884 (al-Bakrî, 150/287; Berbères, i, 263; cf. Ibn 'Idhârî, who does not follow exactly the same order).

It was not long before the principality of Sidjilmâsa, whose tranquility until then appears to have been disturbed only by some purely internal dissensions, entered into the general history of the Maghrib and Islam, at the same time losing the autonomy that it had preserved vis-à-vis the Aghlabids [q.v.] of Kairwân and the 'Abbasids of Baghdâd, of whom the Midrarids were still nominal vassals, as is proved by the letter sent, at the time when the Mahdi 'Abd Allah was being sought after, most likely not by al-Mu'tadid (279-89/892-902), as is stated by Ibn Khaldûn (Mukaddima, i, 30; Fr. tr. de Slane, i, 40-1) and the author of the Istibâr (204), but more probably by his successor al-Mukarrif (289-95/902-8), to the following anîr, iv. al-Yasa' (sometimes erroneously: 'Tsâ) b. al-Muntasîr (or b. Midrar), son of the no. 1 above, who occupied the throne from 270 to 296/882-909.

In fact, on 1 Shawwâl 292/July 905 (see Autobiography, 297), following a prediction according to which the awaited Mahdi [q.v.] is to appear in Sidjilmâsa, the future founder of the Fâtimid dynasty, al-Mahdi 'Abd Allâh [q.v.] set out in the direction of this small capital with his young son al-Kâsim (Istibâr, 204; Berbères, i, 263; Terrasse, i, 140; Jacques-Meunie, ii, 202). He rented a house there, the Dâr Abî Habashâ (Autobiography, 302), succeeded in concealing his identity for almost four years and received good treatment from al-Yasa' b. al-Muntasîr, possibly owing to the presents that he had given him. Besides, he had no doubt been able to make friends among the flourishing 'Irâkî colony resident in the town (cf. Dachroui, Califat, 122, 311). The circumstances in which his true identity was revealed are differently reported by the sources. According to the Autobiography of Dja'far b. Abî (303-4), his son miraculously caused a spring to gush forth in a garden next to his house, and the secret was thus divulged. According to the Istibâr (204), however, he had been
denounced by a Jew, while Dachraoui (Califat, 123) asserts that al-Yasa‘i was informed of his presence by a letter from Ziyādat Allāh [see MULQABIDS]. According to Ibn Khaldūn (Mukaddamā, i, 30, 35-4; Fr. tr. de Slane, i, 40-1, 45), the letter from Baghīdād mentioned above was addressed to the Aghlabids of Kayrawān and the Midrārids of Sidjīlmāsa ordering them to close their land to ‘Ubayd Allāh and his son (whose genealogy, in the opinion of Ibn Khaldūn, was by this act recognised as authentic); al-Yasa‘i then discovered the truth and had the two fugitives imprisoned. Whatever the facts of the matter, at one time or another, the Midrārid put ‘Ubayd Allāh, if not in prison, (Istībār, 202), at least under house arrest in his sister’s house and separated him from his son, with whom he could, however, communicate through an intermediary, a young eunuch originally from Aleppo called Sandal, whom he had bought locally (Autobiogr., 307 and n. 3). Acting through a Shi‘i from Kayrawān in whose company he had travelled (Autobiogr., 305) and who had been authorised to return to Kayrawān, he was able to inform of his situation the dā‘ī Abū ‘Abd Allāh al-Shī‘i, who had just seized Rakkāda [q.e.] (Istībār, 262). This dā‘ī was eager to recruit supporters, hence set out for the West, subdued on his way the Rustamids of Tāhurt and arrived before Sidjīlmāsa on 6 Dhū ’l-Hijjah 298/August-September 910 the end of the reign of al-Yasa‘i, i.e. there is a difference of a whole year from the date given by the contemporary Shi‘i sources, which is perhaps more reliable; for him (150/288) and for Ibn Khaldūn (i, 263), it was in Rābi‘i 1 298/November-December 910 that the rebellious population put on the throne

vi. WĀṢĪL, i.e. al-Fāṭih in Ibn ‘Idhārī, i, 206), son of (ii) Maymūn al-‘Amr, who died in Rabī‘a 300/February-March 913 and was succeeded by his brother

vii. AḤMAD, killed in Muharram 309/May-June 921, by the governor of Tāhurt on behalf of the Mahdi, Masāla b. Ḥabīb, who came to besiege Sidjīlmāsa, seized it and installed on the throne a Midrārid prince who was totally devoted to his cause, 

vi. ‘AL-MUṢṬAṢẓ, Muhammad b. Sā‘ūr (?) b. Midrād (al-Bakrī, 151/288; Berbères, i, 264; Ibn ‘Idhārī, i, 179, 183; Dachraoui, Califat, 151). On his death (321/933-4), his son

viii. Abū ‘UṣMIṬAṢ (al-Maṣrīn in Ibn ‘Idhārī, i, 206) Muhammad succeeded him and spent the rest of his life in power; he died in 331/942-3 (cf. Berbères, i, 264) and his sons

ix. Abū ‘UṣMĀṬ b. (ii) Sāmũ g. (viii) Muhammad, who was only 13 years old, took his place, but entrusted state affairs to his grandmother, who administered the state for only two months, for a son of (v) Wāṣīl, 

x. MUḥAMMAD b. (v) al-Fāṭīm Wāṣūl (ii) Maymūn al-‘Amr, seized power by force and put the incumbent ruler in prison (MadāṣÌ, 389).

The new master of Sidjīlmāsa had apparently developed fairly close ties with the Umayyads of Cordova, since he was present in the midst of their troops on 11 Shawwāl 327/1 August 939 at the Battle of Simancas (Lévi-Provençal, Hist. Esp. mus., ii, 58). Thus it is not astonishing that he had repudiated the Sufi Khārījīs to which his ancestors adhered, so as to be converted to the Mālik Sunnism in force in al-Andalus (al-Bakrī, 151/288). This decision was bound to disappoint his Fātimid suzerain, who endured the Khārījīs for circumstances and possibly also accepted, however dubious this may be, that the kubba should be pronounced in the name of the ‘Abbasids (Berbères, i, 264), but was unable to award a more or less declared allegiance to the Umayyad régime. It is said that he was nevertheless able to govern his principality and to exercise justice there; however, from the testimony of Ibn Hawkal (83/ Fr. tr. 79), who was present in Sidjīlmāsa in 340/951 and had some dealings with him, “while he called for war [...], he was unable to obtain from the Berbers what he wanted, because those whom he invited to join him on campaign were disinclined to do so, fearing a trick to harm them". There is no mention of whether it was the Fātimids against whom he was directing his attack, but it is known that the rulers of Ifrīkiya grew very angry in 342/953-4, when he had the audacity to proclaim himself caliph, take the title of Amīr al-Muṣṭaṣ, the Ahwāz and the ruling name of al-Shākir li-l-lah (Berbères, i, 264; Jacques-Meunier, i, 203) and to mint coins (the madhākh shākiriyah cited by Ibn Ḥazm, Nāṣr al-sā‘ūr, 76; see Colín, in Hespéris [1936], 122; Brēthes, 96, no. 773; Jacques-Meunier, i, 226). The Fātimid Caliph al-Muṣṭaṣ li-din Allāh, unable to bear such a mark of insubordination, ordered the general Dāwwar [q.e.] to go and force the recalcitrant prince to see reason. According to the Shi‘i tradition (MadāṣÌ, 338), Dāwwar, on arriving near Sidjīlmāsa,
wrote to the population asking them to surrender Ibn Wâsûl, but they refused. This attitude did nothing to relieve the anxiety of the amîr, who hastened to leave the town with his family, his treasures and supporters to go to seek refuge in the neighbouring fortress of Tastegeldt (?). Dîwâr then entered the Midrârîd's capital, where he had coined money to replace the mablûkût shâ’âriyya (Dachraoui, Califat, 232, 344). Ibn Wâsûl, having left his refuge to find out what was happening in the town, was recognised by some members of the Maghâra [q.v.] tribe, who gave him up to Dîwâr (on these events, see al-Bakrî, 151/289; Berbîrî, i, 264; Jacques-Meunier, i, 203). Contrary to what is said in the text, gjawhâr, Ibn Wâsûl was not put to death, but made a prisoner (Mafdkhir al-Barbar, 4) and brought to al-Mansûrîyya, together with the amîr of Fâs, Aḥmad b. Bakrî, captured in the same period, and some sons of notable of Sidjelmasa (Magdâlîs, 483) taken as hostages. The attack on the town and the capture of Ibn Wâsûl took place in Rajab, 193/September-October, 358 (al-Bakrî, 151/289). The arrival at al-Mansûrîyya is dated by the kâdid al-Nu’âmân (Magdâlîs, 458) to the end of Sha’âban [348?] /November 959, but the dates mentioned by this author do not always appear to be exact. In any case, we are quite well informed on the prisoner's stay with the Fatimid caliph, on his internment in a part of the castle (mâkîf al-kâbî), on the ignominious treatment that he experienced when he was taken around in a cage, and also on the kâdit's attempts to convert him, as well as on the tenor of the conversations that took place between al-Mu’tizz and Ibn Wâsûl (see Magdâlîs, 411-12, 434-5, 458, 460; Ibn ‘Idhârî, i, 222; Berbîrî, i, 263; Ibn al-Âthlr, vi, 354; Dachraoui, Captivité).

Before leaving Sidjelmasa, Dîwâr had appointed a governor there, but the population were not slow to rebel again and to restore to the throne ix (for the second time). Al-Muntasir b. lâlîh b. (viii) Muhammad b. (vii) al-Mu’tazz, whose father and grandfather had not been appointed by the Fâtimid caliph, as al-Nu’âmân (Magdâlîs, 388) claims, but put in power by Maśâla (see above). According to the same author (Magdâlîs, 389-93), the population, who had killed the governor imposed by Dîwâr, made their excuses to al-Mu’tizz, but he did not accept them at all and summoned al-Muntasir, who made his way to him with 200 men. After a severe reprimand, the caliph nevertheless sent him to govern his town. In 352/963, al-Muntsar was dethroned and, according to Ibn Hawkâl (107/194), put to death, with the help of a group of twelve men, by his brother xi. Aḥî Muhammad ˚Ard Allâh (?) b. (viii) Muhammad b. (vii) al-Mu’tâzz, who recognised the suzerainty of the Fâtitmid caliph. This situation lasted until the year 366/976-7, when the chief of the Maghrâwâ, Khazru’un b. Falêfûl [see Maghrâwâ], who fought on behalf of Cordova, put an end to the dynasty of the Banû Midrâr, the last prince still in power fell on the battlefield, and his head was sent to Cordova (Berbîrî, i, 264-5; Terrasse, i, 169; Jacques-Meunier, i, 206). Lêvi Provincial (Histo. Egl. mus., ii, 261), this place is event in 369/980, which corresponds to the total of 160 years proposed by al-Bakrî for the duration of the dynasty.

The descendants of Khazru’un were to be put under the suzerainty of Cordova, to remain then at the head of an independent principality in Arcos [see Arakbî] until its annexion by Sevilla.

We have seen that one observer interested in the social and economic situation of the land through which he travelled, Ibn Hawkâl, was in 340/951 in Sidjelmasa, and it is probable that he kept in touch with the course of events that then took place. He states (99-100/98; cf. Jacques-Meunier, i, 203) that in the period when (vii) al-Mu’tazz reigned over the principality, he "leased caravans to the country of the Blacks, as well as the tithe, the land tax and some ancient taxes on the sale and purchase of camels, sheep, cattle, in addition to duties on all merchandise being exported to or imported from Ifrikia, Fâs, Spain, Sûs and Aghmâ, and finally other revenues dependent on the administration of the estate. All this amounted to about 40,000 dinars for the capital and the province". According to this author, the revenue from the town and its province, an area of five days' journey by three, was equal to half of that of the whole Maghrib, and one can understand the interest that the great powers of the period took in the principality. The importance that Ibn Hawkâl attributes to the town itself is further reflected by the fact that he calculates the distances from it to other places (91-3-92). He poses very favourable judgment on the inhabitants, upon whose commercial activity and wealth he remarks (99-100/97-8), and he is astonished to see "a recognition of debt by which a merchant of Awdaghust admitted himself in debt to an inhabitant of Sidjelmasa for a sum of 42,000 dinars" (cf. 61/58, where this observation is already mentioned). Reckoning on this sum, he would weigh 170,520 kg (Jacques-Meunier, i, 224). One can deduce from the comments of Ibn Hawkâl that Sidjelmasa was, under the Midrâris, the most important caravan centre on the route passing round the desert through the West; the ruler of Egypt, Ibn Tulûn (249/649-863/957 [q.v.]) having forbidden caravans and single travellers to follow the routes which led directly to the western Sudan, the eastern merchants passed by Sidjelmasa, which also benefited from the advantages of eastern and western civilisation, without however leaving behind, at least in this period, the recollection of a really intense cultural activity.

which was directed against the Arab governor of the Maghrib, Umar b. Hafs. Among the Berber groups taking part in this revolt, one of the most important was that of Abū Kūra al-Ḥarrānī, at the head of 40,000 Sufris belonging, for the most part, to the Zanātī tribe of the Banū Ḥarrān. The last-named inhabited the western part of Algeria. Originating from the same region were the 6,000 Ibadīs commanded by 'Abd al-Raḥmān b. Rustam of Tāhert (Ṭieret) who were among the groups fighting Umar b. Hafs. Also belonging to these troops were Al-Mawār b. Hānī, another Ibadī chieftain with a force of 6,000 Sufris, and 'Abd al-Malīk b. Saqādīd al-Sanāḥādī, who brought his 2,000 Sufris into this coalition. All these detachments laid siege to Umar b. Hafs at his headquarters in the town of Tūbān. Joining the Berber rebels at a later stage was Abū Ḥātim al-Malzuẓī [q.v.], leader of the Ibadīs of Tripoli. The latter succeeded in capturing the town of Tūbān in 154/771, subsequently setting out in pursuit of Umar b. Hafs Hāzāmārī, who made his way towards the east. Abū Ḥātim was preceded by an advance party commanded by Dijarī b. Maṣūd al-Midyānī. The latter caught up with Umar b. Hafs at Dijīdīl (the present-day Djedjelli) in the land of the Ketāmā; in the ensuing battle, Dijarī b. Maṣūd and his partisans perished, and Abū Ḥātim al-Malzuẓī retreated to Tripoli.

Despite the defeat of Dijarī b. Maṣūd in 771/1371 and the emigration of a large proportion of the Midyānī of Morocco to Spain with the troops of Tārīk b. Ziyād in 90/270-11, numerous sections of this tribe survived in North Africa, at least until the 8th/14th century, if not later.

The following is the information provided by Arab authors of the Middle Ages regarding these sections: Morocco: Mention has been made above of the significant group of newly Islamized Midyānī who, taking part in the conquest of Spain by Tārīk b. Ziyād in 92/271-11, settled in south-eastern Spain. It is probable that the Midyānī who inhabited the Dijābal Midyānī, a mountain situated to the south of Fās, between this city and that of Sufri [q.v., present-day Sefrou], and are mentioned by al-Bakrī (5th/11th century), belonged to the same clan. Dijarī b. Maṣūd [q.v.], 8th/14th century mentions in his geographical work Dijābal Midyānī situated to the east of Fās. Could this be the same place as the Dijābal Midyānī situated between Fās and Sefrou? These Midyānī of the region of Fās are also mentioned by Ibn Khāldūn among numerous other Berber tribes of the Maghrib al-Asghār (the Bahlūla, the Fazāz, the Ghīyāḥa, etc.) as professing Judaism at the beginning of the 3rd/9th century. Later, they converted to Islam, accepting Sufi doctrines at a very early stage. In the second half of this century, during the reign of 'Alī b. Umar, the Idrīsī prince of Fās, a Khārdīl Sufi named 'Abd al-Razzāk, a native of the town of Washka [q.v., i.e. Huesca] situated in the north-east of Muslim Spain, settled among the Sufri Midyānī inhabiting the mountain of this name to the south of Fās. There he gained numerous partisans. He had counted for his cause numerous neighbouring Berber tribes, for example the Ghīyāḥa. He had also constructed on the mountain of Sāla in the territory of the Midyānī (to the south of Fās) a powerful stronghold, to which he gave the name of Washka, in memory of his native city in Spain. According to the author of the Kirtās (8th/14th century), this castle was still in existence in 726/1325-6. Subsequently, 'Abd al-Razzāk rebelled against 'Alī b. Umar. After a number of battles with this prince, he inflicted a decisive victory on him and
forced him to abandon the city of Fas and to take refuge in the territory of the Berber tribe of the Arwabra, the tribe most loyal to the Idrisids. The inhabitants of the Andalus quarter of Fas submitted to 'Abd ar-Razzāk, but this family lived for some time in the Maghrib al-Aṣṣā and governed, in all probability, the Midyūna of the region of Fas.

If Ibn Khaldūn is to be believed, the Midyūna of the region of Fas rebelled, in 614-20/1217-23, against the Marinid prince 'Abd ʿUdām Saʿīd, but they were soon defeated by the Marinids and pledged allegiance to this dynasty.

Besides this fact, nothing definite is known concerning the history of this section of the Midyūna living between Fas and Sefrou, at least as regards the 4th-8th/10th-14th centuries. The last item of information available concerning the Moroccan Midyūna dates from the time of Ibn Khaldūn, who mentions a section of this tribe, still present between Fas and Sefrou, in the vicinity of the important Berber tribe of the Maghūla [p.e.] and under its protection.

Al-ʾArabia: According to Ibn Khaldūn, the original homeland of the Midyūna was located in the central Maghrib, in the province of Tiλīmān (Tlemcen). The Midyūna occupied the portion of territory which extends from the Djabal Bāni Rashīd (currently Djebel Amour), in the south-east of the High Plateau region, the east of Geryville and north-west of Laghouat, as far as the mountain which stands to the south of Ouedja (west-south-west of Tlemcen) and which still bears the name of Djebel Midioouna. In this early period, that is before the conquest of the central Maghrib by the Banū tribes of the Banū Tuqūn and the Banū Rashīd, the Midyūna of this part of the Maghrib roamed, in nomadic fashion, "the plains of Ibn Khaldūn. It was located in the canton of Yefren (in the ancient Arab sources: Yafran) situated to the east of Djabal Naftūs in northern Tripolitanian. In fact, in his Kitāb al-Siyar, al-ʾShāmīḫkāh speaks of people belonging to the tribe of the Midyūna inhabiting this district in the Middle Ages. Among these people, al-ʾShāmīḫkāh mentions an ʾIbāḥī scholar named ʾIsā b. Hamdūn al-Midyūnī al-Hawwārī who lived, during the 5th/11th century, in the ibīdīa (desert) of this country. It seems that this section of Midyūna belonged to the major Berber tribe of Hawwārī [p.e.].

Libya: A section of the tribe of the Midyūna also lived in the canto of Tifern (in the ancient Arab sources: Yafran) situated to the east of Djabal Naftūs in northern Tripolitanian. In fact, in his Kitāb al-Siyar, al-ʾShāmīḫkāh speaks of people belonging to the tribe of the Midyūna living in this district during the Middle Ages. Among these people, al-ʾShāmīḫkāh mentions an ʾIbāḥī scholar named ʾIsā b. Hamdūn al-Midyūnī al-Hawwārī who lived, during the 5th/11th century, in the ibīdīa (desert) of this country. It seems that this section of Midyūna belonged to the major Berber tribe of Hawwārī [p.e.].

Spain: It has been noted above that a large number of the Midyūna entered Spain at the time of the first Muslim invasion of Spain led by the Berber Tārik b. Ziyād in 92/711. Becoming very powerful and very numerous, the Midyūna of Spain enjoyed considerable influence there and, in 151/768, a group from this tribe embraced the cause of the Berber pretender Shākiyā al-Mīnkāšī who claimed to be the grandson of Ḥusayn b. ʿĀlī. In fact, one of the Midyūna amīrs of Spain named Ḥilāl b. Abziya rose in rebellion at Shantamariyāt al-Shārīk (Santa Maria de la Antigua or Albarracín) against the Umayyad ʿAbd al-Rahmān al-Đâkhib. After the death of Shākiyā, whose revolt lasted nine years, Ḥilāl b. Abziya pledged submission to ʿAbd al-Rahmān al-Đâkhib and obtained from this amīr a commission appointing him chief of the Midyūna of Spain. His power extended over the Berbers established in eastern Spain and in Santa Maria or Albarracín. He was succeeded by Nabīth, one of his kinsmen.

Sicily: A section of the Midyūna settled, probably in the 3rd/9th century, on the banks of the river called Selīnu in antiquity in south-western Sicily. In fact, this river was later known as Modirīn, from the ancient tribal name Midyūna or Midyūna. The relevant group here is probably that section of the tribe of the Midyūna which was formerly resident in Idrīšiya and which took part in the conquest of Sicily undertaken in 118/826 by the kādī Asad b. Ṭurāt b. Sinān. Initially ʾIbāḥīs, these Midyūna were subsequently converted to orthodox doctrines after the death of the ʾImām Abā Ḥātim al-Malzuṭī.
